# CAMP INCIDENT

CA-BTU-016737

Tuesday

## OPERATIONAL PERIOD

**11/20/2018 0700**

**to**

**11/21/2018 0700**

# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> <p style="text-align: center;">Camp</p>	<b>2. Operational Period:</b>	Date From: 11/20/2018 Time From: 0700	Date To: 11/21/2018 Time To: 0700
<b>3. Objective(s):</b> <u>Management Objectives</u> -Provide for and maintain public and first responder safety by utilizing the incident safety analysis process. -Protect all critical infrastructure to include communication towers, water systems, natural gas, railroad and highways. -It is the Unified Incident Commander's Leader's Intent to ensure transparent, timely and accurate communication at all levels of the incident. -Be financially responsible for all management and fire suppression tactics. -Foster and enhance community and political relationships. -All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of Butte County.			
<u>Fire Control Objectives</u> -Keep the fire East of Hwy 99 to Cohasset Rd. -Keep the fire South of Kanaka Creek -Keep the fire West of Oroville Quincy Hwy -Keep the fire North of Hwy 149 and the intersection of Hwy 149 and Hwy 99			
<b>General Situational Awareness:</b> Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.			
<b>5. Site Safety Plan Required?</b> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> <b>Approved Site Safety Plan(s) Located at:</b>

NIMS IAP

**Fire Weather Forecast**

**FORECAST NO:** 12  
**PREDICTION FOR:** DAY/NIGHT SHIFT  
**SHIFT DATE:** November 20-21, 2018  
**TIME/DATE ISSUED:** November 19, 2018 2000 PDT

**NAME OF FIRE:** Camp  
**UNIT:** CA-BTU  
**SIGNED:** Aviva Braun IMET(T) and  
Alex Hoon IMET

**WEATHER DISCUSSION: ...RAIN BEGINS WEDNESDAY AND CONTINUES THROUGH FRIDAY...**

Overnight northeast winds switch to southerly in the afternoon and continue from the south through the night with gusts up to 25 mph. Humidities will be continually increasing through the period ahead of the rain event. Rain begins Wednesday morning and will continue over the burn area through midmorning on Saturday. The event total will be near 3-5 inches with 1-2 inches falling Wednesday and 2-3 inches falling Thursday-Saturday. For the most part, we are expecting a light steady rain, however, there are periods where moderate to locally heavy rain are possible. These periods are Wednesday afternoon from 1600-1900 and again Friday from 0400-1600. A Flash flood / debris flow watch has been issued to cover this possibility.

**WEATHER FORECAST FOR TODAY: ... WINDS CHANGING OVER TO SOUTHERLY AHEAD OF RAIN...**

**WEATHER:** Increasing clouds with decreasing smoke through the day.

**MAX TEMPERATURES:** 55-65°F LITTLE CHANGE

**MIN HUMIDITY:** 20-30%. LITTLE CHANGE

**20-FOOT WIND:**

**SLOPE/VALLEY** - Winds in the morning from the northeast 5-10 mph with gusts up to 15 mph. Up to 25 mph along the Feather River drainage and other NE-SW aligned valleys. Lighter winds down near Chico and Oroville. Winds become south, upslope/updrainage 5-7 mph with gusts to 15 mph by 1200.

**RIDGETOP** - Northeast 10-15 mph with gusts up to 25 mph. Winds become south, upslope/updrainage 5-10 mph with gusts to 20 mph at 1200.

**MIXING HEIGHT:** 2500 ft AGL in the afternoon      **TRANSPORT WINDS:** Southwest 15-20 mph.

**TONIGHT: ... SOUTHEAST WINDS OVERNIGHT...**

**WEATHER:** Increasing clouds. Warmest and driest within the thermal belt from 1500-2500 feet.

**MIN TEMPERATURES:** 35-45°F LITTLE CHANGE

**MAX HUMIDITY:** 40-50% 15% INCREASE

**20-FOOT WIND:**

**SLOPE/VALLEY** - Light southeast winds at 5-10 mph with gusts up to 20 mph along the Feather River drainage.

**RIDGETOP** - Southeast 5-10 mph with gusts up to 20 mph.

**EXTENDED FORECAST: ... FLASH FLOOD/DEBRIS FLOW WATCH FOR WEDNESDAY-FRIDAY...**

**WEDNESDAY MORNING- SATURDAY MORNING:** Wet conditions are in store for the area. Several inches of rain are expected with 1-2 inches coming Wednesday and 2-3 inches Thursday into Saturday, for a total of 3-5 inches over the period. Moderate to locally heavy rain may be possible Wednesday afternoon and again Friday morning. Snow possible above 5000-5500 feet, beginning Thursday night.

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 12	TYPE OF FIRE: WILDFIRE
FIRE NAME: CAMP	OPERATIONAL PERIOD: NOV 20 --24 HOUR
DATE ISSUED: NOV 19, 2018	TIME ISSUED: 1900
UNIT: BUTTE UNIT/PLUMAS NF	SIGNED:  Typed/printed: TIM CHAVEZ, FBAN

## INPUTS

### WEATHER SUMMARY:

MORE MODERATE HUMIDITY AND LESS WIND. WINDS SWITCHING TO SOUTHERLY AS FRONT APPROACHES. SEE IMET FORECAST.

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

FUEL DRYNESS IS TYPICAL OF LATE SUMMER. ENERGY RELEASE COMPONENT OF THE NATIONAL FIRE DANGER RATING SYSTEM FINALLY TRENDING DOWNWARD. THE LOWER ELEVATIONS HAVE BEEN 217 DAYS WITHOUT A STORM THAT DELIVERED OVER 1/2" OF RAIN. LIVE FUEL MOISTURES IN MANZANITA ARE 74% (80 IS CONSIDERED CRITICAL). 100 HR FUELS 5%. 1000 HR FUELS 7%. SPOTTING DISTANCES UP TO 0.2 MILE. PROBABILITY OF IGNITION 32%, HIGHER IN DIRECT SUN. CONSIDERABLE REBURN POTENTIAL IN INTACT CANOPY IN BRUSH AND TIMBER.

#### SPECIFIC:

##### BRANCH I

ROLLING/SMOLDERING MATERIAL COULD IGNITE UNBURNED TREES AND CAUSE EMBER TRAVEL UP TO 1/10 MILE. TACTICAL PATROL WILL BE IMPORTANT TO PREVENT FURTHER DAMAGE.

##### BRANCH II AND III

NO MOVEMENT ANTICIPATED. INTERIOR ISLANDS MIGHT PRESENT A HAZARD TO THE LINE.

##### BRANCH VI

SOUTHWEST TO SOUTHEAST WINDS LATER IN THE DAY WILL CHALLENGE LINES. INCREASING HUMIDITY WILL LESSEN SPOTTING POTENTIAL.

##### BRANCH X

GRIZZLY CREEK IS WET AND ROLLING MATERIAL IS UNLIKELY TO CROSS. DAYTIME CONDITIONS WILL BE FAVORABLE FOR FIRING BUT SOUTHERLY WINDS MAY CAUSE PROBLEMS ON PULGA MERRIMACK.

##### BRANCH XI

SPOTTING HAZARD WILL BE HIGH IN SHARP BENDS OF THE FEATHER RIVER. ROLLING MATERIAL IS A THREAT.

### AIR OPERATIONS:

SMOKE DECREASING, STILL VISIBILITY PROBLEMS ON THE EAST SIDE OF THE FIRE.

## SAFETY

- FIRE WEAKENED TIMBER ALL OVER THE FIRE AREA IS A SAFETY HAZARD. CHANGE IN WIND DIRECTION MIGHT DISLODGE NEW TREES. DON'T TAKE BREAKS OR EAT LUNCH WITHOUT LOOKING UP FIRST.
- ROCKS CAN BE UNDERMINED BY FIRE ON STEEP SLOPES. POST A LOOKOUT FOR THIS.
- WHEN MOPPING UP BE ON THE LOOKOUT FOR STUMP HOLES.

# Fuels and Fire Behavior Advisory

## Northern California Geographic Area

November 9, 2018

**Subject:** Unseasonably dry, mild weather the past few weeks has amplified fuel dryness in all size classes across Northern California. Extreme fire behavior and rapid to dangerous rates of spread continue to occur with high potential for that to persist through the week of November 11<sup>th</sup>.

**Discussion:** Unseasonably mild, very dry weather in recent weeks across Northern California this fall has kept fuels very dry and been expanding drought conditions. Although reasonably plentiful rain fell across much of the Geographic Area right around the beginning of October, recent dry weather has essentially erased any fuel moisture gains from that event. Much of the time since then, a ridge of high pressure persisting out over the Pacific Ocean has mostly been keeping a very dry airmass over the Geographic Area. The weather pattern during the past 3 weeks been particularly dry with a steady series of N to E foehn wind events that have contributed significantly to fuel dryness and challenging fire control conditions. Fires have recently shown or exhibited rapid or dangerous spread rates or generate extreme fire behavior. Even some internal islands in earlier large fire perimeters (e.g. Carr Fire) have reportedly rekindled, apparently from long-held residual heat. It is not just windy areas that have experienced rapid spread, but some fuel-and-slope-driven fires have also seen unseasonable, very active fire behavior.

**Difference from normal conditions:** Northern California normally sees enough precipitation by late October to bring about fire season-ending conditions. Early October's precipitation did mitigate fire danger for a bit, but unseasonably dry weather since then and several significant foehn wind events the past few weeks have created very dry fuel conditions much later into the fall season than usual. Very low daily afternoon minimum relative humidity (RH) values of 5-12% have been common, and recent wind events have limited overnight RH recovery to less than 25% in many locations and to less than 15% in some. This has had a dramatic effect on fuel dryness and fire danger indices which are now either near seasonal record values or at core fire season severity levels. For more information about the very unseasonable environmental conditions occurring, follow these links:

[https://gacc.nifc.gov/oncc/fuelsFireDanger\\_Bi.php](https://gacc.nifc.gov/oncc/fuelsFireDanger_Bi.php)

[https://gacc.nifc.gov/oncc/fuelsFireDanger\\_Erc.php](https://gacc.nifc.gov/oncc/fuelsFireDanger_Erc.php)

[https://gacc.nifc.gov/oncc/fuelsFireDanger\\_Hundred.php](https://gacc.nifc.gov/oncc/fuelsFireDanger_Hundred.php)

[https://gacc.nifc.gov/oncc/fuelsFireDanger\\_Thousand.php](https://gacc.nifc.gov/oncc/fuelsFireDanger_Thousand.php)

<https://www.esrl.noaa.gov/psd/eddi/>

and [ftp://ftp.cdc.noaa.gov/Public/mhobbins/EDDI/CN\\_DEWS/EDDI\\_01.mn.png](ftp://ftp.cdc.noaa.gov/Public/mhobbins/EDDI/CN_DEWS/EDDI_01.mn.png)

### Concerns to Firefighters and the Public:

- One hour fine fuel loading across the Geographic Area remains well above normal.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

### Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety zones).
- Review current fire potential products from Predictive Services at <https://gacc.nifc.gov/oncc/predictive/weather/index.htm> or potential Red Flag conditions from the National Weather Service at Weather at <https://www.wrh.noaa.gov/fire2/cafw/>.

**Area of Concern:** Most areas across Northern California could see active fire behavior, but the most severe conditions are in the Sacramento Valley and surrounding foothills, the western slopes of Cascade and Northern Sierra Nevada mountains, and Mendocino County southward, including all of the Bay Area. The PSA numbers associated with those areas are NC03A, NC03B, NC05 and NC07.

### DEMOB

#### ACCIDENTS CAN HAPPEN DURING DEMOB

##### Watch Out

- Vehicles will be moving in tight areas around Ground Support and parking areas
- Increased backing and maneuvering of vehicles in tight spots
- Crews may be in a hurry to get home or leave the incident due to reassignment

##### Mitigation

- Provide back-up and spotter personnel - more than one may be required
- Drive safely and be on the lookout for ICP pedestrian traffic
- Drive safely and monitor fatigue when traveling to home unit or new incident

S  
A  
F  
E  
T  
Y

### GENERAL SAFETY AWARENESS

#### MANY HAZARDS AND RISK REMAIN

##### Watch Out

- Hazardous Materials, LPG, Kerosene, Unstable structures and free-standing chimneys
- Snags, fire weakened trees.
- Electricity that is being restored in some areas

##### Mitigation

- Wear proper PPE including N95 masks and SCBA as required
- Be aware of your surroundings – look for hazards and consider risk
- Consider all electrical lines as being energized

S  
A  
F  
E  
T  
Y

### EMOTIONAL AND PHYSICAL FATIGUE

#### FATIGUE CAN CAUSE US TO SACRIFICE SAFETY FOR THE SAKE OF THE TASK

##### Watch Out

- Look for general depression
- Look for lack of work production
- Look for signs and symptoms among your fellow workers

##### Mitigation

- Get as much quality rest as possible
- Eat properly and stay hydrated
- Talk about difficult situations with your peers – seek help

### AIR OPERATIONS SUMMARY ICS-220

Incident Name and Incident Number		Sunrise	Startup	Cutoff	Sunset
Camp Incident CA - BTU - 016737		656	726	1621	1651
General Remarks, Safety Notes, Hazards, Air Operations Special Equipment, etc. TRACK ALL DIPSITE LOCATIONS / NUMBER OF DIPS / GALLONS TAKEN. TRACK ALL DROP LOCATIONS / NUMBER OF DROPS / GALLONS DROPPED. ALL GPS DATA TO BE COLLECTED IN DEGREES, MINUTES, DECIMAL MINUTES FORMAT. AVOID Aerial Application of Retardant / Foam / Agent within 300' of Waterways, Bodies of Water, etc. If Retardant / Foam / Agent is Dropped Within These Areas Immediately Notify the AOB/D and Provide the Following Information: Lat / Long, Estimated Number of Gallons and a Map Detailing The Area.					

Frequencies	RX	Tone	TX	Tone	AM / FM
AIR TACTICS	167.9500		167.9500		FM

# CAMP FIRE INFORMATION

## CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:** Inappropriate information, Inappropriate pictures or videos, Opinions regarding the incident or policy, Endorsements of any kind.

## FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

### **Think before you post:**

- On official time, do official duties; if using government equipment, do government business.
- Don't use your official position/title for private gain.
- Do share government information that is publically available (such as links to Inciweb, weather reports, feature stories, official evacuation notices etc...) Do not disclose (via any medium) non-public information to further private interests or the private interests of others.
- Do not share information outside official channels that could be associated with a crime or a claim, (for instance do not post on social media about serious accidents, deaths or destroyed property).
- Do not accept compensation for statements made over social media that relate to official duties.
- Never use your official title while engaging in "political activity" (activity directed toward the success or failure of a political party, partisan candidate or partisan political group).
- Federal employees may express their opinions concerning partisan political candidates and political parties on social media when they are off duty and away from the federal workplace.
- If you have questions about content you'd like to post on social media, contact a PIO, they can help you.

## CITIZENS IN THE AREA

As citizens start to repopulate into the affected areas we would like to remind you that you are a great asset and resource ambassador of the fire service. As you come into contact with the citizens please treat the citizens as if they were the citizens of your own community.

These citizens just went through a very tragic incident. Please help curb aggressive media away from citizens who may not want to be interviewed or allowed on their private property.

## PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

For approval to post Photo and Video you have taken of the fire, please send to the PIO's incident email at: [Camp2018fire@gmail.com](mailto:Camp2018fire@gmail.com)

## LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Public Information Trailer in Base Camp.

## MAIL SERVICE

The information staff will assist you in receiving letters and packages. Mailing address for Mendocino Complex Fire personnel to have mail sent to:

(Persons Name, O-Number)  
C/O Camp Fire Incident  
Silver Dollar Fairgrounds  
ATTN: PIO TRAILER  
2357 Fair St.  
Chico, CA 95928

## PHONE LINES

**Public Information Line: 530-538-7826**

## MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

# DMOB

CAMP INCIDENT  
CA – BTU – 016737

- Resources must check-in prior to the Demobilization process.
- In order to be deemed excess, supervisors must submit an ICS 213 to the Resources Unit.
- Resources report to the Demobilization Unit at the times posted on the tentative DMOB list, which is posted around the Incident Base and to the Box account.
- Prior to reporting to DMOB, please return all supplies and equipment.
- Resources will get signatures from the following units:
  - Ground Support (Vehicle Inspection)  
All rental vehicles **MUST** be inspected
  - Training (If they have a trainee)
  - Documentation
  - Time
- The following will be done by radio at DMOB
  - Motels
  - Supply
  - Communications
  - DMOB

**Archaeological and Historic Properties:  
Fireline Guidance for the Camp Incident,  
Butte County CA**

*Do not compromise safety for the protection and preservation of archaeological and historic properties.  
When possible and prudent:*

1. Be on the lookout for prehistoric archaeological sites. These sites may include seasonal camps marked by the presence of obsidian and/or basalt flakes, bedrock mortar food processing sites, and village sites that contain the above and dark midden soils. The Native American group living in the area at time of historic contact was the Maidu.
2. Be on the lookout for historic archaeological sites. These sites may include old homesteads now marked by the presence of foundations, wells, and can dumps, early sawmill sites, abandoned ditches, mining tailings, and other mining features including adits (horizontal) and shafts (vertical).
3. Look for these prehistoric and historic sites in flat areas, especially adjacent to streams and springs.
4. Known sites will be marked with red/white or red/black striped plastic flagging tape.
5. If you observe artifacts, features, or sites attempt to avoid if possible. If you can't avoid, minimize ground disturbance as much as possible, only clearing the surface to as minimal a depth as necessary. Try to go around sites with dozers rather than through them. Flag new sites if possible.
6. If you find artifacts leave them in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
7. Note locations of discovered artifacts, features, and/or sites on a map. Better yet take a GPS reading if possible. Leave information for the archaeologist with the Situation Unit so that the sites can be relocated and protected during Fire Suppression Repair.
8. If you encounter a burial site cease work in the area and contact the archaeologist immediately.

Thanks for your help protecting California's cultural heritage.

# FIRING OPERATION CHECKLIST

Location: \_\_\_\_\_

Date: \_\_\_\_\_ Time: \_\_\_\_\_

Firing Supervisor \_\_\_\_\_

## 1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
  - Firing personnel
  - Holding forces
  - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

## 2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

## 3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

## 4. Other Notifications

- Other: \_\_\_\_\_
- Other: \_\_\_\_\_

Attach Firing Operations Checklist to ICS-214

WATER SOURCE LOCATION	Hydrant	Open source i.e. pond	Tank	Gallons Used	Property Owner / Contact Number if known **

**\*\*Please note if you made contact with property owner and their contact.  
(Use reverse side if needed.)  
Information: \_\_\_\_\_**

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

## EMERGENCY FIRE SUPPRESSION REPAIR PLAN - CAMP INCIDENT

**Fire Suppression Repair** is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas caused by the fire. We cannot upgrade facilities beyond their pre-fire condition. Fire suppression repair shall be applied to mitigate infrastructure damage and natural resource damage.

**Infrastructure Damage:** Culverts and other watercourse crossings, water sources, trails, road barriers removed for fire access, trash, debris and supplies left by fire suppression activities; miscellaneous.

**Natural Resource Damage:** Repair of existing problems caused by fire suppression activities (direct effect) to natural resources and to prevent likely future problems such as accelerated erosion caused by rains (indirect effect). The goal is to minimize soil erosion, adverse impacts to water quality, and adverse impacts to protected species of plants and animals

### REPAIR GUIDELINES

**General:** Restore berms and barriers removed for fire control access.

**Drop Points/Staging Areas/Safety Zones:** New construction - cross drain and abandon (if applicable). Existing - repair to original condition, remove debris resulting from use. Pick up all trash.

**Roads:** Reshape soil surfaced roads that were used during fire control operations. Roads should be out-sloped with rolling dips where degradation of the road prism has resulted from fire control operations. Clean out culvert inlets and outlets as needed. Report any damaged culverts to the Fire Suppression Repair Specialist for specific repair guidance. Breach berms, where appropriate, to facilitate drainage.

**Firelines:** Break apart dozer piles of pushed over trees, vegetation and soil, and spread along tractor roads, tractor fire breaks, or any other areas disturbed during fire suppression activities. Lop and scatter displaced vegetation to a height of less than 30 inches or chip within 100' of a gravel road or structure. Scatter the lopped material along the fire line. Pull back any excess soil material sidecast along roads or tractor disturbed areas that are located within 100 feet of any watercourse or spring. Install waterbreaks on all constructed or used dozer lines using the following criteria:

Fireline and road gradient(%) grasslands:	0-10	11-25	26-50	>50
Fireline waterbreak spacing:	150'	100'	75'	75'
Road waterbreak spacing:	300'	200'	150'	100'
Fireline and road gradient(%) all other areas:	0-10	11-25	26-50	>50
Fireline waterbreak spacing:	100'	75'	50'	25'
Road waterbreak spacing:	150'	100'	75'	50'

Waterbreaks and/or rolling dips shall be used to reduce the volume and velocity of water by directing it off fire lines as soon as possible at controlled locations. The outfall end of all waterbreaks shall be opened by hand if necessary. Waterbreaks should be located to discharge into natural vegetation. Waterbreaks should cross the fire line at an angle of approximately 45 degrees.

**Handlines:** Install waterbreaks as needed based on slope and soil erodibility.

All waterbreaks shall be installed diagonally with a minimum cut of 6" into existing grade, and minimum height of 12". Waterbreaks shall be constructed to allow for drainage at the discharge end into non-erodible material.

**Slash Piles:** Piles within 150' of permanent structures or public roads will be lopped and/or scattered within 18" of the soil surface.

Piles along roads and fences: Lop to fire protection standards to ensure decreased fire risk is obtained. Scatter smaller debris where applicable.

**Watercourse Crossings:** All slash, soil, and debris deposited into watercourses resulting from fire suppression activities shall be removed and stabilized above the high-water line.

Major watercourse damage, if present, shall be reported to the Fire Suppression Repair Specialist prior to the end of the shift day.

Where fire lines are constructed within 100' of flowing watercourses, slash or straw mulching will be applied. All loose soil must be pulled away from the watercourse and stabilized.

**Archaeological or Historic Sites:** All potential sites shall be avoided. Contact Incident Archaeologist.

## Summary of Suppression Damage Repair Guidelines

**Objectives** - The objective of the fire suppression repair is:

- Reduce the potential for soil erosion and sedimentation
- Protect natural and cultural resources from additional potential damage
- Repair roads and drainage structures to a functioning condition

### Critical Guidelines

**Sensitive Sites** are marked with Red and Black or Red and White striped flagging.

**Back-haul** all trash and un-needed flagging. Please leave safety flagging in place.

**Restore natural contour and original percentage of ground cover.**

**PULL BACK SOIL BERMS** All berms present from line construction should be recontoured and spread across the constructed line. Removal of berms will allow water to flow off the fire.

**Construct water bars when ground cover does not exceed 60%, and slope exceeds 10%**

The three objectives of waterbars are:

- (1) to divert the destructive overland flow of water **off** the fire line;
- (2) to discharge the water onto areas where the erosive energy can be dissipated; and
- (3) to aid in the recovery of vegetation.

Fire line Gradient (% slope)	Distance Between Waterbars (feet)	<b>Think 5-D System</b>	
0-10	None	Distance	Reduce the distance water can run in a straight line
10 to 20	150	Diagonal	Don't bully the flow, lead it away
21 to 40	100	Divert	Move the water off the fireline
Over 40	50	Discharge	Good water bar is not a dam – must have open outlet.
Over 60	Report to READs	Dissipate	Water should spread out from outlet like a shower not a fire hose.

**DEPTH AND WIDTH:** Waterbars need to be cut into surface, do not simply push up soil. They should be deep enough to redirect the water from expected rain to area.

**Watercourses:** Work with READs to determine appropriate repair needs. Remove deposited soil from streams, watercourses, swales, or draws back to the original contour. Remove only as much as feasible without further damage to the watercourse. Restore bank channels at fire line crossings back to the shape seen adjacent to the crossing. Pull perched soil from drainage edges and spread it evenly across the fire line.
