## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b>  <p style="text-align: center;">COUNTY</p>	<b>2. Operational Period:</b>	Date From: 07/04/18 Time From: 0700	Date To: 07/05/18 Time To: 0700
---	-------------------------------	--	------------------------------------

**3. Objective(s):**

**Strategic Objectives**

A full suppression strategy is to be implemented on the County Incident. Values at risk associated to the incident include human safety, private property and associated improvements, electrical power infrastructure, and cultural values. Minimize acres burned on all lands by utilizing effective and efficient tactics while maintaining safety first.

**Leaders Intent**

Work effectively with cooperative partners towards a common goal of protecting values in a safe and efficient manner. All incident assigned personnel should be prepared to take the appropriate actions regarding:

- Professional behavior, conduct timely/effective communications
- Personal safety and safety of others, including driving slowly, safely and defensively
- Implementation of tactics that offer a high probability of success
- Manage fatigue by taking breaks and maintaining work/rest cycles

**Management Objectives**

- Fight fire aggressively while maintaining safe work practices to minimize threats to the public and emergency responders
- Minimize damage to structures, private property and other improvements in the fire area
- Protect natural, cultural, heritage resources
- Continue to foster and maintain positive relationships with all local cooperators and stakeholders
- Provide timely and accurate incident information
- Maintain fiscal accountability keeping costs commensurate with values at risk

**Control Objectives**

- Keep the fire South of Hamilton Canyon
- Keep the fire North of Miller Canyon
- Keep the fire East of Knoxville Road
- Keep the fire West of Highway 16

**General Situational Awareness:**

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

Stop, Think, Organize, Proceed

**5. Site Safety Plan Required?** Yes  No

**Approved Site Safety Plan(s) Located at:**

**6. Incident Action Plan**

# County Fire Incident Weather Forecast

FORECAST NO: 3 D/N  
 PREDICTION FOR: Wednesday - 24 Hour Shift  
 SHIFT DATE: July 4, 2018  
 FORECAST ISSUED: 2000 PDT July 3, 2018

NAME OF FIRE: County Fire  
 UNIT: LNU  
 Incident Meteorologist: Jeff Tonkin

**WEATHER DISCUSSION:** An upper trough of low pressure will approach the north coast maintaining onshore flow and a marine influence to the fire area today. Cool temperatures and higher relative humidity values will continue before returning to much lower daytime and nighttime RH's as well as warmer temperatures on Thursday. The trough will also usher in a more general south and southwest wind flow over the fire area but strong winds are not expected. A more significant rise in temperature and drop in both daytime and nighttime humidity is expected to begin Saturday as another strong ridge of high pressure returns over the region.

**WEATHER FORECAST TODAY (WEDNESDAY DAYTIME):**

SKY/WEATHER: Continued cooler with some morning low clouds and smoke likely... then sunny.  
 MAX TEMPERATURES: 79 - 84  
 MIN HUMIDITY 2000 ft: 24 - 32%.  
 WINDS (EYE LEVEL):

Valley Floor to Midslope: South and southeast 4 to 7 mph with gusts to 12 mph through mid morning then becoming southwesterly 7 to 12 mph with gusts to 18 mph through midnight.

Midslope to Ridge: South winds 6 - 10 mph through mid morning... then increasing to south and southwest 12 to 16 with afternoon gusts to 22 mph through midnight.

LAL: 1 CWR: 0%  
 STABILITY / INVERSION: Moderately Unstable.  
 SMOKE TRANSPORT WIND: South-southwest 25 mph.

**WEATHER FORECAST WEDNESDAY NIGHT:**

SKY/WEATHER: Low clouds and smoky through the morning hours.  
 MIN TEMPERATURES: 49 - 54.  
 MAX HUMIDITY: 90 TO 100%.  
 WINDS (EYE LEVEL):  
 South and southwest 10 to 15 mph with locally higher gusts to 20 mph through 0200 hours.  
 South winds diminishing to 5 to 10 mph through sunrise.

**OUTLOOK FOR THURSDAY:** Sunny and warmer...and much lower RH's. Max Temps: 87 to 92. Min RH: 17 to 22%. Wind: Upslope or southwest 4 to 8 mph...gusts to 15 mph after 1200 PDT. East Side: Upslope or south-southeast 4 to 8 mph...gust to 15-20 mph in the afternoon.  
 Smoke Transport Wind: South-southwest 25 mph.

**EXTENDED FORECAST FOR FRIDAY THROUGH SUNDAY:** Mainly clear and becoming hot and dry again. Max Temps 96 to 101. Min RH 16 - 21%...near 10% Saturday and Sunday. Mainly west winds 5 to 10 mph.  
 Smoke Transport Wind: Southwest 30 mph.

**OBSERVED WEATHER FROM YESTERDAY (TUESDAY):**

<u>RAWS</u>	<u>MAX TEMP</u>	<u>MIN RH</u>	<u>WIND SPEED MPH / DIRECTION</u>
BROOKS	101	13%	4-7... Gust 12 / South

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 004	TYPE OF FIRE: Wildfire
FIRE NAME: County	OPERATIONAL PERIOD: July 4, 2018 Monday
	TIME ISSUED: 2000
UNIT: CAL FIRE-Sonoma, Lake, Napa	SIGNED: 
	Typed/printed: Jon Heggie Fire Behavior Analyst

## INPUTS

### WEATHER SUMMARY:

**Daytime:** Sunny with temps near 79°-84°. Relative humidity 24%-32%.

Winds will vary by position on slope and time of day. Please review incident weather forecast.

**Night time:** Smokey with temps near 49°-54° and relative humidity 90-100%. Winds will vary by position on slope and time of day. Please review incident weather forecast.

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

Today will be the coolest and most moist day this week. This favorable weather should keep fire behavior to a moderate level but a south wind will push the fire towards heavier fuels. The expected fire behavior this operational period is for moderate growth, but fuel conditions have been accelerating fire behavior despite cooler weather. The fire is burning in a mix of Grass, Brush and Conifers. South winds will align with the most active branches of the fire this operational period.

**Probability of Ignition 70-80%**

**Spotting Distance ½ mile**

**Fine Dead Fuel Moisture 3-4%**

#### SPECIFIC:

##### Branch II

Much of fire activity on this branch has transitioned to lower elevations and has been holding on control lines. The only exception is the far north portion of the branch that will have opportunity for dangerous fire spread as heavier fuels align with wind. The rates of spread in the grass can exceed 90 ch/h and 80 ch/h in the brush were wind and slope align. Fuel continuity varies by aspect and elevation but all fuels are expected to support fire growth.

##### Branch IV

This branch is mainly grass oak woodland that has been back burning towards farming areas on the east and towards Hwy 128 on the south. A successful burning operation has brought most of the control lines to lower elevations and are expected to have very little activity. The area of concern is for pockets of unburned fuel that could ignite and impact the Hwy 128 area. If wind and slope align on this branch, expect the values in grass to exceed 90 ch/h and 80 ch/h in the brush.

##### Branch VI

The fire has progressed down to Lake Berryessa on most of this branch. A favorable wind should aid to complete any burn operations that were not completed last operational period. Look for pockets of unburned fuel that may become active by a new wind direction influence. The rates of spread in the grass can exceed 90 ch/h and 80 ch/h in the brush were wind and slope align.

##### Branch VIII

The fire has been back burning, finding slope reveal and accelerating to the north. The afternoon south wind may push the fire up the Knoxville Rd corridor with dangerous rates of spread. The rates of spread in the grass can exceed 90 ch/h and 80 ch/h in brush were wind and slope align. Spotting will find opportunity in dry receptive grass.

##### Branch X

This branch is predicted to be the most active portion of the incident this operational period. Heavy fuels aligned with south winds will push the fire to the north towards Hwy 40. Spotting from large column development may out pace ground and air resources. Indirect line construction must monitor fire conditions for accelerated spread compromising escape routes. The rates of spread in the grass can exceed 100 ch/h and 90 ch/h in brush where wind and slope align.

**AIR OPERATIONS:** Air resources may be grounded due to smoke, make your plan with this in mind

## SAFETY

- Fire behavior has been extreme. Make all plans with this as a basis.
- Ensure that you have established a realistic escape route.
- Look for increased fire activity after 1400hrs.

# CAL FIRE INCIDENT MANAGEMENT TEAM 3

1. INCIDENT NAME:		2. DATE PREPARED:		3. TIME PREPARED:	
County		07/03/18		1800	
4. PREPARED BY:		5. LEADER NAME:		6. OPERATIONAL PERIOD:

# SAFETY MESSAGE

*This Nation will remain the land of the free only as long it is the home of the Brave!*

- All PPE must be worn when working on the fire-line.
- Provide sufficient rest during the work cycle.
- Make sure everyone gets a briefing on the plan for the day!
- Watch for increase in traffic and congestion. Stay focused on driving safely.
- Monitor your hydration/nutrition intake and keep adequate supplies of each.
- Be alert to changes in wind direction and expect changes in fire behavior.
- Beware of environmental hazards such as bee hives, poison oak, trip hazards, steep slopes and stump holes.

## Tailgate Safety Briefing Checklist

- ✓ **Accountability:** Everyone checks in and everyone checks out. Supervisors know where their crews are at all times.
- ✓ **Communication:** Everyone knows the communication plan and how to use their radio.
- ✓ **Briefing:** Everyone knows the plan for the day and their role in the plan.
- ✓ **Safety Gear:** Everyone has the appropriate safety gear.
- ✓ **LCES:** Have these been addressed?

**8. MEDICAL EMERGENCY PROCEDURES**

**LINE EMERGENCY:** Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
  - FEMT / FEMP
  - Communications Unit
- Communication Unit will clear command channel for emergency traffic; as needed for Minor/Major Emergency
- Communications will switch all emergency traffic to CALCORD as needed or requested.
- Communications Unit contacts:
  - Medical Unit
  - Safety
  - Operations
- Division Supervisor will run medical emergency on CALCORD.
- Medical Unit will:
  - Dispatch air/ground ambulance to as appropriate.
  - If necessary, after patient pickup, dispatch ambulance to helibase for transportation.
  - Notify receiving hospital of injury status.

**CAMP EMERGENCY:** Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident.

**INJURY REPORTING PROCEDURES**

### TRAINING SPECIALIST MESSAGE

## A Training Specialist is now assigned to the County Incident.

All assigned trainees working on Position Task Books will need to register with the Incident Training Specialist in order to receive documented credit for your assignment.

If you were reassigned from the Pawnee Incident and did not get a chance to close out with training, please see the TNSP to complete your training packet.

Bring the following with you to register:

- Incident Qualification Card
- Initiated Position Task Book

Rob Scott TNSP 949-292-3207

Justin Voyson TNSP-T 661-547-8629

Incident Type: Vegetation Fire	Cause: Under Investigation
Incident Location: Hwy 16 x County Road 63, Yolo County	Total Personnel:
Acreage:	Containment:

Update

409.5

**MEDIA** – The California State Penal Code, Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

**CAL FIRE SOCIAL MEDIA POLICY** – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

Social Media

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

**LOST AND FOUND** – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

**MAIL SERVICE** – The Information Section can assist you with sending and receiving mail.

*In readiness is all*

## COUNTY INCIDENT FINANCE SECTION MESSAGE

### **SHIFT TICKETS / HIRED EQUIPMENT VENDORS:**

Line supervisors are responsible for completing shift tickets for all hired equipment resources working for them. Please turn completed shift tickets into the CAL FIRE Time Unit at the end of your shift. We will not accept shift tickets from vendors.

### **FEDERAL TIME:**

Federal agency timekeepers are on site and available to assist our federal government cooperators with personnel and equipment time.

### **LOCAL GOVERNMENT TIME KEEPING:**

The CAL OES representative is on site to handle F-42 and any questions you may have. If you are a local government cooperator from the Sonoma-Lake-Napa Unit (including Yolo County), please check in with the CAL FIRE Time Unit.

### **SUPPRESSION DAMAGES:**

Please report all fire suppression damage to the Comp Claims Unit Leader. We will need location, lat/long, property owner, type of damage, etc. Examples of "fire suppression damage: Damaged fence, crush culverts, pipe damage, broken gates, etc.

### **ALL FINANCE FUNCTIONS ARE LOCATED IN THE "HOME ARTS" BUILDING NEAR THE OVER HEAD PARKING AREA**

**Absolutely no off site feeding or purchases charged to the incident. They must be pre-approved by the Logistics Section and/or Finance Section Chief.**

**ROGER RAINES, FSC1, IMT3  
MARA ZAVER, FSC1, IMT3**

## FIRE SUPPRESSION REPAIR PLAN: COUNTY INCIDENT

**Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.**

Damaged facilities will be returned to functional status in order to prevent further damage. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by the Operations Division and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities. Extra care will be exercised and equipment will be monitored when operating in locations where new fire starts are more likely to occur, such as rocky areas in dry grass. New fires will be reported following the instructions in the radio call plan.

Examples of items that may be repaired include, but are not limited to:

Infrastructure Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges, and other watercourse crossings	Adverse impacts to air and water quality
Water sources	Adverse impacts to protected species of plants and animals
Utility distribution lines (above or below ground)	
Road barriers removed for fire access	
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	

### Dozer Line Repair

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer line:

- Berms and push-piles shall be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.
- Waterbreaks shall be constructed at a 30-45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated or rocked areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall be left in the same condition they were found or better. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

Prevailing gradient	Maximum waterbreak spacing
0-10%	200 feet
11-25%	150 feet
26-50%	100 feet
>50%	75 feet

*Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.*

**Archaeological and Historic Properties:  
General Fire-line Guidance for the BLM Ukiah Field Office.**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.  
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
