

INCIDENT ACTION PLAN CAMP INCIDENT

CA-BTU-016737

Monday

OPERATIONAL PERIOD

11/19/2018 0700

to

11/20/2018 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">Camp</p>	2. Operational Period: <table style="width: 100%; border: none;"> <tr> <td style="border: none;">Date From:</td> <td style="border: none;">11/19/2018</td> <td style="border: none;">Date To:</td> <td style="border: none;">11/20/2018</td> </tr> <tr> <td style="border: none;">Time From:</td> <td style="border: none;">0700</td> <td style="border: none;">Time To:</td> <td style="border: none;">0700</td> </tr> </table>	Date From:	11/19/2018	Date To:	11/20/2018	Time From:	0700	Time To:	0700
Date From:	11/19/2018	Date To:	11/20/2018						
Time From:	0700	Time To:	0700						

3. Objective(s):

Management Objectives

- Provide for and maintain public and first responder safety by utilizing the incident safety analysis process.
- Protect all critical infrastructure to include communication towers, water systems, natural gas, railroad and highways.
- It is the Unified Incident Commander's Leader's Intent to ensure transparent, timely and accurate communication at all levels of the incident.
- Be financially responsible for all management and fire suppression tactics.
- Foster and enhance community and political relationships.
- All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of Butte County.

Fire Control Objectives

- Keep the fire East of Hwy 99 to Cohasset Rd.
- Keep the fire South of Kanaka Creek
- Keep the fire West of Oroville Quincy Hwy
- Keep the fire North of Hwy 149 and the intersection of Hwy 149 and Hwy 99

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

5. Site Safety Plan Required? Yes No

Fire Weather Forecast

FORECAST NO: 11
PREDICTION FOR: DAY/NIGHT SHIFT
SHIFT DATE: November 19-20, 2018
TIME/DATE ISSUED: November 18, 2018 2000 PDT

NAME OF FIRE: Camp
UNIT: CA-BTU
SIGNED: Aviva Braun IMET(T) and Alex Hoon IMET

Handwritten signatures and initials

WEATHER DISCUSSION: ...RAIN BEGINS WEDNESDAY AND CONTINUES THROUGH FRIDAY...

Breezy northeast winds this morning will taper off as the morning progresses, finally switching to an upslope/updrainage flow by 1300. Little mixing during the day and increased smoke activity will lower visibilities over the course of the day...

WEATHER FORECAST FOR TODAY: ... WINDY IN THE MOUNTAINS, DECREASING AFTER 1000...

WEATHER: A few high clouds with heavy smoke through the day.

MAX TEMPERATURES: 55-65°F LITTLE CHANGE

MIN HUMIDITY: 20-30% LITTLE CHANGE

20-FOOT WIND: ...BREEZY MORNING WINDS...

SLOPE/VALLEY - Winds in the morning from the northeast 5-15 mph with gusts up to 20 mph. Up to 30 mph along the Feather River drainage and other NE-SW aligned valleys.

RIDGETOP - Northeast 10-15 mph with gusts up to 30 mph. Winds decrease and become 5-10 mph upslope/updrainage around 1300.

MIXING HEIGHT: 1500 ft AGL in the afternoon TRANSPORT WINDS: West to southwest 5-10 mph.

TONIGHT: ...NORTHEAST WINDS OVERNIGHT...

WEATHER: Breezy with smoke.

MIN TEMPERATURES: 35-45°F LITTLE CHANGE

MAX HUMIDITY: 25-35% LITTLE CHANGE

20-FOOT WIND:

SLOPE/VALLEY - Winds increasing from the Northeast 5-15 mph with gusts up to 20 mph after 2000 along the Feather River drainage and other NE-SW aligned valleys.

RIDGETOP - Northeast 5-15 mph with gusts up to 20 mph.

EXTENDED FORECAST: ...RAIN WEDNESDAY AND AGAIN THURSDAY NIGHT/FRIDAY...

TUESDAY: Lighter winds expected. Downdrainage overnight into the morning hours. Upslope/updrainage flow during the afternoon. Temperatures in the 60s. Humidity near 25-45%, driest in thermal belts above 1500-2500ft.

WEDNESDAY - FRIDAY: Wet conditions are in store for the area. Several inches of rain are possible with snow possible above 5000-5500 feet, beginning Thursday night.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 11	TYPE OF FIRE: WILDFIRE
FIRE NAME: CAMP	OPERATIONAL PERIOD: NOV 19 --24 HOUR
DATE ISSUED: NOV 18, 2018	TIME ISSUED: 1900
UNIT: BUTTE UNIT/PLUMAS NF	SIGNED: 
	Typed/printed: TIM CHAVEZ, FBAN

INPUTS

WEATHER SUMMARY:
MORE MODERATE HUMIDITY AND LESS WIND. STILL BREEZY AT NIGHT. SEE IMET FORECAST.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

FUEL DRYNESS IS TYPICAL OF LATE SUMMER. ENERGY RELEASE COMPONENT OF THE NATIONAL FIRE DANGER RATING SYSTEM FINALLY TRENDING DOWNWARD. THE LOWER ELEVATIONS HAVE BEEN 217 DAYS WITHOUT A STORM THAT DELIVERED OVER 1/4" OF RAIN. LIVE FUEL MOISTURES IN MANZANITA ARE 74% (80 IS CONSIDERED CRITICAL). 100 HR FUELS 6%. 1000 HR FUELS 7%. SPOTTING DISTANCES UP TO 0.1 MILE. PROBABILITY OF IGNITION 32%, HIGHER IN DIRECT SUN. CONSIDERABLE REBURN POTENTIAL IN INTACT CANOPY IN BRUSH AND TIMBER.

SPECIFIC:

BRANCH I

SMOLDERING MATERIAL COULD IGNITE UNBURNED TREES AND CAUSE EMBER TRAVEL UP TO 1/10 MILE. TACTICAL PATROL WILL BE IMPORTANT TO PREVENT FURTHER DAMAGE.

BRANCH II AND III

NO MOVEMENT ANTICIPATED. SMOLDERING FUELS ARE A HAZARD TO IGNITE SCORCHED CANOPY AND REBURN.

BRANCH VI

SPOTTING POTENTIAL ACROSS FROM GRIZZLY CREEK. EXPECT BACKING FIRE SPREAD.

BRANCH X

IF A SPOT CROSSES GRIZZLY CREEK A HIGH INTENSITY UPSLOPE RUN WILL TAKE ABOUT 4-8 HOURS TO GET TO THE TOP OF GRIZZLY DOME. DAYTIME CONDITIONS WILL BE FAVORABLE FOR FIRING.

BRANCH XI

SPOTTING HAZARD WILL BE HIGH IN SHARP BENDS OF THE FEATHER RIVER. A SPOT ACROSS THE LAKE WILL ARRIVE IN BERRY CREEK WITHIN A FEW HOURS.

AIR OPERATIONS:

SMOKE DECREASES VISIBILITY MOST OF THE DAY.

SAFETY

- FIRE WEAKENED TIMBER ALL OVER THE FIRE AREA IS A SAFETY HAZARD. DON'T TAKE BREAKS OR EAT LUNCH WITHOUT LOOKING UP FIRST.
- REBURN COULD MAKE SEEMINGLY VIABLE SAFETY ZONES UNTENABLE.
- ROCKS CAN BE DISLODGED BY FIRE ON STEEP SLOPES. POST A LOOKOUT FOR THIS.

Fuels and Fire Behavior Advisory

Northern California Geographic Area

November 9, 2018

Subject: Unseasonably dry, mild weather the past few weeks has amplified fuel dryness in all size classes across Northern California. Extreme fire behavior and rapid to dangerous rates of spread continue to occur with high potential for that to persist through the week of November 11th.

Discussion: Unseasonably mild, very dry weather in recent weeks across Northern California this fall has kept fuels very dry and been expanding drought conditions. Although reasonably plentiful rain fell across much of the Geographic Area right around the beginning of October, recent dry weather has essentially erased any fuel moisture gains from that event. Much of the time since then, a ridge of high pressure persisting out over the Pacific Ocean has mostly been keeping a very dry airmass over the Geographic Area. The weather pattern during the past 3 weeks been particularly dry with a steady series of N to E foehn wind events that have contributed significantly to fuel dryness and challenging fire control conditions. Fires have recently shown or exhibited rapid or dangerous spread rates or generate extreme fire behavior. Even some internal islands in earlier large fire perimeters (e.g. Carr Fire) have reportedly rekindled, apparently from long-held residual heat. It is not just windy areas that have experienced rapid spread, but some fuel-and-slope-driven fires have also seen unseasonable, very active fire behavior.

Difference from normal conditions: Northern California normally sees enough precipitation by late October to bring about fire season-ending conditions. Early October's precipitation did mitigate fire danger for a bit, but unseasonably dry weather since then and several significant foehn wind events the past few weeks have created very dry fuel conditions much later into the fall season than usual. Very low daily afternoon minimum relative humidity (RH) values of 5-12% have been common, and recent wind events have limited overnight RH recovery to less than 25% in many locations and to less than 15% in some. This has had a dramatic effect on fuel dryness and fire danger indices which are now either near seasonal record values or at core fire season severity levels. For more information about the very unseasonable environmental conditions occurring, follow these links:

https://gacc.nifc.gov/oncc/fuelsFireDanger_Bi.php

https://gacc.nifc.gov/oncc/fuelsFireDanger_Erc.php

https://gacc.nifc.gov/oncc/fuelsFireDanger_Hundred.php

https://gacc.nifc.gov/oncc/fuelsFireDanger_Thousand.php

<https://www.esrl.noaa.gov/psd/eddi/> and ftp://ftp.cdc.noaa.gov/Public/mhobbins/EDDI/CN_DEWS/EDDI_01mn.png

Concerns to Firefighters and the Public:

- One hour fine fuel loading across the Geographic Area remains well above normal.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety zones).
- Review current fire potential products from Predictive Services at <https://gacc.nifc.gov/oncc/predictive/weather/index.htm> or potential Red Flag conditions from the National Weather Service at Weather at <https://www.wrth.noaa.gov/fire2/cafw/>.

Area of Concern: Most areas across Northern California could see active fire behavior, but the most severe conditions are in the Sacramento Valley and surrounding foothills, the western slopes of Cascade and Northern Sierra Nevada mountains, and Mendocino County southward, including all of the Bay Area. The PSA numbers associated with those areas are NC03A, NC03B, NC05 and NC07.

SAFETY MESSAGE

CAMP

18-CA-BTU-016737 November 19, 2018 0700-0700

DEMOB

ACCIDENTS CAN HAPPEN DURING DEMOB

Watch Out

- Vehicles will be moving in tight areas around Ground Support and parking areas
- Increased backing and maneuvering of vehicles in tight spots
- Crews may be in a hurry to get home or leave the incident due to reassignment

Mitigation

- Provide back-up and spotter personnel - more than one may be required
- Drive safely and be on the lookout for ICP pedestrian traffic
- Drive safely and monitor fatigue when traveling to home unit or new incident

GENERAL SAFETY AWARENESS

MANY HAZARDS AND RISK REMAIN

Watch Out

- Hazardous Materials, LPG, Kerosene, Unstable structures and free-standing chimneys
- Snags, fire weakened trees.
- Electricity that is being restored in some areas

Mitigation

- Wear proper PPE including N95 masks and SCBA as required
- Be aware of your surroundings – look for hazards and consider risk
- Consider all electrical lines as being energized

EMOTIONAL AND PHYSICAL FATIGUE

FATIGUE CAN CAUSE US TO SACRIFICE SAFETY FOR THE SAKE OF THE TASK

Watch Out

- Look for general depression
- Look for lack of work production
- Look for signs and symptoms among your fellow workers

Mitigation

- Get as much quality rest as possible
- Eat properly and stay hydrated
- Talk about difficult situations with your peers – seek help

AIR OPERATIONS SUMMARY ICS-220

Incident Name and Incident Number
Camp Incident CA - BTU - 016737

Sunrise 656 Startup 726 Cutoff 1621 Sunset 1651

General Remarks, Safety Notes, Hazards, Air Operations Special Equipment, etc.
 TRACK ALL DIPSITE LOCATIONS / NUMBER OF DIPS / GALLONS TAKEN.
 TRACK ALL DROP LOCATIONS / NUMBER OF DROPS / GALLONS DROPPED.
 ALL GPS DATA TO BE COLLECTED IN DEGREES, MINUTES, DECIMAL MINUTES FORMAT.
 AVOID Aerial Application of Retardant / Foam / Agent within 300' of Waterways, Bodies of Water, etc.
 If Retardant / Foam / Agent is Dropped Within These Areas Immediately Notify the AOB&C and Provide the Following Information: Lat / Long, Estimated Number of Gallons and a Map Detailing The Area.

Frequencies	RX	Tone	TX	Tone	AM / FM

MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY: CALCORD

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division Group Supervisor Contacts:

1. Closest EMS resource
 2. Communications Unit
- Communications Unit Contacts:
1. Ground or Air Ambulance as requested.
 2. Medical Unit (916) 622-3371
 3. Safety
 4. Operations

- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.

1. A pre-assigned tactical frequency (CALCORD) should be used for IWI and only for duration of the emergency.
- Communications Unit will clear the Command channel for emergency traffic as needed for duration of the need.

CAMP EMERGENCY:

Contact Communications on CALCORD or @ 530-417-4561 with patient complaint and location.

Communications will respond appropriate medical response.

- Communications contacts:

1. Medical Unit
2. Safety
3. Logistics
4. Operations
5. Crew Supervisor
6. Comp/Claims

INCIDENT REPORTING PROCEDURES:

****COLLECT ALL INFO BELOW PRIOR TO INITIATING EMERGENCY****

CHIEF COMPLAINT _____

LOCATION OF PATIENT _____

POINT OF CONTACT _____

TRANSPORTATION REQUESTED BY: AIR ___ **GROUND** ___

POINT OF PICKUP _____

LAT _____ **LONG** _____

PATIENT UNIT ID _____

IS AN LINE MEDIC WITH PATIENT: YES ___ **NO** ___

AGE _____

SEX: MALE ___ **FEMALE** ___

ALL EMERGENCIES--Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

Hospital	LAT	LONG
Oroville	39 30.27	121 32.52

CAMP FIRE INFORMATION

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:** Inappropriate information, Inappropriate pictures or videos, Opinions regarding the incident or policy, Endorsements of any kind.

FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

Think before you post:

- On official time, do official duties; if using government equipment, do government business.
- Don't use your official position/title for private gain.
- Do share government information that is publically available (such as links to Inciweb, weather reports, feature stories, official evacuation notices etc...) Do not disclose (via any medium) non-public information to further private interests or the private interests of others.
- Do not share information outside official channels that could be associated with a crime or a claim, (for instance do not post on social media about serious accidents, deaths or destroyed property).
- Do not accept compensation for statements made over social media that relate to official duties.
- Never use your official title while engaging in "political activity" (activity directed toward the success or failure of a political party, partisan candidate or partisan political group).
- Federal employees may express their opinions concerning partisan political candidates and political parties on social media when they are off duty and away from the federal workplace.
- If you have questions about content you'd like to post on social media, contact a PIO, they can help you.

CITIZENS IN THE AREA

As citizens start to repopulate into the affected areas we would like to remind you that you are a great asset and resource ambassador of the fire service. As you come into contact with the citizens please treat the citizens as if they were the citizens of your own community.

These citizens just went through a very tragic incident. Please help curb aggressive media away from citizens who may not want to be interviewed or allowed on their private property.

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

For approval to post Photo and Video you have taken of the fire, please send to the PIO's incident email at: Camp2018fire@gmail.com

LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Public Information Trailer in Base Camp.

MAIL SERVICE

The Information staff will assist you in receiving letters and packages. Mailing address for Mendocino Complex Fire personnel to have mail sent to:

(Persons Name, O-Number)
C/O Camp Fire Incident
Silver Dollar Fairgrounds
ATTN: PIO TRAILER
2357 Fair St.
Chico, CA 95928

PHONE LINES

Public Information Line: 530-538-7826
Media Information Line: 530-487-4788

Email Updates (Sign-Up): <https://tinyurl.com/2018campfire>

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

DMOB

CAMP INCIDENT
CA – BTU – 016737

- Resources must check-in prior to the Demobilization process.
- In order to be deemed excess, supervisors must submit an ICS 213 to the Resources Unit.
- Resources report to the Demobilization Unit at the times posted on the tentative DMOB list, which is posted around the Incident Base and to the Box account.
- Prior to reporting to DMOB, please return all supplies and equipment.
- Resources will get signatures from the following units:
 - Ground Support (Vehicle Inspection)
All rental vehicles MUST be inspected
 - Training (If they have a trainee)
 - Documentation
 - Time
- The following will be done by radio at DMOB
 - Motels
 - Supply
 - Communications
 - DMOB

**CAMP INCIDENT
CA-BTU-016737
REMOTE CHECK-IN**

**Please use this code to check In to the
CAMP INCIDENT**

REMEMBER: YOU MUST STILL VISIT TIME UNIT!

Local Government/OES Engines

Due to the complexity and timing of the Camp Incident Operations and your OES AREP are asking for the following information from your Strike Teams.

Use the QR code to fill out the form or fill out the attached and drop off the form at the OES Support Unit.

Strike Team Designator E- _____

Will your Strike Team be able to extend past 14 Days? YES NO

Will your Strike Team be able to rotate at 14 Days? YES NO

TRAINING SPECIALIST MESSAGE

**A Training Specialist is available for trainees on
the incident.**

**All State, Federal and local government agency
Trainees working on Position Task Books will
need to register with the Incident Training
Specialist in order to receive proper credit for
your assignment.**

Training Specialist's

Dennis Martin

Archaeological and Historic Properties: Fireline Guidance for the Camp Incident, Butte County CA

*Do not compromise safety for the protection and preservation of archaeological and historic properties.
When possible and prudent:*

1. Be on the lookout for prehistoric archaeological sites. These sites may include seasonal camps marked by the presence of obsidian and/or basalt flakes, bedrock mortar food processing sites, and village sites that contain the above and dark midden soils. The Native American group living in the area at time of historic contact was the Maidu.
2. Be on the lookout for historic archaeological sites. These sites may include old homesteads now marked by the presence of foundations, wells, and can dumps, early sawmill sites, abandoned ditches, mining tailings, and other mining features including adits (horizontal) and shafts (vertical).
3. Look for these prehistoric and historic sites in flat areas, especially adjacent to streams and springs.
4. Known sites will be marked with red/white or red/black striped plastic flagging tape.
5. If you observe artifacts, features, or sites attempt to avoid if possible. If you can't avoid, minimize ground disturbance as much as possible, only clearing the surface to as minimal a depth as necessary. Try to go around sites with dozers rather than through them. Flag new sites if possible.
6. If you find artifacts leave them in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
7. Note locations of discovered artifacts, features, and/or sites on a map. Better yet take a GPS reading if possible. Leave information for the archaeologist with the Situation Unit so that the sites can be relocated and protected during Fire Suppression Repair.
8. If you encounter a burial site cease work in the area and contact the archaeologist immediately.

Thanks for your help protecting California's cultural heritage.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications

- Other: _____
- Other: _____

Attach Firing Operations Checklist to ICS-214

Rev: Ops Group February 8, 2011

EMERGENCY FIRE SUPPRESSION REPAIR PLAN - CAMP INCIDENT

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas caused by the fire. We cannot upgrade facilities beyond their pre-fire condition. Fire suppression repair shall be applied to mitigate infrastructure damage and natural resource damage.

Infrastructure Damage: Culverts and other watercourse crossings, water sources, trails, road barriers removed for fire access, trash, debris and supplies left by fire suppression activities; miscellaneous.

Natural Resource Damage: Repair of existing problems caused by fire suppression activities (direct effect) to natural resources and to prevent likely future problems such as accelerated erosion caused by rains (indirect effect). The goal is to minimize soil erosion, adverse impacts to water quality, and adverse impacts to protected species of plants and animals

REPAIR GUIDELINES

General: Restore berms and barriers removed for fire control access.

Drop Points/Staging Areas/Safety Zones: New construction - cross drain and abandon (if applicable). Existing - repair to original condition, remove debris resulting from use. Pick up all trash.

Roads: Reshape soil surfaced roads that were used during fire control operations. Roads should be out-sloped with rolling dips where degradation of the road prism has resulted from fire control operations. Clean out culvert inlets and outlets as needed. Report any damaged culverts to the Fire Suppression Repair Specialist for specific repair guidance. Breach berms, where appropriate, to facilitate drainage.

Firelines: Break apart dozer piles of pushed over trees, vegetation and soil, and spread along tractor roads, tractor fire breaks, or any other areas disturbed during fire suppression activities. Lop and scatter displaced vegetation to a height of less than 30 inches or chip within 100' of a gravel road or structure. Scatter the lopped material along the fire line. Pull back any excess soil material sidecast along roads or tractor disturbed areas that are located within 100 feet of any watercourse or spring. Install waterbreaks on all constructed or used dozer lines using the following criteria:

Fireline and road gradient(%) grasslands:	0-10	11-25	26-50	>50
Fireline waterbreak spacing:	150'	100'	75'	75'
Road waterbreak spacing:	300'	200'	150'	100'
Fireline and road gradient(%) all other areas:	0-10	11-25	26-50	>50
Fireline waterbreak spacing:	100'	75'	50'	25'
Road waterbreak spacing:	150'	100'	75'	50'

Waterbreaks and/or rolling dips shall be used to reduce the volume and velocity of water by directing it off fire lines as soon as possible at controlled locations. The outfall end of all waterbreaks shall be opened by hand if necessary. Waterbreaks should be located to discharge into natural vegetation. Waterbreaks should cross the fire line at an angle of approximately 45 degrees.

Handlines: Install waterbreaks as needed based on slope and soil erodibility.

All waterbreaks shall be installed diagonally with a minimum cut of 6" into existing grade, and minimum height of 12". Waterbreaks shall be constructed to allow for drainage at the discharge end into non-erodible material.

Slash Piles: Piles within 150' of permanent structures or public roads will be lopped and/or scattered within 18" of the soil surface.

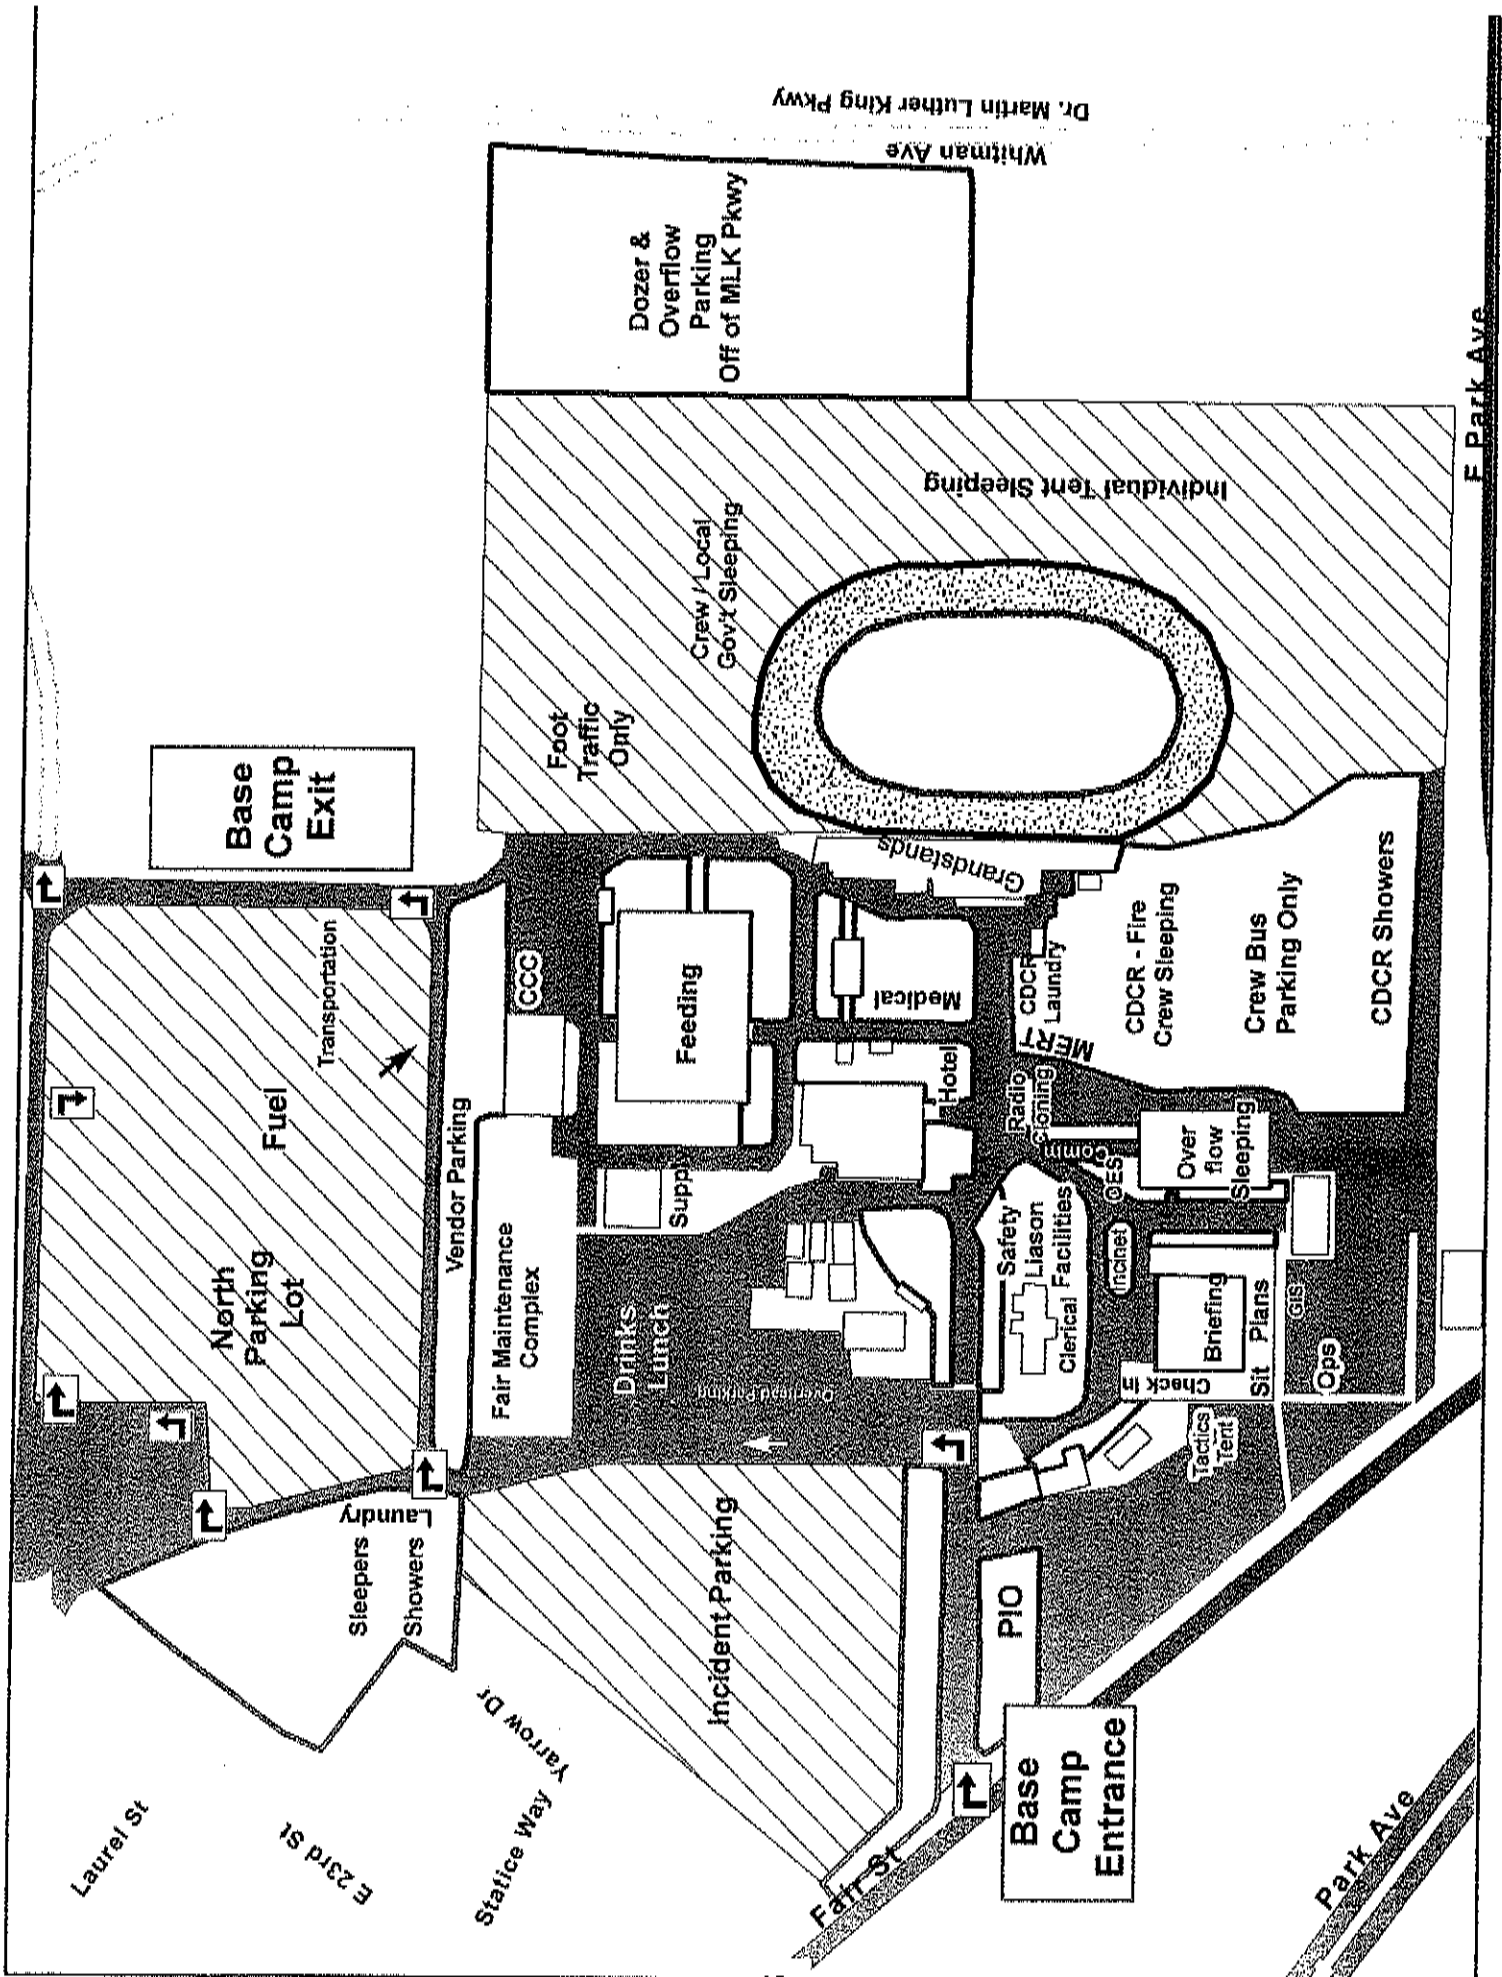

Piles along roads and fences: Lop to fire protection standards to ensure decreased fire risk is obtained. Scatter smaller debris where applicable.

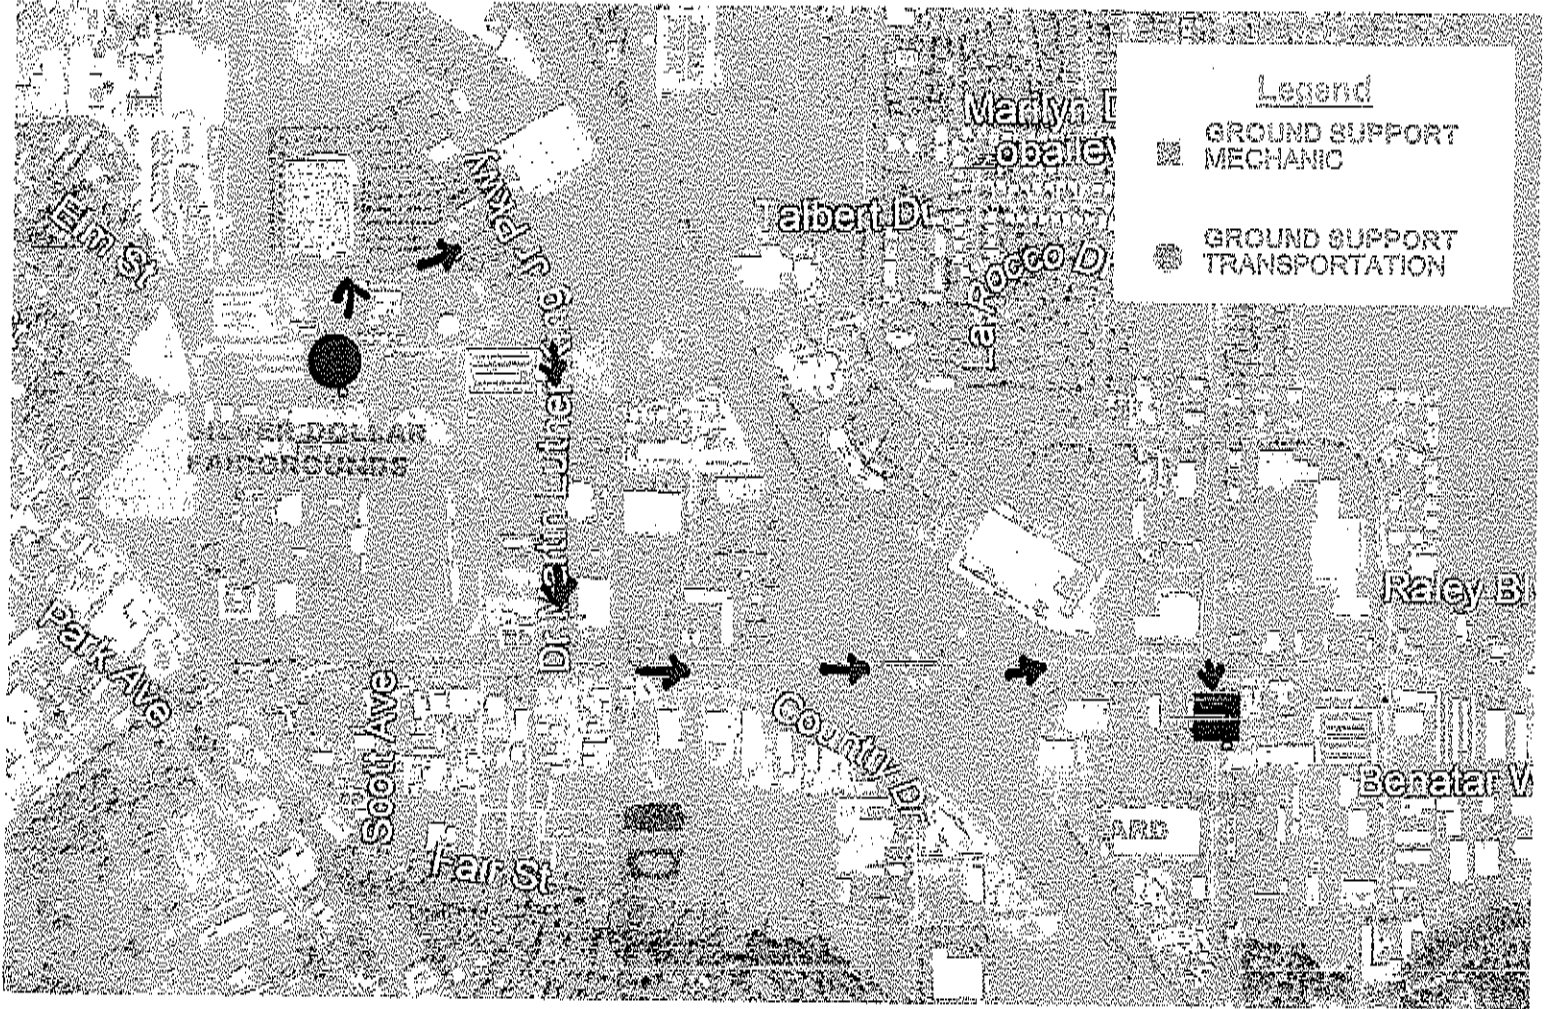

Watercourse Crossings: All slash, soil, and debris deposited into watercourses resulting from fire suppression activities shall be removed and stabilized above the high-water line.

Major watercourse damage, if present, shall be reported to the Fire Suppression Repair Specialist prior to the end of the shift day.

Where fire lines are constructed within 100' of flowing watercourses, slash or straw mulching will be applied. All loose soil must be pulled away from the watercourse and stabilized.

Archaeological or Historic Sites: All potential sites shall be avoided. Contact Incident Archaeologist.
