### HAZARD TREES

FIRE DAMAGED TREES IN and AROUND the FIRE AREA

#### Watch Out

- Working under and around conifers and oak trees
- Be aware of snags and widow makers
- Fire weakened and drought stressed trees

#### Mitigation

- Be vigilant and alert, "Look-Up" when working under and around any trees
- Post lookouts when necessary to mitigate a hazard within a stand of trees
- Isolate HAZARD trees with red and white, "THREE STRIPES you're out" flagging

### INCLEMENT WEATHER

INCREASED POTENTIAL FOR ACCIDENT DUE TO RAIN AND WIND

#### Watch Out

- Vehicle maintenance records and annual maintenance
- First rains for this year / Wet and Oil slick roads in and around the fire perimeter
- The dirt roads within and around the fire perimeter are known for thick and deep mud production

#### Mitigation

- Confirm your vehicle maintenance is up-to-date and perform a daily safety inspection prior to going out on the line
- Drive for the conditions and not the speed limit, be cognizant of roadside workers
- Keep fire engines and other heavy equipment on asphalt and improved roads, pre-plan for smaller use to make emergency access to remote areas.

### CITIZEN REPOPULATION

EVACUEES WILL BE RE-ENTERING FIRE EFFECTED AREAS

#### Watch Out

- Increased holiday weekend traffic and distracted drivers
- Potentially highly emotional citizens as repopulation continues and the reality of loss this community has suffered
- Unknown hazards by citizens re-entering burned areas

#### Mitigation

- Drive slowly and defensively. Calm the citizens, calm yourself. Set the example
- Remain patient and compassionate as we continue to be this areas fire department. Drive slow and be courteous, cautious and caring when travelling the area
- Be diligent and supportive to assist residence re-entering their properties

# TAILBOARD SAFETY TOPICS

## LARGE AMOUNTS OF RAINFALL IN FIRE AREA

### ARE YOU IN AN AREA SUBJECT TO FLASH FLOODING, MUD OR DEBRIS?

#### Watch Out For

- Rapidly Changing Conditions – Expect the Unexpected!
- Increase water flows or raising waters
- Tree fall during storm conditions
- The need to support early and immediate evacuation of civilians
- One way in One Way Out Situations
- Washouts and Sinkholes
- Mud, silt and reactivated retardant causing road slick hazards

#### Mitigation

- Avoid entering the water – if you must, you must wear a PFD!
- React early to increasing flows and raising waters – escape early
- Don't be Complacent – these are not routine emergencies – don't under estimate the power of hydraulics
- React to unstable looking conditions – Mud Slides, Leaning Trees and undermined roads
- LCES Early!

L-ookouts posted – Post early with a lookout that understands the situation

C-ommunications (Establish a Plan and make it known using Face to Face and Radios)

E-scape Routes are recognized and made known to emergency personnel. In Flood conditions, consider shorter routes and earlier trigger points – Get to high ground

S-afety Zones are identified and large enough to assemble lots of equipment and personnel, perform a PAR

- Be on the lookout of other hazards such as hazardous materials, contaminated water, large debris in current and electrical hazards as examples
