Willard Fire

CA-LMU-004695

Incident Action Plan

Operational Period

September 14th -15th , 2016

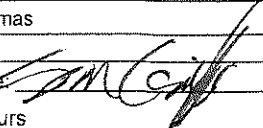

0700-0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">WILLARD</p>	2. Operational Period: <table style="width: 100%; border: none;"> <tr> <td style="border: none;">Date From:</td> <td style="border: none;">9/14/2016</td> <td style="border: none;">Date To:</td> <td style="border: none;">9/15/2016</td> </tr> <tr> <td style="border: none;">Time From:</td> <td style="border: none;">0700</td> <td style="border: none;">Time To:</td> <td style="border: none;">0700</td> </tr> </table>	Date From:	9/14/2016	Date To:	9/15/2016	Time From:	0700	Time To:	0700												
Date From:	9/14/2016	Date To:	9/15/2016																		
Time From:	0700	Time To:	0700																		
3. Objective(s):																					
<u>Management Objectives</u> <ul style="list-style-type: none"> -Utilize Incident Risk Analysis to identify and mitigate hazardous conditions to provide for responder and public safety. -Safely and effectively repopulate evacuated communities and open travel routes to affected areas. -Reduce the potential for impacts to natural and cultural resources. -Accurately track costs and provide fiscal accountability while ensuring the needs of the incident are met. -Establish and maintain excellent relationships by recognizing the needs of all cooperating agencies. -Ensure timely and accurate information is provided to the public and cooperators. 																					
<u>Control Objectives</u> <ul style="list-style-type: none"> -Keep the fire east of Forest Road 29N03 -Keep the fire south of Susan River -Keep the fire west of Susan Hills Subdivision (Richmond Road) -Keep the fire north of Gold Run Road (1200 Road) 																					
General Situational Awareness: <ul style="list-style-type: none"> - Aggressively secure and hold direct line expeditiously.

Willard Fire Weather Forecast

FORECAST NO: 2
PREDICTION FOR: DAY SHIFT – NIGHT SHIFT
SHIFT DATE: Saturday, September 14, 2016

NAME OF INCIDENT: Willard Fire
UNIT: Lassen-Modoc Unit, Cal Fire
SIGNED:

FORECAST ISSUED: September 13, 2016

Terry Lebo, Incident Meteorologist

WEATHER DISCUSSION

Low pressure aloft over southern Idaho today will continue slowly moving east, away from the region. Although the low will exit a weak upper level trough will linger over the west coast into the weekend. At the surface high pressure will slowly build over the region with light winds and warming and drying conditions expected through the week.

FORECAST FOR WEDNESDAY:

Max Temperature:	Valley Bottom	72-78	Ridgetop	64-73
Minimum Humidity:	Valley Bottom	20-25%	Ridgetop	15-20%
20 ft Winds:				
Slopes/Valleys:	Light downslope becoming upslope 4 to 8 mph in the afternoon.			
Ridges:	Northwest 12 to 17 mph.			
Transport Winds:	Northwest 12 to 17 mph			
LAL	1			
Chance of Wetting Rain	0%			

FORECAST FOR TONIGHT:

Min Temperature:	Valley Bottom	28-35	Ridgetop	34-40
Minimum Humidity:	Valley Bottom	80-90%	Ridgetop	40-50%
20 ft Winds:				
Slopes/Valleys:	West to northwest wind 10 mph with gusts 15 to 20 mph in the evening Becoming light and downslope overnight			
Ridges:	Northwest 10 to 15 mph.			
Transport Winds:	Northwest 10 to 15 mph			

FORECAST FOR THURSDAY:

Max Temperature:	Valley Bottom	74-80	Ridgetop	67-75
Minimum Humidity:	Valley Bottom	17-22%	Ridgetop	12-17%
20 ft Winds:				
Slopes/Valleys:	Light downslope becoming upslope 4 to 8 mph in the afternoon.			
Ridges:	Northeast 10 mph.			
Transport Winds:	Northeast 10 mph			
LAL	1			
Chance of Wetting Rain	0%			

EXTENDED OUTLOOK:

FRIDAY: Sunny. Highs 73-83, Lows 40-50. Min RH 10%. Terrain driven winds less than 10 mph.

SATURDAY: Sunny. Highs 75-85, Lows 42-52. Min RH 10%. Terrain driven winds less than 10 mph.

SUNDAY: Mostly sunny. Highs 78-88, Lows 45-55. Min RH 12%. Terrain driven winds less than 10 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: # 2	TYPE OF FIRE: Wildland Fire
FIRE NAME: Willard	OPERATIONAL PERIOD: 09/14 (0700-0700)
DATE ISSUED: 09/13/16	TIME ISSUED: 2000 hrs
UNIT: LMU	SIGNED:  Printed: Scott Jones

INPUTS

WEATHER SUMMARY
 Dry conditions with a warming trend and reduced overnight humidity recovery.

Temp: 70° – 75° Relative Humidity: 12 - 16%
 20 Ft Winds – up slope 2 to 5 mph becoming NW 4 to 8 mph after 1300hrs.

OUTPUTS

FIRE BEHAVIOR

GENERAL:
 Fire growth and activity has diminished from the 1st burn period. The last two operational periods have had slop overs and spot fires controlled with aggressive rotary wing and ground force suppression actions. The fuel types that are currently active are the heavier down and dead ground litter and some pines that are drought stressed. Yesterday the fire was creeping with some isolated lower canopy singeing mainly along the eastern portion of the fire. Fuels are a combination of grass oak and established conifer and conifer plantations.

**Fire Behavior for Optimal Alignment
 Receptive Fuels**

Fuel Type	ROS (Ft-MIN) Forward	ROS (Ft-MIN) Lateral	FL (Ft)	P(i)G
Grass/Shrub GS2	Slow/Moderate (44-114)	Slow (7-10)	7 - 12	85
Timber/Shrub TU5	Slow (17-35)	Slow (0-2)	9 - 13	85

Predicted Indices

Wx Station / Fuel Model	SC	ERC	BI	IC
Hidden Valley – T Sagebrush/ Grass	30	17	54	44
Westwood – G Short Needle (Heavy Dead)	13	83	75	52

SPECIFIC:
 Crews need to be cognizant of post fire hazards; weakened trees, hot ash pits and root ball cavities.

DIV A – M – P
 Minimal activity is expected. Interior islands and pockets of unburned fuels may have isolated short burst flare ups.

DIV X – W – V
 This will remain an area of potential due to the wind pattern, fuel loads and receptive fuels outside control lines. This area was active Tuesday with low intensity creeping and heavy downed fuels burning. Slop overs from the cold front that went through on Monday may have higher levels of heat.

AIR OPERATIONS:
 No expected limitations.

SAFETY

Weather can make dramatic and unpredicted changes in this area, maintain situational awareness as it relates to the climatic indicators over the fire and in the general area.

Willard Incident Safety Message

16-CALMU-004695

September 14, 2016

Complete All Tasks Safely, Competently and Completely

Driving

- ✓ Narrow roadways, dirt roads, fire impacted roads; insure adequate clearances, use spotters when necessary, use warning lights, drive defensively. Be prepared for wet roads if thunderstorms materialize
- ✓ Seat Belts will be worn at all times
- ✓ Check Dual's prior to leaving the dirt road

Fuels, Fire Behavior and Weather

- ✓ Fuel moistures are near or at record lows and ERC's at record high levels – Potential for rapid fire growth and erratic fire behavior is still present
- ✓ **Be aware of potential thunderstorms and gusty winds**
- ✓ **Hazard Trees** exist throughout the majority of the incident – Identify and Flag - Utilize qualified fallers – Work only within prescribed parameters! Refer to ***IRPG pg. 22-23***

Hydration, Nutrition and Fatigue

- ✓ As personnel work more and more shifts on the line and the weather becomes warmer – Dehydration can accumulate and sneak up on you. Make sure you are staying hydrated. Minimum of ONE QUART per HOUR per person. Plan accordingly.
- ✓ Take frequent short breaks with small meals or snacks on regular intervals
- ✓ Monitor Personnel for Fatigue - Consider decreasing intervals for breaks or Increasing time – “This is a marathon; NOT a sprint!”

15. WIND INCREASES AND/OR CHANGES DIRECTION

Footing and Rolling Material

- ✓ There is a significant amount of steep and unstable terrain – watch your footing and be aware of rolling material!
- ✓ Watch your Step! – Avoid Stump Holes and Ash Pits – Ground around stump holes can collapse without warning.

PPE

- ✓ Wear all appropriate PPE – Replace damaged and worn equipment
- ✓ Be prepared for freezing temperatures on the fireline

Communications

- ✓ Ensure communications are clear, concise and understood.

Willard Fire - INCIDENT RISK ANALYSIS (ICS 215a)
16-CA-LMU-004695

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	FUELS and WEATHER	<ul style="list-style-type: none"> • WATCHOUT FOR THUNDERSTORM ACTIVITY • Be prepared for freezing temperatures on the fireline • Fuels are extremely receptive with record low fuel moistures causing ERC values that are off of the charts of current models
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> • Drive defensively! Expect the unexpected around every curve. • Drive with headlights and seatbelts on. • Slow Down! Narrow roads with limited passing room. Coordinate your movements on one lane roads. • Increase following distances. Maintain Situational Awareness. • Check duals prior to leaving the dirt road • Be prepared for slick roads if thunderstorms materialize
ALL	EXTREME FIRE BEHAVIOR	<ul style="list-style-type: none"> • Know your LCES and maintain Situational Awareness. • Use experienced look outs. • Adhere to the downhill line construction guidelines. • Monitor weather for changes in the wind, temp, RH and building cumulus • Expect rapid rates of spread with long range spotting, have a contingency plan (PACE) with established decision points and safety zones.
ALL	FATIGUE/HEAT/DEHYDRATION	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1 quart per hour per person. • Be alert for signs of heat stress in yourself and others; use the buddy system. • Eat small meals often and when possible. • Drink electrolyte drinks at a 2 water to one sport drink ratio.
ALL	STRUCTURE DEFENSE & HAZARDS	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Follow <i>Wildland Urban Interface Guidelines</i> (IRPG p. 12-16).
ALL	AIRCRAFT OPERATIONS	<ul style="list-style-type: none"> • Keep personnel out of drop zones. • Use air-to-ground freq. to communicate with aircraft. • Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective.
ALL	POWER LINES	<ul style="list-style-type: none"> • Follow <i>Power Line Safety</i> guidelines (IRPG pg.24.) • Communicate power line hazards to immediate supervisor and hazard flag accordingly. • Flag area around downed power lines and deny access. • Treat all downed power lines as energized.
ALL	TACTICAL HAZARDS	<ul style="list-style-type: none"> • Follow 10's and 18's. • Complete Go no Go checklist for firing operations. • Follow the Downhill Checklist. • Know your LCES.
ALL	DOZER SAFETY	<ul style="list-style-type: none"> • Watch for rolling material. • Monitor safe working distances. • Avoid working below Dozer. • Utilize communication with the operator (radio or hand signals)
ALL	HAZARD TREES	<ul style="list-style-type: none"> • Identify and Isolate the area to provide for the safety of others. • Flag and make proper notifications. • Do Not Fall trees out of your certification level.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Ensure instructions are clear and understood. • Clearly communicate the leader's intent. • Use human repeaters or relays whenever needed. • Brief others as needed, ask if you don't know. • Communicate hazards to others. • Utilize assigned frequencies only, know the communications plan (ICS 205).

Prepared By (Communications Unit)		Ken Parker, COM1 951-217-4482		Incident Location		General Location of 25130 Highway 94, Portero, San Diego County CA			

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the KX and IX reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to com205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY:

LINE EMERGENCY:
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 - Closest EMS resource
 - Communications Unit
- Communications Unit contacts:
 - Ground or Air ambulance as requested
 - Operations
 - Safety
 - Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 - A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

CAMP EMERGENCY:
Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident.

- Medical Unit contacts:
 - Communications
 - Safety
 - Logistics
 - Operations
 - Crew Supervisor
 - Comps/Claims

INJURY REPORTING PROCEDURES

NATURE OF INJURY _____
 LOCATION OF PATIENT _____
 POINT OF CONTACT _____
 TRANSPORTATION REQUESTED BY: AIR ___ GROUND ___
 POINT OF PICKUP _____
 LAT _____ LONG _____
 PATIENT UNIT ID _____
 IS AN EMT WITH PATIENT: YES ___ NO ___
 AGE _____
 SEX: MALE ___ FEMALE ___

**ALL EMERGENCIES--Secure the area
and identify witnesses for later
investigation. Keep an accurate log of
events.**

ICS 206 (Rev 03/12) FR	9. PREPARED BY: (Medical Unit Leader)	10. REVIEWED BY: (Safety Officer)
		

FINANCE MESSAGE

Absolutely no offsite feeding is allowed without prior approval!!

CAL FIRE PERSONNEL

Make sure to stop by the Time Unit and start or update your FC-33.

LOCAL GOVERNMENT RESOURCES

Make sure you check in with Cal OES to start your F-42 Paperwork.

ALL HIRED EQUIPMENT

Check in with Equipment Time ASAP to drop off your agreement and start your pay document.

ALL SUPERVISORS OF HIRED EQUIPMENT

Shift Tickets for hired equipment need to be signed and turned in to Equipment Time daily. Ensure the shift ticket is filled out completely (including evaluation), accurately and legibly.

PROPERTY DAMAGE or INJURIES

Please report any property damage caused by suppression activities and/or injuries to the COMP/CLAIMS Unit Leader.

WATER USEAGE LOG

Please complete for all water taken on the incident and turn completed form in to the COMP/CLAIMS Unit Leader.

Steven Hawks – Finance Section Chief

Darren Dow – Deputy Finance Section Chief

CAL FIRE

INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/ Relocate fire lines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water.

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to the Comp/Claims Unit of the Finance Section.
- Review this check list and brief daily.

Incident Type: Vegetation	Cause: Under Investigation
Incident Location: Willard Creek Rd, West of Susanville	Total Personnel:
Acreage:	Containment:

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.

TRAINING SPECIALIST MESSAGE

Thursday at 1200 is the deadline for opening a training package on this incident.

Friday at 1000 the Training Specialist office will be closing. All trainees will need to be processed by then.

Regardless of home agency, in order to insure incident documentation of any training assignment – You must register and close your assignment with Training.

Bring a completed individual performance rating and

ICS 225/Taskbook/Qualifications card

to the exit interview.

Thank you

Dennis Martin

**Willard Fire
Demobilization Plan
CA-LMU-004695
September 13th, 2016**

Supervisory personnel are to identify resources excess to the needs of the incident at the earliest opportunity. If possible, this should be done within 36 hours in advance of a proposed release by filling out a General Message Form (ICS 213) or Declaration of Excess Resource Sheet. Please include name, request number, date, ETD, ETA, and if available for reassignment. By definition, surplus personnel are available for release if they have met the 2:1 work rest requirements, and have rested for a minimum of 8 hours.

Section Chiefs will approve all excess resource lists and the lists will be forwarded to the Resources Unit for processing. Operational resource excess lists shall be prepared by the Planning Section and approved by the Planning Section Chief.

The release priorities are:

- Local Government
- OES
- Hired Equipment
- Cooperating Agencies
- Federal Resources
- CAL FIRE Resources

The needs of the incident and off-incident issues may necessitate the modification of these priorities in certain cases.

Information concerning surplus resources will be forwarded to the Lassen-Modoc Unit expanded dispatch by the Demobilization Unit (with ECC Support Team at incident). This information will include the resource name, request number, ETD, and ETA. Additionally, the availability of the resource for a new assignment will be provided.

All government vehicles and hired equipment must be safety inspected prior to release. Safety inspections shall be coordinated with the Ground Support Unit Leader. All deficiencies will be corrected prior to departure for home unless agency head signs a waiver of inspection.

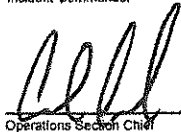

Surplus resources lists will be posted within the ICP and at the Demobilization Unit with a schedule for resources to pick up the checkout form (ICS-221) at the Demobilization Unit and begin the checkout process. Finance will be the final stop prior to returning to the Demobilization Unit. All resources must complete the demobilization process. Once the ICS-221 has been completed and returned in to the Demobilization Unit, the resource will be released from the incident to home, re-assigned to another incident, or held as directed by Northern Region Operations Center (North-Ops).

All Resources will meet any agency-specific and/or DMV rest requirements before demobilizing from the incident. The operator must be rested prior to driving. A resource encountering a delay enroute will contact the appropriate home unit or incident.

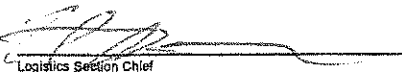

APPROVED:

Incident Commander

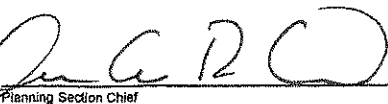

Safety

Operations Section Chief

Finance Section Chief

Logistics Section Chief

Expanded Dispatch Supervisor

Planning Section Chief

Demobilization Unit Leader

Fire Suppression Repair Plan

Roads:

- Install waterbars where waterbars previously existed.
- Install new waterbars where needed.
- Install or maintain rolling dips where a rolling dip previously existed.
- Re-establish existing berms where applicable.
- Clean culverts plugged with soil and rock resulting from fire road use.
- Dip out stream crossings and stabilize if filled with dirt.
- Remove all slash and debris from culvert inlets/outlets.
- Water roads for dust abatement.

Hand Lines and Dozer Lines

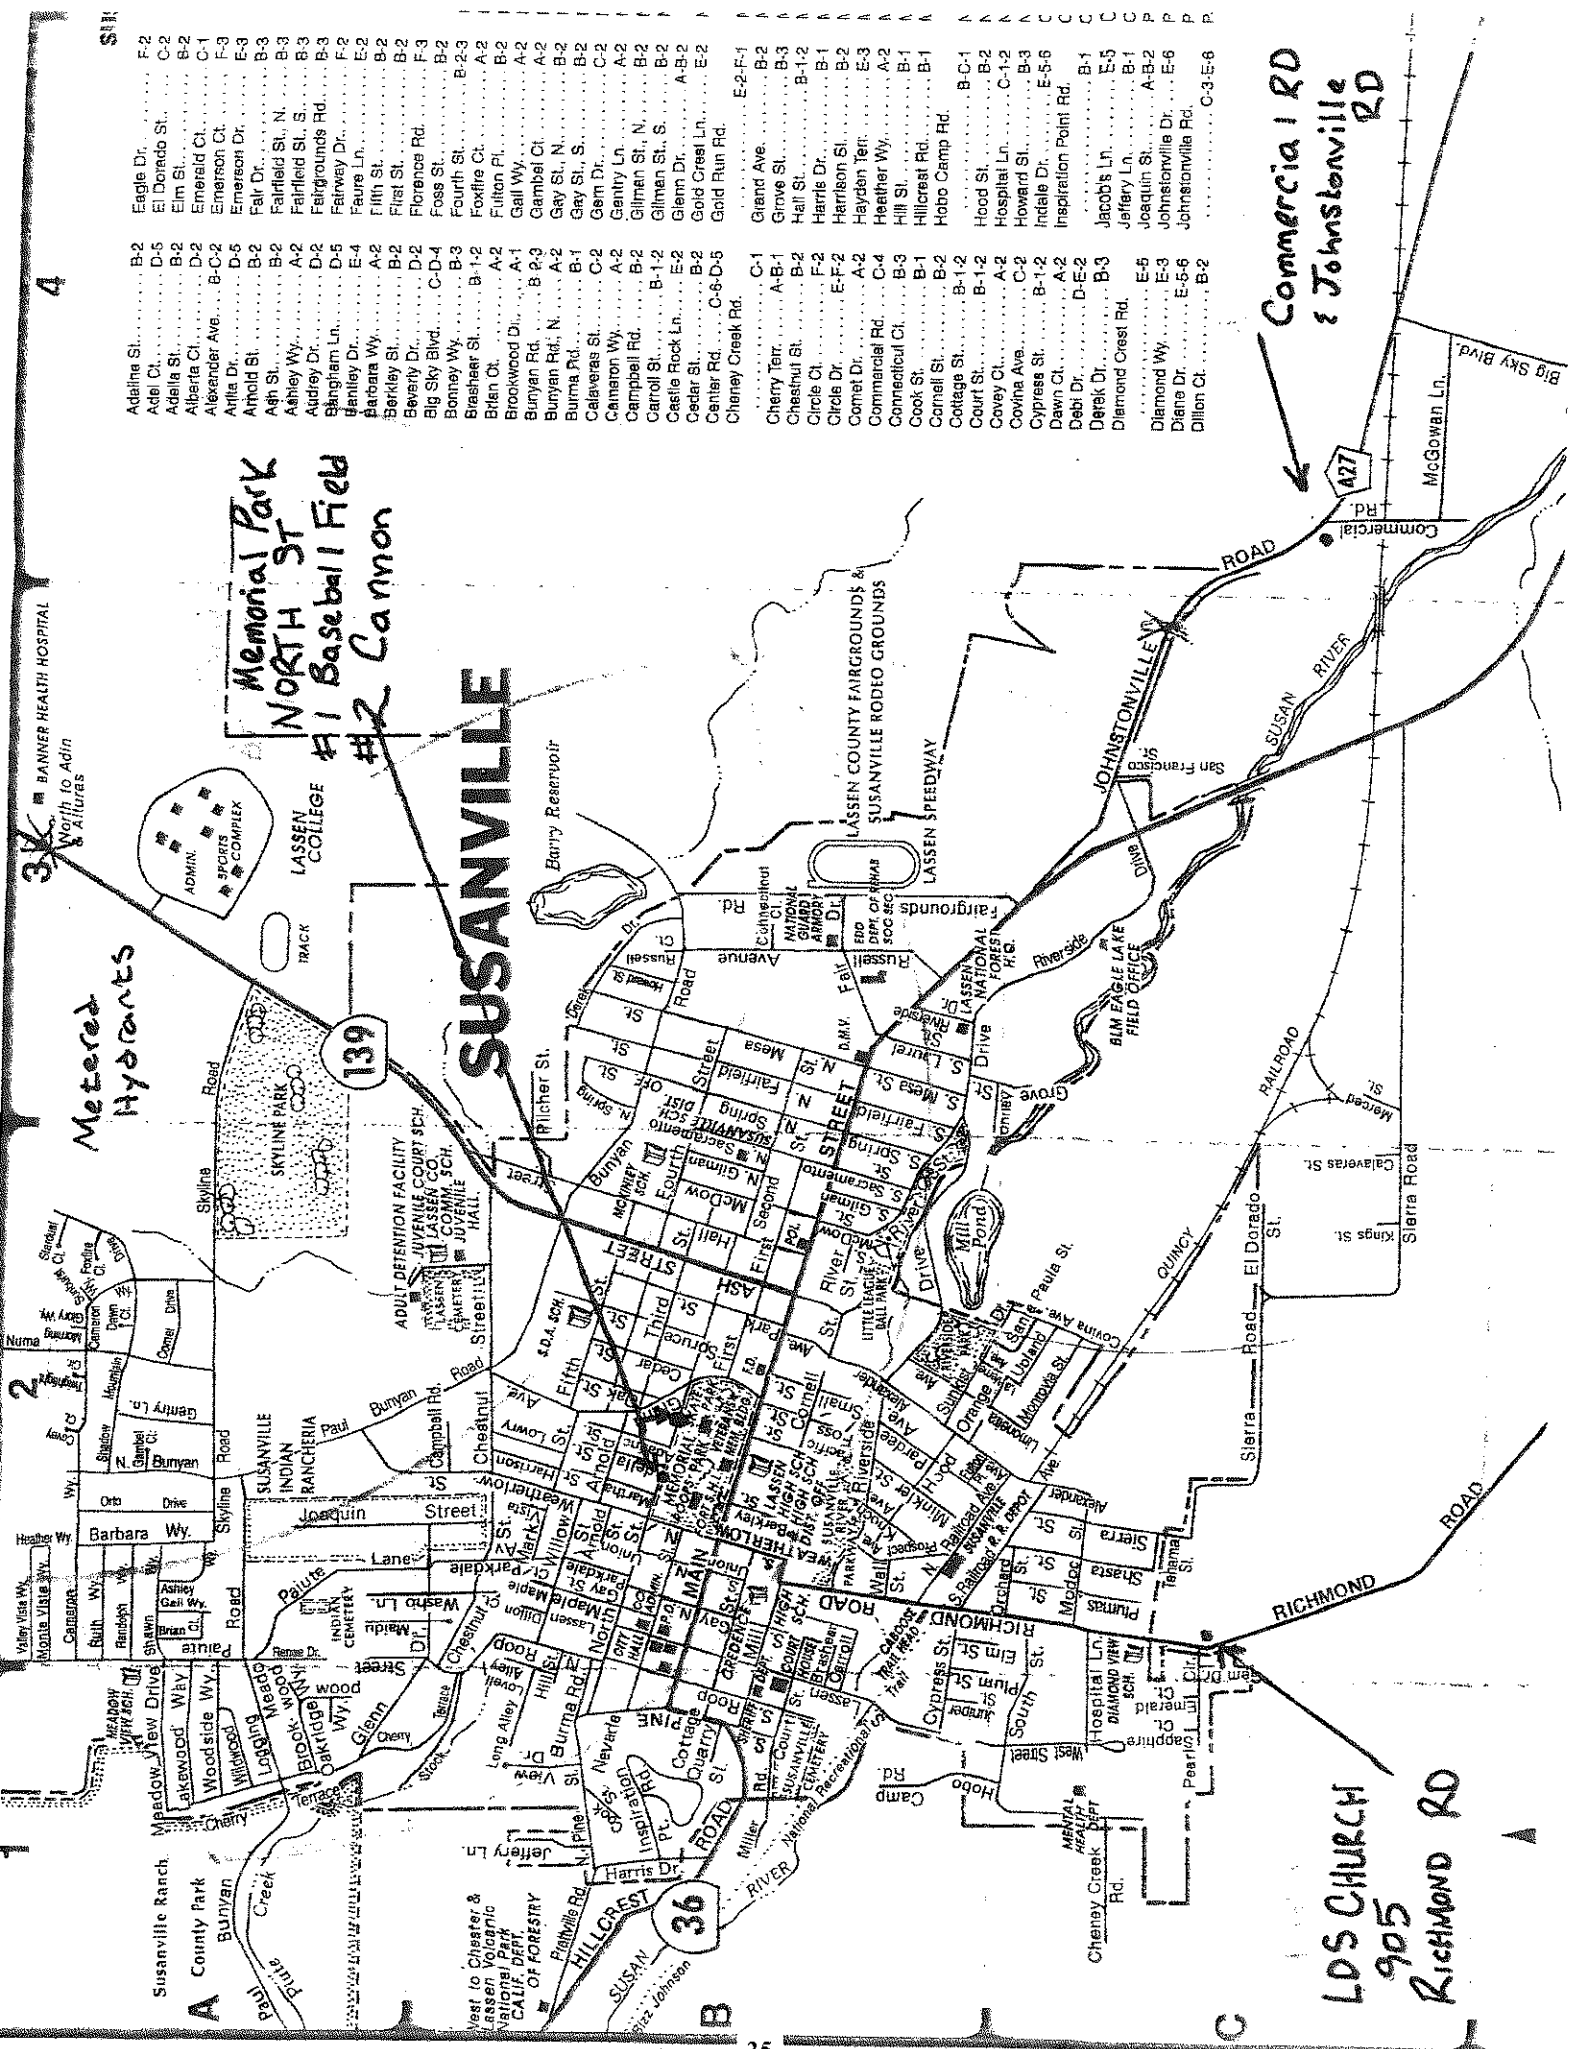

Install waterbars as described in the guidelines below. Waterbars are designed to Intercept, slow and spread precipitation run-off to reduce sediment transport and soil erosion. The intent is to move water off the fireline before it can build up enough energy to erode and transport sediment.

Waterbar Guidelines:

These spacing distances should be used as a **guide**. Judgment should be used in locating waterbars to minimize erosion potential. It may not be possible or necessary to place waterbars in steep or rocky areas. Install waterbars at the following recommended minimum intervals:

<u>% Slope</u>	<u>0-25</u>	<u>26-50</u>	<u>>50</u>
Hand Line	100'	75'	50'
Road /Dozer	150'	75'	50'
