Incident: LUMPKIN

No fire growth.

29. Primary Fuel Model, Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc):

Timber (Grass and Understory)

Chaparral (6 feet)

Narrative:

brush lower elevations; conifer higher elevations

30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc):

Although the threat has been mitigated for Sunset Lookout Tower, PG&E Transmission Lines, South Feather Water and Power, water conveyance for City of Oroville, natural and cultural resources, & commercial timberland, the upcoming change in weather remains a concern.

33. Life, Safety, and Health Status/Threat Remarks:

Primary threats are high humidity, wind, steep terrain, and rolling material. Impending weather change will lead to high heat, as well.

35. Weather Concerns (synopsis of current and predicted weather; discuss related factors that may cause concern):

Warmer and drier weather is forecast for Thursday and Friday.

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour time frames:

12 hours: **Mop up 300' interior. Assess fire suppression repair's ability for implementation, due to steep, slippery roads.**

24 hours: **Continue mop up. Assess fire suppression repair's ability for implementation, due to steep, slippery roads.**

48 hours: **Continue mop up. Implement fire suppression repair plan.**

72 hours: **Mop up and patrol. Complete fire suppression repair.**

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Full suppression of the fire, completion of fire suppression repair.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: **Fire threat has been mitigated for the Communities of Robinson Mill, Forbestown, and Feather Falls, as well as the threats to commercial timber, PG&E, natural and cultural resources, watershed, water conveyance to City of Oroville, & South Feather Water & Power, although potential remains, due to the incoming hotter and drier weather.**

24 hours: **Fire threat has been mitigated for the Communities of Robinson Mill, Forbestown, and Feather Falls, as well as the threats to commercial timber, PG&E, natural and cultural resources, watershed, water conveyance to City of Oroville, & South Feather Water & Power, although potential remains, due to the incoming hotter and drier weather.**

48 hours: **Little to no threat should exist, although the incoming hotter and drier weather presents a potential future threat.**

72 hours: **Little to no threat should exist, although the incoming hotter and drier weather presents a potential future threat.**

Anticipated after 72 hours:

39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:

Incident Status Summary (ICS-209)

Incident: LUMPKIN

12 hours: Chipper Module
 24 hours: Grader, 2 Type II Excavators with thumbs
 48 hours: None
 72 hours: None
 Anticipated after 72 hours:

40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
 1) critical resource needs identified above,
 2) the Incident Action Plan and management objectives and targets,
 3) anticipated results.
 Explain major problems and concerns such as operational challenges, incident management problems, and social, political, economic, or environmental concerns or impacts.
 Steep terrain, difficult access, and wind gusts are the primary challenges. The potential to spot across South Fork Feather River and protection of communities and infrastructure remain the highest priority. Suppression efforts are being implemented with protection of critical infrastructure in mind, such as the water conveyance system for the City of Oroville and PG&E transmission lines. The strategy is to keep the fire within the existing perimeter by holding existing line and mopping up interior. While the percent containment significantly increased due to the favorable conditions, the incident is preparing for the impending weather change.

41. Planned Actions for Next Operational Period:
 Mop up 300 feet interior. Assess ability to begin fire suppression repair, due to steep, slippery roads. Extract 2 burned dozers.

42. Projected Final Incident Size/Area (use unit label – e.g., “Acres”, “Square Miles”): **1,042**

43. Anticipated Incident Containment or Completion Date: **09/17/2015**

44. Projected Significant Resource Demobilization Start Date: **09/18/2015**

45. Estimated Incident Costs to Date: **\$4,044,095.00**

46. Projected Final Incident Cost Estimate: **\$10,000,000.00**

47. Remarks (or continuation of any blocks above – list block number in notation):
 All evacuation orders and warnings have been lifted for the incident.

 Ponderosa Way is open to local traffic only, from Lower Forbestown Rd to Ponderosa Reservoir/S. Fork Feather River.

 While the containment of the fire increased to 100% due to the favorable conditions, the incident is preparing for the impending weather change to hotter and drier conditions.
