

INCIDENT ACTION PLAN

CAMP INCIDENT

CA-BTU-016737

Wednesday

OPERATIONAL PERIOD

11/14/2018 0700

to

11/15/2018 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">Camp</p>	2. Operational Period:	Date From: 11/14/2018 Date To: 11/15/2018 Time From: 0700 Time To: 0700
3. Objective(s): <u>Management Objectives</u> -Provide for and maintain public and first responder safety by utilizing the incident safety analysis process. -Protect all critical infrastructure to include communication towers, water systems, natural gas, railroad and highways. -It is the Unified Incident Commander's Leader's Intent to ensure transparent, timely and accurate communication at all levels of the incident. -Be financially responsible for all management and fire suppression tactics. -Foster and enhance community and political relationships. -All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of Butte County.		
<u>Control Objectives</u> -Keep the fire East of Hwy 99 to Cohasset Rd. -Keep the fire South of Kanaka Creek -Keep the fire West of Oroville Quincy Hwy -Keep the fire North of Hwy 149 and the intersection of Hwy 149 and Hwy 99		
General Situational Awareness: Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.		
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
Approved Site Safety Plan(s) Located at:

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6	TYPE OF FIRE: Wildland Fire
FIRE NAME: Camp	OPERATIONAL PERIOD: 24hr 11/14 (0700-0700)
DATE ISSUED: 11/13	TIME ISSUED: 1800
UNIT: BTU	SIGNED: Jonathan Pangburn FBAN <i>Jonathan M. Pangburn</i>

INPUTS

WEATHER SUMMARY

****Warm and Dry, with Overnight NE Winds****
See Weather Forecast in IAP.

OUTPUTS

GENERAL: ****Daytime Terrain and Fuel-Driven Fire with Wind-Dominated Fire Behavior at Night****

Expect varying windows for direct attack versus indirect, as related to flame lengths and rates of spread, based upon forecast wind and smoke coverage. Expect daytime upslope runs. Winds will be Northeast overnight, continuing to align downslope with the Feather River and Butte Creek drainages. Spotting will continue to present a concern.

ERC values continue to set new record highs for the entire month of November. Dead fuel moistures remain critical. Fuel conditions are more similar to late summer. It has been 213 days since the lower elevations last received 0.5" of precipitation.

Areas with most activity last two shifts have no recorded fire history: south of Goat Point (DIV E), east of Feather River (DIV A), and north of Paradise (DIV N/U).

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	< 5' (1.5 m)	30-40 ch/hr (0.6-0.8 km/hr)	< 0.25 mile (0.4 km)	60%
Grass/Shrub Mix	< 7' (2 m)	15-25 ch/hr (0.3-0.5 km/hr)	< 0.25 mile (0.4 km)	60%
Shrub	< 7' (2 m)	15-25 ch/hr (0.3-0.5 km/hr)	< 0.25 mile (0.4 km)	60%
Timber Litter	< 5' (1.5 m)	5-10 ch/hr (0.1-0.2 km/hr)	< 0.25 mile (0.4 km)	60%
Slash-Blowdown	< 10' (3 m)	10-20 ch/hr (0.2-0.4 km/hr)	< 0.25 mile (0.4 km)	60%
WUI/Shrub/Timber Runs	10-20' (3-6 m)	40-70 ch/hr (0.8-1.4 km/hr)	< 0.25 mile (0.4 km)	60%

****minimum safety zone size for brush fuels is 1/3 acre (0.1 Ha) for a Strike Team of Engines.**

****minimum safety zone size for slash fuels is 1/2 acre (0.2 Ha) for a Strike Team of Engines.**

****minimum safety zone size for WUI/shrub/timber is 1 acre (0.4 Ha) for a Strike Team of Engines.**

SPECIFIC:

Branch I, VI: Fire will have single and group tree torching and passive crown fire activity in timber stands, especially areas of dense canopy or ladder fuels; greatest activity 1000-1700. Expect mostly surface fire backing and flanking into the wind after 2000, with for short runs after rollout below or spotting. Clearcuts and thinned areas will exhibit lower rates of spread, but are highly susceptible to spotting.

Branch II, III, X: Expect rapid rates of spread in grass fuels wherever torching and ember cast is seen. Flame lengths will be lower in the shorter grass near Highway 99. Slightly lower POI due to shading from smoke. Greatest activity from 0900-1400 below 1,600 feet. Areas above 1,600 feet will increase in spotting and fire behavior with influence of overnight winds.

Areas of tactical advantage (water features, highways), normally utilized as barriers to fire spread, continue to be compromised with winds via spotting, during the entire shift. The fire has crossed a 300-foot span of Lake Oroville 3 times.

AIR OPERATIONS:

Improved visibility at higher elevations; little to no visibility in lower elevations. Heavy fuel consumption will continue to hinder operations with turbulence and smoke inversion.

Mixing height: 2,000 ft. AGL, Transport winds: SW 15 mph, Sunrise 0650, Sunset 1651.

SAFETY

Post lookouts. Escape routes and safety zones are a must with heavy timber and extremely dry fuels!
Daytime terrain & fuels-driven fire will transition to sustained, strong winds in the evening.

Fuels and Fire Behavior Advisory

Northern California Geographic Area

November 9, 2018

Subject: Unseasonably dry, mild weather the past few weeks has amplified fuel dryness in all size classes across Northern California. Extreme fire behavior and rapid to dangerous rates of spread continue to occur with high potential for that to persist through the week of November 11th.

Discussion: Unseasonably mild, very dry weather in recent weeks across Northern California this fall has kept fuels very dry and been expanding drought conditions. Although reasonably plentiful rain fell across much of the Geographic Area right around the beginning of October, recent dry weather has essentially erased any fuel moisture gains from that event. Much of the time since then, a ridge of high pressure persisting out over the Pacific Ocean has mostly been keeping a very dry airmass over the Geographic Area. The weather pattern during the past 3 weeks been particularly dry with a steady series of N to E foehn wind events that have contributed significantly to fuel dryness and challenging fire control conditions. Fires have recently shown or exhibited rapid or dangerous spread rates or generate extreme fire behavior. Even some internal islands in earlier large fire perimeters (e.g. Carr Fire) have reportedly rekindled, apparently from long-held residual heat. It is not just windy areas that have experienced rapid spread, but some fuel-and-slope-driven fires have also seen unseasonable, very active fire behavior.

Difference from normal conditions: Northern California normally sees enough precipitation by late October to bring about fire season-ending conditions. Early October's precipitation did mitigate fire danger for a bit, but unseasonably dry weather since then and several significant foehn wind events the past few weeks have created very dry fuel conditions much later into the fall season than usual. Very low daily afternoon minimum relative humidity (RH) values of 5-12% have been common, and recent wind events have limited overnight RH recovery to less than 25% in many locations and to less than 15% in some. This has had a dramatic effect on fuel dryness and fire danger indices which are now either near seasonal record values or at core fire season severity levels. For more information about the very unseasonable environmental conditions occurring, follow these links:

https://qacc.nifc.gov/oncc/fuelsFireDanger_Bi.php

https://qacc.nifc.gov/oncc/fuelsFireDanger_Erc.php

https://qacc.nifc.gov/oncc/fuelsFireDanger_Hundred.php

https://qacc.nifc.gov/oncc/fuelsFireDanger_Thousand.php

<https://www.esrl.noaa.gov/psd/eddi/> and ftp://ftp.cdc.noaa.gov/Public/mhobbins/EDDI/CN_DEWS/EDDI_01mn.png

Concerns to Firefighters and the Public:

- One hour fine fuel loading across the Geographic Area remains well above normal.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety zones).
- Review current fire potential products from Predictive Services at <https://qacc.nifc.gov/oncc/predictive/weather/index.htm> or potential Red Flag conditions from the National Weather Service at Weather at <https://www.wrh.noaa.gov/fire2/cafw/>.

Area of Concern: Most areas across Northern California could see active fire behavior, but the most severe conditions are in the Sacramento Valley and surrounding foothills, the western slopes of Cascade and Northern Sierra Nevada mountains, and Mendocino County southward, including all of the Bay Area. The PSA numbers associated with those areas are NC03A, NC03B, NC05 and NC07.

SAFETY MESSAGE

CAMP

18-CA-BTU-016737 November 14, 2018 0700-0700

S
A
F
E
T
Y

FIRE BEHAVIOR

FUEL IS ACTING LIKE IT'S JULY

Watch out

- Short and long-range spotting has been common on this fire
- Radiant heat even in short fuels has creates a serious hazard
- Rapid rates of spread even in wind protected areas has been observed

Mitigation

- LCES is the key to preventing issues related to fire behavior
- Divisions should communicate to neighboring Divisions any unusual fire behavior
- Be aware of your surroundings and prevent being on mid-slope roads and drainages

S
A
F
E
T
Y

ROCKS AND BOULDERS

GROUND COVER HAS BURNED LOOSENING ROCKS AND BOULDERS

Watch Out

- Rocks may roll for great distances down slope.
- Rocks and boulders may even become airborne.
- Lose gravel, rocks and boulders may end up in roadways.

Mitigation

- Watch out in areas with steep slopes.
- Drive safely and be on the lookout for roadway hazards
- Listen for rolling rocks and boulders and 'yell out' to others around you

S
A
F
E
T
Y

HYGIENE

DON'T CONTRIBUTE TO THE POTENTIAL DEVELOPMENT OF THE 'CAMP CRUD'

Watch Out

- The incident population has reached 5500, increasing this risk of exposure
- Coworkers may be coughing and sneezing to a irritating atmosphere
- Long hours and arduous work will weaken the immune system

Mitigation

- Wash hands and face before entering chow line
- No Nomex in chow line, serving or eating areas.
- Report health and safety concerns to Facilities, Safety or any IMT 4 member

MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY: CALCORD
 Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.
 - Division Group Supervisor Contacts:
 1. Closest EMS resource
 2. Communications Unit
 - Communications Unit Contacts:
 1. Ground or Air Ambulance as requested.
 2. Medical Unit (916) 622-3371
 3. Safety
 4. Operations
 - Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 1. A pre-assigned tactical frequency (CALCORD) should be used or IWI and only for duration of the emergency.
 - Communications Unit will clear the Command channel for emergency traffic as needed for duration of the need.

CAMP EMERGENCY:
 Contact Communications on CALCORD or @ 530-417-4561 with patient complaint and location.
 Communications will respond appropriate medical response.
 Communications contacts:
 1. Medical Unit
 2. Safety
 3. Logistics
 4. Operations
 5. Crew Supervisor
 6. Comp/Claims

INCIDENT REPORTING PROCEDURES:
****COLLECT ALL INFO BELOW PRIOR TO INITIATING EMERGENCY****

CAMP FIRE INFORMATION

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:** Inappropriate information, Inappropriate pictures or videos, Opinions regarding the incident or policy, Endorsements of any kind.

FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

Think before you post:

- On official time, do official duties; if using government equipment, do government business.
- Don't use your official position/title for private gain.
- Do share government information that is publically available (such as links to Inciweb, weather reports, feature stories, official evacuation notices etc...) Do not disclose (via any medium) non-public information to further private interests or the private interests of others.
- Do not share information outside official channels that could be associated with a crime or a claim, (for instance do not post on social media about serious accidents, deaths or destroyed property).
- Do not accept compensation for statements made over social media that relate to official duties.
- Never use your official title while engaging in "political activity" (activity directed toward the success or failure of a political party, partisan candidate or partisan political group).
- Federal employees may express their opinions concerning partisan political candidates and political parties on social media when they are off duty and away from the federal workplace.
- If you have questions about content you'd like to post on social media, contact a PIO, they can help you.

CITIZENS IN THE AREA

As citizens start to repopulate into the affected areas we would like to remind you that you are a great asset and resource ambassador of the fire service. As you come into contact with the citizens please treat the citizens as if they were the citizens of your own community.

These citizens just went through a very tragic incident. Please help curb aggressive media away from citizens who may not want to be interviewed or allowed on their private property.

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

For approval to post Photo and Video you have taken of the fire, please send to the PIO's incident email at: Camp2018fire@gmail.com

LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Public Information Trailer in Base Camp.

MAIL SERVICE

The Information staff will assist you in receiving letters and packages.

Mailing address for Mendocino Complex Fire personnel to have mail sent to:

(Persons Name, O-Number)

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

DMOB

CAMP INCIDENT
CA – BTU – 016737

- Resources must check-in prior to the Demobilization process.
- In order to be deemed excess, supervisors must submit an ICS 213 to the Resources Unit.
- Resources report to the Demobilization Unit at the times posted on the tentative DMOB list, which is posted around the Incident Base and to the Box account.
- Prior to reporting to DMOB, please return all supplies and equipment.
- Resources will get signatures from the following units:
 - Ground Support (Vehicle Inspection)
All rental vehicles **MUST** be inspected
 - Training (If they have a trainee)
 - Documentation
 - Time
- **The following will be done by radio at DMOB**
 - Motels
 - Supply
 - Communications
 - DMOB

TRAINING SPECIALIST MESSAGE

A Training Specialist is available for trainees on the incident.

All State, Federal and local government agency Trainees working on Position Task Books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment. We are located next to Check-In.

Training Specialist's

Archaeological and Historic Properties: Fireline Guidance for the Camp Incident, Butte County CA

Do not compromise safety for the protection and preservation of archaeological and historic properties. When possible and prudent:

1. Be on the lookout for prehistoric archaeological sites. These sites may include seasonal camps marked by the presence of obsidian and/or basalt flakes, bedrock mortar food processing sites, and village sites that contain the above and dark midden soils. The Native American group living in the area at time of historic contact was the Maidu.
2. Be on the lookout for historic archaeological sites. These sites may include old homesteads now marked by the presence of foundations, wells, and can dumps, early sawmill sites, abandoned ditches, mining tailings, and other mining features including adits (horizontal) and shafts (vertical).
3. Look for these prehistoric and historic sites in flat areas, especially adjacent to streams and springs.
4. Known sites will be marked with red/white or red/black striped plastic flagging tape.
5. If you observe artifacts, features, or sites attempt to avoid if possible. If you can't avoid, minimize ground disturbance as much as possible, only clearing the surface to as minimal a depth as necessary. Try to go around sites with dozers rather than through them. Flag new sites if possible.
6. If you find artifacts leave them in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
7. Note locations of discovered artifacts, features, and/or sites on a map. Better yet take a GPS reading if possible. Leave information for the archaeologist with the Situation Unit so that the sites can be relocated and protected during Fire Suppression Repair.
8. If you encounter a burial site cease work in the area and contact the archaeologist immediately.

Thanks for your help protecting California's cultural heritage.
