County Fire Incident Weather Forecast

FORECAST NO: 2 D/N
 PREDICTION FOR: Tuesday - 24 Hour Shift
 SHIFT DATE: July 3, 2018
 FORECAST ISSUED: 2000 PDT July 2, 2018

NAME OF FIRE: County Fire
 UNIT: LNU
 Incident Meteorologist: Jeff Tonkin

WEATHER DISCUSSION: Seasonal conditions are expected to continue through Friday with temperatures and relative humidity values running near normal for this time of year. Winds will continue to mainly be out of the north during the late night and early morning hours with a gradual transition to southwesterly in the early afternoon. A significant rise in temperature and drop in both daytime and nighttime humidity is expected to begin Saturday as another strong ridge of high pressure returns over the region.

WEATHER FORECAST TODAY (TUESDAY DAYTIME):

WEATHER: Sunny.
 MAX TEMPERATURES: 90-95
 MIN HUMIDITY 2000 ft: 15-20%.
 WINDS (EYE LEVEL):

Valley Floor to Midslope: North and northeast 5 to 10 mph with gusts to 15 mph through mid morning then diminishing and becoming westerly 5 to 8 mph with gusts to 15 mph through midnight.

Midslope to Ridge: Gusty north-northeast winds 8 -15 mph with gusts 20 to 25 mph until 1300 PDT...then becoming west-southwest 4 to 8 mph with gusts 15 to 20 mph through midnight.

LAL: 1 CWR: 0%
 STABILITY / INVERSION: Moderately Unstable.
 SMOKE TRANSPORT WIND: Southwest 15 mph.

WEATHER FORECAST TUESDAY NIGHT:

WEATHER: Smoky through the morning hours.
 MIN TEMPERATURES: 56 - 60.
 MAX HUMIDITY: 65 TO 75%.
 WINDS (EYE LEVEL):
 West and southwest 4 to 7 mph with gusts up to 12 mph along ridgelines until midnight...then becoming north-northeast or down slope 4 to 6 mph through late Wednesday morning.

OUTLOOK FOR WEDNESDAY: Sunny ...continued cooler and much more moist. Max Temps: 86 to 91. Min RH: 28 to 32%. Wind West Side: Upslope or southwest 4 to 8 mph...gusts to 15 mph after 1200 PDT. East Side: Upslope or south-southeast 4 to 8 mph...gust to 15-20 mph in the afternoon. Smoke Transport Wind: South-southwest 10 mph.

EXTENDED FORECAST FOR THURSDAY THROUGH SATURDAY: Partly Cloudy and similar conditions as Wednesday. Saturday will see a return to warmer temperatures. Mainly west winds 5 to 10 mph. Max Temps 85 to 90 increasing to 95 to 100 on Saturday. Min RH 22-27%...near 10% Saturday. Smoke Transport Wind: Southwest 20 mph.

OBSERVED WEATHER FROM YESTERDAY (SUNDAY):

<u>RAWS</u>	<u>MAX TEMP</u>	<u>MIN RH</u>	<u>WIND SPEED MPH / DIRECTION</u>
BROOKS	101	13%	4-7... Gust 12 / South

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 003	TYPE OF FIRE: Wildfire
FIRE NAME: County	OPERATIONAL PERIOD: July 3, 2018 Monday
	TIME ISSUED: 2000
UNIT: CAL FIRE-Sonoma, Lake, Napa	SIGNED: 
	Typed/printed: Jon Heggie Fire Behavior Analyst

INPUTS

WEATHER SUMMARY:

Daytime: Sunny with temps near 90°-95°. Relative humidity 15%-20%.

Winds will vary by position on slope and time of day please review incident weather forecast.

Night time: Smokey with temps near 56°-60° and relative humidity 65-75%. Winds will vary by position on slope and time of day please review incident weather forecast.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fire behavior the last operational period diminished slightly but the fire did continue to burn aggressively in dry receptive fuels. The expected fire behavior this operational period is for moderate growth as weather conditions will help suppression efforts. Down and dead Oak trees will retain heat and have potential for rollout on steep slopes into dry receptive grass. The fire is burning in a mix of Grass, Brush and scrub oak. Live fuels have made a rapid descent into near critical levels and are burning with characteristics of late fall conditions. Shifting winds throughout this operational period can increase fire activity on previously quiet portions of the line.

Probability of Ignition 85-95%

Spotting Distance ½ mile

Fine Dead Fuel Moisture 2-3%

SPECIFIC:

Branch II

The fire in this branch is in very steep and challenging terrain. Rollout into Hamilton Creek will find dry receptive fuel on southern exposed canyons and increase activity. As the wind shift to a west wind, expect increased fire activity as wind aligns with slope. The rates of spread in the grass can exceed 90 ch/h and 80 ch/h in the brush were wind and slope align. Fuel continuity varies by aspect and elevation but all fuels are expected to support fire growth.

Branch IV

This branch is mainly grass oak woodland that has been back burning towards farming areas on the east and towards Hwy 128 on the south. The area of concern is if fire activity increases due to a north wind or rollout that could cross lines into receptive grass. The rates of spread of this backing fire are expected to be at 6-8 ch/h in the grass and 18-24 ch/h in the brush. If wind and slope align on this branch, expect the values in grass to exceed 90 ch/h and 80 ch/h in the brush.

Branch VI

The fire is expected to continue to slow progression to the west towards Lake Berryessa. If proposed firing plan is not completed by 1500 west winds could push the fire to the east towards Div J. If am north winds surface stronger than predicted the fire may make a run to the south and impact Div. O. The rates of spread in the grass can exceed 90 ch/h and 80 ch/h in the brush were wind and slope align.

Branch VIII

The fire has been back burning towards Knoxville Rd but north winds in the am has the potential for accelerated fire behavior. The afternoon west wind should push the fire back into the burn for the south portion of the Branch. The rates of spread in the grass can exceed 90 ch/h and 80 ch/h in brush were wind and slope align. Dense brush, difficult access and steep topography will allow the fire to continue to push the fire to the north towards the branch break.

AIR OPERATIONS: Smokey conditions may restrict air operations, don't rely on air support for any tactics.

SAFETY

- Winds may change direction numerous times, monitor the weather the entire operational period.
- Fire behavior has been extreme, make all plans with this as a basis.
- Ensure that you have established, realistic escape route.
- Look for increased fire activity after 1400.

CAL FIRE INCIDENT MANAGEMENT TEAM 3

SAFETY MESSAGE

Safety is a full-time job – don't make it a part time practice.

- All PPE must be worn when working on the fire-line.
- Avoid complacency by focusing on the task at hand.
- Make sure everyone gets a briefing!
- Watch for aggressive driving. Drive Defensively with your headlights on.
- Monitor your hydration/nutrition intake and keep adequate supplies of each.
- Be alert to changes in wind direction and expect changes in fire behavior.
- Beware of environmental hazards such as bee hives, poison oak, trip hazards, steep slopes and stump holes.

Tailgate Safety Briefing Checklist

- ✓ **Accountability:** Everyone checks in and everyone checks out. Supervisors know where their crews are at all times.
- ✓ **Communication:** Everyone knows the communication plan and how to use their radio.
- ✓ **Briefing:** Everyone knows the plan for the day and their role in the plan.
- ✓ **Safety Gear:** Everyone has the appropriate safety gear.
- ✓ **LCES:** Have these been addressed?

INCIDENT RISK ANALYSIS ICS 215A

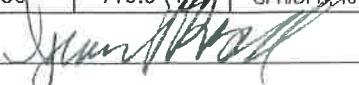

BRANCH	HAZARDOUS ACTIONS/ CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	FIRE AND DROUGHT WEAKENED TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines IRPG (p. 22). Many of the trees within the fire area and along roadways are stressed. Snags are present. Be aware that trees may fall even if not impacted by the fire.
DIVISION C, D, G	MOPUP	<ul style="list-style-type: none"> Do not get complacent during mop up. Watch your footing. Wear your PPE.
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> Watch your speeds. Watch for debris in roadways. Expect increased civilian traffic in the populated areas.
ALL	WEATHER	<ul style="list-style-type: none"> Hot and dry weather will continue. Watch for changing weather conditions. The local pattern is a daily afternoon wind shift. Stay prepared.
ALL	PERSONNEL SAFETY	<ul style="list-style-type: none"> All personnel are responsible for their personal safety. Be sure to wear all required PPE while on the fire line. Be cautious of snakes and yellowjackets within the fire area.
ALL	POWER LINES	<ul style="list-style-type: none"> Follow Power Line safety guidelines IRPG (p. 24). Treat all downed power lines as energized.
ALL	HYDRATION	<ul style="list-style-type: none"> Drink water before, during and after each shift. Be alert for signs of heat stress in yourself and others.
ALL	FATIGUE	<ul style="list-style-type: none"> Monitor incoming and outgoing resources for level of fatigue. Provide sufficient rest during the work cycle.
ALL	CIVILIAN PRESENCE	<ul style="list-style-type: none"> Be aware of civilians in the area. Civilians may be distracted by the fire operations. Stay alert.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Check the communication plan for frequency assignments. Use human repeaters as needed.
ALL	BRIEFINGS	<ul style="list-style-type: none"> Make sure everyone gets a briefing on the plan for the day. Document this on your ICS 214.
ALL	LCES	<ul style="list-style-type: none"> Ensure that LCES is being utilized.
ALL	AIRCRAFT AWARENESS	<ul style="list-style-type: none"> Be aware of rotor wash when working near helicopters. Understand that hazard trees may react to helicopters overhead. Monitor assigned aircraft frequencies.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Maintain situational awareness. Be prepared for extreme fire behavior in all presented fuel types. Live fuel moistures are Critically Low.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Review IRPG (p. 80). Provide working space around equipment. Avoid working below equipment where rollout is a potential.
BRANCH IV, VI, VIII	FIRING OPERATIONS	<ul style="list-style-type: none"> Utilize Risk Management Process IRPG (p. 1). Ensure that Firing check list is complete

8. MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
 - FEMT / FEMP
 - Communications Unit
- Communication Unit will clear command channel for emergency traffic; as needed for Minor/Major Emergency
- Communications will switch all emergency traffic to CALCORD as needed or requested.
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on CALCORD.
- Medical Unit will:
 - Dispatch air/ground ambulance to as appropriate.
 - If necessary, after patient pickup, dispatch ambulance to helibase for transportation.
 - Notify receiving hospital of injury status.

CAMP EMERGENCY: Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident.

INJURY REPORTING PROCEDURES

NATURE OF INJURY _____

LOCATION OF PATIENT _____

TRANSPORTATION REQUESTED BY: AIR___ GROUND___

POINT OF PICKUP _____

LAT _____ LONG _____

PATIENT UNIT ID _____

REMINDER: DO NOT GIVE PT NAME OVER RADIO

IS AN EMT WITH PATIENT: YES ___ NO ___

AGE _____

SEX: MALE___ FEMALE___

ALL EMERGENCIES---Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

Incident _____ Firing Plan

OVERVIEW

A burn operation will be utilized to complete fire line in the area of _____. Firing will be initiated on _____ at _____ hours if all burning conditions are favorable and necessary control lines are in place.

INCIDENT AUTHORITY 7013.4.2

(No. 1 November 2005)

The Incident Commander has the overall authority and responsibility to set a backfire or burn should the need exist. As the incident organization expands, the responsibility and authority to backfire or burnout may be delegated. A normal progression of delegation, depending on the complexity of the incident, would be from the Incident Commander to the Operations Section Chief and could extend down to the Branch Director, Division Supervisor, Strike Team Leader, Task Force Leader or Single Resource.

Safety will be the first priority. All personnel will closely follow the 10 standard Fire Fighting Orders, 18 Watch Out Situations, and LCES. A qualified firing group supervisor working under the direction of the Branch Director/ Division Supervisor and Operations Chief will supervise firing operations.

The following general guidelines will be followed:

- Firing will move as fast as dictated by the current conditions.
- Only those areas necessary for successful fire control should be ignited.
- Weather will be monitored continuously for changes.
- The firing group supervisor will use all necessary-firing devices. Aerial ignition will be used only as necessary to support hand firing.
- Adjacent divisions will be briefed and if aerial ignition is used, all crews working in the vicinity will be briefed on safety procedures of aerial ignition. Supervisors will verify crews have been briefed, by their signature on the firing plan.
- Crews will be prepared for a long shift (16+ hours) to complete operation.
- Contingency lines will be identified but will not be constructed unless needed.
- A test fire will be conducted prior to beginning operations.

GO / NO-GO

- All personnel briefed
- Weather Forecast Reviewed
- Resources in place
- Lookouts posted

- Communications systems in place
- Escape Routes established and made known
- Fire Behavior is within recommended parameters
- TEST FIRE IS FAVORABLE

TEST FIRING PLAN

The size and location of the test burn will be large enough and representative of the fuels of the proposed burn area. The test burn will be conducted from one ignition point only and left to burn to evaluate if burning conditions are appropriate. The test fire will be evaluated and a go or no-go recommendation will be given to the IC.

Communications:

A radio net announcement at the incident will be made prior to backfiring and/or burnout. This will be communicated on tactical and command nets and will identify general location of geographic area to be burned.

Except where immediate firing is necessary to prevent the loss of life or major property damage, all firing operations shall be communicated to the appropriate ICS supervisor prior to the commencement of the firing operation. The officer supervising the firing operation shall remain in communication with his/her ICS supervisor and adjoining forces to the extent possible.

Constraints:

Firing should occur in such a manner to minimize escapes and provide for firefighter safety.

Slop over and Escapes:

If an escape/slop over occurs the Firing Group Supervisor will notify the Division Group Supervisor, who will take appropriate suppression actions. The Firing Group Supervisor will evaluate whether or not to continue firing and communicate such to the Division Group Supervisor. At all times, appropriate information will be transmitted through the chain of command to the Operations Section Chief.

Perimeter Firing Sequence:

The perimeter firing will proceed as follows:

- Conditions:**
Desired weather conditions:

- Sequence of Firing:**
 1. Ignition will begin at anchor point _____
 2. _____
 3. _____
 4. _____
 5. _____

Interior Firing Plan:

APPROVALS and Initials

- Firing Group Supervisor _____
- Branch Director _____
- Air Operations Branch Director _____

Update

409.5

MEDIA – The California State Penal Code, Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

Social Media

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.

In readiness is all

COUNTY INCIDENT FINANCE SECTION MESSAGE

SHIFT TICKETS / HIRED EQUIPMENT VENDORS:

Line supervisors are responsible for completing shift tickets for all hired equipment resources working for them. Please turn completed shift tickets into the CAL FIRE Time Unit at the end of your shift. We will not accept shift tickets from vendors.

FEDERAL TIME:

Federal agency timekeepers are on site and available to assist our federal government cooperators with personnel and equipment time.

LOCAL GOVERNMENT TIME KEEPING:

The CAL OES representative is on site to handle F-42 and any questions you may have. If you are a local government cooperator from the Sonoma-Lake-Napa Unit (including Yolo County), please check in with the CAL FIRE Time Unit.

SUPPRESSION DAMAGES:

Please report all fire suppression damage to the Comp Claims Unit Leader. We will need location, lat/long, property owner, type of damage, etc. Examples of "fire suppression damage: Damaged fence, crush culverts, pipe damage, broken gates, etc.

ALL FINANCE FUNCTIONS ARE LOCATED IN THE "HOME ARTS" BUILDING NEAR THE OVER HEAD PARKING AREA

Absolutely no off site feeding or purchases charged to the incident. They must be pre-approved by the Logistics Section and/or Finance Section Chief.

**ROGER RAINES, FSC1, IMT3
MARA ZAVER, FSC1, IMT3**

INCIDENT MANAGEMENT TEAM 3

“COUNTY” INCIDENT WATER USAGE REPORT

DATE: _____

Division / Group: _____

RESOURCE / VENDOR ID: _____

REQUEST # _____

I.e.. Strike Team 1110C, Acme Water Tenders

TURN INTO FINANCE DAILY

WATER SOURCE LOCATION	Source (Hydrant, Pond, Tank, Other)	Gallons Used	Property Owner / Contact Number**

**Please note PROPERTY OWNER AND CONTACT NUMBER! (Use reverse side if needed.)

The intent of this document is to track, record and validated the amount of water used on an incident. It's not intended to review the performance of equipment using the water on an incident.

In readiness is all

FIRE SUPPRESSION REPAIR PLAN: COUNTY INCIDENT

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.

Damaged facilities will be returned to functional status in order to prevent further damage. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by the Operations Division and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities. Extra care will be exercised and equipment will be monitored when operating in locations where new fire starts are more likely to occur, such as rocky areas in dry grass. New fires will be reported following the instructions in the radio call plan.

Examples of items that may be repaired include, but are not limited to:

Infrastructure Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges, and other watercourse crossings	Adverse impacts to air and water quality
Water sources	Adverse impacts to protected species of plants and animals
Utility distribution lines (above or below ground)	
Road barriers removed for fire access	
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	

Dozer Line Repair

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer line:

- Berms and push-piles shall be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.
- Waterbreaks shall be constructed at a 30-45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated or rockied areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall be left in the same condition they were found or better. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

Prevailing gradient	Maximum waterbreak spacing
0-10%	200 feet
11-25%	150 feet
26-50%	100 feet
>50%	75 feet

Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.

**Archaeological and Historic Properties:
General Fire-line Guidance for the BLM Ukiah Field Office.**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
