

Scotts Incident

CA-MEU-006376

INCIDENT ACTION PLAN
OPERATIONAL PERIOD
Sept 12 – Sept 13, 2012
0700-0700

INCIDENT OBJECTIVES	1. Incident Name SCOTTS	2. Date 9-11-12	3. Time 2000
4. Operational Period September 12-13, 2012 0700-0700			
5. General Control Objectives for the Incident (include alternatives) Management Objectives <ul style="list-style-type: none"> • Provide for Firefighter and Public Safety • Maintain positive communication and relationships with cooperating agencies and the public • Protect natural and cultural resources • Maintain effective cost management while meeting the needs of the incident • Provide for a safe and efficient demobilization Control Objectives <ul style="list-style-type: none"> • Keep fire within constructed lines 			
6. Weather Forecast for Period <ul style="list-style-type: none"> • Max temperature: 91-97° F • Min humidity: 4-17% • 20' WINDS: Valley – upslope up to 5 mph, becoming southeast up to 8 mph Ridges/Upper slopes: E up to 8 mph 			
7. General Safety Message <ul style="list-style-type: none"> • Continually monitor your personnel for signs and symptoms of dehydration; water to electrolyte enhanced drink is a 2 to 1 ratio. • Be cautious of rattlesnakes, hornets and wasps. • Be alert for fire weakened trees and snags. • Drive defensively.

Scotts Incident Weather Forecast

FORECAST NO: 2

NAME OF FIRE: Scotts

PREDICTION FOR: 0700-0700

UNIT: CA-MEU-006376

SHIFT DATE: 9/12-9/13/2012

SIGNED: Ryan Walbrun

TIME AND DATE

FORECAST ISSUED: 2000 9/11/2012

Incident Meteorologist

WEATHER DISCUSSION: No significant weather changes forecast today but much of northern California remains under a **critical fire weather pattern** with hot temperatures and low humidity. A thermal trough is over the coastal range which will keep winds from the east-southeast over the ridges this morning and through about 1 pm. By this afternoon ridge winds will turn west-southwest with some gusts 15-20 mph. Temperatures will remain above normal for mid September with daytime highs approaching 90 degrees while RH readings fall into the teens. Westerly winds will ease after sunset and then turn light easterly overnight. Temperatures will remain mild...in the 60s over the mid and upper slopes tonight with poor RH recovery...generally less than 30%. Reminder that fuels remain at or near record dry levels and the absence of night time humidity recovery will keep probability of ignition high for any potential spotting, roll out or new starts.

WEATHER FORECAST For Wednesday:

WEATHER: Sunny...continued hot and dry.

HIGH TEMPERATURES: Afternoon highs 86-92 degrees.

MIN HUMIDITY: Starting out around 35%...then lowering 12-19% in the afternoon.

20 FT WINDS:

RIDGETOP - Southeast 5 mph in the morning turning West 6-12 mph gusts 15-18 mph afternoon

SLOPE/VALLEY - Light and variable turning upslope 3-6 mph in the afternoon with gusts 8-10 mph.

STABILITY/INVERSION: Weak morning inversion over the fire will mix out by 10 am.

Forecast for Wednesday Night:

WEATHER: Clear and mild with poor RH recovery over most of the fire site.

MIN TEMPERATURES: 61-66 over most of the fire...upper 50s lowest drainages.

MAX HUMIDITY: Less than 25% through sunset then slowly recovering 35-40% by morning.

20 FT WINDS:

RIDGETOP - West 6-12 mph in the evening...turning East to Southeast 5 mph by morning.

SLOPE/VALLEY - Evening upslope 3-5 mph until sunset...then downslope 0-3 mph overnight.

STABILITY/INVERSION: Weak inversion setting up over the fire after sunset.

OUTLOOK FOR Thursday through Saturday: No significant weather changes forecast through the end of the week with high pressure over the region. If anything expect a few degrees of warming and drying each day. Winds will generally be light and from the East at night along the ridges...turning Westerly 5-10 mph in the afternoon. Afternoon highs mid 80s to lower 90s. Afternoon RH to around 15% with poor night time recovery only around 30-40% for a few hours each morning. Gentle cooling possible by Saturday.

SAFETY MESSAGE/PLAN

1. Incident Name: SCOTTS INCIDENT CA-MEU-006376	2. Operational Period: Date From: 09/12/2012 Date To: 09/13/2012 Time From: 0700 Time To: 0700	
3. Safety Message: <ul style="list-style-type: none">• Remember the incident's first Management Objective: Firefighter and public safety.• In order to have confidence in your Personal Protective Equipment, you need to be wearing it!• Preplan escape routes, providing enough time for firefighters to move to Safety Zones or Temporary Refuge Areas.• Maintain awareness of rattlesnakes, hornets and wasps.• Be cautious of fire weakened or partially burned trees.• Drive with your headlights on at all times, follow all speed limits and traffic laws.• Be aware of road hazards specifically plastic culverts burned out under the road.• Just as a reminder: Uphill traffic has the right away.• Always use a backer and chock your vehicles.• Prevent dehydration by drinking frequently throughout each working hour. Drink plenty of water with meals; continue replacing fluids while off shift. Plan ahead and don't allow water to run out before resupplying.• Pay close attention to the fatigue levels. Get rest and drink plenty of water!

Incident Location
 County Lake State CA Latitude N Longitude W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY: CALCORD

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 - Closest EMS resource
 - Communications Unit
- Communications Unit contacts:
 - Ground or Air ambulance as requested
 - Operations
 - Safety
 - Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 - A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

CAMP EMERGENCY:
Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
 - Communications
 - Safety
 - Logistics
 - Operations
 - Crew Supervisor
 - Comps/Claims

INJURY REPORTING PROCEDURES

NATURE OF INJURY _____
 LOCATION OF PATIENT _____
 POINT OF CONTACT _____
 TRANSPORTATION REQUESTED BY: AIR ___ GROUND ___
 POINT OF PICKUP _____
 LAT _____ LONG _____
 PATIENT UNIT ID _____
 IS AN EMT WITH PATIENT: YES ___ NO ___
 AGE _____
 SEX: MALE ___ FEMALE ___

ALL EMERGENCIES---Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

A message from the Training Specialist

Thank you for registering as a trainee! Now please keep up the good work by giving me periodic progress reports and starting your trainee evaluation process. You can start your evaluation well in advance of incident demobilization so don't delay start today. I will be located in the Check – In Building from 0730 to 1900 hours.

You may also call me at:

Jim Mobley 530-941-2129

Thank you for helping me to help you!!!

**Archaeological and Historic Properties:
Fireline Guidance for the Scotts Creek Fire
Lake County**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs but can occur in other areas as well. The most common indicators of prehistoric sites in this area are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic mining sites are possible as well.
2. Known sites will be flagged with red plastic flagging tape. Note, that much of the area has never been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map. Better yet take site coordinates with a GPS. Leave information for the archaeologist with the Plans Unit so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.

"Scotts" Incident Fire Suppression Repair Plan

I. Objectives

The objective of the Suppression Repair Plan is to mitigate possible adverse effects to resources resulting from fire suppression activities on the Scotts Fire in a manner which does not compromise firefighter safety. The mitigations described within this plan have been developed to apply to constructed fire lines, watercourse crossings, access roads, drop points, heli-spots and any other locations disturbed by fire suppression activities. A Repair Specialist will be assigned to ensure that work is done as required and according to the Emergency Fire Suppression Repair Plan. Additional specialists or equipment may be used if the need arises. Specialists will release equipment from the area when their work is completed.

II. General Repair Guidelines

A. Helispots/Staging Areas/Safety Zones

- 1) Re-contour to the original slope as requested by the Repair Specialist.
- 2) Remove soil, and/or breach berms so that runoff can be dissipated. Cross drain these areas to effectively dissipate water runoff.
- 3) Place disturbed vegetation, brush and trees, piled during line construction, on the surface of safety zones and open areas. This may be done with equipment or hand crews.

B. Roads

- 1) Re-establish existing berms where applicable.
- 2) Breach berms to facilitate drainage, where applicable.
- 3) Clean culverts plugged with soil and rock resulting from fire suppression activities.
- 4) Blading or grading of roads may be necessary.

C. Firelines; Hand and Dozer

Install waterbars as needed. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment. Re-establish waterbars and rolling dips using pre-fire locations. Flatten berms along fire lines to match natural contours. Utilize cut vegetation for erosion control on steep dozer and hand lines.

Water Bar or cross drain spacing				
Fireline or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Spacing	200'	150'	100'	75'

D. Watercourses

- 1) Watercourse crossings shall be dipped to original configuration. Waterbreaks shall be installed on each side of channel to divert flow off of trails prior to entering watercourse channel.
- 2) Remove all soil and debris that was placed in any stream channel. A Repair Specialist will review the site for acceptability. If all foreign material cannot be removed with heavy equipment, the material shall be removed by hand. The approaches to the crossing may be sloped back to prevent future stream bank failure.

E. Other Repair Concerns

- 1) Remove all trash from fire lines and other affected areas.
- 2) Repair, broken, damaged fences, and/or gates damaged as the result of the fire control operations will be repaired. (Note: Extent and condition of damage should be documented prior to repairs.)
