County Fire Incident Weather Forecast

FORECAST NO: 6 D/N
 PREDICTION FOR: Saturday - 24 Hour Shift
 SHIFT DATE: July 7, 2018
 FORECAST ISSUED: 2000 PDT July 6, 2018

NAME OF FIRE: County Fire
 UNIT: LNU
 Incident Meteorologists: Jeff Tonkin
 Stephen Bodnar (T)

WEATHER DISCUSSION: A ridge of high pressure currently over the Desert Southwest will expand into Northern California. This will lead to a gradual increase in temperatures while corresponding RH values fall. Winds will become primarily terrain driven and light with a more climatological normal light north-northeast direction at night followed by west and southwest direction during the day. Max temperatures by Monday will likely exceed 100 while both daytime and nighttime RH's fall to critical values. At this time strong winds are not expected during this heat wave.

WEATHER FORECAST TODAY (SATURDAY DAY SHIFT):

SKY/WEATHER: A few high clouds...otherwise continued warmer and drier.
 MAX TEMPERATURES: 89 - 93...93 - 97 east perimeter.
 MIN HUMIDITY: 9 - 14%.
 WINDS (20 FT):
 West and northwest 4 to 7 mph until 1400 PDT...then increasing to upslope or west and northwest 5 to 10 mph with gusts to 15 mph through sunset. Divisions O and J...Gusts 20 to 25 mph afternoon and evening.
 LAL: 1 CWR: 0%
 STABILITY / INVERSION: Moderately unstable.
 SMOKE TRANSPORT WIND: South-southwest 20 mph.

WEATHER FORECAST SATURDAY NIGHT:

SKY/WEATHER: Mainly clear.
 MIN TEMPERATURES: 61 - 66.
 MAX HUMIDITY: 30 - 40%.
 WINDS (20 FT):
 West and northwest 7 to 11 gusts to 17 mph...diminishing to north and northwest 4 to 7 mph around midnight. Winds diminishing to north and northeast or downslope 2 to 5 mph around sunrise.

OUTLOOK FOR SUNDAY: Sunny. Max Temps: 91 - 96. Min RH: 10 - 15%. Wind: North and northwest 2 to 5 mph early...increasing to upslope or west 7 to 12 mph after 1400 PDT.
 Smoke Transport Wind: Southwest 20 mph.

EXTENDED FORECAST MONDAY THROUGH WEDNESDAY: Mainly clear and slightly warmer. Max Temps 98 - 103. Min RH 8 - 14%. Mainly west winds or upslope 3 to 7 mph...with afternoon and evening gusts from 10 - 15 mph.
 Smoke Transport Wind: West 20 mph.

OBSERVED WEATHER FROM YESTERDAY (FRIDAY):

<u>RAWS</u>	<u>MAX TEMP</u>	<u>MIN RH</u>	<u>WIND DIRECTION / SPEED MPH</u>
BROOKS	95	21%	Southwest / 10 Gust 15

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 007	TYPE OF FIRE: Wildfire
FIRE NAME: County	OPERATIONAL PERIOD: July 7, 2018
	TIME ISSUED: 2000
UNIT: CAL FIRE-Sonoma Lake Napa	Jon Heggie Fire Behavior Analyst <i>JH</i>

INPUTS

WEATHER SUMMARY:

Daytime: High clouds giving away to sunshine with temps near 93° to 99° and minimum relative humidity between 9%-14%.

Winds will surface from the west after noon at 10-15 mph and gust up to 20 mph.

Night time: Clear with temps near 61° to 66° and maximum relative humidity between 30-40%. Winds will continue to be from the west at 7-11 mph and diminish after midnight. Please review incident weather forecast.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Fire behavior is expected to remain moderate with most of the incident within control lines. Fuels are receptive and the increasing temperatures and lower relative humidity will increase potential for escapes and spots fires. Fuel will begin to react to forecasted weather with more volatility than previous operational periods. Energy Release Component will push towards the 90th percentile. Any escapes from proposed burning operation will find receptive grass and brush and will be difficult to contain. The live fuel moistures for the area have made a dramatic drop last month and are at critical levels well ahead of seasonal normalcy.

Probability of Ignition 95-100%

Spotting Distance 3/4 mile

Fine Dead Fuel Moisture 2-3%

SPECIFIC:

Branch II

Most of fire activity on this branch has been concentrated above Chase Canyon. The fire continues to back burn and the potential for slope reversal runs with high intensity will remain a concern. Any escapes from firing operations can expect rates of spread in the grass can exceed 200 ch/h and 150 ch/h in the brush were wind and slope align. Torching trees can send ember cast up to 3/4 mile. Winds will be favorable in the am but transition after 1300 to the west. If wind develops a southern component it may compromise firing operations.

Branch IV

Fire activity in this branch is expected to be minimal but smoldering 1000 hour fuels may dislodge and roll into receptive grass outside of control lines. A hotter and dryer day may flare up pockets of unburned fuel close to control lines and could send ember cast outside of established lines. If fire becomes established in the green the expected rates of spread in the grass can exceed 175 ch/h and 125 ch/h in the brush were wind and slope align.

Branch VI

Fire activity is expected to be minimal in this branch. Some interior pockets of unburned fuel may be become active and rollout will remain a concern along the Hwy 128 corridor. If fire escapes control lines it will find dry grass that can have rates of spread more than 175 ch/h. and 125 ch/h were wind and slope align.

Branch VIII

The previous operational period had moderate fire activity but hotter and dryer weather may increase fire behavior. The fire is above the Knoxville Rd corridor and potential for rollout is high. The rates of spread in the grass can exceed 200 ch/h and 150 ch/h in the brush were wind and slope align. Torching trees can send ember cast up to 1/2 mile.

Branch X

Resources working in this branch may not see the main fire and must stay in communication with those who can. Indirect line construction and firing preparation must continue to evaluate escape routes if the fire makes a northern push. The rates of spread in the grass can exceed 200 ch/h and 150 ch/h in the brush were wind and slope align.

AIR OPERATIONS: Lack of any dominate wind may smoke out some areas of fire limiting visibility.

SAFETY

- Extreme fire behavior preparation should be part of every plan.
- Definition: Spot Fire- A fire ignited outside the perimeter of the main fire by rolling or flying sparks or embers.
- Definition: Flare Up- Any sudden acceleration of fire spread or intensification of a fire.

CAL FIRE INCIDENT MANAGEMENT TEAM 3

1. INCIDENT NAME:		2. DATE PREPARED:	3. TIME PREPARED:	
County		07/06/18	1800	
4. PREPARED BY:	5. LEADER NAME:	6. OPERATIONAL PERIOD:		
David Sargenti SOF1	David Sargenti SOF1	07/07/18 0700	TO	07/08/18 0700

SAFETY MESSAGE

**SAFETY DOES NOT STOP AT THE BRIEFING!
KEEP IT IN YOUR MIND AND REFLECT IT IN YOUR ACTIONS!
BE A ROLE MODEL FOR OTHERS!**

- Understand the plan for the day and your role in the plan.
- Provide sufficient rest during the work cycle.
- Make sure everyone gets a briefing on the plan for the day!
- Roadway conditions may change. Drive defensively and slow down.
- Monitor your hydration/nutrition intake and keep adequate supplies of each.
- Be alert to changes in wind direction and expect changes in fire behavior.
- Beware of environmental hazards such as bee hives, poison oak, trip hazards, steep slopes and stump holes.

LCES

- Lookouts
 - Experienced, competent, trusted.
 - Aware of decision points.
- Communications
 - Radio Frequencies confirmed.
 - Provide updates on any situation change.
- Escape Routes
 - More than one escape route.
 - Evaluate escape time vs. rate of spread.
- Safety Zones
 - Survivable without a fire shelter.
 - Scouted for size and hazards.

8. CONSTRUCTING FIRELINE WITHOUT SAFE ANCHOR POINT

Prepared by: David Sargenti SOF1

INCIDENT RISK ANALYSIS ICS 215A

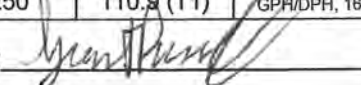

BRANCH DIVISION	HAZARDOUS ACTIONS/ CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	FIRE AND DROUGHT WEAKENED TREES	<ul style="list-style-type: none"> Follow Hazard Tree Safety Guidelines IRPG (p. 22). Many of the trees within the fire area and along roadways are stressed. Snags are present. Be aware that trees may fall even if not impacted by the fire.
IV C, D, V	MOP UP	<ul style="list-style-type: none"> Do not get complacent during mop up. Watch your footing. Wear your PPE.
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> Watch your speeds. Watch for debris in roadways. Expect increased civilian traffic in the populated areas.
ALL	WEATHER	<ul style="list-style-type: none"> Hot and dry weather will continue. Watch for changing weather conditions. The local pattern is a daily afternoon wind shift. Stay prepared.
ALL	PERSONNEL SAFETY	<ul style="list-style-type: none"> All personnel are responsible for their personal safety. Be sure to wear all required PPE while on the fire line. Be cautions of snakes and yellowjackets within the fire area.
ALL	POWER LINES	<ul style="list-style-type: none"> Follow Power Line safety guidelines IRPG (p. 24). Treat all downed power lines as energized.
ALL	HYDRATION	<ul style="list-style-type: none"> Drink water before, during and after each shift. Be alert for signs of heat stress in yourself and others.
ALL	FATIGUE	<ul style="list-style-type: none"> Monitor incoming and outgoing resources for level of fatigue. Provide sufficient rest during the work cycle.
ALL	CIVILIAN PRESENCE	<ul style="list-style-type: none"> Be aware of civilians in the area. Civilians may be distracted by the fire operations. Stay alert.
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Check the communication plan for frequency assignments. Use human repeaters as needed.
ALL	BRIEFINGS	<ul style="list-style-type: none"> Make sure everyone gets a briefing on the plan for the day. Document this on your ICS 214.
ALL	LCES	<ul style="list-style-type: none"> Ensure that LCES is being utilized.
ALL	AIRCRAFT AWARENESS	<ul style="list-style-type: none"> Be aware of rotor wash when working near helicopters. Understand that hazard trees may react to helicopters overhead. Monitor assigned aircraft frequencies.
ALL	FIRE BEHAVIOR	<ul style="list-style-type: none"> Maintain situational awareness. Be prepared for extreme fire behavior in all presented fuel types. Live fuel moistures are Critically Low.
ALL	HEAVY EQUIPMENT OPERATIONS	<ul style="list-style-type: none"> Review IRPG (p. 86). Provide working space around equipment. Avoid working below equipment where rollout is a potential.
II, X	FIRING OPERATIONS	<ul style="list-style-type: none"> Utilize Risk Management Process IRPG (p. 1). Ensure that Firing check list is complete.

8. MEDICAL EMERGENCY PROCEDURES

LINE EMERGENCY: Crew Supervisor to contact Division Supervisor with patient complaint/condition and location.

- Division Supervisor contacts:
 - FEMT / FEMP
 - Communications Unit
- Communication Unit will clear command channel for emergency traffic; as needed for Minor/Major Emergency
- Communications will switch all emergency traffic to CALCORD as needed or requested.
- Communications Unit contacts:
 - Medical Unit
 - Safety
 - Operations
- Division Supervisor will run medical emergency on CALCORD.
- Medical Unit will:
 1. Dispatch air/ground ambulance to as appropriate.
 2. If necessary, after patient pickup, dispatch ambulance to helibase for transportation.
 3. Notify receiving hospital of injury status.

CAMP EMERGENCY: Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident.

INJURY REPORTING PROCEDURES

NATURE OF INJURY _____

LOCATION OF PATIENT _____

TRANSPORTATION REQUESTED BY: AIR___ GROUND___

POINT OF PICKUP _____

LAT _____ LONG _____

PATIENT UNIT ID _____

REMINDER: DO NOT GIVE PT NAME OVER RADIO

IS AN EMT WITH PATIENT: YES ___ NO ___

AGE _____

SEX: MALE ___ FEMALE ___

ALL EMERGENCIES---Secure the area and identify witnesses for later investigation. Keep an accurate log of events.

TRAINING SPECIALIST MESSAGE

TRAINEES:

Please register with the TNSP as soon as possible in order to receive documented credit for your training assignment. Training is located in the Plans building across from check-in.

TRAINERS/EVALUATORS:

The narrative in the ICS 225 (Performance Evaluation) should reflect the tasks performed by the trainee on the incident. Be as descriptive as possible.

Bring the following with you to register:

- Incident Qualification Card
- Initiated Position Task Book

Rob Scott TNSP 949-292-3207
Justin Voyson TNSP (T) 661-547-8629

CAL FIRE INCIDENT MANAGEMENT TEAM 3

DEMOBILIZATION MESSAGE County Incident CA-LNU-009502

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

Update

409.5

MEDIA – The California State Penal Code, Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

Social Media

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.

COUNTY INCIDENT FINANCE SECTION MESSAGE

INCIDENT FINANCE WILL BE FULLY STAFFED AT YOLO COUNTY FAIRGROUNDS ICP AND LIBERTY SPIKE.

ALL DEMOB WILL HAPPEN AT THE ICP AT YOLO COUNTY FAIRGROUNDS.

SHIFT TICKETS / HIRED EQUIPMENT VENDORS:

Line supervisors are responsible for completing shift tickets for all hired equipment resources working for them. Please turn completed shift tickets into the CAL FIRE Time Unit at the end of your shift. We will not accept shift tickets from vendors.

FEDERAL TIME:

The FEDERAL TIME UNIT and FEDERAL COMP CLAIMS are located at the Yolo County Fairgrounds ICP.

For Federal resources at Liberty Spike – Please drop off your CTR's and other time documents with the CAL FIRE Time Unit. They will ensure delivery to the ICP.

LOCAL GOVERNMENT TIME KEEPING:

The CAL OES representative is on site at the ICP to handle F-42 and any questions you may have.

INJURIES, SUPPRESSION DAMAGES AND EQUIPMENT DAMAGE:

Please report all Injuries, fire suppression damage and equipment damage to the Comp Claims Unit Leader. For Fire Suppression Damages, we will need location, lat/long, property owner, type of damage, photos, etc. Examples of "fire suppression" damage include: damaged fences, crushed culverts, pipe damage, broken gates, etc.

Absolutely no off site feeding or purchases charged to the incident. They must be pre-approved by the Logistics Section and/or Finance Section Chief.

ROGER RAINES, FSC1 - WOODLAND

JACK FRANKLIN, FSC1 – LIBERTY SPIKE

FIRE SUPPRESSION REPAIR PLAN: COUNTY INCIDENT

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.

Damaged facilities will be returned to functional status in order to prevent further damage. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by the Operations Division and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities. Extra care will be exercised and equipment will be monitored when operating in locations where new fire starts are more likely to occur, such as rocky areas in dry grass. New fires will be reported following the instructions in the radio call plan.

Examples of items that may be repaired include, but are not limited to:

Infrastructure Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges, and other watercourse crossings	Adverse impacts to air and water quality
Water sources	Adverse impacts to protected species of plants and animals
Utility distribution lines (above or below ground)	
Road barriers removed for fire access	
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	

Dozer Line Repair

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer line:

- Berms and push-piles shall be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.
- Waterbreaks shall be constructed at a 30-45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated or rockied areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall be left in the same condition they were found or better. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

Prevailing gradient	Maximum waterbreak spacing
0-10%	200 feet
11-25%	150 feet
26-50%	100 feet
>50%	75 feet

Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.

**Archaeological and Historic Properties:
General Fire-line Guidance for the BLM Ukiah Field Office.**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.
When possible and prudent:**

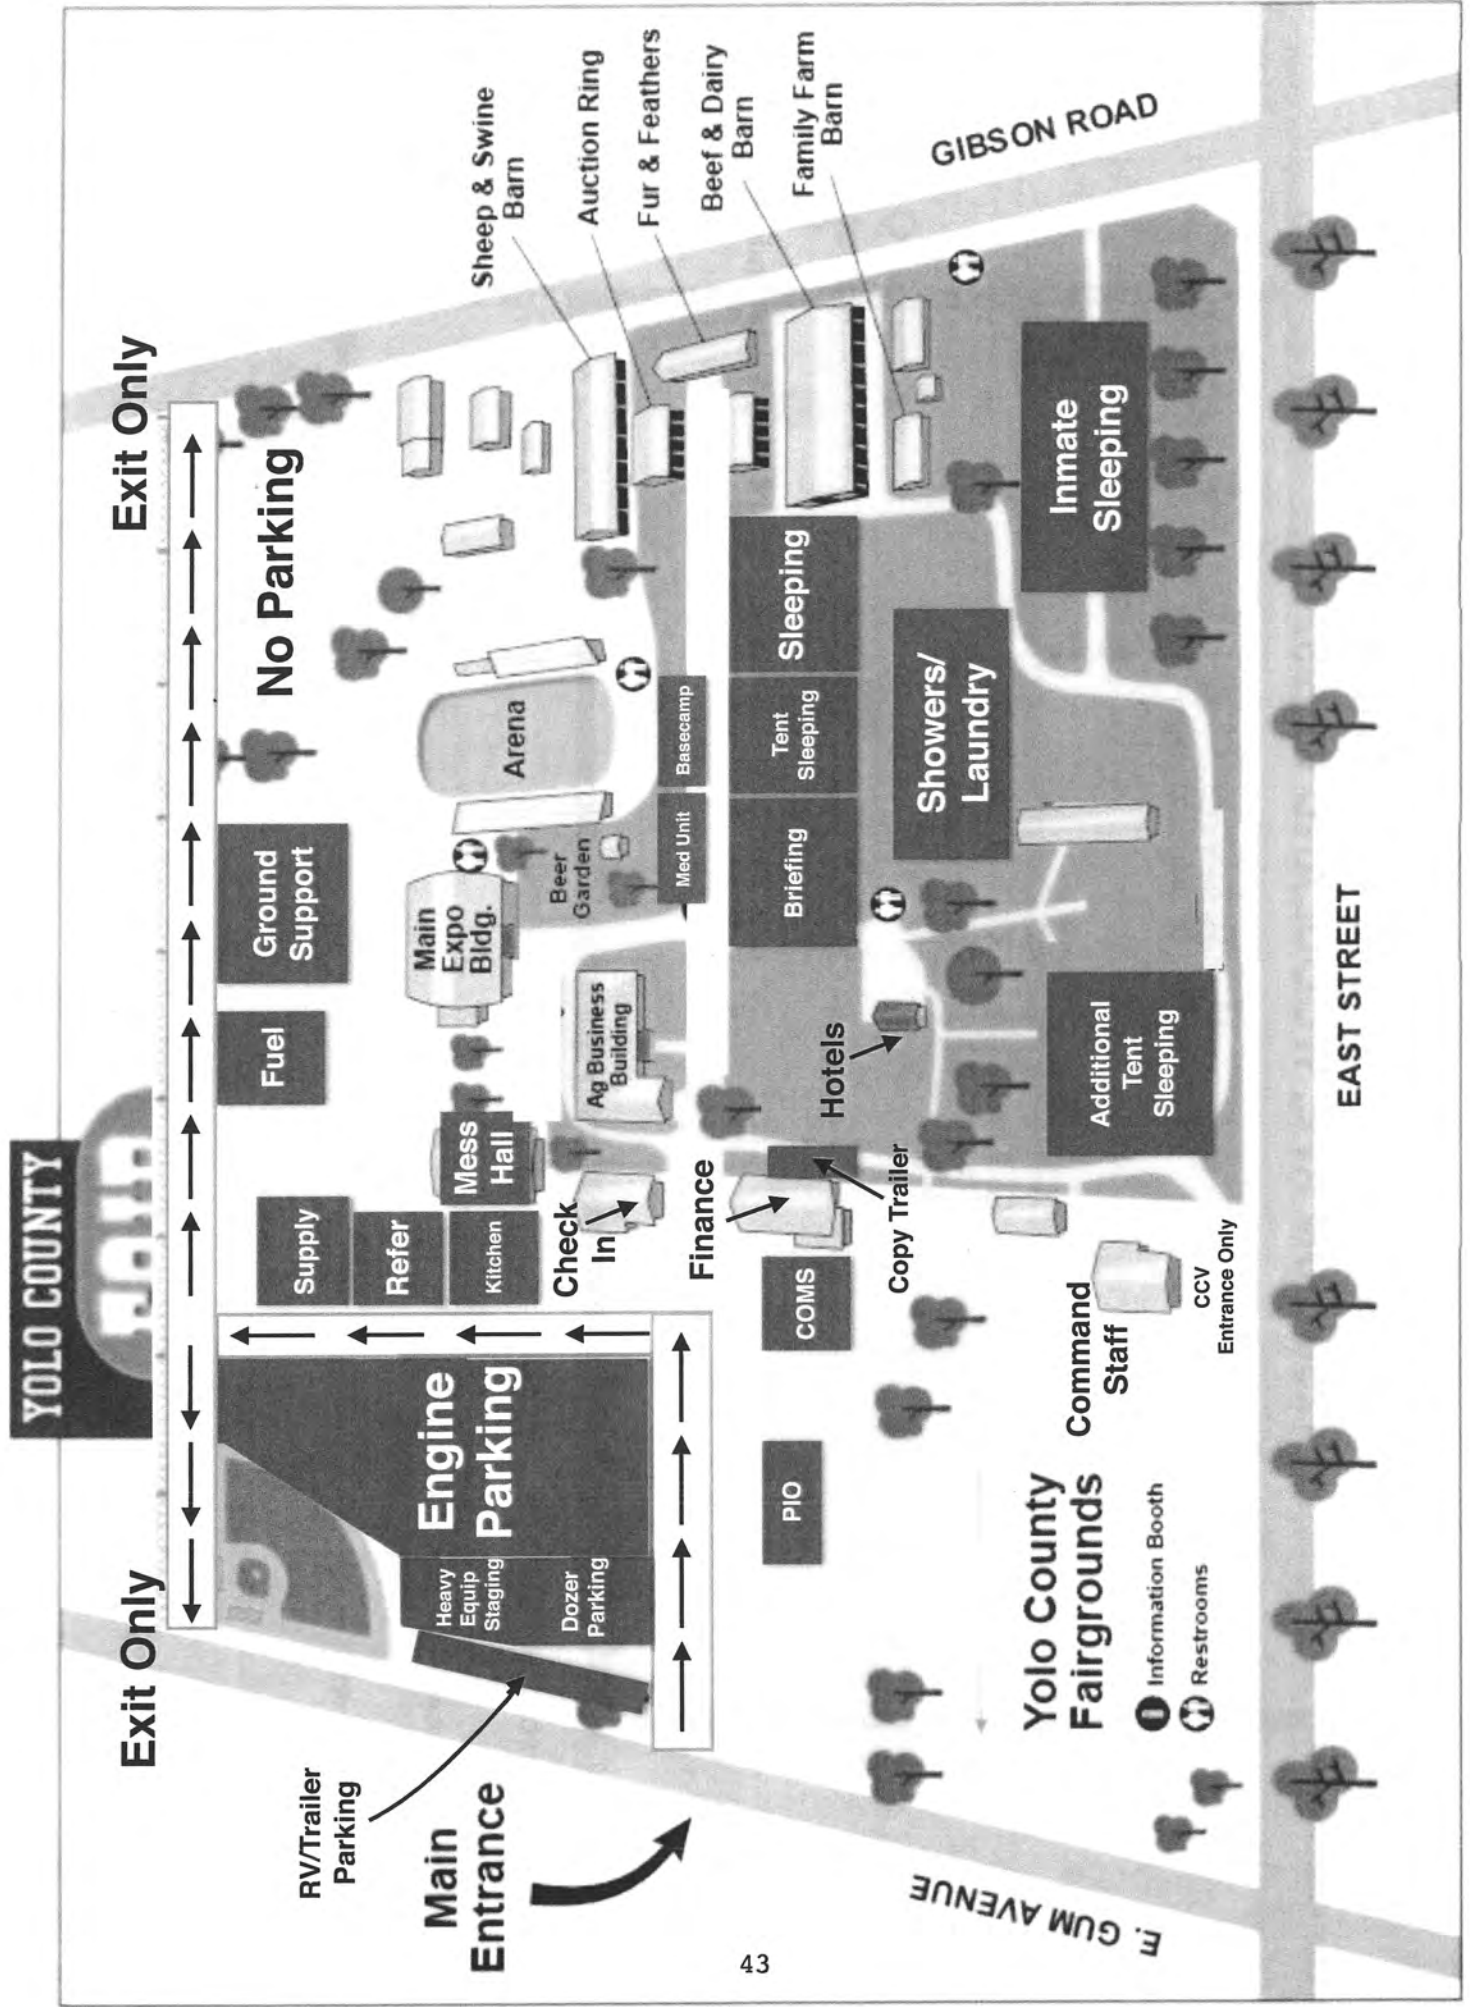

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
