Fire Weather Forecast

FORECAST NO:

13

PREDICTION FOR: DAY/NIGHT SHIFT SHIFT DATE: November 21-22, 2018

TIME/DATE ISSUED: November 20, 2018 2000 PDT

NAME OF FIRE: Camp

UNIT: CA-BTU

SIGNED: Aviva Braun IMET(T) and

Jim Wallmann IMET

WEATHER DISCUSSION: ... FLASH FLOOD/DEBRIS FLOW WATCH FOR WEDNESDAY-FRIDAY...

Southeast winds will prevail across the area today with gusts up to 30 mph possible with heavier showers and along winds-aligned drainages. Rain begins Wednesday morning and will continue over the burn area through midmorning on Saturday. The event total will be near 4-6 inches, potentially more, with 1-2 inches falling Wednesday and 3-4 inches falling Thursday-Saturday. For the most part, we are expecting a light to moderate steady rain, however, there are periods where locally heavy rain are possible. These periods are this afternoon from 1600-1900 and again Friday from 0400-1600. A Flash flood / debris flow watch has been issued to cover this possibility.

WEATHER FORECAST FOR TODAY:

... RAIN AND SOUTHERLYWINDS...

WEATHER: Rain begins around 0700 and continues through the day. Period of heaviest rain: 1600-1900.

MAX TEMPERATURES:

40-50°F

15 DEGREE DROP

MIN HUMIDITY:

70-80%.

50 PERCENT RISE (OCCURS BEFORE 1200)

20-FOOT WND:

SLOPE/VALLEY - East to southeast 10-20 mph. Gusts to 30 mph possible with the heavier showers and along the wind-aligned drainages.

RIDGETOP - East to southeast 10-20 mph. Gusts to 30 mph possible with the heavier showers.

MIXING HEIGHT: 2500 ft AGL in the afternoon

TRANSPORT WINDS: Southeast 30 mph.

TONIGHT:

... SOUTHEAST WINDS AND RAIN OVERNIGHT...

WEATHER: Rain continues overnight.

MIN TEMPERATURES: 40-50°F

5 DEGREE RISE

MAX HUMIDITY:

90-100%

40 PERCENT INCREASE

20-FOOT WND:

SLOPE/VALLEY - East to southeast 10-20 mph. Gusts to 30 mph possible with the heavier showers and along the wind-aligned drainages.

RIDGETOP - East to southeast 10-20 mph. Gusts to 30 mph possible with the heavier showers.

EXTENDED FORECAST: ... FLASH FLOOD/DEBRIS FLOW WATCH CONTINUES THROUGH FRIDAY...

THURSDAY-SATURDAY MORNING: Wet conditions continue for the area. Several inches of rain are expected with 3-4 inches Thursday into Saturday, for a total of 4-6 inches over the rain event. Moderate to locally heavy rain may be possible Friday morning. Snow possible above 5000-5500 feet, Thursday.

SATURDAY AFTERNOON - MONDAY: Drier conditions are in store as a ridge of high pressure builds aloft.

COMPLACENCY

THE FIRE IS WINDING DOWN - DON'T GET COMPLACENT

Watch Out

- Cooler temperatures may cause you to forget to drink fluids and rest
- Patrol and aggressive overhaul can seem 'routine'
- Many accidents occur during overhaul this is not the time to get hurt

Mitigation

- Slow down and take breaks during exhaustive work
- Drink plenty of water throughout the shift-even if you're not thirsty
- · Coach members of your team and take care of one another

INCLEMENT WEATHER

INCREASED POTENTIAL FOR ACCIDENT DUE TO RAIN AND WIND

Watch Out

- Vehicle maintenance records and annual maintenance
- First rains for this year / Wet and Oil slick roads in and around the fire perimeter
- The dirt roads within and around the fire perimeter are known for thick and deep mud production

Mitigation

- Confirm your vehicle maintenance is up-to-date and perform a daily safety inspection prior to going out on the line
- Drive for the conditions and not the speed limit, be cognizant of roadside workers
- Keep fire engines and other heavy equipment on asphalt and improved roads, pre-plan for smaller use to make emergency access to remote areas.

CITIZEN REPOPULATION

EVACUEES WILL BE RE-ENTERING FIRE EFFECTED AREAS

Watch Out

- Increased traffic and distracted driving
- Increased demand for resources due to the public's physical/emotional reactions
- Potential hidden hazards discovered by citizens re-entering burned areas

Mitigation

- Drive slowly and defensively. Calm the citizens, calm yourself. Set the example
- Be compassionate while maintaining situational awareness and mission focus
- Stop, address, and correct unsafe citizen actions. Prevent potential injuries

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post**: Inappropriate information, Inappropriate pictures or videos, Opinions regarding the incident or policy, Endorsements of any kind.

FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

Think before you post:

- On official time, do official duties; if using government equipment, do government business.
- Don't use your official position/title for private gain.
- Do share government information that is publically available (such as links to Inciweb, weather reports, feature stories, official evacuation notices etc...) Do not disclose (via any medium) non-public information to further private interests or the private interests of others.
- Do not share information outside official channels that could be associated with a crime or a claim, (for instance do not post on social media about serious accidents, deaths or destroyed property).
- •Do not accept compensation for statements made over social media that relate to official duties.

CAMP FIRE INFORMATION

- Never use your official title while engaging in "political activity" (activity directed toward the success or failure of a political party, partisan candidate or partisan political group).
- Federal employees may express their opinions concerning partisan political candidates and political parties on social media when they are off duty and away from the federal workplace.
- If you have questions about content you'd like to post on social media, contact a PIO, they can help you.

CITIZENS IN THE AREA

As citizens start to repopulate into the affected areas we would like to remind you that you are a great asset and resource ambassador of the fire service. As you come into contact with the citizens please treat the citizens as if they were the citizens of your own community.

These citizens just went through a very tragic incident. Please help curb aggressive media away from citizens who may not want to be interviewed or allowed on their private property.

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

For approval to post Photo and Video you have taken of the fire, please send to the PIO's incident email at: Camp2018fire@gmail.com

LOST AND FOUND

The Information staff will manage Lost and Found items for the incident. If you have lost an item, leave your contact information and what you have lost at the Public Information Trailer in Base Camp.

MAIL SERVICE

The Information staff will assist you in receiving letters and packages. Mailing address for Mendocino Complex Fire personnel to have mail sent to:

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

- Resources must check-in prior to the Demobilization process.
- In order to be deemed excess, supervisors must submit an ICS 213 to the Resources Unit.
- Resources report to the Demobilization Unit at the times posted on the tentative DMOB list, which is posted around the Incident Base and to the Box account.
- Prior to reporting to DMOB, please return all supplies and equipment.
- Resources will get signatures from the following units:
 - Ground Support (Vehicle Inspection)
 All rental vehicles MUST be inspected
 - o Training (If they have a trainee)
 - o Documentation
 - o Time
- The following will be done by radio at DMOB
 - o Motels
 - o Supply
 - Communications
 - o DMOB

TRAINING SPECIALIST MESSAGE

A Training Specialist is available for trainees on the incident.

All State, Federal and local government agency Trainees working on Position Task Books will need to register with the Incident Training Specialist in order to receive proper credit for

your assignment.

Archaeological and Historic Properties: Fireline Guidance for the Camp Incident, Butte County CA

Do not compromise safety for the protection and preservation of archaeological and historic properties. When possible and prudent:

- 1. Be on the lookout for prehistoric archaeological sites. These sites may include seasonal camps marked by the presence of obsidian and/or basalt flakes, bedrock mortar food processing sites, and village sites that contain the above and dark midden soils. The Native American group living in the area at time of historic contact was the Maidu.
- 2. Be on the lookout for historic archaeological sites. These sites may include old homesteads now marked by the presence of foundations, wells, and can dumps, early sawmill sites, abandoned ditches, mining tailings, and other mining features including adits (horizontal) and shafts (vertical).
- 3. Look for these prehistoric and historic sites in flat areas, especially adjacent to streams and springs.
- 4. Known sites will be marked with red/white or red/black striped plastic flagging tape.
- 5. If you observe artifacts, features, or sites attempt to avoid if possible. If you can't avoid, minimize ground disturbance as much as possible, only clearing the surface to as minimal a depth as necessary. Try to go around sites with dozers rather than through them. Flag new sites if possible.
- 6. If you find artifacts leave them in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
- 7. Note locations of discovered artifacts, features, and/or sites on a map. Better yet take a GPS reading if possible. Leave information for the archaeologist with the Situation Unit so that the sites can be relocated and protected during Fire Suppression Repair.
- 8. If you encounter a burial site cease work in the area and contact the archaeologist immediately.

Thanks for your help protecting California's cultural heritage.

EMERGENCY FIRE SUPPRESSION REPAIR PLAN - CAMP INCIDENT

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas caused by the fire. We cannot upgrade facilities beyond their pre-fire condition. Fire suppression repair shall be applied to mitigate infrastructure damage and natural resource damage.

Infrastructure Damage: Culverts and other watercourse crossings, water sources, trails, road barriers removed for fire access, trash, debris and supplies left by fire suppression activities; miscellaneous.

Natural Resource Damage: Repair of existing problems <u>caused by fire suppression activities</u> (direct effect) to natural resources and to prevent likely future problems such as accelerated erosion caused by rains (indirect effect). The goal is to minimize soil erosion, adverse impacts to water quality, and adverse impacts to protected species of plants and animals

REPAIR GUIDELINES

General: Restore berms and barriers removed for fire control access.

Drop Points/Staging Areas/Safety Zones: New construction - cross drain and abandon (if applicable). Existing - repair to original condition, remove debris resulting from use. Pick up all trash.

Roads: Reshape soil surfaced roads that were used during fire control operations. Roads should be out-sloped with rolling dips where degradation of the road prism has resulted from fire control operations. Clean out culvert inlets and outlets as needed. Report any damaged culverts to the Fire Suppression Repair Specialist for specific repair guidance. Breach berms, where appropriate, to facilitate drainage.

Firelines: Break apart dozer piles of pushed over trees, vegetation and soil, and spread along tractor roads, tractor fire breaks, or any other areas disturbed during fire suppression activities. Lop and scatter displaced vegetation to a height of less than 30 inches or chip within 100' of a gravel road or structure. Scatter the lopped material along the fire line. Pull back any excess soil material sidecast along roads or tractor disturbed areas that are located within 100 feet of any watercourse or spring. Install waterbreaks on all constructed or used dozer lines using the following criteria:

Fireline and road gradient(%) grasslands:	0-10	11-25	26-50	>50
Fireline waterbreak spacing:	150'	100'	75'	75'
Road waterbreak spacing:	300'	200'	150'	100'
Fireline and road gradient(%) all other are	as: <u>0-10</u>	11-25	26-50	>50
Fireline waterbreak spacing:	100'	75'	50'	25'
Road waterbreak spacing:	150'	100'	75'	50'

Waterbreaks and/or rolling dips shall be used to reduce the volume and velocity of water by directing it off fire lines as soon as possible at controlled locations. The outfall end of all waterbreaks shall be opened by hand if necessary. Waterbreaks should be located to discharge into natural vegetation. Waterbreaks should cross the fire line at an angle of approximately 45 degrees.

Handlines: Install waterbreaks as needed based on slope and soil erodibility.

All waterbreaks shall be installed diagonally with a minimum cut of 6" into existing grade, and minimum height of 12". Waterbreaks shall be constructed to allow for drainage at the discharge end into non-erodible material.

Slash Piles: Piles within 150' of permanent structures or public roads will be lopped and/or scattered within 18" of the soil surface.

Piles along roads and fences: Lop to fire protection standards to ensure decreased fire risk is obtained. Scatter smaller debris where applicable.

Watercourse Crossings: All slash, soil, and debris deposited into watercourses resulting from fire suppression activities shall be removed and stabilized above the high-water line.

Major watercourse damage, if present, shall be reported to the Fire Suppression Repair Specialist prior to the end of the shift day.

Where fire lines are constructed within 100' of flowing watercourses, slash or straw mulching will be applied. All loose soil must be pulled away from the watercourse and stabilized.

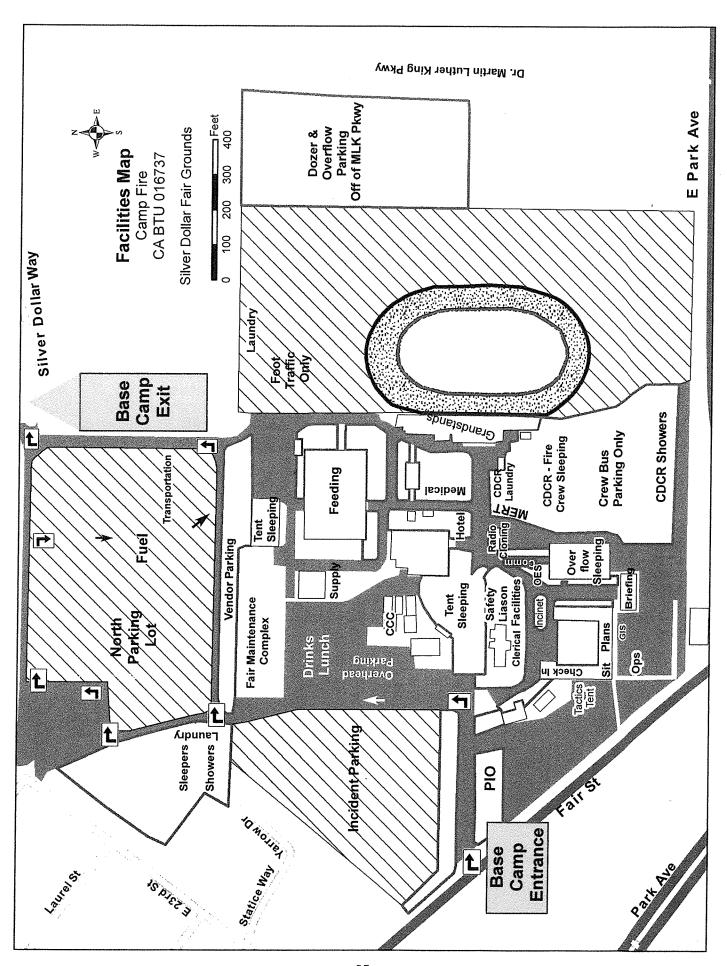

Archaeological or Historic Sites: All potential sites shall be avoided. Contact Incident Archaeologist.
