# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> <div style="text-align: center;">COUNTY</div>	<b>2. Operational Period:</b>	Date From: 7/9/2018 Time From: 0700	Date To: 7/10/2018 Time To: 0700
---	-------------------------------	--	-------------------------------------

**3. Objective(s):**  
Strategic Objectives

A full suppression strategy is to be implemented on the County Incident. Values at risk associated to the incident include human safety, private property and associated improvements, electrical power infrastructure, and cultural values. Minimize acres burned on all lands by utilizing effective and efficient strategies and tactics while maintaining safety first.

Leaders Intent

Work effectively with cooperative partners towards a common goal of protecting values in a safe and efficient manner. All incident assigned personnel should be prepared to take the appropriate actions regarding:

- Professional behavior, conduct timely/effective communications
- Personal safety and safety of others, including driving slowly, safely and defensively
- Implementation of tactics that offer a high probability of success
- Manage fatigue by taking breaks and maintaining work/rest cycles

Management Objectives

- Fight fire aggressively while maintaining safe work practices to minimize threats to the public and emergency responders
- Minimize damage to structures, private property and other improvements in the fire area
- Protect natural, cultural, heritage resources
- Continue to foster and maintain positive relationships with all local cooperators and stakeholders
- Provide timely and accurate incident information
- Maintain fiscal accountability keeping costs commensurate with values at risk

Control Objectives

- Keep the fire South of Highway 20
- Keep the fire North of Miller Canyon
- Keep the fire East of Knoxville Road
- Keep the fire West of Highway 16

**General Situational Awareness:**

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

Stop, Think, Organize, Proceed

**5. Site Safety Plan Required?** Yes  No

**Approved Site Safety Plan(s) Located at:**

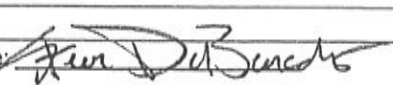

**6. Incident Action Plan**

# County Fire Incident Weather Forecast

FORECAST NO: 8 D/N  
PREDICTION FOR: Monday 24 Hour Shift  
SHIFT DATE: July 9, 2018  
FORECAST ISSUED: 2000 PDT July 8, 2018

NAME OF FIRE: County Fire  
UNIT: LNU  
Incident Meteorologists: Jeff Tonkin  
Stephen Bodnar (T)

**WEATHER DISCUSSION:** High pressure continues to dominate the region while subtle warming is expected over the next few days. Daytime and nighttime RHs will fall to critical values especially along ridges above 2000 ft. We will see a bump in westerly winds Monday evening; otherwise winds will generally be light and terrain driven. Some mid level monsoonal moisture may work its way into Northern CA Wednesday and beyond, but at this time the best chance of thunderstorm activity looks to remain over the Sierra Crest.

**WEATHER FORECAST TODAY (MONDAY DAY SHIFT):**

SKY/WEATHER: Sunny, hot and dry.  
MAX TEMPERATURES: 94 - 98° mid slopes and ridgetops. 97 - 103° lower slopes and valleys.  
MIN HUMIDITY: 7 - 14% upper slopes and ridges. 15 - 20% lower slopes and valley.  
WINDS (20 FT):  
Upslope 4 to 7 mph until 1400 pdt...then west and northwest 6 to 10 mph with gusts to 15 mph through 1700 PDT.. Divisions O and J...Gusts 20 to 25 mph afternoon and evening.  
LAL: 1 CWR: 0%  
STABILITY / INVERSION: Moderately unstable.  
SMOKE TRANSPORT WIND: South-southwest 15 mph.

**WEATHER FORECAST MONDAY NIGHT:**

SKY/WEATHER: Clear. Gustier west winds during the evening.  
MIN TEMPERATURES: 64 - 69°.  
MAX HUMIDITY: 15 - 20% ridges. 30 - 40% slopes and drainages.  
WINDS (20 FT):  
West and northwest 6 to 9 gusts to 15 mph...increasing to 10 to 14 mph with gusts 20 to 25 mph around 1800 PDT and lasting through 0200. Winds then diminishing to north and northwest or downslope 2 to 5 mph through sunrise.

**OUTLOOK FOR TUESDAY:**

Sunny and continued hot. Max Temps: 96 - 102°. Min RH: 9 - 15%.  
Wind: North and northwest 2 to 5 mph early...becoming upslope 4 to 8 mph after 0900 pdt.  
After 1400 pdt, winds increasing from west and southwest 6 to 9 mph with gusts to 15 mph. Winds then becoming east to southeast after midnight along upper slopes and ridges 5 to 10 mph.  
Smoke Transport Wind: Southwest 18 mph.

**EXTENDED FORECAST WEDNESDAY THROUGH FRIDAY:**

Mainly clear and hot through Friday then a subtle cooling trend late in the week with increasing high clouds. Max Temps 95 - 103° through Wednesday then 92 - 99°. Min RH: 10 - 15% ridges... 15 - 25% slopes and valleys. East or southeast winds early Wednesday. Otherwise mainly west or terrain driven winds or upslope 3 to 7 mph...with afternoon and evening gusts from 10 - 15 mph.  
Smoke Transport Wind: South and Southeast 20 mph.

**OBSERVED WEATHER FROM YESTERDAY (SUNDAY):**

RAWS	MAX TEMP	MIN RH	WIND DIRECTION / SPEED MPH
BROOKS	100	12%	east/southeast / 6 Gust 13

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 009	TYPE OF FIRE: Wildfire
FIRE NAME: County	OPERATIONAL PERIOD: July 9, 2018
UNIT: CAL FIRE-Sonoma Lake Napa	TIME ISSUED: 2000 hrs.
	Jon Heggie Fire Behavior Analyst <i>J. Heggie</i>

## INPUTS

### WEATHER SUMMARY:

**Daytime:** Sunny with temps near 93° to 103° and minimum relative humidity between 7%-14%. Winds will surface from the west and northwest after 1400 hrs. at 6-10 mph with gusts up to 15 mph.

**Night time:** Clear with temps near 63° to 68° and maximum relative humidity between 7-14%. Winds will increase from the west and northwest at 10-14 mph with gust up to 25 mph and will diminish after 0200 hrs. Please review incident weather forecast.

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

Most fire activity will be concentrated to interior portions of Branch II. A successful firing operation has completed control lines on the northern edge of the incident but winds may test established lines. Branch II will be the most susceptible for escape from control lines with a large amount of heat signatures close to control lines. If a spot gets outside the perimeter, it will establish quickly and be challenging to suppress. All other branches are expected to have minimal fire activity but hotter and dryer weather will increase activity of interior islands and 1000 hour fuels.

Probability of Ignition 100%

Spotting Distance 3/4 mile

Fine Dead Fuel Moisture 2-3%

#### SPECIFIC:

##### Branch II

Winds are predicted to potentially test control lines on the north side of the branch. If winds favor the west over the northwest, it will push directly across recently burned areas. Heavier fuels in the branch will retain heat and require extensive mop up to mitigate any potential threats to established control lines. Pockets of unburned islands will become active as the solar radiation heats available fuels and potential for ember cast outside of the perimeter will be high. If a spot becomes established expect rates of spread to exceed 200 ch/h in grass and 150 ch/h in the brush were wind and slope align.

##### Branch IV and VI

Fire activity in this branch is expected to be minimal but fire weakened trees may fail and could roll into unburned fuel. Hotter and dryer conditions will cause pockets of unburned fuel to become active and may impact control lines. If fire becomes established in the green the expected rates of spread in the grass can exceed 175 ch/h and 125 ch/h in the brush were wind and slope align.

##### Branch VIII

Large interior island may become active under hotter and dryer weather. The fire operation from the previous operational period will retain heat and will be wind tested this shift. If fire escapes established control lines the rates of spread in the grass can exceed 200 ch/h and 150 ch/h in the brush were wind and slope align.

##### Branch X

Resources transitioning into suppression repair must utilize 95-15-15 thresholds for weather to reduce accidental ignitions. Continue to monitor weather and the main fire for flare ups that may impact this branch.

##### Contingency

Suppression repair must utilize 95-15-15 thresholds for weather to reduce accidental ignitions. Continue to monitor weather and the main fire for flare ups that may impact this branch.

**AIR OPERATIONS:** Good visibility is forecasted for tomorrows operational period.

## SAFETY

- Fire weakened trees can fall with no warning.
- Definition: Spot Fire- A fire ignited outside the perimeter of the main fire by rolling or flying sparks or embers.
- Definition: Flare Up- Any sudden acceleration of fire spread or intensification of a fire.

# CAL FIRE INCIDENT MANAGEMENT TEAM 3

1. INCIDENT NAME:		2. DATE PREPARED:	3. TIME PREPARED:
County		07/08/18	1800
4. PREPARED BY:	5. LEADER NAME:	6. OPERATIONAL PERIOD:	
David Brockman SOF1 (T)	David Sargenti SOF1	07/09/18 0700 TO 07/10/18 0700	

## SAFETY MESSAGE

**Extreme Fire Behavior:** "Extreme" implies a level of fire behavior characteristics that ordinarily precludes methods of direct control action. One or more of the following is usually involved: high rate of spread, prolific crowning and/or spotting, presence of fire whirls, strong convection column. Predictability is difficult because such fires often exercise some degree of influence on their environment and behave erratically, sometimes dangerously.

- Understand the plan for the day and your role in the plan.
- Make sure everyone gets a briefing on the plan for the day!
- Roadway conditions may change. Drive defensively and slow down.
- Monitor your hydration/nutrition intake and keep adequate supplies of each.
- Be alert to changes in wind direction and expect changes in fire behavior.
- Beware of environmental hazards such as bee hives, poison oak, trip hazards, steep slopes and stump holes.

### SNAG (Hazard Tree) SAFETY:

- Size up snag hazards in work area
- Never become complacent
- Always look up
- Get weather reports
- Scout out parking, work areas, and safety zones
- Advice co-workers of known hazards
- Face your hazards and take appropriate action
- Examine work area for other hazards
- Take extra caution around heavy equipment
- You are responsible for your own safety

18. TAKING A NAP NEAR THE FIRELINE

CAL FIRE INCIDENT MANAGEMENT TEAM 3 SOF1 David Sargenti

# INCIDENT RISK ANALYSIS ICS 215A

BRANCH DIVISION	HAZARDOUS ACTIONS/ CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES
ALL	FIRE AND DROUGHT WEAKENED TREES	<ul style="list-style-type: none"> <li>Follow Hazard Tree Safety Guidelines IRPG (p. 22).</li> <li>Many of the trees within the fire area and along roadways are stressed. # TRAINING SPECIALIST MESSAGE

### TRAINEES:

In order to receive documented credit for your training assignment, you must register with the TNSP prior to starting the demob process.

### TRAINERS/EVALUATORS:

If as much work as possible has been completed in the position task book, you are strongly encouraged to take advantage of your time in camp and conduct the training close-out with the TNSP. It is not necessary to wait until you demob.

Bring the following with you to the "exit interview"

- Your properly initiated Position Task Book
- Completed and signed ICS 225 Performance Evaluation
- Completed and signed Evaluation Record

Rob Scott TNSP 949-292-3207  
Justin Voyson TNSP (T) 661-547-8629

# CAL FIRE INCIDENT MANAGEMENT TEAM 3

## DEMOBILIZATION MESSAGE County Incident CA-LNU-009502

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

### SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

### BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

### BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

Update

409.5

**MEDIA** – The California State Penal Code, Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

**CAL FIRE SOCIAL MEDIA POLICY** – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

Social Media

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

**LOST AND FOUND** – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

**MAIL SERVICE** – The Information Section can assist you with sending and receiving mail.

**DELIVERY ADDRESS** – 1250 Gum Ave. Woodland, Ca. 95776

*In readiness is all*

# COUNTY INCIDENT FINANCE SECTION MESSAGE

***INCIDENT FINANCE WILL BE FULLY STAFFED AT YOLO COUNTY FAIRGROUNDS ICP AND LIBERTY SPIKE.***

***ALL DEMOB WILL HAPPEN AT THE ICP AT YOLO COUNTY FAIRGROUNDS.***

**SHIFT TICKETS / HIRED EQUIPMENT VENDORS:**

Line supervisors are responsible for completing shift tickets for all hired equipment resources working for them. Please turn completed shift tickets into the CAL FIRE Time Unit at the end of your shift. We will not accept shift tickets from vendors.

**FEDERAL TIME:**

The FEDERAL TIME UNIT and FEDERAL COMP CLAIMS are located at the Yolo County Fairgrounds ICP.

***For Federal resources at Liberty Spike*** – Please drop off your CTR’s and other time documents with the CAL FIRE Time Unit. They will ensure delivery to the ICP.

**LOCAL GOVERNMENT TIME KEEPING:**

The CAL OES representative is on site at the ICP to handle F-42 and any questions you may have.

**INJURIES, SUPPRESSION DAMAGES AND EQUIPMENT DAMAGE:**

Please report all Injuries, fire suppression damage and equipment damage to the Comp Claims Unit Leader. For Fire Suppression Damages, we will need location, lat/long, property owner, type of damage, photos, etc. Examples of “fire suppression” damage include: damaged fences, crushed culverts, pipe damage, broken gates, etc.

**Absolutely no off site feeding or purchases charged to the incident. They must be pre-approved by the Logistics Section and/or Finance Section Chief.**

**ROGER RAINES, FSC1 - WOODLAND  
JACK FRANKLIN, FSC1 – LIBERTY SPIKE**

**INCIDENT MANAGEMENT TEAM 3**

## FIRE SUPPRESSION REPAIR PLAN: COUNTY INCIDENT

Fire suppression repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas that happened as a result of the fire itself.

Damaged facilities will be returned to functional status in order to prevent further damage. Projects too large or complex to be completed by the Fire Suppression Repair Group shall be transferred to the Comp/Claims Unit or the local Unit. Repair work shall only occur in locations authorized by the Operations Division and where fire suppression activities are complete. Fire Suppression Repair Group resources shall evaluate all Divisions for appropriate repair needs. This includes areas inside and outside the fire perimeter, provided the damage was caused by official fire suppression activities. Extra care will be exercised and equipment will be monitored when operating in locations where new fire starts are more likely to occur, such as rocky areas in dry grass. New fires will be reported following the instructions in the radio call plan.

Examples of items that may be repaired include, but are not limited to:

Infrastructure Damage	Natural Resource Damage
Fences and gates	Soil erosion
Culverts, bridges, and other watercourse crossings	Adverse impacts to air and water quality
Water sources	Adverse impacts to protected species of plants and animals
Utility distribution lines (above or below ground)	
Road barriers removed for fire access	
Trash, debris, and supplies left by fire suppression resources	
Miscellaneous damage to residential property	

### Dozer Line Repair

Dozers construct both fire and contingency lines. Dozer line width varies greatly. The following measures shall be implemented for constructed dozer line:

- Berms and push-piles shall be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.
- Waterbreaks shall be constructed at a 30-45 degree angle and shall be a minimum depth of 12 inches from the bottom of the cut to the top of the berm. Where feasible, the discharge from waterbreaks shall be directed into vegetated or rocked areas.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with hand tools.
- Roads used in fire suppression activities shall be left in the same condition they were found or better. Gravel and soil-surfaced roads shall be watered to prevent excessive dust. Where fire suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable dips shall be installed for drainage.
- Where fire suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.
- Spacing of waterbreaks shall be as follows:

Prevailing gradient	Maximum waterbreak spacing
0-10%	200 feet
11-25%	150 feet
26-50%	100 feet
>50%	75 feet

*Spacing criteria is a general guide. Actual location of waterbreaks should be tailored to the topography and placement suited to the best dispersal of water flow.*

**Archaeological and Historic Properties:  
General Fire-line Guidance for the BLM Ukiah Field Office.**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.  
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

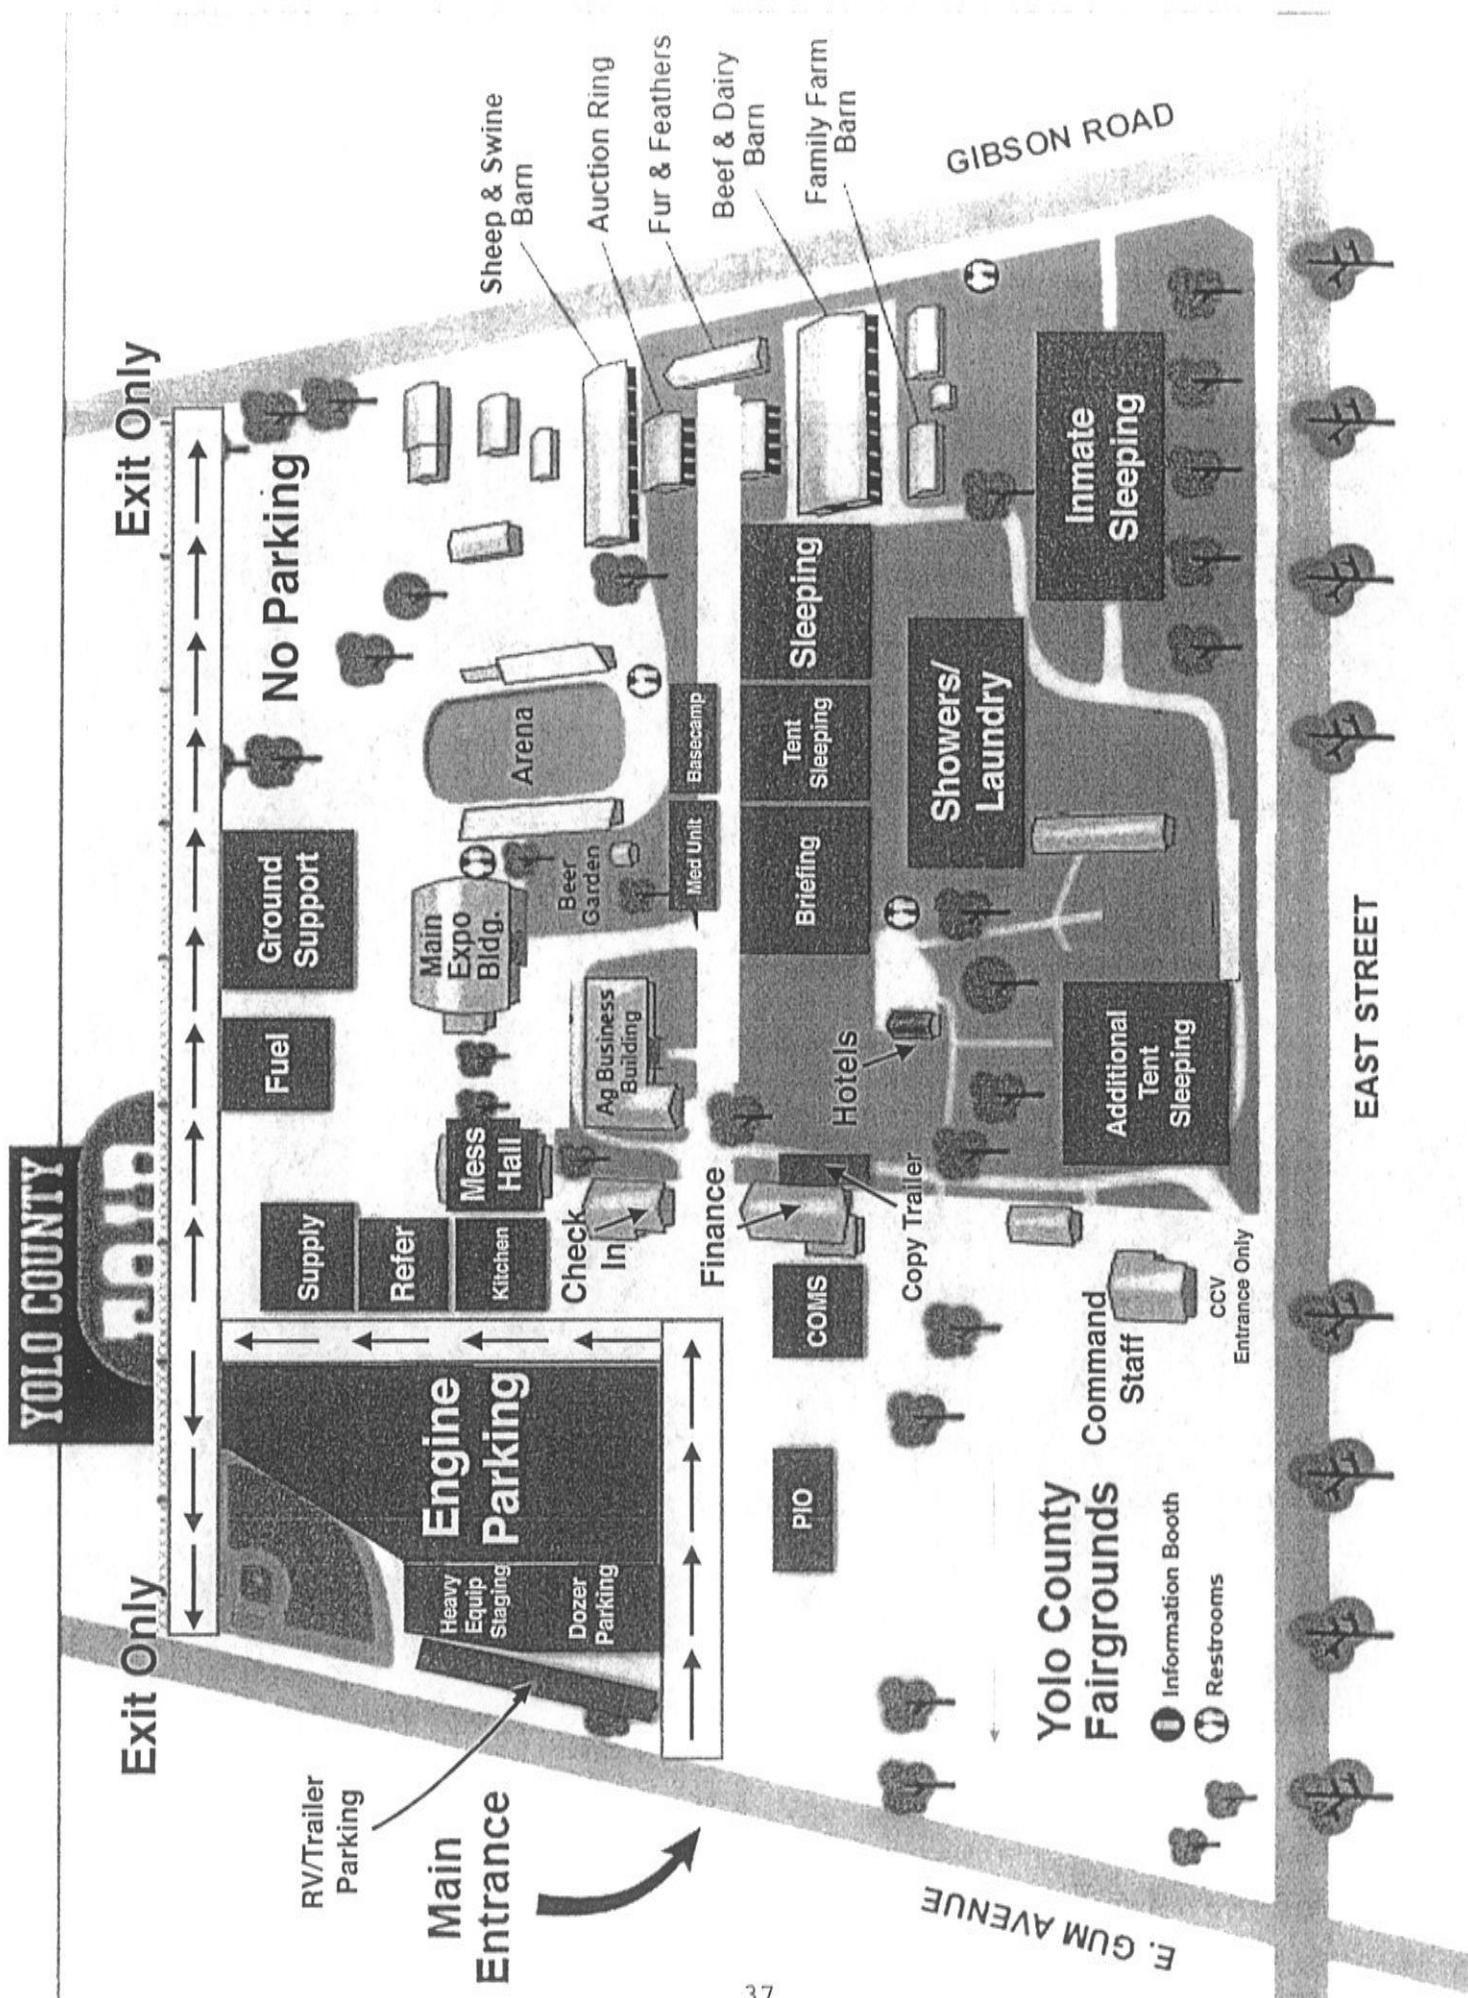

Your help preserving California's non-renewable cultural resources is appreciated.
