SAFETY MESSAGE

SAFETY FIRST, LAST AND ALWAYS!!!

Remain mindful of changing weather conditions; Negligence can lead to major injuries and fatalities so don't be caught off guard!

Maintain Situational Awareness during operations at all times.

Watch out for uneven terrain proper **footing** is essential in all branches.

HEADS UP!!! Look out for falling rocks and boulders.

Stay hydrated!!! Time to think Water = Time to drink Water Remember nutrition is key to a healthy shift Stretch before work Document rest and hydration on 214.

Use the Incident Radio Plan and Common Communications

Watch for retardant drops Stay out from underneath bucket drops Watch for low drops

Ensure your crews are briefed on Chipper safety prior to chipping: See chipper info sheet

Remain mindful of what is going on around you adapt your exit strategy accordingly.

Be aware of alignment of topography and wind know what your fire is doing at all times

Lookouts, Communications, Escape Routes, Safety Zones

DONT FORGOT! SLOW DOWN DRIVE SAFE

Remember your radio etiquette stand down to priority traffic

Chipper Machine Safety Tips

Chipper machines cut tree limbs into small chips. Hazards arise when workers get too close to, or make contact with, the chipper. Contact with chipper operating components (blades, discs or knives) may result in amputation or death. Workers may also be injured by material thrown from the machine. To minimize these hazards, use appropriate engineering and work practice controls, including worker training.

Hazards

- Workers making contact with or being pulled into the chipper.
- Hearing loss.
- Face, eye, head or hand injuries.

Safe Work Practices

- **Never reach into a chipper while it is operating.**
- Do not wear loose-fitting clothing around a chipper.
- Always follow the manufacturer's guidelines and safety instructions.
- Use earplugs, safety glasses, hard hats and gloves.
- Workers should be trained on the safe operation of chipper machines. Always supervise new workers using a chipper to ensure that they work safely and never endanger themselves or others.
- Protect yourself from contacting operating chipper components by guarding the infeed and discharge ports, and preventing the opening of the access covers or doors until the drum or disc completely stops.
- Prevent detached trailer chippers from rolling or sliding on slopes by chocking the trailer wheels.
- Maintain a safe distance (i.e., two tree or log lengths) between chipper operations and other work/workers.
- When servicing and/or maintaining chipping equipment (i.e., "unjamming") use a lockout system to ensure that the equipment is de-energized.

Incident Location
County - Humboldt | State - CA | Latitude - 41 22.00 N | Longitude - 123 46.27 W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.
