## **Incident Status Summary (ICS-209)**

Incident: LUMPKIN

### Fire activity significantly decreased with the cooler weather. Potential remains with the upcoming weather change.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Grass and Understory) Chaparral (6 feet)

Narrative:

Lower elevation brush; higher elevation conifer

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: Hold and improve containment line.

24 hours: Mop up 200' interior. Assess fire suppression repair needs.

48 hours: Continue mop up. Implement fire suppression repair, as needed.

72 hours: Continue mop up, as warranted. Continue fire suppression repair, as needed.

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Full suppression of the fire, utilizing direct attack where safe and feasible.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

Fire currently threatens the Communities of Robinson Mill, Forbestown, and Feather Falls. Threats exist to commercial timber, PG&E, natural and cultural resources, watershed, water conveyance to City of Oroville, & South Feather Water & Power.

12 hours:

Signifigant progress in dozer and handline construction. Working towards holding the established containment line(s). Fire increased in size moderatley last night.

Fire threat to Forbestown will diminish with completion of mop up. Fire will continue to threaten commercial 24 hours: timber, PG&E, natural and cultural resources, watershed, water conveyance to City of Oroville, & South Feather Water & Power.

Fire threat to Forbestown will diminish with completion of mop up. Fire will continue to threaten commercial 48 hours: timber, PG&E, natural and cultural resources, watershed, water conveyance to City of Oroville, & South Feather Water & Power.

Fire threat to Forbestown, Feather Falls, and Robinson Mill will diminish with completion of mop up. Fire will 72 hours: continue to threaten commercial timber, PG&E, natural and cultural resources, watershed, water conveyance to City of Oroville, & South Feather Water & Power.

Anticipated after 72 hours:

### **Incident Status Summary (ICS-209)**

#### Incident: LUMPKIN

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

12 hours: None 24 hours: None 48 hours: None 72 hours: None

Anticipated after 72 hours:

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

Steep terrain, difficult access, and spotting are the primary challenges. The potential to spot across South Fork Feather River and protection of communities and infrastructure remain the highest priority. Suppression efforts are being devised with protection of critical infrastructure in mind, such as the water conveyance system for the City of Oroville and PG&E transmission lines. The strategy is to minimize acreage with direct attack, where safe and feasible.

41. Planned Actions for Next Operational Period:

Direct attack, flanking action. The target area is the NE shoulder by Powerhouse Rd, to mitigate the potential for spotting across the South Fork Feather River. Hold and improve line. Begin mop up.

- 42. Projected Final Incident Size/Area (use unit label e.g., "Acres", "Square Miles"): 1,000
- 43. Anticipated Incident Containment or Completion Date: 09/18/2015
- 44. Projected Significant Resource Demobilization Start Date: 09/21/2015
- 45. Estimated Incident Costs to Date: \$2,546,626.00
- 46. Projected Final Incident Cost Estimate: \$10,000,000.00
- 47. Remarks (or continuation of any blocks above list block number in notation):

Mandatory evacuation remains in effect for Ponderosa Way from Lower Forbestown Rd to Ponderosa Reservoir/S. Fork Feather River, and for Broken Springs Rd. Evacuation warning exists for Forbestown Rd to New York Flats and Lumpkin Rd to Boat Launch.

A hard road closure remains in effect for Ponderosa Way from Lower Forbestown Rd to Ponderosa Reservoir/S. Fork Feather River.

- 49. Resources (summarize resources by category, kind, and/or type; show # of resources on top ½ of box, show # of personnel associated with resource on bottom ½ of box):
- 53. Additional Cooperating and Assisting Organizations Not Listed Above:

Butte County Sheriff, Butte County Fire, CHP, Department of Parks and Recreation, PG&E, CDCR, USFS, Local Tribes, South Feather Water And Power, CCC
