

COLD INCIDENT

16 LNU 007135

INCIDENT ACTION PLAN

OPERATIONAL PERIOD

8/5/2016 0700

to

8/6/2016 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: COLD	2. Operational Period Date From: 8/5/2016 Time From: 0700	Date To: 8/6/2016 Time To: 0700
----------------------------------	---	------------------------------------

3. Objective(s):

- Management Objectives
- Provide for emergency personnel and public safety at all times
 - Protect property, improvements and infrastructure
 - Foster and maintain relationships with all cooperators and stakeholders
 - Protect economic, natural, cultural and heritage resources
 - Ensure coordinated, timely and accurate release of public information
 - Maintain fiscal accountability and keep costs commensurate with values at risk
- Control Objectives
- Keep the fire East of Lake Berryessa
 - Keep the fire South of Enos Creek
 - Keep the fire West of Grapevine Spring
 - Keep the fire North of Hwy 128

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history, drought stressed trees, and new communications plan.

5. Site Safety Plan Required? Yes ___ No X

INCIDENT WEATHER FORECAST

FORECAST NO: 1
PREDICTION FOR: Friday DAY/NIGHT SHIFT

INCIDENT NAME: Cold Fire
UNIT: CALFIRE Sonoma-Lake-Napa Unit

SHIFT DATE: 5 August 2016
TIME AND DATE
FORECAST ISSUED: 2100 / 4 August 2016

SIGNED: 
Jason Clapp
Incident Meteorologist

WEATHER TODAY:

WEATHER: Mostly cloudy on SW edge in morning with stratus, otherwise mostly sunny. Continued onshore pressure gradient will keep afternoon and evening breezy ridge winds with increased RH. Expected wind eddies in upper Putah Creek drainage and mid to upper slopes on western side of fire.

TEMPERATURES: 84-90 *Trend: Little Change*
RELATIVE HUMIDITY: 30-35% *Trend: Little Change*

20 FT WINDS:

RIDGETOP – NW 3-7 mph in the morning shifting WSW 6-9 mph gusting 15 mph by afternoon, then increasing 8-12 mph gusting to 20 mph (1800-2400).

SLOPE/VALLEY – SE 3-7 mph in aligned canyons by mid-morning, then upcanyon gusts 15 mph in afternoon with eddying winds on mid to upper slopes in Putah Creek drainage.

LAL: 1 **Stability/Inversion:** Weak inversion breaking around 1100.

WEATHER FOR TONIGHT AFTER 2200: Mostly clear with marine stratus near western edge of fire.

Low temperatures: 55-62

Max RH: 70% upper elevation, 90% lower elevations.

20FT Winds: W 5-10 mph gusting 15-20 to near midnight, then weakening & becoming terrain-driven.

WEATHER DISCUSSION: Upper trough near coast to keep strong onshore winds through Saturday with a **more unstable airmass Saturday**. Then the upper disturbance moves overhead Sunday with slightly less wind. Temperatures will remain cool with elevated humidity. Monday will be slightly warmer and drier with some drier WNW ridge winds.

OUTLOOK FOR SATURDAY/SUNDAY:

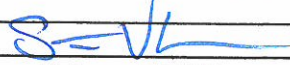

Saturday: Mostly sunny and slightly cooler with decent onshore flow. Upper trough offshore will **destabilize atmosphere**. Potential isolated thunderstorms north over Mendocino NF and Trinity Alps.

High temps: 81-86. Max/ Min RH: 85% / 35%. Winds: Slope winds with SSW ridge winds 6-12 gusting 20-25 mph mid-afternoon to 2200. W 6-10 mph gusting 18 down Putah Creek Canyon late evening.

Sunday: Temperatures stay cool with lingering upper trough and onshore flow. Upper trough moves just east. Upper level WNW ridge flow brings more westerly ridge winds than Saturday.

High temps: 83-88. Max/ Min RH: 75% / 30%. Winds: Slope winds with WSW ridge winds 6-10 gusting 15-20 mph mid-afternoon to 2200. W 4-7 mph gusting 15 down Putah Creek Canyon late evening.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1	TYPE OF FIRE: Wildland
FIRE NAME: COLD	OPERATIONAL PERIOD: 8/5 – 8/6/2016 0700-0700
DATE ISSUED: 8/4/2016	TIME ISSUED: 2000
UNIT: LAKE NAPA	SIGNED:  Typed/printed: Stephen Volmer FBAN

INPUTS

WEATHER SUMMARY:

Continued on shore winds will produce cooler temperatures and high relative humidity throughout the fire area. Expect good overnight RH recovery. Daytime RH 30-35% Night time RH 70-90%

Ridgetop winds will change from NW 3-7 mph to WSW 6-9 mph in the afternoon. Winds will increase to 8-12 mph with gusts to 20 after sundown. Valley winds will be SE 3-7 mph and then shift up canyon with gusts of 15mph after 1200. Expect eddying winds on ridgetops.

Day time temperatures 84-90 degrees cooling to 55-62 degrees in the evening.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

All fuels throughout the region have been stressed by drought, which is lending to more rapid rates of spread and producing easier ignition. Large diameter fuels will be completely consumed within the operational period. Fuels outside of the Monticello 2014 fire, North of Crane Ridge, have not burned in over 30 years. Any spots or roll-outs that get established in a North/South drainage will be in alignment with the wind, and topography making for the possibility of large fire runs.

ERC are just below the 90th percentile.

SPECIFIC:

GRASS... FLAME LENGTH 5'
RATE OF SPREAD 35 Ch/Hr
SPOTTING DISTANCE .25 Mi
PROB of IGNITION 90%

BRUSH... FLAME LENGTH 15'
RATE OF SPREAD 42 Ch/Hr
SPOTTING DISTANCE .40 Mi
PROB of IGNITION 90%

AIR OPERATIONS:

- Ridgetop winds will be strong and gusty. Eddys will be present on the leeseide of ridges.
- Visibility will be moderate throughout the operational period.
- Smoke transport will cause hazy conditions to the East of the fire.

SAFETY

- Be alert for wind shifts and changes in speed.
- Expect burned material to roll-out easily due to steep topography, and promote fire spread in drainages.
- Heavy rotor wash and water drops will cause fire weakened timber to drop expectantly.

COLD INCIDENT CA LNU 007135

SAFETY MESSAGE	1. INCIDENT NAME: Cold	2. DATE PREPARED: August 4, 2016	3. TIME PREPARED: 14:00
4. PREPARED BY: Joe Buchmeier SOF1	5. LEADER NAME: Joe Buchmeier SOF1	6. OPERATIONAL PERIOD: 8/5/16 0700 TO 8/6/16 0700	

SAFETY MESSAGE

NEW FIRES IN THE UNIT EVERYDAY, STAY FOCUSED AND HAVE A CONTINGENCY PLAN

- Drought stressed trees and stump holes are a big problem maintain situational awareness and brief your personnel on these hazards.
- Be aware of complacency, many of us were in this same place last year, while that can help some of the operation it might hinder our planning. Have a contingency plan.
- Stay aware of what is happening around you and adapt your exit strategy accordingly. ESTABLISH: LOOKOUTS, COMMUNICATIONS, ESCAPE ROUTES AND SAFETY ZONES.
- Watch for signs of fatigue in your personnel, with draw down in the state most of us have been working on other fires.
- Only new generation Nomex should be on this incident, if you are using improperly marked old Nomex you will need to exchange it, inspect all PPE being used including fire shelters.
- No PPE allowed in the eating areas, wash hands regularly and always before entering the eating areas.
- If personnel get fatigued but it's not a medical emergency use line medics for evaluation and rehab in a shaded area on the fire line.
- Drive with head lights on and slow down, be aware of school zones as some schools are back in session.
- Watch out for civilian traffic in the incident base, maintain the 5 MPH speed limit and follow the one way traffic plan.
- Units working on Hwy 128 use code three lights while parked, be aware of traffic passing in the open lane.

IF IT'S PREDICTABLE IT'S PREVENTABLE

CAL FIRE

Archaeological and Historic Properties: Fireline Guidance for the Cold Fire Yolo and Napa Counties

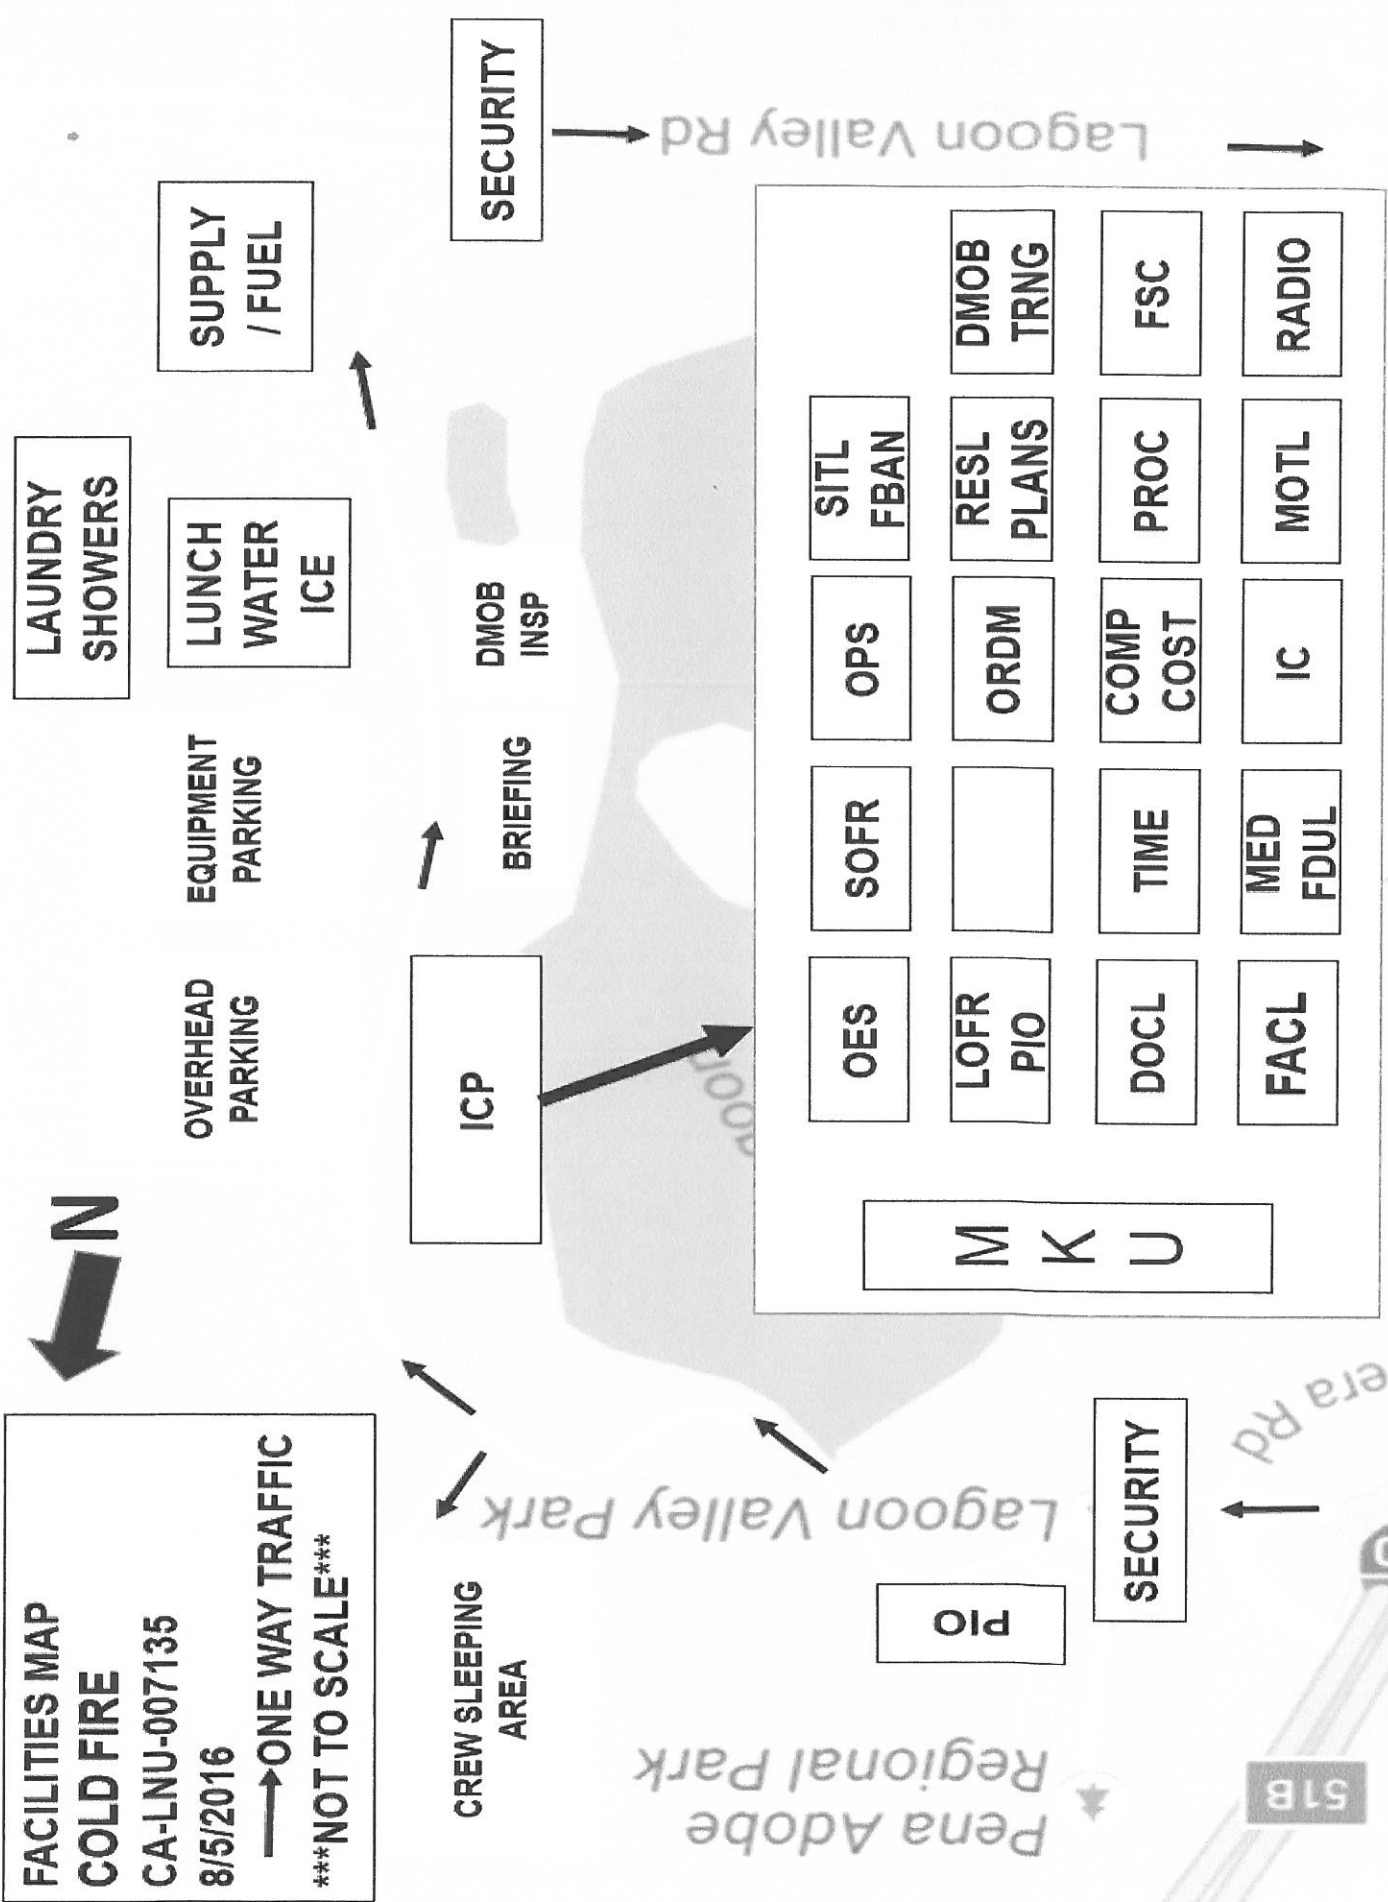

Do not compromise safety for the protection and preservation of archaeological and historic properties. When possible and prudent:

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs but can occur in other areas as well. The most common indicators of prehistoric sites in this area are scatters of shiny black obsidian or chert flakes from tool making activities, food processing features including bedrock mortars, and areas of dark soils. Historic sites include homesteads and/or cabins that contain foundations, rock chimneys, wells, can/bottle scatters, and/or non-native vegetation.
2. Known sites will be flagged with bright pink plastic flagging tape. Note that much of the area has never been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
4. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
5. Note locations of discovered resources on a map. Better yet take site coordinates with a GPS. Leave information for the archaeologist with the Plans Unit so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
6. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.

COLD FIRE

*****SITUATIONAL AWARENESS FOR OFF SITE HOTEL STAYS*****

- Keep your eyes open when entering the parking lot to park
- Watch out for each other as you unload your equipment
- Take all of your valuables into the hotel if at all possible
- Lock all of the equipment you need to inside a locked part of your rig
- Park under lights when possible
- Ask the Hotel if they have security and if they do ask for patrols
- Walk around your equipment prior to entering and leaving
- Always watch your surroundings
