Incident Meteorologist

WEATHER DISCUSSION: Mostly clear conditions are expected through this evening...then skies will become partly cloudy. There will be a slight chance of thunderstorms late Thursday night/early Friday morning...with any storms likely to be dry. So...new lightning starts and gusty/erratic winds will be possible late in the operational period. Otherwise...today will be hottest and driest day of the week.

On Friday...the slight chance of thunderstorms will continue across the complex through the evening. Any thunderstorms that develop on Friday will likely be on the dry side...although some wet storms cannot be ruled out in the afternoon/evening. Dry conditions and a cooling trend are anticipated this weekend.

WEATHER FORECAST:

WEATHER: Mostly clear through this evening...then partly cloudy overnight. A slight chance of thunderstorms early Friday morning (LAL 2).

Incident Location
County - Humboldt | State - CA | Latitude - 41 22.00 N | Longitude - 123 46.27 W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.
