#### **INPUTS**

WEATHER SUMMARY: Strong high pressure will remain over the region and bring very hot temperatures to the location, low humidities and poor humidity recoveries each day and night. Local easterly gusts to 20 mph late Thursday night and in the early morning hours and again Friday night.

WEATHER: Sunny, Smoky, very hot, and very dry.

TEMPERATURES / HUMIDITY: Day: Max Temperature 103-108 F / Min Humidity: 7%-12%

Night: Min Temperature 78-83 F / Max Humidity: 20%-30%

**20 FT WINDS:** Slope/Valley: Northeast/Downslope 7-12 mph in the morning, shifting to the southwest

up to 6 mph in the afternoon. Southwest winds up to 6 mph shifting to the east 5 to 10 mph

after midnight.

Ridgetop: East 8 mph in the morning, becoming northeast 6 mph in afternoon continuing through the

evening hours.

#### **OUTPUTS**

#### FIRE BEHAVIOR

**GENERAL:** The fire is burning in a mix of grass and brush with stands of timber and timber litter that are extremely dry and have a heavy fuel loading. The fire spread is being driven by fuel and topography runs with short range spotting. Group tree torching could cast embers to produce spot fires in receptive fuel beds, especially where timber litter fuel loading is high. Nighttime humidity recovery is expected to be poor, however the fire activity should decrease slightly due to the lack of solar heating on the fuels.

Probability of Ignition: 100% 100 HRFM: 97th Percentile

FDFM: 2%

**ERC:** Above 90<sup>th</sup> Percentile **1000 HRFM:** 90<sup>th</sup> Percentile

Brush: Head Fire: 23-47 ft/min, Flanking Fire: 5-9 ft/min, Timber Understory: 7-9 ft/min, Flanking Fire: 1-2 ft/min,

Timber Understory: Head Fire: 5-7 ft, Flanking Fire: 2-3 ft,

Backing Fire: 2-5 ft/min Backing Fire: >1 ft/min

Flame Length- Grass: Head Fire 5-13 ft,

Brush: Head Fire: 11-17 ft,

Flanking Fire: 2-6 ft, Flanking Fire: 5-8 ft,

Backing Fire: 2-5 ft Backing Fire: 4-6 ft Backing Fire: 1-2 ft

Spotting Distances- Up to 500 feet

#### **AIR OPERATIONS:**

Smoky conditions may make visibility difficult for air resources.

Sunrise: 0635 Sunset: 1938

#### **SAFETY**

- Identify Trigger Points Early in the Shift and Respect Them!
- Watch out when on a hillside where rolling materials can ignite fuel below.
- Expect Areas Where Wind and Terrain Align to Produce Surprisingly Rapid Rates of Spread!

#### PONDEROSA SAFETY MESSAGE

#### **Maintain Situational Awareness**

INCIDENT: Ponderosa Fire CA-BTU-013737 DATE: September 1, 2017 TIME: 0700-0700

Major Hazards and Risks: Extreme fire behavior, Hot dry weather, Steep terrain, Hazard trees.

Heat/Fatigue/Dehydration: Hot weather for the next several days, be alert for signs of fatigue and take breaks as necessary. Be alert for signs of heat stress in yourself and others. Utilize cooling stations when appropriate.

**Fire Behavior**: Fuels are receptive to fire spread. A small amount of wind on this dry fuel changes fire behavior dramatically!! Be alert to changes in wind direction and expect changes in fire behavior.

**Hazard trees:** Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Dead trees from bug kill. Review and follow **Hazard Tree Safety**, pg. 22-23 in your IRPG.

Steep slopes/rolling material: Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.

**Personnel:** Manage yourself and those around you for fatigue. Drink fluids frequently and eat nutritious food regularly. As fatigue increases, injuries tend to increase also.

**Driving:** Slow Down! Drive defensively. Expect the unexpected around every curve. Drive with headlights and seatbelts on. Coordinate your movements on all one-lane roads.

**Downed powerlines and High voltage powerlines:** Follow power line safety guidelines (IRPG pg.24), watch out for burned out power poles.

Review your ICS 206 and know what to do in the event of an (IWI).

Lookouts, Communication, Escape routes, Safety zones

#### **Tailgate Safety**

- Accountability: everyone checks in and everyone checks out. Supervisors know where their crews are at all times
- Communication: everyone knows the com-plan
- Briefing: everyone knows the plan and the contingency plan
- Safety gear: everyone has the appropriate safety gear in good working condition
- LCES: they are clear and made known to everyone

### **Heat Illness Prevention:**

- Drink plenty of fluids:
  - Water and Gatorade
- Avoid drinking energy drinks
- Rest when you can
- Find shade when you can
- Eat nutritious food regularly

# PONDEROSA PUBLIC INFORMATION

Incident Information Line: 503-538-7826

Media Line: 916-203-4153

#### **MEDIA**

<u>California State Penal Code Section 409.5(d)</u> allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire
  personnel cannot provide members of the media with authorization to enter private
  property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

#### CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post**:

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

#### PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

#### **LOST AND FOUND**

The Information staff will manage Lost and Found items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.

#### MAIL SERVICE

The Information staff will assist you in mailing and receiving letters and packages.

### Archaeological and Historic Properties: Fireline Guidance for the Ponderosa Fire Butte County

Do not compromise safety for the protection and preservation of archaeological and historic properties. When possible and prudent:

- 1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs but can occur in other areas as well. The most common indicators of prehistoric sites in this area are scatters of chipped stone flakes from tool making activities, food processing features including bedrock mortars, and areas of dark soil. Historic sites include homesteads and/or cabins that contain foundations, rock chimneys, wells, can/bottle scatters, ditches, mining tailings, and/or non-native vegetation.
- 2. Known sites will be flagged with a length of red flagging and a length of white plastic flagging tape close together. Note that much of the area has never been surveyed for archaeological resources and many sites out there have yet to be discovered.
- 3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
- 4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
- 4. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons. No collection permitted for any reason.
- 5. Note locations of discovered resources on a map. Better yet take site coordinates with a GPS. Leave information for the archaeologist with the Plans Unit so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in pink if possible.
- 6. If you encounter human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
