### OUTPUTS

#### FIRE BEHAVIOR

**GENERAL:** The fire is burning in a mix of grass and brush with stands of timber and timber litter that are extremely dry and have a heavy fuel loading. The fire spread is being driven by fuel and topography runs with short range spotting. Group tree torching could cast embers and produce spot fires in receptive fuel beds, especially where timber litter fuel loading is high. A thermal belt exists in the evening where temperatures may be up to 10 degrees hotter than the predicted temperature. Nighttime humidity recovery is expected to be very poor. This combination of poor humidity recovery and the thermal belt will result in an increase in fire activity in the affected areas.

## PONDEROSA SAFETY MESSAGE

### **Maintain Situational Awareness**

**INCIDENT:** Ponderosa Fire CA-BTU-013737      **DATE:** September 2, 2017      **TIME:** 0700-0700

**Major Hazards and Risks: Extreme fire behavior, Hot dry weather, Steep terrain, Hazard trees.**

**Heat/Fatigue/Dehydration:** Hot weather for the next several days, be alert for signs of fatigue and take breaks as necessary. Be alert for signs of heat stress in yourself and others. Utilize cooling stations when appropriate.

**Fire Behavior:** Fuels are receptive to fire spread. A small amount of wind on this dry fuel changes fire behavior dramatically!! Be alert to changes in wind direction and expect changes in fire behavior.

**Hazard trees:** Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Dead trees from bug kill. Review and follow **Hazard Tree Safety**, pg. 22-23 in your IRPG.

**Steep slopes/rolling material:** Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.

**Personnel:** Manage yourself and those around you for fatigue. Drink fluids frequently and eat nutritious food regularly. As fatigue increases, injuries tend to increase also.

**Driving:** Slow Down! Drive defensively. Expect the unexpected around every curve. Drive with headlights and seatbelts on. Coordinate your movements on all one-lane roads.

**Downed powerlines and High voltage powerlines:** Follow power line safety guidelines (IRPG pg.24), watch out for burned out power poles.

**Review your ICS 206 and know what to do in the event of an (IWI).**

**Lookouts, Communication, Escape routes, Safety zones**

#### Tailgate Safety

- **Accountability:** everyone checks in and everyone checks out. Supervisors know where their crews are at all times
- **Communication:** everyone knows the com-plan
- **Briefing:** everyone knows the plan and the contingency plan
- **Safety gear:** everyone has the appropriate safety gear in good working condition
- **LCES:** they are clear and made known to everyone

#### Heat Illness Prevention:

- Drink plenty of fluids:
  - Water and Gatorade
- Avoid drinking energy drinks
- Rest when you can

## EMERGENCY FIRE SUPPRESSION REPAIR PLAN - PONDEROSA INCIDENT

**Fire Suppression Repair** is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas caused by the fire. We cannot upgrade facilities beyond their pre-fire condition. Fire suppression repair shall be applied to mitigate infrastructure damage and natural resource damage.

**Infrastructure Damage:** Culverts and other watercourse crossings, water sources, trails, road barriers removed for fire access, trash, debris and supplies left by fire suppression activities; miscellaneous.

**Natural Resource Damage:** Repair of existing problems caused by fire suppression activities (direct effect) to natural resources and to prevent likely future problems such as accelerated erosion caused by rains (indirect effect). The goal is to minimize soil erosion, adverse impacts to water quality, and adverse impacts to protected species of plants and animals

### REPAIR GUIDELINES

**General:** Restore berms and barriers removed for fire control access.

**Drop Points/Staging Areas/Safety Zones:** New construction - cross drain and abandon (if applicable). Existing - repair to original condition, remove debris resulting from use. Pick up all trash.

**Roads:** Reshape soil surfaced roads that were used during fire control operations. Roads should be out-sloped with rolling dips where degradation of the road prism has resulted from fire control operations. Clean out culvert inlets and outlets as needed. Report any damaged culverts to the Fire Suppression Repair Specialist for specific repair guidance. Breach berms, where appropriate, to facilitate drainage.

**Firelines:** Break apart dozer piles of pushed over trees, vegetation and soil, and spread along tractor roads, tractor fire breaks, or any other areas disturbed during fire suppression activities. Lop and scatter displaced vegetation to a height of less than 30 inches or chip within 100' of a gravel road or structure. Scatter the lopped material along the fire line. Pull back any excess soil material sidecast along roads or tractor disturbed areas that are located within 100 feet of any watercourse or spring. Install waterbreaks on all constructed or used dozer lines using the following criteria:

Fireline and road gradient (%):	<u>0-30</u>	<u>31-50</u>	<u>&gt;50</u>
Fireline waterbreak spacing:	100'	75'	50'
Road waterbreak spacing:	150'	100'	75'

Waterbreaks and/or rolling dips shall be used to reduce the volume and velocity of water by directing it off fire lines as soon as possible at controlled locations. The outfall end of all waterbreaks shall be opened by hand if necessary. Waterbreaks should be located to discharge into natural vegetation. Waterbreaks should cross the fire line at an angle of approximately 45 degrees.

**Handlines:** All waterbreaks shall be installed diagonally with a minimum cut of 4" into existing grade, and minimum height of 8". Waterbreaks shall be constructed to allow for drainage at the discharge end into non-erodible material.

Fireline and road gradient (%):	<u>0-30</u>	<u>31-50</u>	<u>&gt;50</u>
Handline waterbreak spacing:	75'	50'	25'

**Slash Piles:** Piles within 100' of permanent structures or public or un-gated private roads will be lopped and/or scattered within 30" of the soil surface. Scatter smaller debris where applicable.

**Watercourse Crossings:** All slash, soil, and debris deposited into watercourses resulting from fire suppression activities shall be removed and stabilized above the high-water line. Where fire lines are constructed within 100' of flowing watercourses, slash mulching will be applied. All loose soil must be pulled away from the watercourse and stabilized.

**Archaeological or Historic Sites:** All potential sites shall be avoided. Contact Incident Archaeologist.

**Other Repair Concerns:** Remove all trash from the fire lines and other affected areas.

# PONDEROSA PUBLIC INFORMATION

**Incident Information Line: 503-538-7826**

Media Line: 916-203-4153

## **MEDIA**

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

## **CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)**

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

## **PICTURES AND VIDEO OF INCIDENT**

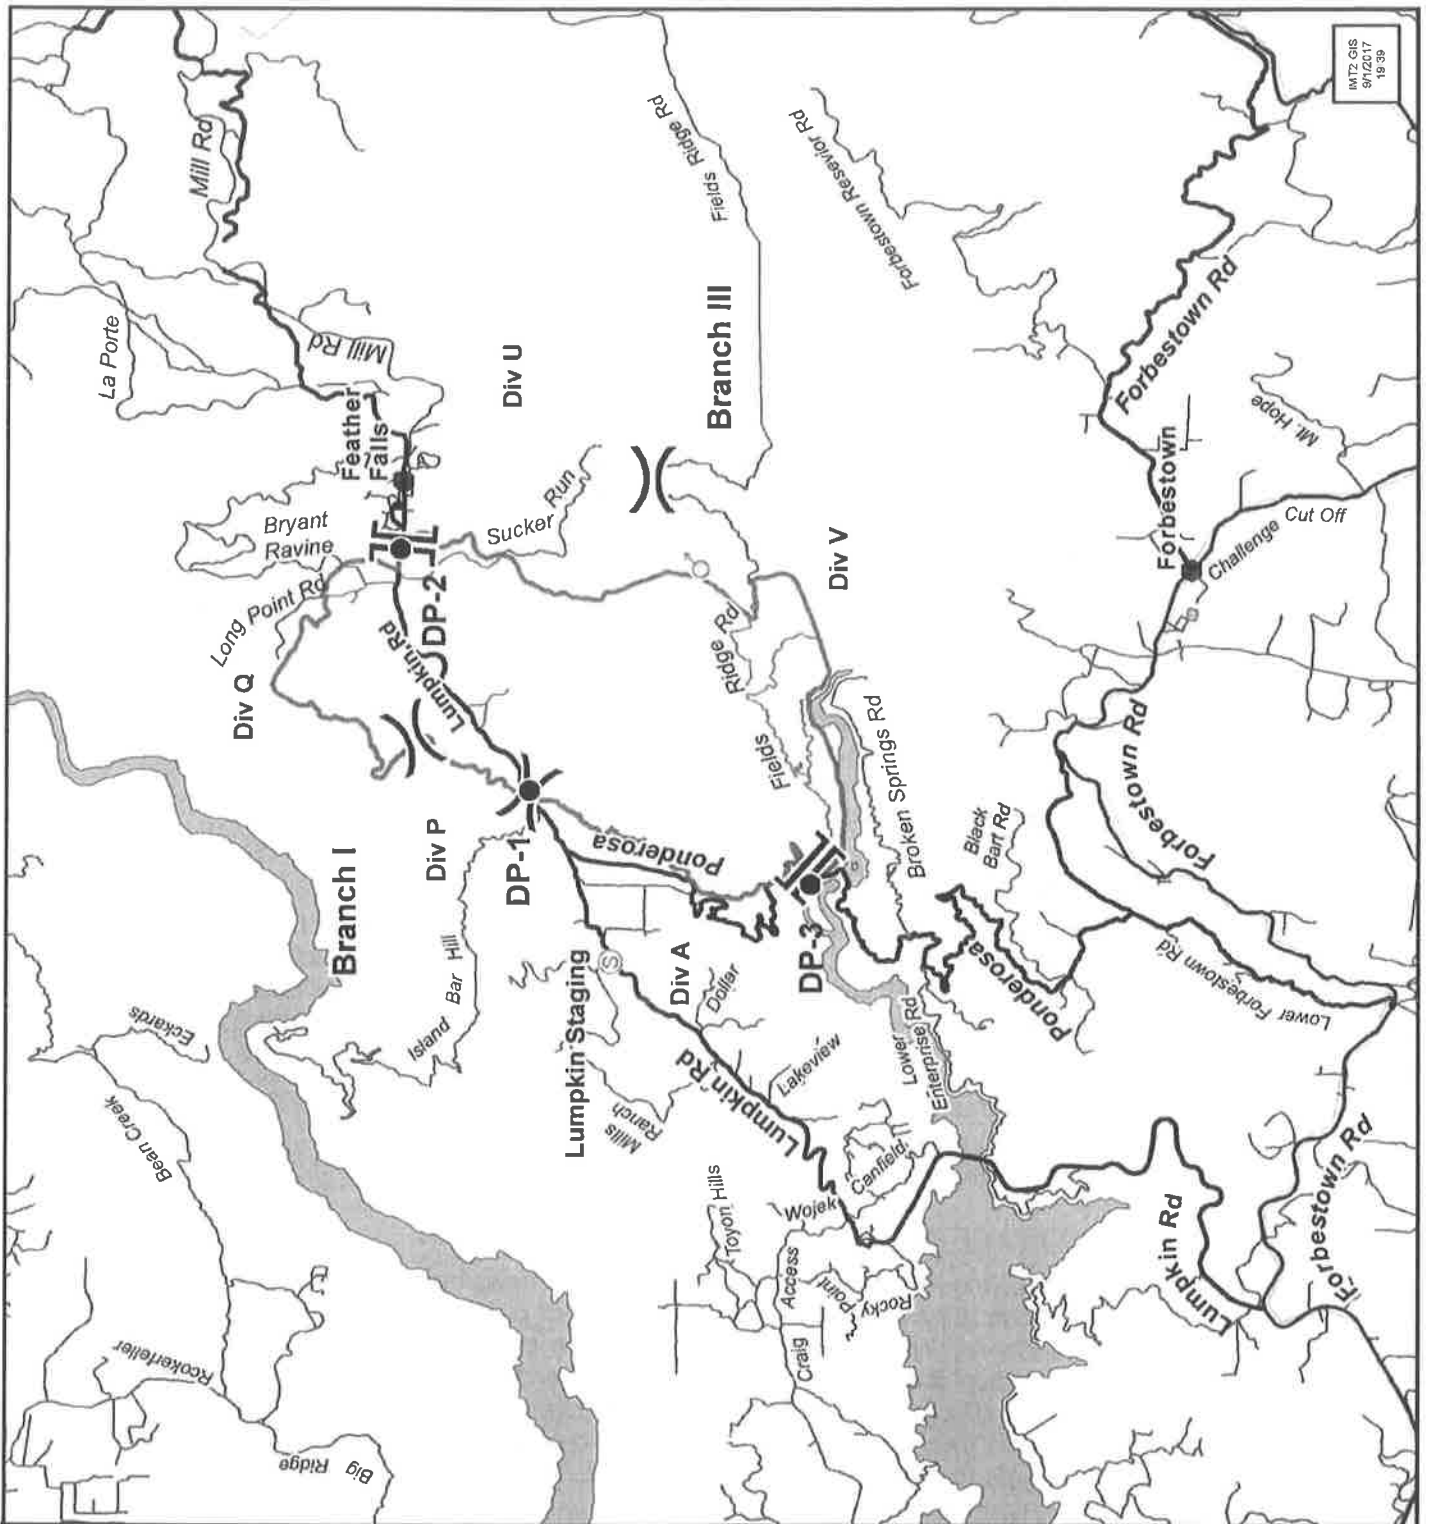

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

## **LOST AND FOUND**

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.
