## Incident Status Summary (ICS-209)

Incident: LUMPKIN

**Fire growth is minimal, with the fire continuing to back to the South Fork Feather River. Potential remains high, with very gusty conditions and the incoming change in weather.**

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Grass and Understory)  
Chaparral (6 feet)

Narrative:

**Brush lower elevation; conifer higher elevation**

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc): <b>Threat has been mitigated for Sunset Lookout Tower, PG&amp;E Transmission Lines, South Feather Water and Power, water conveyance for City of Oroville, natural and cultural resources, &amp; commercial timberland. 36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **Mop up 200' interior. Assess fire suppression repair needs.**

24 hours: **Continue mop up. Assess fire suppression repair's ability for implementation, due to steep, slippery roads.**

48 hours: **Continue mop up. Implement fire suppression repair plan.**

72 hours: **Continue mop up, as warranted. Continue fire suppression repair implementation.**

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

**Full suppression of the fire, completion of fire suppression repair.**

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

**Fire threat has been mitigated for the Communities of Robinson Mill, Forbestown, and Feather Falls, as well as the threats to commercial timber, PG&E, natural and cultural resources, watershed, water conveyance to City of Oroville, & South Feather Water & Power.**

12 hours:

**Significant progress in dozer and handline construction. Working towards holding the established containment line. Fire increased in size moderateley last night.**

24 hours:

**Fire may threaten commercial timber, PG&E, natural and cultural resources, watershed, water conveyance to City of Oroville, & South Feather Water & Power.**

48 hours:

**With the impending change in weather, the fire may threaten commercial timber, PG&E, natural and cultural resources, watershed, water conveyance to City of Oroville, & South Feather Water & Power.**

72 hours:

**With the impending change in weather, the fire may threaten commercial timber, PG&E, natural and cultural resources, watershed, water conveyance to City of Oroville, & South Feather Water & Power.**

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List

44. Projected Significant Resource Demobilization Start Date: 09/18/2015

45. Estimated Incident Costs to Date: \$3,544,095.00

46. Projected Final Incident Cost Estimate: \$10,000,000.00

47. Remarks (or continuation of any blocks above – list block number in notation):

All evacuation orders and warnings have been lifted for the incident.

Ponderosa Way is open to local traffic only, from Lower Forbestown Rd to Ponderosa Reservoir/S. Fork Feather River.

While the percent containment significantly increased due to the favorable conditions, the incident is preparing for the impending weather change.

## Incident Status Summary (ICS-209)

Incident: LUMPKIN

resource category, kind, and/or type, and amount needed, in priority order:

12 hours: **None**

24 hours: **Chipper Module**

48 hours: **Grader, 2 Type II Excavators with thumbs**

72 hours: **None**

Anticipated after 72 hours:

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:

- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.

Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.

**Steep terrain, difficult access, and wind gusts are the primary challenges. The potential to spot across South Fork Feather River and protection of communities and infrastructure remain the highest priority. Suppression efforts are being implemented with protection of critical infrastructure in mind, such as the water conveyance system for the City of Oroville and PG&E transmission lines. The strategy is to keep the fire within the existing perimeter by holding existing line and mopping up interior. While the percent containment significantly increased due to the favorable conditions, the incident is preparing for the impending weather change.**

41. Planned Actions for Next Operational Period:

**Hold and improve line; begin mop up. Assess ability to begin fire suppression repair, due to steep, slippery roads. Extract 2 burned dozers.**

42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”): **1,042**

43. Anticipated Incident Containment or Completion Date: **09/18/2015**
