# INCIDENT

CA LNU 008670

## INCIDENT ACTION PLAN

OPERATIONAL PERIOD

September 18 – September 19, 2015

0700-0700

<b>INCIDENT OBJECTIVES</b>	<b>1. INCIDENT NAME</b> VALLEY	<b>2. DATE</b> 9/17/15	<b>3. TIME</b> 1800
----------------------------	-----------------------------------	---------------------------	------------------------

**4. OPERATIONAL PERIOD (DATE/TIME)**  
9/18/15 - 9/19/15 0700 - 0700

**5. MANAGEMENT OBJECTIVES**

- Maintain safe work practices to minimize threats to the public and emergency personnel.
- Foster and maintain relationships with all local cooperators, stakeholders, and the public.
- Protect natural and heritage resources.
- Provide timely and accurate incident information.
- Maintain fiscal accountability and keep costs commensurate with values at risk.

**6. GENERAL CONTROL OBJECTIVES**

• Keep the fire:

- North of Knights Valley/Tubbs Lane/Swartz Canyon
- East of Alexander Valley
- West of Knoxville/Berryessa Road
- South of Hopland Grade to Highway 29 and South of Morgan Valley/Knoxville Road

**7. WEATHER FORECAST FOR OPERATIONAL PERIOD**

Mostly Sunny  
Temp: 74-79° F  
RH: 22-27%

Wind: Slope/Valley Upslope 3 to 6 mph; Ridgeline Northwest 6 to 8 gusts to 12 mph.

**8. GENERAL SAFETY MESSAGE**

Maintain LCES at all times.  
Watch for fatigue and ensure a 2:1 work ratio.  
Ensure everyone gets briefed on the current IAP.

**9. Attachments (X if attached)**

**INCIDENT Weather Forecast**

FORECAST NO: 04

PREDICTION FOR: Friday/Friday Night

SHIFT DATE: September 18, 2015

FORECAST ISSUED: 9/17/2015 at 1900

Mark Loeffelbein (IMET)

NAME OF FIRE: Valley

UNIT: LNU

SIGNED: *Mark Loeffelbein*

**WEATHER DISCUSSION:** A weak ridge will build into the region putting the fire under warming and drying conditions through the forecast. RH recovers at night will be fairly poor with the exception of the lowest valley bottoms. Mid slopes will stay warmer and drier than valleys as thermal belts develop overnight. Winds at ridge top will be a little lighter as there is a lack of large scale flow to drive the winds. Much warmer and drier weather will occur over the weekend.

**FORECAST FOR TODAY:** Mostly Sunny (0-20% Cloud Cover).

Max Temperature: Valley Bottom...74-79 Ridge Top...71-76. 3-5 Degrees Warmer.

Min RH: Valley Bottom...22-27% Ridge Top...25-30%. 8-12 Percent Lower.

20 FT Winds:

Slope/Valleys: Upslope 3 to 6 mph on sheltered slopes.

Ridgetops: Northwest 6 to 8 gusts to 12 mph.

CWR.....0%

LAL.....1

Inversion.....Inversions breaking between 1000 and 1100.

**OUTLOOK FOR TONIGHT:** Mostly Clear (0-20% Cloud Cover).

Min Temperature: Valley Bottom...44-49 Ridge Top...50-55.

Max RH: Valley Bottom...35-45% Ridge Top...30-40%.

20 FT Winds:

Slope/Valleys: Downslope/Downvalley 3 to 6 mph after 2000.

Ridgetops: North 4 to 6 mph after 2000.

CWR.....0%

LAL.....1

Inversion.....Inversions developing with thermal belts on the mid-slopes.

**EXTENDED OUTLOOK:** Saturday...Mostly Sunny (0-20% Cloud Cover). High: 83-88. Min RHs: 16 to 26%. Winds: NW 4 to 8 mph.

Sunday...Mostly Sunny (0-20% Cloud Cover). High: 86-91. Min RHs: 13 to 23%. Winds: W 6 to 10 gusts to 16 mph.

Monday...Mostly Sunny (0-20% Cloud Cover). High: 82-87. Min RHs: 16 to 26%. Winds: SW 6 to 10 gusts to 16 mph.

Obs from Wednesday:

RAWS	Max Temp	Min RH	Max Wind	Min Temp	Max RH	Precip
Konoci (2163)	73	38%	N 6G13	50	97%	0.00"
Hawkeye (2024)	71	48%	SSW 10G17	49	100%	0.00"

# FIRE BEHAVIOR FORECAST

**FORECAST NUMBER: 05**      **TYPE OF FIRE: Wildland Fire**

**FIRE NAME: Valley**      **OPERATIONAL PERIOD: 09-18 (0700-0700)**

**DATE ISSUED: 09-17-2015**      **TIME ISSUED: 2100**

**UNIT: LNU**      **SIGNED:**       **PRINTED: Scott Jones**

## INPUTS

### WEATHER SUMMARY

Mostly Sunny  
 Temps: 71° - 79°      RH: 22 - 25%      LAL -- 1  
 20ft - (MPH)  
 Slope/Valley - Upslope 3 to 6      Ridgetop -- NW 6 to 8 gusts to 12

### Extended Outlook

Saturday mostly sunny 83° - 88° RH 16 - 26%, Sunday mostly sunny 86° to 91° RH 13 to 23%

## OUTPUTS

### FIRE BEHAVIOR

### GENERAL:

Wednesday's rain was more than what was predicted with estimates of 1/2 inch over portions of the fire. This precipitation helped crews by reducing fire intensity in the 100 hour fuels and suppressing the heat in the 1 and 10 hour fuels. Yesterday began a warming trend that has neutralized the advantage provided by the rain event. The Konocli RAWS ERCs are at the 87 percentile. Numerous smokes from heat in the downed heavier fuels were observed on the western portion of the fire and within the communities that experienced the most intense level of heat. The southern portion still has heat in the shrub and brush models both interior and near the control lines.

### Fire Behavior for Optimal Alignment Receptive Fuels

Fuel Type	ROS (Ft-MIN) Forward	ROS (Ft-MIN) Lateral	FL (Ft) P(i)G
Timber Understory	5 - 12	1 - 2	6 - 8      75%
Shrub	18 - 50	5 - 6	10 - 16      75%
Grass / Low Brush	9 - 27	2 - 4	3 - 5      75%

**Fuels that are in vertical alignment and jackpots, or during firing operations crews should expect significantly increased ROS and FL.**

### SPECIFIC:

Branch XIII (Geysers) - XV - I  
 Expect continued active low intensity burning in the downed heavy fuels and within snags. Smoke production from these heat sources should dissipate unlike earlier in the week when conditions would become socked in limiting visibility. If these fires align with slope, even at the lower wind threshold expect fires to transition into the canopy. Individual and group torching is within the realm of opportunity. Branch XI - IX - VII  
 Potential remains as this area has had limited suppression efforts due to lack of resources. There is still open and indirect line. Areas of active fire will remain a concern as the fuels in this area have proven to be very receptive to spot fires and slop overs. Branch V - III  
 Interior heat is still being observed, but lower level of activity is expected.

### AIR OPERATIONS:

Air operations should not experience any lasting impacts

### SAFETY

Suppression efforts may involve indirect attack, post lookouts, have escape routes and evaluate all options when accessing hot spots in unburned fuels.

*Handwritten signature*

14. WEATHER IS GETTING HOTTER AND DRIER

- Roads are still dangerous in areas and dusty... Drive Defensively!
- Watch for excessive fatigue. TAKE BREAKS as needed.
- Use caution when working around burned or damaged structures numerous hazards still exist.
- Ensure radios are properly programmed for today's IAP and that crews are trained in the communications procedures for the incident.
- Stay hydrated!!! Time to think = time to drink. Document rest and hydration on 214.
- ALL PPE must be worn when working on the fireline.
- Expect an increased in civilian traffic on the roadways.
- Beware of stump-holes, steep slopes, trip hazards, and loose footing.
- DO NOT CUT any powerlines. Treat all powerlines as energized.

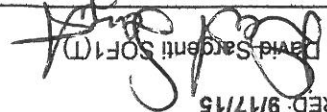

SAFETY DOESN'T STOP AT THE BRIEFING! KEEP IT IN YOUR MIND AND REFLECT IT IN YOUR ACTIONS!!!  
BE A ROLE MODEL FOR OTHERS!

Contact Calpine at 707.894.3901 regarding Calpine equipment.

- ⇒ The Geysers is a power distribution area, assume all power lines are energized. DO NOT CUT ANY DOWN POWERLINES.
- ⇒ Steep winding UNMARKED roads are throughout the Geysers. Drive defensively with headlights on anticipating the unexpected.
- ⇒ The Geysers area contain vertical and horizontal mines shafts, look down for vertical mines and stay away from horizontal mine openings.
- ⇒ Earthquakes are prevalent throughout the Geysers, LOOK OUT for rolling rocks and take earthquake precautions if earthquakes are felt.
- ⇒ Hydrogen Sulfide (H2S) in parts per million can be hazardous, if available utilize air monitoring equipment to detect for this hazard.
- ⇒ Natural steam vents exist in many areas. DO NOT mistake steam for smoke you may be BURNED.
- ⇒ Reclaimed hydrants are painted PURPLE do not drink water from the hydrant system in the Geysers.
- ⇒ Stay upwind of cooling towers, the steam may contain hazardous materials. Use DEFENSIVE tactics on cooling tower fires.

This Safety Message applies to any resource assigned to the Geysers, in addition to the Valley Incident Safety Message.

Prepared By (Communications Unit)  
KYLE JOHNSON COM1

Kyle P. Johnson

Incident Location 8040 HIGH VALLEY RD  
County LAKE State CA. LAKEPORT, CA.  
Latitude 38° 50.63 N Longitude 122° 45.500 W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

## 8. MEDICAL EMERGENCY PROCEDURES

### EMERGENCY FREQUENCY: CALCORD

**LINE EMERGENCY:**  
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

• Division/Group Supervisor contacts:

- 1. Closest EMS resource
- 2. Communications Unit
- 3. Communications Unit contacts:

• Communications Unit contacts:  
1. Ground or Air ambulance as requested

- 2. Operations
- 3. Safety
- 4. Medical Unit

• Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.

• A pre-assigned tactical frequency (i.e. CALCORD) should be used for LWI and only for duration of need.

• Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

**CAMP EMERGENCY:**  
Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident.

• Medical Unit contacts:

- 1. Communications
- 2. Safety
- 3. Logistics
- 4. Operations
- 5. Crew Supervisor
- 6. Comps/Claims

**INJURY REPORTING PROCEDURES**

# Incident Management Team 3

## Information Message

Incident Public Information Line: (707) 967-4207

Incident Media Line: (916) 591-9018

### MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

### CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies, the media and the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

### PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

### LOST AND FOUND

The information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the information trailer. If you have found an item on the incident, bring the item to the information trailer.

### MAIL SERVICE

The information staff will assist you in mailing and receiving letters and packages.

www.fire.ca.gov

# VALLEY INCIDENT FINANCE SECTION MESSAGE

The OES rep is available for any questions regarding F-42's and local government time keeping.

There is a computer dedicated for E-Pay use set up in the Finance Section.

Please make sure hired equipment shift tickets are completed for all private vendors and dropped off in the Time Unit by agency personnel / line supervisors only.

Please report all injuries and suppression damage to the Comp / Claims Unit, no matter how minor. For fire suppression damage, please include photos (if possible), a location and a brief description.

Please use the Water Use forms included in the IAP.

Any "off-site" feeding charged to the incident must be pre-approved by the Logistics Section and/or Finance Section Chief. The Motel Tech Spec will have information on this.

ROGER RAINES, FSC1  
TERRY EASTWOOD, DEP. FSC1

## Turn shift tickets into Finance.

Contact Andy Whitlock for questions: 707-498-7545

⊕ We are here to help make your training assignment successful and support the certification process.

⊕ Training documentation cannot be easily initiated once you start demob, so please plan ahead.

⊕ Training Hours are 0630 to 2000 hours and TNSP Lynn Webb's cell phone number is 707-391-6754.

⊕ Training is in the Plans Building (Firtch Hall) just past Documentation.

*problematic!*

*If not, their training documentation could be*

*Has the Trainee checked in at Training?*

*Trainees and Evaluators:*

**Archaeological and Historic Properties:  
General Fire-line Guidance for the BLM Ukiah Field Office.**

**Do not compromise safety for the protection and preservation of archaeological and historic properties. When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.

2. Note, that much of the area has never been surveyed for archaeological resources and many sites out there have yet to be discovered.

3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.

4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.

5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.

6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.

7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.

## FC-315 INSTRUCTIONS FOR USE

### INITIAL AND EXTENDED ATTACK INCIDENTS:

The Incident Commander approves replacement request based on Engine Accountability sheets or other fire equipment inventory documents approved by the requesting resource's home unit.

- If equipment and supplies are available at the incident for replacement, the request is filled at the incident host unit.
- If equipment and supplies are unavailable at the incident for replacement AND the requesting resource is not being immediately demobilized, the hosting unit will place a resource order for needed items through appropriate channels to the servicing fire cache or vendor. The order will be shipped to the incident and replacement will take place at the host unit.
- If equipment and supplies are unavailable at the incident for replacement, AND the requesting resource is being demobilized, an FC-315 will be completed by the host unit, 'S' number issued, signed by the authorizing official and given to the requesting resource.
- On an Initial or Extended Attack incident, where a Supply Unit has not been established, approvals are limited to the Incident Commander or Agency Representative.

### LARGE INCIDENTS WHERE A BASE HAS BEEN ESTABLISHED:

The Incident Supply Unit Leader (SPUL) will be responsible for handling incident replacement requisitions when a incident base is established. The SPUL approves replacement request based on Engine Accountability sheets or other fire equipment inventory documents approved by the requesting resource's home unit.

- If equipment and supplies are NOT available at the incident for replacement, AND the requesting resource is not being immediately demobilized, The Supply Unit will place a resource order for needed items through appropriate channels to the servicing fire cache or vendor. The order will be shipped to the incident and replacement will take place at the Supply Unit.
- If equipment and supplies are unavailable at the incident for replacement, AND the requesting resource is being demobilized, an Incident Replacement Requisition (FC-315) will be completed by the Supply Unit, a 'S' number issued, signed by the authorizing official and given to the requesting resource.
- Authorized approvals and signatures MUST be included on the FC-315. For large incidents where a Base has been established, these approvals are limited to Incident Supply Unit Leader, Logistics Section Chief, Incident Commander or Agency Representative.

Replacement orders will be based on approved OF-315's and must be processed within 30 days of control of incident. A copy of the FC-315 will be attached to all pay documents charged against an incident number.

(Revision 4/04)

### Instructions for Use of CDF 101

## Property Certification of Location or Damage

Document Number: for use as a local number system or when attached to a FC-40 document  
Location / Incident Name: Enter the CDF facility property is assigned to. If submitting to an incident base, enter the Incident Name.

Incident Number: Enter the appropriate incident number  
Unit: Enter the Unit the property is assigned to. If submitting to an incident base, enter the request number of the person certifying damage example E-320, C-14 or O-355.

Region: Enter the CDF Region where the property was assigned. If submitting to an incident base, enter the CDF Region responsible for the incident.  
Date: Enter the date the P.L or D. was completed.

The following items were: Enter either 'Broken', 'Left on Line', 'Damaged' or other status of the property. Reminder, this form cannot be used in place of the STD-152 to certify Lost, Stolen, Worn Out or Damaged beyond repair property.

Date of Occurrence: Enter the date the property was broken, left on line or damaged.  
Quantity: Enter the quantity for the line item.  
Unit of Measure: Enter the unit of measure for the line item (example ea = each).

CDF Stock Number: Enter the PIN or stock number.  
Description: Enter the description of the line item, indicate size, make, model and type. Clearly describe the item and provide adequate data to effectively identify equipment or property.

Property Number: Enter the CDF property number assigned to the line item, Capitalized or sensitive property must have their property number entered here.  
Location of Items: Where is the property now (example, left on Division B night shift 8/1/04, Drop Point 2). A GPS coordinate, Station 22 or Unit Service Center may also be used to describe Location.

Remarks: Enter specific remarks here, how was the property damaged, what specifically is wrong with it.  
Signature of Person Certifying the Occurrence as Described:  
Printed Name: Enter the printed name of the signature.

Title: Enter the title of the signature.  
Date: Enter the date of the signature.

Unit Supervisors Approval:  
If submitted on an incident this section must be completed by the supervisor of the property custodian. This may be the Strike Team Leader, Division Supervisor, Receiving and Distribution Manager, Supply Unit Leader, Logistics Section Chief, Agency Representative or Incident Commander.

If submitted at the home Unit this section must also be completed by the supervisor of the property custodian. This may be a Battalion or Division Chief.  
Comments: Supervisors may enter comments of approval or disapproval.  
Signature of Unit Administrator: Signature of Unit Supervisor reviewing the certification described.

Title: Title of the signature.  
Date: Date of the signature.

Notes:  
This document is NOT required if exchanging property at an incident base with the exception of capitalized or sensitive property assigned a CDF property number.  
This document is required as certification when submitting an MRT to your local Service Center for replacement of property.

An OF-315 (Incident Replacement Requisition) is required as authorization to purchase fire replacement items at your local Unit. This document is required when submitting an MRT to your local Service Center for fire replacement items. A CDF-101 and/or A STD-152 are required for the certification of the status of property being requisitioned for replacement.

# WATER USAGE PLAN

## California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

### Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

### Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

### Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

### Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, IMT3 Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

### Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

### Management and Supervision-

- Use leaders intent and establish Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Situation Unit.
- Review this check list and brief daily.

# LNU Employees Relief Fund

Dear Fire Family, a number of our employees have lost their homes and all of their belongings in the Valley and Butte Fires. At this point here is what we know:

- Battalion Chief Paul Duncan and Communications Operator Courtney Duncan lost their home in Hidden Valley
- Fire Captain Justin Galvan lost his home in Middletown
- FF Matt Maxwell lost his home in Middletown
- FF Dave Watkins lost his home in Hidden Valley
- FF Robert Hamblin-Taylor lost his home on Cobb
- FF Kyle Catto lost his home in Mokolunne Hill to the Butte Fire
- FAE Steve Cherry lost his home in Middletown
- Retired HFE0 Ken Leuzinger lost his home in Middletown

A fund has been set up through the Forestry Crabfeed Firefighter Benevolent Fund to help all of these employees. The Fire Information trailer here in camp is accepting monetary donations for the duration of the incident from any one assigned here willing to donate.

For those wishing to donate at a later date, you can mail checks to the following:

Forestry Crabfeed FF Relief Fund  
2210 West College Ave  
Santa Rosa, Ca 95401  
Attn: Olga Leitch

The Forestry Crabfeed, was established as a benevolent fund to assist the employees in the Sonoma Lake Napa Unit, is a non-profit 501c3 so your donation is tax deductible, tax payer ID 45-3748304.

100% of the money collected will be given directly to the employees
