

INCIDENT ACTION PLAN

CAMP INCIDENT

CA-BTU-016737

*** CORRECTED ***

Sunday

OPERATIONAL PERIOD

11/18/2018 0700

to

11/19/2018 0700

CORRECTION

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">Camp</p>	2. Operational Period:	Date From: 11/18/2018 Time From: 0700	Date To: 11/19/2018 Time To: 0700
---	-------------------------------	--	--------------------------------------

3. Objective(s):

Management Objectives

- Provide for and maintain public and first responder safety by utilizing the incident safety analysis process.
- Protect all critical infrastructure to include communication towers, water systems, natural gas, railroad and highways.
- It is the Unified Incident Commander's Leader's Intent to ensure transparent, timely and accurate communication at all levels of the incident.
- Be financially responsible for all management and fire suppression tactics.
- Foster and enhance community and political relationships.
- All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of Butte County.

Fire Control Objectives

- Keep the fire East of Hwy 99 to Cohasset Rd.
- Keep the fire South of Kanaka Creek
- Keep the fire West of Oroville Quincy Hwy
- Keep the fire North of Hwy 149 and the intersection of Hwy 149 and Hwy 99

Law Branch Control Objectives

- Recover and account for missing civilians

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Fire Weather Forecast

FORECAST NO: 10
PREDICTION FOR: DAY/NIGHT SHIFT
SHIFT DATE: November 18-19, 2018
TIME/DATE ISSUED: November 17, 2018 2000 PDT

NAME OF FIRE: Camp
UNIT: CA-BTU
SIGNED: Aviva Braun IMET(T) and Alex Hoon IMET

Handwritten signature

Handwritten initials AB

WEATHER DISCUSSION: ...RED FLAG WARNING CONTINUES THROUGH SUNDAY AT 1600...

Critical fire weather conditions continue this morning, with the Red Flag Warning ending by 1600. Peak gusts up to 50 mph are expected in the morning through 1000, especially over upper-slopes, ridges, and aligned drainages including the Feather River Canyon.

WEATHER FORECAST FOR TODAY: ... WINDY IN THE MOUNTAINS, DECREASING AFTER 1000...

WEATHER: A few high clouds with heavy smoke through the day.

MAX TEMPERATURES: 55-65°F 3 DEGREES LESS

MIN HUMIDITY: 15-25% across the fire area.

20-FOOT WIND: ...STRONGEST WINDS OVER RIDGES AND ALIGNED DRAINAGES...

SLOPE/VALLEY - Winds in the morning from the Northeast 10-20 mph with gusts up to 30 mph. Gusts up to 45-50 mph along the Feather River drainage and other NE-SW aligned valleys.

RIDGETOP - Northeast 20-25 mph with gusts up to 50 mph. Winds decrease and become 5-10 mph upslope/updrainage around 1300.

MIXING HEIGHT: 1800 ft AGL in the afternoon TRANSPORT WINDS: West to southwest 5-10 mph.

TONIGHT: ... BREEZY TONIGHT IN THE MOUNTAINS...

WEATHER: Breezy with smoke.

MIN TEMPERATURES: 35-45°F 5-10 DEGREES LESS

MAX HUMIDITY: 25-35% 5% INCREASE

20-FOOT WIND:

SLOPE/VALLEY - Winds increasing from the Northeast 10-20 mph with gusts up to 30 mph after 2000 along the Feather River drainage and other NE-SW aligned valleys.

RIDGETOP - Northeast 10-20 mph with gusts up to 30 mph.

EXTENDED FORECAST: ... RAIN LIKELY WEDNESDAY AND AGAIN THURSDAY NIGHT/FRIDAY...

MONDAY AND TUESDAY: Lighter winds expected. Downdrainage overnight into the morning hours. Upslope/updrainage flow during the afternoon. Temperatures in the 60s. Humidity near 25-45%, driest in thermal belts above 1500-2500ft.

WEDNESDAY - FRIDAY: Wet conditions are in store for the area. A few inches of rain are possible with snow possible above 5000-5500 feet, beginning Thursday night

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 10	TYPE OF FIRE: WILDFIRE
FIRE NAME: CAMP	OPERATIONAL PERIOD: NOV 18 --24 HOUR
DATE ISSUED: NOV 17, 2018	TIME ISSUED: 1900
UNIT: BUTTE UNIT/PLUMAS NF	SIGNED: 
	Typed/printed: TIM CHAVEZ, FBAN

INPUTS

WEATHER SUMMARY:
DRY WITH RED FLAG WARNING. WINDS PEAKING AT 1000 ENDING AT 1600 HOURS. SEE IMET FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL:

FUEL DRYNESS IS TYPICAL OF LATE SUMMER. ENERGY RELEASE COMPONENT OF THE NATIONAL FIRE DANGER RATING SYSTEM HAS SET NEW RECORDS FOR THE AREA EVERY DAY SINCE THE FIRE STARTED. THE LOWER ELEVATIONS HAVE BEEN 216 DAYS WITHOUT A STORM THAT DELIVERED OVER ½" OF RAIN. LIVE FUEL MOISTURES IN MANZANITA ARE 74% (80 IS CONSIDERED CRITICAL). 100 HR FUELS 4%. 1000 HR FUELS 6%. SPOTTING HAS BEEN A MAJOR MEANS OF FIRE SPREAD DURING STRONG WINDS. SPOTTING DISTANCES UP TO ½ MILE. PROBABILITY OF IGNITION 54%, HIGHER IN DIRECT SUN. CONSIDERABLE REBURN POTENTIAL IN INTACT CANOPY IN BRUSH AND TIMBER.

SPECIFIC:

BRANCH I

STRONG WINDS EARLY WILL IGNITE SMOLDERING MATERIAL AND CAUSE EMBER TRAVEL UP TO ½ MILE. TACTICAL PATROL WILL BE IMPORTANT TO PREVENT FURTHER LOSS.

BRANCH II AND III

NO MOVEMENT ANTICIPATED. SMOLDERING FUELS ARE A HAZARD TO IGNITE SCORCHED CANOPY AND REBURN.

BRANCH VI

WINDS WILL ENHANCE BACKING FIRE INTENSITY AND CAUSE TURBULENCE IN THE FEATHER RIVER DRAINAGE, ESPECIALLY IN SHARP BENDS. SPOTTING POTENTIAL ACROSS FROM GRIZZLY CREEK. AFTER WINDS DECREASE, EXPECT BACKING FIRE SPREAD.

BRANCH X

FIRE WILL BE FLANKING WITH DOWNWIND RUNS POSSIBLE IF FINGERS OR POCKETS ARE EXPOSED TO NORTHEASTERLY WINDS. IF A SPOT CROSSES GRIZZLY CREEK A HIGH INTENSITY UPSLOPE RUN WILL TAKE ABOUT 3-6 HOURS TO GET TO THE TOP OF GRIZZLY DOME. .

BRANCH XI

MAJOR CONCERN IS BIG BEND. THE BIG BEND MOUNTAIN ITSELF WILL BE AN OBSTRUCTION TO THE WIND FLOW. BUT THAT OBSTRUCTION IN THE FLOW WILL RESULT IN EDDY CURRENTS AND TURBULENT FLOW AT THE LAKE LEVEL. SOME AREAS WILL BE CALM AND A SHORT DISTANCE AWAY WINDS WILL BE STRONG. SPOTTING HAZARD WILL BE HIGH IN TURBULENT AREAS. A SPOT ACROSS THE LAKE WILL ARRIVE IN BERRY CREEK WITHIN AN HOUR OR LESS.

AIR OPERATIONS:

CLEAR AIR UPWIND OF STRONG WINDS. AREA SMOKING IN AFTER WINDS SUBSIDE AFTER 1600.

SAFETY

- RETURN OF WIND DRIVEN FIRE BEHAVIOR WILL MAKE RAPID SPREAD IN ALL FUELS POSSIBLE. SHORTER ESCAPE TIMES TO LARGER SAFETY ZONES WILL BE REQUIRED. TEMPORARY REFUGE AREAS WILL NEED TO BE IDENTIFIED IN ADVANCE AND FLAGGED.
- STRONG WINDS MAY BRING DOWN FIRE WEAKENED TIMBER ALL OVER THE FIRE AREA
- REBURN COULD MAKE SEEMINGLY VIABLE SAFETY ZONES UNTENABLE.

Fuels and Fire Behavior Advisory

Northern California Geographic Area

November 9, 2018

Subject: Unseasonably dry, mild weather the past few weeks has amplified fuel dryness in all size classes across Northern California. Extreme fire behavior and rapid to dangerous rates of spread continue to occur with high potential for that to persist through the week of November 11th.

Discussion: Unseasonably mild, very dry weather in recent weeks across Northern California this fall has kept fuels very dry and been expanding drought conditions. Although reasonably plentiful rain fell across much of the Geographic Area right around the beginning of October, recent dry weather has essentially erased any fuel moisture gains from that event. Much of the time since then, a ridge of high pressure persisting out over the Pacific Ocean has mostly been keeping a very dry airmass over the Geographic Area. The weather pattern during the past 3 weeks been particularly dry with a steady series of N to E foehn wind events that have contributed significantly to fuel dryness and challenging fire control conditions. Fires have recently shown or exhibited rapid or dangerous spread rates or generate extreme fire behavior. Even some internal islands in earlier large fire perimeters (e.g. Carr Fire) have reportedly rekindled, apparently from long-held residual heat. It is not just windy areas that have experienced rapid spread, but some fuel-and-slope-driven fires have also seen unseasonable, very active fire behavior.

Difference from normal conditions: Northern California normally sees enough precipitation by late October to bring about fire season-ending conditions. Early October's precipitation did mitigate fire danger for a bit, but unseasonably dry weather since then and several significant foehn wind events the past few weeks have created very dry fuel conditions much later into the fall season than usual. Very low daily afternoon minimum relative humidity (RH) values of 5-12% have been common, and recent wind events have limited overnight RH recovery to less than 25% in many locations and to less than 15% in some. This has had a dramatic effect on fuel dryness and fire danger indices which are now either near seasonal record values or at core fire season severity levels. For more information about the very unseasonable environmental conditions occurring, follow these links:

https://gacc.nifc.gov/oncc/fuelsFireDanger_Bi.php

https://gacc.nifc.gov/oncc/fuelsFireDanger_Erc.php

https://gacc.nifc.gov/oncc/fuelsFireDanger_Hundred.php

https://gacc.nifc.gov/oncc/fuelsFireDanger_Thousand.php

<https://www.esrl.noaa.gov/psd/eddi/>

and ftp://ftp.cdc.noaa.gov/Public/mhobbins/EDDI/CN_DEWS/EDDI_01mn.png

Concerns to Firefighters and the Public:

- One hour fine fuel loading across the Geographic Area remains well above normal.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety zones).
- Review current fire potential products from Predictive Services at <https://gacc.nifc.gov/oncc/predictive/weather/index.htm> or potential Red Flag conditions from the National Weather Service at Weather at <https://www.wrh.noaa.gov/fire2/cafw/>.

Area of Concern: Most areas across Northern California could see active fire behavior, but the most severe conditions are in the Sacramento Valley and surrounding foothills, the western slopes of Cascade and Northern Sierra Nevada mountains, and Mendocino County southward, including all of the Bay Area. The PSA numbers associated with those areas are NC03A, NC03B, NC05 and NC07.

ASSIGNMENT LIST (ICS 204 WF)

FALM O-785			Module, 2 Fallers	1	O-785	0700-1900	DP-65

6. Work Assignments:
 Fall hazard trees and trees that threaten control lines to mitigate the threat of the fire escaping, while maintaining personal safety.
 Mop up 300' in from control lines to eliminate threat to fire-line
 Tactical Patrol around structures for the potential of new starts, to prevent structure damage, and alleviate citizen concerns

7. Special Instructions:
 All interior tactical patrol and mop up will be handled by the Rescue Branch. For affected structures, secure power, water, and gas.
 Open and close water sources and hydrants slowly in communities on Concow, Paradise, Magalia.
 Personnel may be transported across the Feather River arm of Lake Oroville using a DWR boat. All personnel are required to wear a PFD while onboard the boat. Personnel shall wear an appropriate particulate mask when working in the remains of burned structures.

FIRE BEHAIOR

FIRE WEATHER WATCH THIS WEEKEND DUE TO INCREASED WINDS

Watch out

- Short and long-range spotting has been common on this fire
- Radiant heat even in short fuels has creates a serious hazard
- Rapid rates of spread even in wind protected areas has been observed
- Re-burn potential for areas previously exposed to fire

Mitigation

- LCES is the key to preventing issues related to fire behavior
- Divisions should communicate to neighboring Divisions any unusual fire behavior
- Be aware of your surroundings and prevent being on mid-slope roads and drainages

S
A
F
E
T
Y

HYGIENE

DON'T CONTRIBUTE TO THE SPREAD OF THE 'CAMP CRUD'

Watch Out

- The incident population has reached 5500, increasing this risk of exposure
- Coworkers may be coughing and sneezing to a irritating atmosphere
- Long hours and arduous work will weaken the immune system

Mitigation

- Wash hands and face before entering chow line
- No Nomex in chow line, serving or eating areas.
- Report health and safety concerns to Facilities, Safety or any IMT 4 member

S
A
F
E
T
Y

TRAFFIC SAFETY

WE HAVE EXPERIENCED SEVERAL NEAR SERIOUS ACCIDENTS

Watch Out

- Smoke conditions have greatly reduced visibility, watch your speeds
- Access roads are unforgiving in the fire area, they are narrow, soft soils, steep
- Watch for crews working on the side of the road, often near blind corners

Mitigation

- Drive with a high level of Situational Awareness and optimum defensive driving techniques
- Use caution when navigating through your branch and divisions
- Use warning lights as appropriate and always drive with your headlights on

AIR OPERATIONS SUMMARY ICS-220

Incident Name and Incident Number		Sunrise	Startup	Cutoff	Sunset
Camp Incident CA - BTU - 016737		656	726	1621	1651
General Remarks, Safety Notes, Hazards, Air Operations Special Equipment, etc. TRACK ALL DIPSITE LOCATIONS / NUMBER OF DIPS / GALLONS TAKEN. TRACK ALL DROP LOCATIONS / NUMBER OF DROPS / GALLONS DROPPED. ALL GPS DATA TO BE COLLECTED IN DEGREES, MINUTES, DECIMAL MINUTES, FORMAT. AVOID Aerial Application of Retardant / Foam / Agent within 300' of Waterways, Bodies of Water, etc. If Retardant / Foam / Agent is Dropped Within These Areas Immediately Notify the AOBDD and Provide the Following Information: Lat / Long, Estimated Number of Gallons and a Map Detailing The Area.

Prepared By (Communications Unit)
 Bill Corey, COM1 (Sutter Co Sheriff) 530-682-8899 cell
 Incident Location
 County BUTTE State CA Latitude N Longitude

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY: CALCORD

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division Group Supervisor Contacts:

1. Closest EMS resource
2. Communications Unit

- Communications Unit Contacts:

1. Ground or Air Ambulance as requested.
2. Medical Unit (916) 622-3371

3. Safety

4. Operations

Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.

1. A pre-assigned tactical frequency (CALCORD) should be used for IWI and only for duration of the emergency.

Communications Unit will clear the Command channel for emergency traffic as needed for duration of the need.

CAMP EMERGENCY:

Contact Communications on CALCORD or @ 530-417-4561 with patient complaint and location.

Communications will respond appropriate medical response.

Communications contacts:

- Medical Unit
- Safety
- Logistics
- Operations
- Crew Supervisor
- Comp/Claims

INCIDENT REPORTING PROCEDURES:

****COLLECT ALL INFO BELOW PRIOR TO INITIATING EMERGENCY****

CHIEF COMPLAINT _____

LOCATION OF PATIENT _____

POINT OF CONTACT _____

TRANSPORTATION REQUESTED BY: AIR ___ GROUND ___

POINT OF PICKUP _____

LAT _____ **LONG** _____

PATIENT UNIT ID _____

IS AN LINE MEDIC WITH PATIENT: YES ___ NO ___

AGE _____

SEX: MALE ___ FEMALE ___

ALL EMERGENCIES---Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

CAMP FIRE INFORMATION

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:** Inappropriate information, Inappropriate pictures or videos, Opinions regarding the incident or policy, Endorsements of any kind.

FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

Think before you post:

- On official time, do official duties; if using government equipment, do government business.
- Don't use your official position/title for private gain.
- Do share government information that is publically available (such as links to Inciweb, weather reports, feature stories, official evacuation notices etc...) Do not disclose (via any medium) non-public information to further private interests or the private interests of others.
- Do not share information outside official channels that could be associated with a crime or a claim, (for instance do not post on social media about serious accidents, deaths or destroyed property).
- Do not accept compensation for statements made over social media that relate to official duties.
- Never use your official title while engaging in "political activity" (activity directed toward the success or failure of a political party, partisan candidate or partisan political group).
- Federal employees may express their opinions concerning partisan political candidates and political parties on social media when they are off duty and away from the federal workplace.
- If you have questions about content you'd like to post on social media, contact a PIO, they can help you.

CITIZENS IN THE AREA

As citizens start to repopulate into the affected areas we would like to remind you that you are a great asset and resource ambassador of the fire service. As you come into contact with the citizens please treat the citizens as if they were the citizens of your own community.

These citizens just went through a very tragic incident. Please help curb aggressive media away from citizens who may not want to be interviewed or allowed on their private property.

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

For approval to post Photo and Video you have taken of the fire, please send to the PIO's incident email at: Camp2018fire@gmail.com

LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Public Information Trailer in Base Camp.

MAIL SERVICE

The Information staff will assist you in receiving letters and packages.

Mailing address for Mendocino Complex Fire personnel to have mail sent to:

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions.
- There is no such thing as an "off the record" comment.

DMOB

CAMP INCIDENT
CA – BTU – 016737

- Resources must check-in prior to the Demobilization process.
- In order to be deemed excess, supervisors must submit an ICS 213 to the Resources Unit.
- Resources report to the Demobilization Unit at the times posted on the tentative DMOB list, which is posted around the Incident Base and to the Box account.
- Prior to reporting to DMOB, please return all supplies and equipment.
- Resources will get signatures from the following units:
 - Ground Support (Vehicle Inspection)
All rental vehicles MUST be inspected
 - Training (If they have a trainee)
 - Documentation
 - Time
- The following will be done by radio at DMOB
 - Motels
 - Supply
 - Communications
 - DMOB

**CAMP INCIDENT
CA-BTU-016737
REMOTE CHECK-IN**

**Please use this code to check In to the
CAMP INCIDENT**

REMEMBER: YOU MUST STILL VISIT TIME UNIT!

Local Government/OES Engines

Due to the complexity and timing of the Camp Incident Operations and your OES AREP are asking for the following information from your Strike Teams.

Use the QR code to fill out the form or fill out the attached and drop off the form at the OES Support Unit.

Strike Team Designator E- _____

Will your Strike Team be able to extend past 14 Days? YES NO
Will your Strike Team be able to rotate at 14 Days? YES NO

TRAINING SPECIALIST MESSAGE

A Training Specialist is available for trainees on the incident.

All State, Federal and local government agency Trainees working on Position Task Books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

Training Specialist's

Dennis Martin

(707) 479-8421

Archaeological and Historic Properties: Fireline Guidance for the Camp Incident, Butte County CA

Do not compromise safety for the protection and preservation of archaeological and historic properties. When possible and prudent:

1. Be on the lookout for prehistoric archaeological sites. These sites may include seasonal camps marked by the presence of obsidian and/or basalt flakes, bedrock mortar food processing sites, and village sites that contain the above and dark midden soils. The Native American group living in the area at time of historic contact was the Maidu.
2. Be on the lookout for historic archaeological sites. These sites may include old homesteads now marked by the presence of foundations, wells, and can dumps, early sawmill sites, abandoned ditches, mining tailings, and other mining features including adits (horizontal) and shafts (vertical).
3. Look for these prehistoric and historic sites in flat areas, especially adjacent to streams and springs.
4. Known sites will be marked with red/white or red/black striped plastic flagging tape.
5. If you observe artifacts, features, or sites attempt to avoid if possible. If you can't avoid, minimize ground disturbance as much as possible, only clearing the surface to as minimal a depth as necessary. Try to go around sites with dozers rather than through them. Flag new sites if possible.
6. If you find artifacts leave them in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
7. Note locations of discovered artifacts, features, and/or sites on a map. Better yet take a GPS reading if possible. Leave information for the archaeologist with the Situation Unit so that the sites can be relocated and protected during Fire Suppression Repair.
8. If you encounter a burial site cease work in the area and contact the archaeologist immediately.

Thanks for your help protecting California's cultural heritage.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications

- Other: _____
- Other: _____

Attach Firing Operations Checklist to ICS-214

EMERGENCY FIRE SUPPRESSION REPAIR PLAN - CAMP INCIDENT

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas caused by the fire. We cannot upgrade facilities beyond their pre-fire condition. Fire suppression repair shall be applied to mitigate infrastructure damage and natural resource damage.

Infrastructure Damage: Culverts and other watercourse crossings, water sources, trails, road barriers removed for fire access, trash, debris and supplies left by fire suppression activities; miscellaneous.

Natural Resource Damage: Repair of existing problems caused by fire suppression activities (direct effect) to natural resources and to prevent likely future problems such as accelerated erosion caused by rains (indirect effect). The goal is to minimize soil erosion, adverse impacts to water quality, and adverse impacts to protected species of plants and animals

REPAIR GUIDELINES

General: Restore berms and barriers removed for fire control access.

Drop Points/Staging Areas/Safety Zones: New construction - cross drain and abandon (if applicable). Existing - repair to original condition, remove debris resulting from use. Pick up all trash.

Roads: Reshape soil surfaced roads that were used during fire control operations. Roads should be out-sloped with rolling dips where degradation of the road prism has resulted from fire control operations. Clean out culvert inlets and outlets as needed. Report any damaged culverts to the Fire Suppression Repair Specialist for specific repair guidance. Breach berms, where appropriate, to facilitate drainage.

Firelines: Break apart dozer piles of pushed over trees, vegetation and soil, and spread along tractor roads, tractor fire breaks, or any other areas disturbed during fire suppression activities. Lop and scatter displaced vegetation to a height of less than 30 inches or chip within 100' of a gravel road or structure. Scatter the lopped material along the fire line. Pull back any excess soil material sidecast along roads or tractor disturbed areas that are located within 100 feet of any watercourse or spring. Install waterbreaks on all constructed or used dozer lines using the following criteria:

Fireline and road gradient(%) grasslands:	0-10	11-25	26-50	>50
Fireline waterbreak spacing:	150'	100'	75'	75'
Road waterbreak spacing:	300'	200'	150'	100'
Fireline and road gradient(%) all other areas:	0-10	11-25	26-50	>50
Fireline waterbreak spacing:	100'	75'	50'	25'
Road waterbreak spacing:	150'	100'	75'	50'

Waterbreaks and/or rolling dips shall be used to reduce the volume and velocity of water by directing it off fire lines as soon as possible at controlled locations. The outfall end of all waterbreaks shall be opened by hand if necessary. Waterbreaks should be located to discharge into natural vegetation. Waterbreaks should cross the fire line at an angle of approximately 45 degrees.

Handlines: Install waterbreaks as needed based on slope and soil erodibility.

All waterbreaks shall be installed diagonally with a minimum cut of 6" into existing grade, and minimum height of 12". Waterbreaks shall be constructed to allow for drainage at the discharge end into non-erodible material.

Slash Piles: Piles within 150' of permanent structures or public roads will be lopped and/or scattered within 18" of the soil surface.

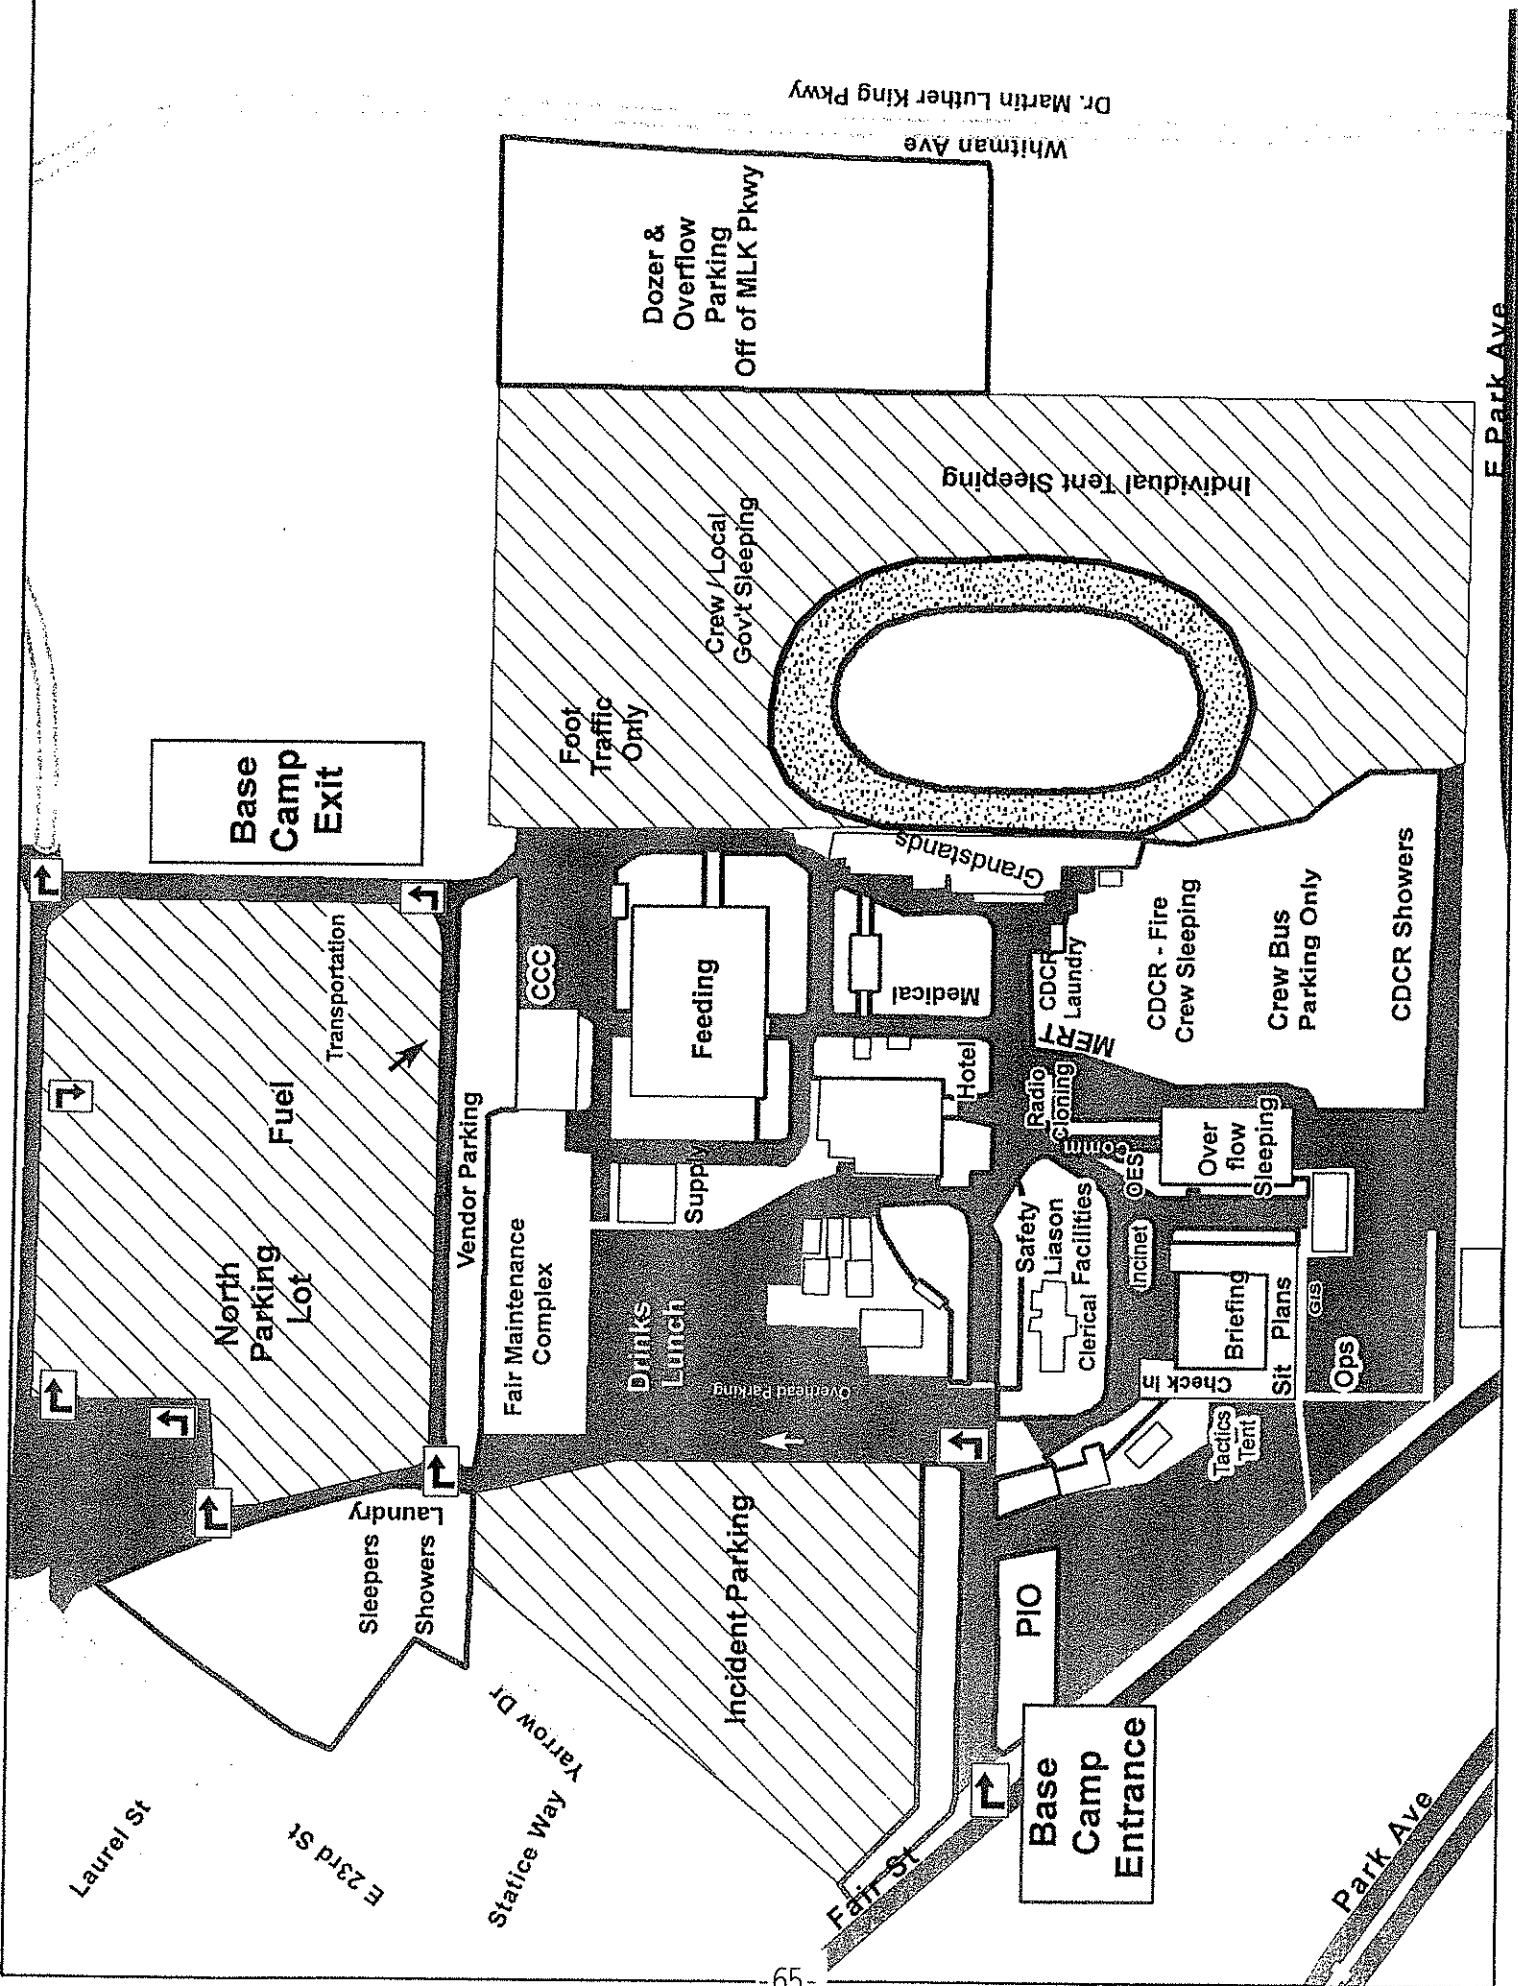

Piles along roads and fences: Lop to fire protection standards to ensure decreased fire risk is obtained. Scatter smaller debris where applicable.

Watercourse Crossings: All slash, soil, and debris deposited into watercourses resulting from fire suppression activities shall be removed and stabilized above the high-water line.

Major watercourse damage, if present, shall be reported to the Fire Suppression Repair Specialist prior to the end of the shift day.

Where fire lines are constructed within 100' of flowing watercourses, slash or straw mulching will be applied. All loose soil must be pulled away from the watercourse and stabilized.

Archaeological or Historic Sites: All potential sites shall be avoided. Contact Incident Archaeologist.
