National Weather Service Sacramento

2017-10-09 7:10 PM PDT

SPOT FORECAST for Atlas FIre...CAL FIRE National Weather Service SACRAMENTO CA 710 PM PDT Mon Oct 9 2017

Forecast is based on request time of 0800 PDT on October 10. If conditions become unrepresentative...contact the National Weather Service.

.DISCUSSION...

A dry weather system will pass just north of the fire site Tuesday into Wednesday. Relative humidity will be low with good overnight recovery for the lower elevations. Winds will be shifting the next couple of days as the system approaches and moves through the region. North winds are expected to start to develop after 6 am on Wednesday.

.TUESDAY...

Sky/weather.....Sunny. Max temperature....78-83.

Min humidity......18-23 percent.

Wind (20 ft).....

Slope/valley.....East winds up to 6 mph shifting to the south 5 to 10 mph with local gusts up to 20 mph in the afternoon.

Ridgetop......Southeast 7 mph.

Mixing height.....1900-3600 ft AGL increasing to 4400-5600 ft AGL

early in the afternoon.

Transport winds....Southeast 7 mph.

.TUESDAY NIGHT...

Sky/weather......Mostly clear.

Min temperature....47-52.

Max humidity......84-89 percent.

Wind (20 ft).....

Slope/valley......West winds 6 to 12 mph. Gusts up to 20 mph in

the evening.

Ridgetop...... West 7 mph.

Mixing height......4400 ft AGL decreasing to 1100-1900 ft AGL

early in the evening.

Transport winds.....West 7 mph.

.WEDNESDAY ...

Sky/weather.....Sunny. Max temperature....73-78.

Min humidity......19-24 percent.

Wind (20 ft).....

Slope/valley.....North winds 5 to 11 mph.

Ridgetop.........North 10 mph.

Mixing height......1200-2600 ft AGL increasing to 5100-6200 ft AGL

early in the afternoon.

Transport winds....North 10 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER 1	TYPE OF FIRE Wildland
FIRE NAME Southern LNU Complex	OPERATIONAL PERIOD 10-10-2017 (24 HOUR SHIFT)
DATE ISSUED 11-09-17	TIME ISSUED 2230 HOURS
	SIGNED Jon Heggie FBAN

INPUTS

WEATHER SUMMARY

Winds are switching to a southwest direction across most of the area. This will likely start pushing the ongoing fires in new directions, especially any open line on the east side of the ongoing fires. Areas below 1000 feet in the Napa and Sonoma Valleys will see better humidity recovery but the hills will continue with poor humidity recovery. Be aware strong southwest winds coming through the Golden Gate and impacting the southern Sonoma and Napa Valley region.

SEE SPOT WEATHER FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL

Probability of Ignition = 80-90% Spotting Distance= 1/4 (light winds) to 3/4 mile (strong winds) Dead Fuel Moisture 3% Live Fuel Moisture 57%

The fire is burning in Oak woodland with a heavy grass load. Pockets of brush contain large amounts of dead fuel due to previous years of drought. Fire history in the area various by location but there are some recent incidents that have reduced available fuel.

SPECIFIC

<u>Atlas</u>

With a diminished north wind the fire has now changed direction under a southwest flow and is heavily influenced by fuel and topography. Fire activity continues to be heavy with short range spotting and sustained uphill runs. The fire is pushing to the Green Valley area and could impact numerous homes with limited means of egress. Expected rates of spread in the grass to be 100 ch/h with flame lengths to be at 19 ft. Rate of spread in the brush will be 75 ch/h and flame lengths at 17ft. Growth potential remains high on this fire.

Partrick

This fire is still actively burning between the communities of Napa and Sonoma. Heavy fire activity on Arrowhead Mt will push the fire toward Lovall Valley Rd into heavily populated areas. Expected rates of spread in the grass to be 65 ch/h with flame lengths to be at 15 ft. Rate of spread in the brush will be 50 ch/h and flame lengths at 13 ft. Growth potential remains high on this fire.

Nuns

The community of Glen Ellen has and will continue to be impacted by this incident. This fire is burning into the Maycamas Mountains and has potential for large growth. Expected rates of spread in the grass to be 100 ch/h with flame lengths to be at 19 ft. Rate of spread in the brush will be 75 ch/h and flame lengths at 17 ft. Growth potential remains high on this fire.

<u>Adobe</u>

Wind and slope alignment will have a heavy influence on this fire and continued burning in the communities of Kenwood and Bennett Valley. Growth potential is moderate on this incident. Expected rates of spread in the grass to be 65 ch/h with flame lengths to be at 15 ft. Rate of spread in the brush will be 50 ch/h and flame lengths at 13 ft.

AIR OPERATIONS

• Identify where crews are in the area before drops. Smoke may impair vision of crews working in the area

SAFETY

- Spots establish rapidly so escape routes must be short and effective. 4x flame length separation distance minimum.
- When developing strategies and tactics, safety zones and escape routes you should be evaluating potential fire behavior (worst case scenario), not just observed fire behavior.

SAFETY MESSAGE

Accountability (n)

an obligation or willingness to accept responsibility or to account for one's actions

- Be aware of changing wind and weather conditions.
- Trees are weakened due to fire activity. Look Up, Down, and Around.
- Use caution when working around structures that have been affected by fire.
- Monitor your hydration/nutrition intake and keep adequate supplies of each.
- Be sure to ALWAYS use the appropriate PPE.
- · Drive defensively and expect the unexpected.
- · Treat all down powerlines as energized.
- · Make sure everyone gets a briefing

TREE MORTALITY TIPS

- Provide timely feedback to others regarding any hazard trees.
- Post look outs to help secure high-risk areas.
- 3. Keep clear of bucket drops.
- 4. Brief incoming units of identified tree hazards in the area.
- 5. Avoid hazards by designating "No Work Zones".
- 6. Empower everyone to speak up to ensure safety of all.

FIRE NOT SCOUTED AND SIZED UP

8. MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
 - Line EMT / PM
 - Communications Unit
- Communication Unit will clear command channel for emergency traffic
- Communications will switch all emergency traffic to CALCORD as required for Emergency
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on CALCORD
- Medical Unit will:

ICS 206 8-78

- Dispatch air/ground ambulance to as appropriate.
- If necessary, after patient pickup, dispatch ambulance to helibase for transportation
- Notify receiving hospital of injury status.

CAMP EMERGENCY: Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

 	PROCEDURES

NATURE OF INJURY	

LOCATION OF PATIENT_____

TRANSPORTATION REQUESTED BY:AIR GROUND

POINT OF PICKUP

LAT _____ LONG ____

PATIENT UNIT ID_ REMINDER: DO NOT GIVE PT NAME OVER RADIO

IS AN EMT WITH PATIENT: YES _____ NO_

AGE

SEX: MALE____ FEMALE___

ALL EMERGENCIES---Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

Update

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found here.

409.5

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy here.

Social Media

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE - The Information Section can assist you with sending and receiving mail.
