TIME AND DATE

Incident Meteorologist

FORECAST ISSUED: 1900 10/11/17

...Gusty north winds and low humidity expected today...

<u>WEATHER DISCUSSION:</u> An upper level trough of low pressure over the Pacific Northwest will bring cooler than normal temperatures over the next couple of days but disturbances pivoting through this low will bring breezy and dry northerly winds at times. One of these wind events will occur today with breezy northerly winds and poor humidity recovery combining to bring near Red Flag weather conditions. The strongest winds are expected this morning with decreasing winds expected through the day. Lighter winds are expected on Friday with slightly higher RH. Another disturbance will bring another round of breezy northeast winds on Saturday. Neither of these periods of breezy wind is expected to be as strong as that experienced last Sunday or Monday. Lighter winds and warm dry conditions are expected early next week.

WEATHER FORECAST:

WEATHER: Fair skies. Well dispersed smoke due to winds.

TEMPERATURES: High temperatures 72 to 78.

HUMIDITY: Minimum humidity 12-16% after overnight recovery of 35-45%

20 FT WINDS:

ABOVE 1000 FT ELEV - Northeast winds 6-10 mph with occasional gusts to 15 mph through about 1000 then northwest 4-8 mph with occasional gusts to 12 mph.

BELOW 1000 FT ELEV - North 10-15 mph through about 1000 becoming northwest 8-13 mph.

STABILITY/INVERSION: Weak morning inversions due to winds. Generally stable conditions in the afternoon.

<u>OUTLOOK FOR Thursday Night:</u> Fair skies. Weak inversions allowing for areas of smoke. Minimum temperatures 45-49. Poor maximum RH recovery at 30-40%. Winds above 1000 feet, becoming north to northeast 3-7 mph by about 2000. Winds below 1000 feet, becoming north to northeast 3-7 mph gust to 12 mph after about 2000.

<u>OUTLOOK FOR FRIDAY:</u> Fair skies except for patchy morning smoke. High temperatures 75-81. Minimum RH values 14-20%. Winds...Above 1000 feet elevation, becoming northwest 4-6 mph with gusts to 10 mph after about 1000. Below 1000 feet, becoming northwest 6-8 gusts to 12 mph after about 1000.

EXTENDED FORECAST OUTLOOK FOR SATURDAY: Warmer and Drier with gusty north winds.

OUTPUTS

FIRE BEHAVIOR

GENERAL: The fires are burning in a mix of grass and brush with stands of timber and timber litter that are extremely dry and have a heavy fuel loading. The initial fire spread was driven by high winds and low humidity with long range spotting. With the predicted northwest and northeast wind, single or group tree or tall brush torching could cast embers and produce spot fires in receptive fuel beds, especially where timber litter fuel loading or heavy grass crops are high. Wind speeds are expected to increase with strong gust which will lead to increased rates of spread and the possibility of long range spotting. Fire will stay active in the evenings with north wind and poor humidity recovery.

AIR OPERATIONS:

Strong north winds may lay the smoke down making visibility difficult for air resources

Sunrise: 0712 Sunset: 1828

SAFETY

- Fire has potential to be active in the evening with poor humidity recovery
- Expect rapid fire growth in light flashy fuels.
- Exceptionally dry fuels warrant a high degree of caution.
- Don't become complacent! Identify your safety zones and escape routes.

WIND COMPLEX SAFETY MESSAGE

Maintain Situational Awareness

INCIDENT: Wind Complex CA-NEU-026295 DATE: October 12, 2017 TIME: 0700-0700

Major Hazards and Risks: Extreme fire behavior, Windy dry weather, Limited resources.

Fire Behavior: Fuels are receptive to fire spread. A small amount of wind on this dry fuel changes fire behavior dramatically!! Be alert to changes in wind direction and expect changes in fire behavior. Watch for spot fires outside the control lines.

Fatigue: Dry windy weather for the next several days, be alert for signs of fatigue and take breaks as necessary. Be alert for signs of fatigue in yourself and others.

Downed powerlines: Follow power line safety guidelines (IRPG pg.24), watch out for burned out power poles.

Personnel: Manage yourself and those around you for fatigue. Drink fluids frequently and eat nutritious food regularly. As fatigue increases, injuries tend to increase also. Keep an eye on your crew and partner. Stay engaged and make smart decisions.

Hazard trees: Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Dead trees from bug kill. Review and follow **Hazard Tree Safety**, pg. 22-23 in your IRPG.

Heavy Equipment – Stay alert working around heavy equipment working in the area, monitor safe working distances, utilize communication with heavy equipment operators (radio or hand signals), avoid working below dozers, watch for rolling material.

Driving: Slow Down! Drive defensively. Expect the unexpected around every curve. Drive with headlights and seatbelts on. Coordinate your movements on one-lane roads.

Review your ICS 206 and know what to do in the event of an (IWI).

Lookouts, Communications, Escape routes, Safety zones

Tailgate Safety

- Accountability: everyone checks in and everyone checks out. Supervisors know where their crews are at all times
- Communication: everyone knows the com-plan
- Briefing: everyone knows the plan and the contingency plan
- Safety gear: everyone has the appropriate safety gear in good working condition
- LCES: they are clear and made known to everyone

Fatigue Management:

- Drink plenty of fluids:
 - Water and Gatorade
- Avoid drinking energy drinks
- Rest when you can
- Find shade when you can
- Eat nutritious food regularly
- Work within your abilities.

Suppression Repair Message

The following are repair task that crews can conduct as available on the fireline.

Handlines

- Install waterbreaks when necessary to prevent erosion.
- Handlines along the contour, on ridge tops or other flat areas will not require waterbreaks if the line will not concentrate water runoff.
- Waterbreaks on handlines shall be cut a minimum of 6 inches into firm ground and shall have an unobstructed discharge at the outlet.
- Remove all trash from the lines so it can be backhauled.

Dozer Lines

- Move hose lines to one side of the line so that it can be accessed and repaired by equipment if necessary.
- Install waterbreaks as feasible focusing on very steep areas first.

Roads

- Remove berms from outside of roads.
- Clean Culvert inlets of debris from suppression activities.
- Clean inside ditches of debris from suppression activities.

General Repair Items

- Report any damage to property including gates, fences, watersources, culverts or any other damage caused by suppression activities.
- Remove all trash generated by the incident.

•	Fireline and Road Gradient (%):	<u>0-10</u>	11-25	26-50*	<u>>50</u> *

Fire Suppression Repair

It is time to begin planning for the fire suppression repair efforts. A fire suppression repair plan will be developed for the NEU Wind Incident. To accomplish our goals we need to identify problem areas, prescribe the needed work, and ensure that the work is completed.

In an effort to identify problem areas we have created the attached form for use by the Branches and Divisions. As noted on the form, items to consider include: fences and gates damaged during the incident; road and watercourse crossings repairs; culverts and watercourses needing cleanout; fire breaks in need of waterbarring; trash and equipment pickup.

Use the attached form(s) to document locations where repair work may be necessary. Use maps to show locations. GPS's can be down loaded by GIS. Return forms to the Suppression Repair Unit at the end of your shift.

WIND COMPLEX PUBLIC INFORMATION

Incident Information Line: 530-823-4083

Media Line: 916-203-4153

MEDIA

<u>California State Penal Code Section 409.5(d)</u> allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire
 personnel cannot provide members of the media with authorization to enter private
 property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post**:

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

PICTURES AND VIDEO OF INCIDENT

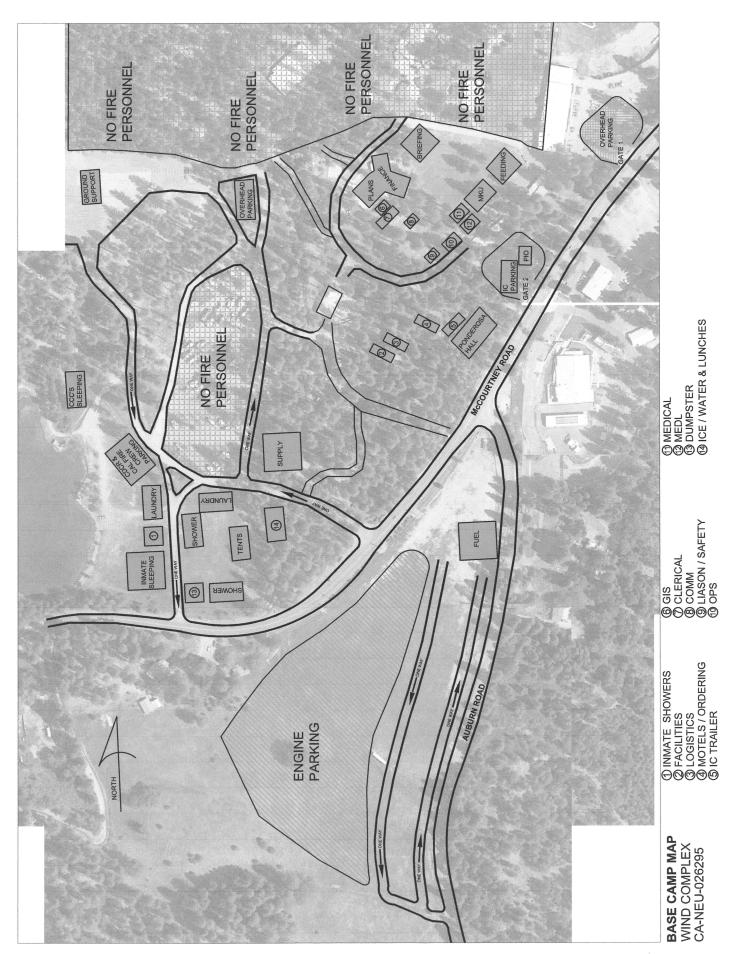

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Information trailer. If you have found an item on the incident, bring the item to the Information trailer.

MAIL SERVICE

The Information staff will assist you in mailing and receiving letters and packages.
