INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: BUTTE INCIDENT CA-AEU-024918	2. Operational Period: Date From: 09/27/2015 Date To: 09/28/2015 Time From: 0700 hours Time To: 0700 hours						
3. Objective(s): <u>Management Objectives</u> <ul style="list-style-type: none"> • Provide for public and emergency personnel safety at all times • Provide for timely and accurate release of incident information to the public, media, first responders and cooperators • Protect and defend structures and improvements in the fire area • Protect natural and cultural resources in the fire area • Provide a process to manage emergency resources efficiently • Ensure costs are minimized appropriately for values at risk • Ensure coordination and communication with stakeholders and cooperating agencies <u>Control Objectives</u> <ul style="list-style-type: none"> • Keep the fire: <ol style="list-style-type: none"> 1. North of the Esmerelda Road 2. South of Highway 88 3. East of Highway 49 4. West of secondary containment lines, Railroad Flat Rd., Summit Level Rd., Forest Service Road 5N52 and Sheep Ranch Rd 							
4. General Weather Conditions: SEE ATTACHED							
General Situational Awareness and Safety: <ul style="list-style-type: none"> • MAINTAIN L.C.E.S. AT ALL TIMES. Safety zones and escape routes are mandatory • Ensure all personnel maintain situational awareness • Rolling material and steep terrain. Remember to maintain good footing • Keep your hydration up by drinking water and electrolyte beverages. Avoid energy drinks • Maintain good communications with your supervisors, adjacent forces and crew members • Maintain awareness of fire weakened trees, ash pits, and burned-out stump holes. 							
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Approved Site Safety Plan(s) Located at:							
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

Spot Forecast for Butte Incident Fire

National Weather Service Sacramento

321 PM PDT Sat Sep 26 2015

IF CONDITIONS BECOME UNREPRESENTATIVE,
CONTACT THE NATIONAL WEATHER SERVICE.

SPOT FORECAST FOR BUTTE INCIDENT...CALFIRE IMT 1
NATIONAL WEATHER SERVICE SACRAMENTO CA
321 PM PDT SAT SEP 26 2015

FORECAST IS BASED ON REQUEST TIME OF 0728 PDT ON SEPTEMBER 26.
IF CONDITIONS BECOME UNREPRESENTATIVE...CONTACT THE NATIONAL WEATHER
SERVICE.

.DISCUSSION...

HIGH PRESSURE OVER THE REGION WILL CONTINUE TO BRING ABOVE NORMAL
TEMPERATURES AND DRY WEATHER THROUGH THE WEEKEND. HUMIDITY
RECOVERY SHOULD IMPROVE SLIGHTLY SUNDAY NIGHT. MORE SIGNIFICANT
COOLING AND INCREASING HUMIDITY LEVELS EXPECTED MONDAY AND
TUESDAY AS A LOW PRESSURE SYSTEM APPROACHES ALONG THE COAST.

.SUNDAY...

SKY/WEATHER.....MOSTLY SUNNY.
MAX TEMPERATURE.....85-90.
MIN HUMIDITY.....17-24 PERCENT.
WIND (20 FT).....

SLOPE/VALLEY.....EAST WINDS 3 TO 6 MPH SHIFTING TO THE
UPSLOPE 4 TO 7 MPH IN THE AFTERNOON.

RIDGETOP.....NORTHEAST 4 TO 7 MPH BECOMING SOUTHWEST 5 TO 10
MPH
WITH GUSTS TO 16 MPH IN THE AFTERNOON.

CWR.....0 PERCENT.

LAL.....1.

MIXING HEIGHT.....200-300 FT AGL INCREASING TO 7000 FT AGL BY
AROUND NOON.

TRANSPORT WINDS.....SOUTHWEST 6 TO 12 MPH.

.SUNDAY NIGHT...

SKY/WEATHER.....MOSTLY CLEAR.

MIN TEMPERATURE.....60-66.

MAX HUMIDITY.....47-59 PERCENT.

WIND (20 FT).....

SLOPE/VALLEY.....DOWNSLOPE WINDS 3 TO 6 MPH.

RIDGETOP.....SOUTHWEST 5 TO 10 MPH IN THE EARLY EVENING
BECOMING EAST 4 TO 8 MPH AFTER MIDNIGHT.
AFTER MIDNIGHT.

CWR.....0 PERCENT.

LAL.....1.

MIXING HEIGHT.....7000 FT AGL DECREASING TO 300 FT AGL EARLY
IN THE EVENING.

TRANSPORT WINDS.....SOUTHWEST 7 TO 14 MPH BECOMING EAST 4 TO 8 MPH.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 16	TYPE OF FIRE: Wildfire
FIRE NAME: Butte	OPERATIONAL PERIOD: 9/26-10/2/15 0700-0700
DATE ISSUED: 9/24/15	TIME ISSUED: 1900
UNIT: AEU – Amador El Dorado Unit	SIGNED: _____ Typed/printed: Don Watt FBAN

INPUTS

WEATHER SUMMARY:

See spot weather forecast for weather information.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The recovery overnight for the fuels has been limited for a week and will continue in this pattern. The fine dead fuels are highly receptive and will ignite when embers land, even in the overnight hours. The fire has been inactive for several days and is limited to smoldering material. This can change over time as the root system of the trees continues to burn underground. There is the possibility for these smoldering items to surface and find unburned vegetation. This situation would most likely be near the edges of the islands. The vegetation in the islands will continue to lose leaves and needles creating a new ground layer of unburned fuels. Fire in the islands will consist mainly of surface fire unless there is sufficient ground fuel to sustain enough heat to ignite the overstory. Spotting and increased rate of spread will only be seen in established fires with a developed column. A new start will have a slow spread unless there is slope and wind alignment which will increase the spread and spotting distance.

CSR 7 Day Outlook

CNR 7 Day Outlook

SPECIFIC:

Division E will continue to have smoldering material with some actively burning heavy fuels. The access into this area will make extinguishment difficult. Watch for rolling material as the heavy fuels continue to burn and become unstable. Fire and drought stressed trees will continue to fall in all areas of the fire, especially during high gusts of wind. Continue to recheck areas worked the previous day as the root systems will continue to burn unseen for many days. If you observe any embers from active fire traveling towards unburned fuels watch where they land as they most likely will start a new fire.

AIR OPERATIONS

There should be no issues for aircraft under the current weather and fire conditions.

SAFETY

Watch for stump holes and ash pits. Root systems have had several days to burn leaving a potential for the ground to break loose around the edges. Continually look up and watch for widow makers and hazard trees.

SAFETY MESSAGE/PLAN (ICS 208)

1. Incident Name:

BUTTE INCIDENT CA-AEU-024918

2. Operational Period: Date From: 09/26/2015

Date To: 09/27/2015

Time From: 0700

Time To: 0700

3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan:

MAJOR HAZARDS/RISKS

PERSONAL PROTECTIVE EQUIPMENT: While engaged in firefighting activities, including mop up, **Full PPE and Webb Gear** shall be worn.

ASH PITS and STUMP HOLES: Beware of hazards throughout the fire area. Maintain solid footing and plan your work. Maintain situational awareness.

HAZARD TREES & SNAGS: Use caution when working around fire weakened & drought stressed trees. Share information. Identify & flag hazards with **LIFE SAFETY FLAGGING**.

STEEP TERRAIN and LOOSE FOOTING: Plan your work and maintain LCES at all times. Have a plan for the removal of injured or ill personnel from steep and limited access areas. Communicate your plan. Wear proper PPE.

DEHYDRATION: Drink water and sport drinks. Ensure personnel carry enough water for work shift. Monitor and support personnel needs. Multiple hot work days in a row increase your risk.

DRIVING HAZARDS: Use defensive driving. **SLOW DOWN** in the field and in base camp. Beware of other driver's actions. Avoid roadway and driving complacency.

MASTICATORS, CHIPPERS, and other HEAVY EQUIPMENT: Maintain safe distances when working near heavy equipment. Beware of flying debris. Maintain communications with operators and personnel.

TREE FELLING, UTILITY POLES, UTILITY LINES: **Assume all utility lines are live.** Communicate with adjacent fire and utility personnel that are felling trees or utility poles. Maintain safe distances from falling hazards.

DEMOBILIZATION: Travel safely to your home base or next assignment. Get proper rest and have a travel and communications plan. Ensure your equipment is accounted for and ready for inspection.

MINE SHAFTS and other MINING HAZARDS: All hazardous areas may not be identified or marked. Flag mine shafts and other hazards when found. Beware of shafts hidden in brush and debris.

FATIGUE: Ensure adequate work to rest ratio. For 12 hour resources, consider long travel time to rest accommodations. Supervisors should adjust work times accordingly.

4. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located At: NA

Latitude

N

Longitude

W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

FINANCE MESSAGE

TIME & COMP CLAIMS UNIT

- As of Monday afternoon the Equipment and Comp / Claims Units will be moving **Murphy Suites** Located at 134 Hwy. 4 Murphy, CA. A State Purchasing Specialist will be available. They will be available late Monday afternoon through late Wednesday afternoon and may extended if warranted.
- The rest of the Finance Section will be relocating to the **Ranch Cordova Training Center** located at 2941 Sunrise Blvd #280. Rancho Cordova

If have any questions feel free to contact any of the Finance Section Chiefs

Rich Browne (FSC1) 559-799-2470
Abby O'Leary (FSC1) 619-838-9861

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

Butte Fire

CA-AEU-024918

Documentation Message

DATE: 9-27-15

Please remember to turn in ICS 214's (Unit Logs) on a regular bases, and prior to demobing.

- ICS 214's are required to be filled out by Strike Team Leaders and above; however, crews, overhead, engine companies, and contractors may need to fill out ICS 214's if a significant event has occurred requiring documentation.
- Ensure they are signed and dated, and include the operational period.
- Please turn in your original copies only.

Please submit your ICS 225's (performance evaluations) prior to demobing.

- Evaluations are sent to your home unit or business office; therefore it is imperative to include your home unit or business name and address on your ICS 225's.

Documentation is located in the "Frogateria" next to Check In.

Thank you for your help and cooperation.

Butte Fire -Fire Suppression Repair

Roads

- Install waterbars where waterbars previously existed.
- Install waterbars where needed based on guidelines.
- Install or maintain rolling dips where a rolling dip previously existed.
- Install or maintain existing berms where applicable.
- Clean culverts plugged with soil and rock resulting from fire suppression actions.
- Remove all slash and debris from culvert inlets/outlets resulting from suppression actions.
- Clean and grade ditch lines and lead off ditches as necessary.
- Water roads for dust abatement.

Hand Lines, Dozer Lines, and Safety Zones

- Install waterbars as described in the guidelines below. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment. Direct waterbars into “green” vegetation whenever possible.

Waterbar Guidelines:

These spacing distances should be used as a **guide**. Judgment should be used in locating waterbars to minimize erosion potential. It may not be possible or necessary to place waterbars in steep or rocky areas. Install waterbars at the following recommended **minimum** intervals:

Fireline Gradient (% slope)	Minimum Distance between Waterbars (feet)
0 to 10	200
11 to 25	100
25+	50

- Remove sediment from watercourse crossing locations and stabilize watercourse crossing approaches with straw or scattered brush where necessary.
- Contour rip wide dozer lines where gradients exceed 20%. (National Forest Lands Only)

Brush Piles/ Wind Rows

- Scatter, lop, crush, or masticate brush piles or wind rows within 100 feet of residences, public roads, or along identified strategic fuel breaks.
- Move whole trees to roadside edge of fire line. Delimb whole trees to provide ground cover. (National Forest Lands Only).
- In sensitive areas where vegetation ground cover is below 50%, add wood straw. (National Forest Lands Only)

Sensitive Areas (National Forest Lands Only)

- Minimize further damage Cultural/Historic resources by avoiding areas that have been flagged with sensitive resource flagging (yellow and black checker).
 - Contact Resource Advisor before proceeding with work in these areas.
- Minimize further spread of noxious weeds by avoiding areas that have been flagged with orange flagging with Noxious Weed writing with equipment and rehabilitation activities.
 - Contact Resource Advisor before proceeding with work in these areas.

Stream Channels (National Forest Lands Only)

- Remove all material used to construct diversions or impoundments.
- Block access to stream channels where not previously accessible from roads, or trails; use slash and make natural appearing.
- If dirt was pushed into stream channels, pull dirt back at least 50 feet from stream banks.
- Do not disturb stream bottom and stream bank.

Fences

- Repair fences damaged during fire suppression operations.

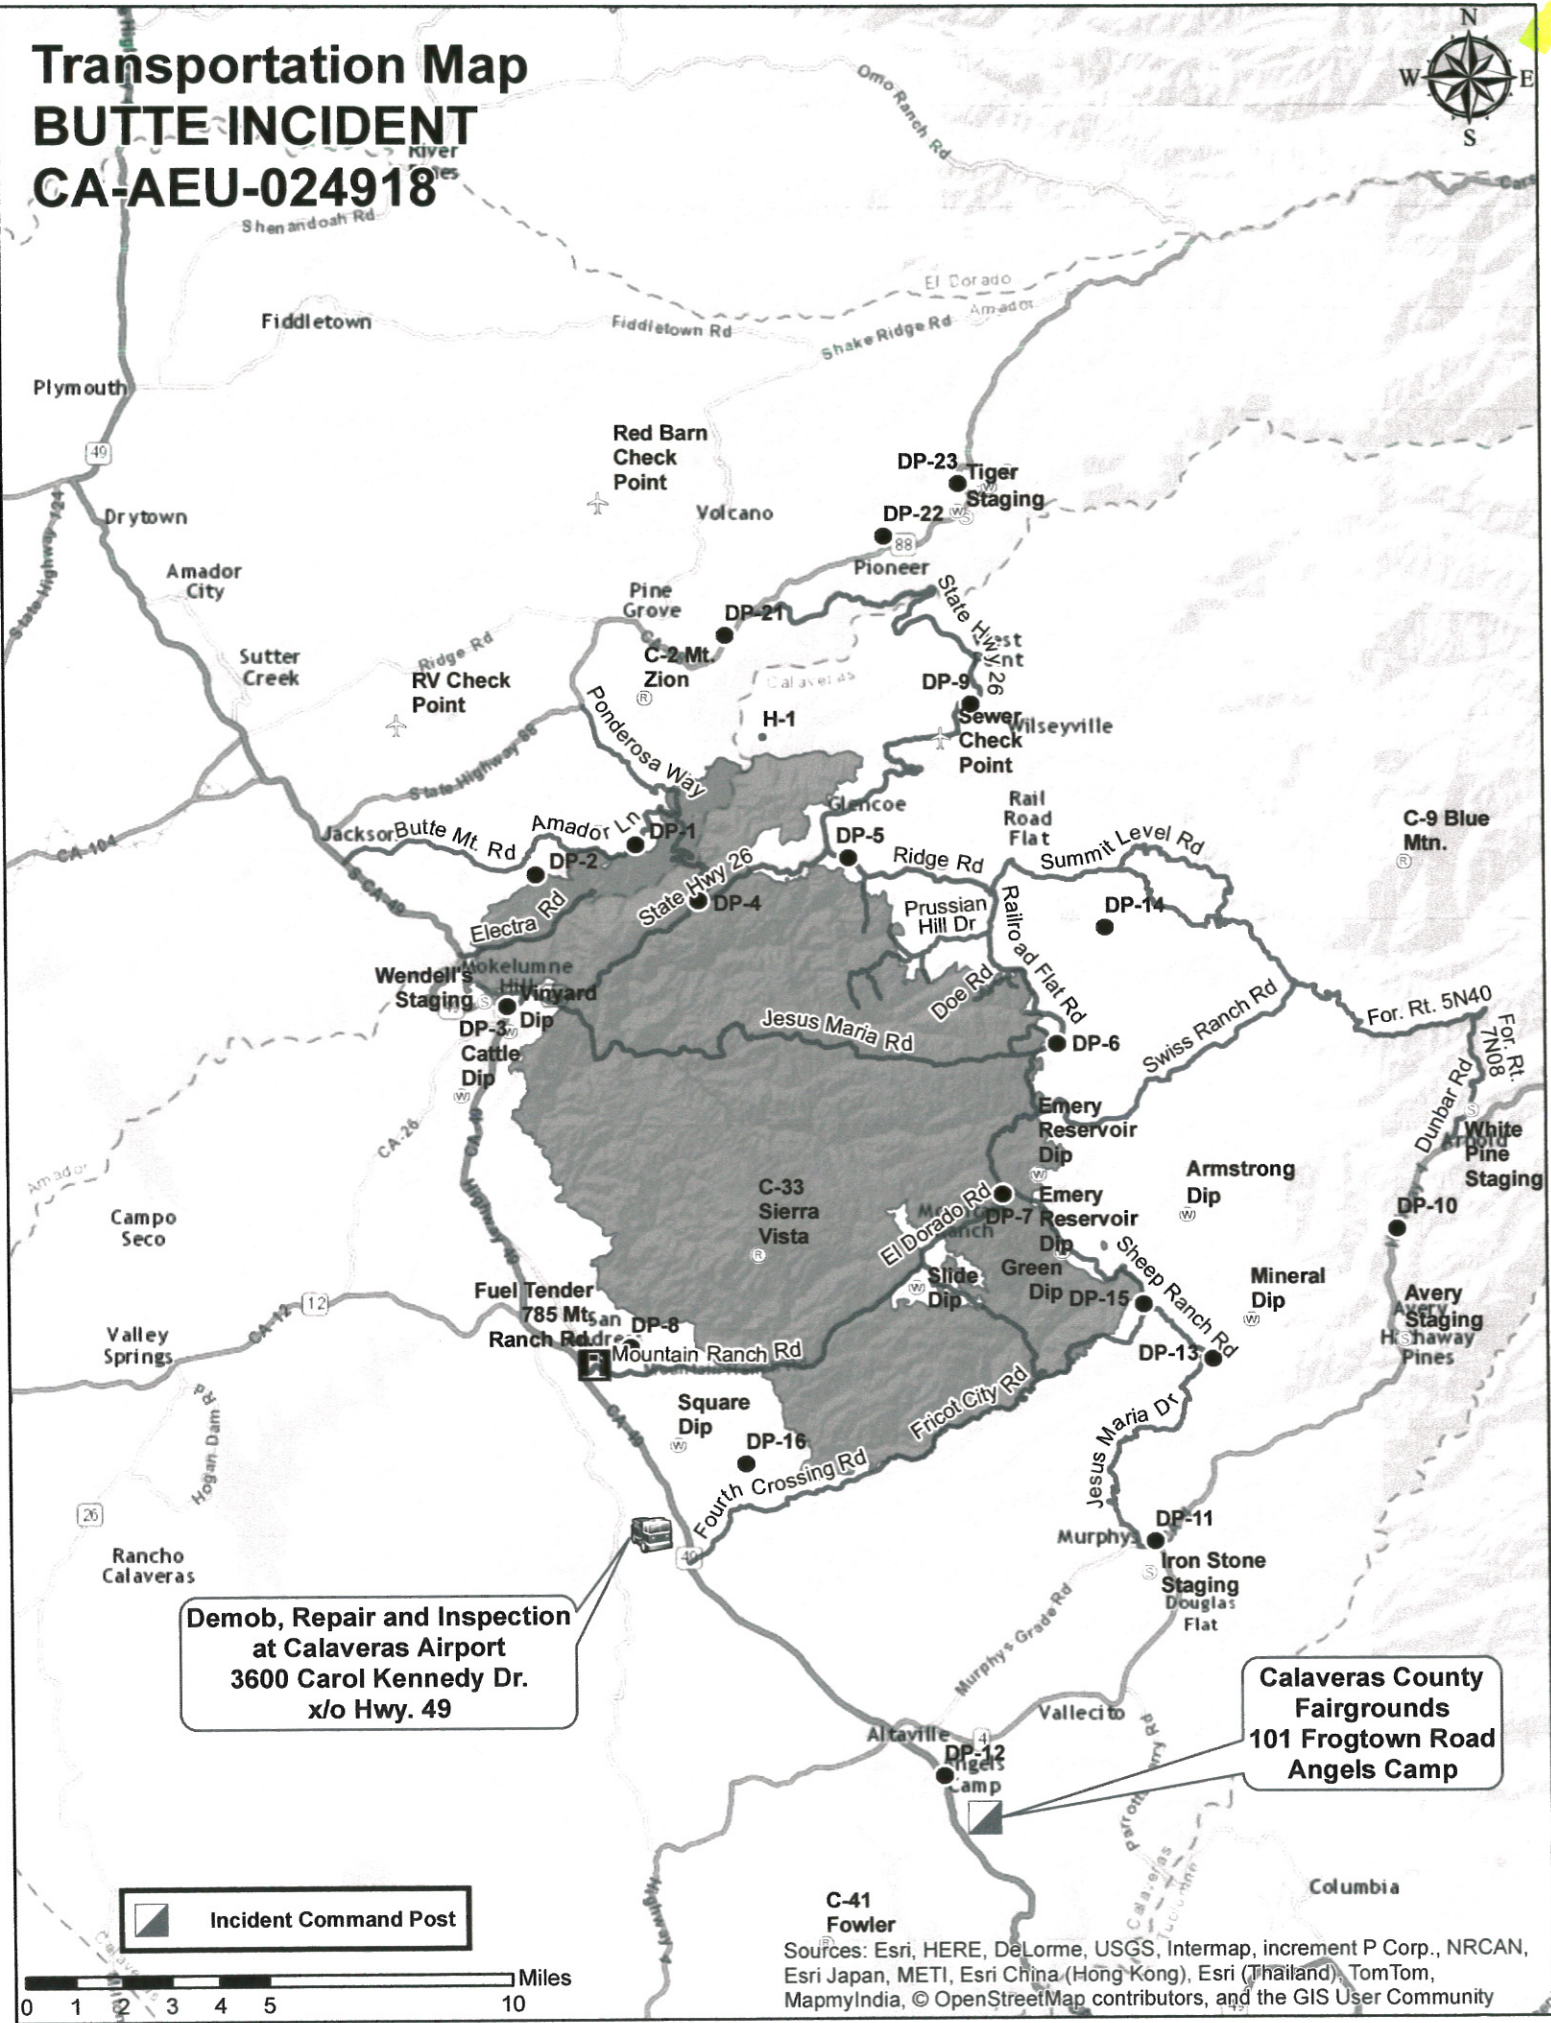

Damaged Property

- Report damaged property to the comp claims unit.
