The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

# SAFETY MESSAGE

*SAFETY DOESN'T STOP AT THE BRIEFING! ENSURE EVERYONE ON THE LINE RECEIVES ONE!*

- Steep winding roads are throughout the incident. Slow down when driving on loose gravel and blind curves. Drive defensively with headlights on and use hands free devices.

- Working on steep, uneven terrain. Be mindful of rolling materials.

- Ensure radios are properly programmed for today's IAP and that crews are trained in communications procedures for the incident.

Maintain situational awareness. Look up, Look down, Look around

- Stay hydrated!!! Time to think = time to drink. Document rest and hydration on 214.

- Remain mindful of what is going on around you! LCES!

- HEADS UP!!! Lookout for SNAGS when working around areas with burned trees. Evaluate all wind damaged trees with large limbs before working under around them.

Avoid complacency!!!! Experiencing extreme fire behavior due to low live and dead fuel moistures, persistent drought, and elevated fire danger rating values.

14. WEATHER IS GETTING HOTTER AND DRIER
