BRANCH I AND III (SULFUR) V AND VI AND VII (REDWOOD)

NO MOVEMENT ANTICIPATED. STEEP SLOPES COULD CAUSE ROLLOUT BELOW LINES. TREE FAILURE IS A PROBLEM.

BRANCH IV

SLOPE REVERSAL POSSIBLE IN AFTERNOON IF FIRE GETS TO BOTTOM OF SLOPE. FIRED LINES MUST HAVE AT LEAST 60' DEPTH TO HOLD. BACKING FIRE WILL TAKE HALF AN HOUR TO AN HOUR TO BACK IN THAT FAR. DIV 0 ROLLOUT POTENTIAL HIGH.

FIRING CONDITIONS

FLAME LENGTH (FT)/RATE OF SPREAD (FT/MIN)

MID-DAY

	HEADFIRE	BACKING FIRE	FLANK FIRE

AIR OPERATIONS:

SMOKE OBSCURES VISIBILITY DUE TO LACK OF WIND UNTIL EARLY AFTERNOON HEATING.

SAFETY

- MONITOR WIND AND SMOKE CONDITIONS DURING BURNING FOR AWARENESS OF WHERE SPOTS MAY ORIGINATE AND SPREAD.
- SAFETY ZONES ON STEEP RIDGE LINES SHOULD BE UP TO 4 TIMES THE SIZE NEEDED IN GENTLE TERRAIN, THAT IS 16 X FLAME HEIGHT.

Fire Information Line (Redwood): 707-467-6428

Fire Information Line (Sulphur): 707-967-4207

Media Line 562-619-7467

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.

Charlie Martin- Suppression Repair Technical Specialist

Reviewed & approved by Plans.: *Jonathan M. Payne*

PURPOSE: Public Resources Code Sections 4675 and 4676 enables CAL FIRE to repair any fire suppression impacts on State Responsibility Area Land.

REHABILITATION RECOMMENDATIONS: Damages incurred as the result of suppression activities will be mitigated under this plan. This plan does not mitigate damages to the environment caused by the fire alone.

PRIORITIES:

- Damages with potential to impact public safety.
- Damages with potential to impact public infrastructure.
- Damages with potential to negatively impact the environment.
- Damages to property.

SPECIFIC REHABILITATION GUIDELINES

**All control lines and roads install drainage as described below.
For public and private roads, note and report problems which may impact the road.**

Repair fences and gates damaged by suppression work to a functional standard.

Note and report damage to property due to suppression work. If possible, repair to functional condition with available resources.

Pick up and remove all trash and debris created by suppression work.

Waterbar specifications

Hand lines: Space waterbars at every 50 feet on steep pitches (>45% gradient). For slopes <45%, install as needed to drain, break or pull back berms to drain. Pull dirt and debris from watercourse crossings.

Dozer line: Space waterbars at 50 feet for slopes >45% and 100 feet for slopes <45%. Smooth berms to allow natural drainage. Dip watercourse crossings to the natural grade and mulch bare soil.

Roads: Break outside berms at natural drainages if berm created by suppression efforts. Water non-paved roads as needed to maintain or restore firm surface. Clean inside ditches blocked by suppression work. Clean inlets of culverts where debris was due to suppression work.
