INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	Date From:	8/2/2018	Date To	8/3/2018
Mendocino Complex		Time From:	0700	Time Tc	0700

3. Objective(s):

Management Objectives

-Provide for emergency personnel and public safety at all times.

-Protect property, improvements, and infrastructure.

-Ensure repopulation takes place in a quick, efficient, and effective manner.

-Ensure coordinated, timely and accurate release of public information.

-Foster and maintain relationships with all cooperators and stakeholders.

-Protect economic, natural, cultural and heritage resources.

-Maintain fiscal accountability and keep costs commensurate with values at risk.

Control Objectives

Ranch Objectives:

-Keep the fire North of Hwy 20

-Keep the fire South of Lake Pillsbury

-Keep the fire East of Potter Valley

-Keep the fire West of Indian Valley Reservoir.

River Objectives:

- Keep the fire North of Pine Mountain Road

- Keep the fire South of Mill Creek Road

- Keep the fire East of Old River Road

- Keep the fire West of Hwy 29

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

5. Site Safety Plan Required? Yes ☐ No ☑

INCIDENT Weather Forecast

FORECAST NO: 4

NAME OF FIRE: Mendocino Complex

PREDICTION FOR: Thursday/Thu night **SHIFT**

UNIT: Mendocino

SHIFT DATE: 8/2-8/3

SIGNED: Mike Smith *Mike Smith*

Incident Meteorologist

TIME AND DATE FORECAST ISSUED: 2000 August 1, 2018

...Warm, Dry and Breezy conditions continuing....NWS Fire Wx Watch Saturday...

WEATHER DISCUSSION: The upper level high pressure system responsible for the warm, dry weather the last several days will be displaced slightly southeast Thursday and Friday as a weak weather system pushes into the Pacific northwest. This will bring a little cooling each day with a little higher humidity. The passage of this system will likely not bring much in the way of increase in the already breezy northwest winds. Ridgetops will continue to see these breezy northwest winds through the day and nighttime hours with the strongest winds in the afternoon and evening hours. Ridges will also see a continued drop in RH after midnight as drier air from above mixes down in the early morning hours. Biggest concern will continue to be erratic winds associated with column inflow and collapse so maintain situational awareness. A more significant cool off with higher humidity will occur over the weekend as a low pressure system approaches the coast increasing onshore flow.

WEATHER FORECAST:

WEATHER: Fair skies but smoky.

TEMPERATURES: Highs above 1500 feet...87-93. Morning mins 70-75.
Highs below 1500 feet...94-98. Morning mins 56-60.

HUMIDITY: Minimum RH above 1500 feet 15-19%. After Max recovery 35-40% evening hours.
Minimum RH below 1500 feet 10-15% After Max recovery 65-75%

20 FT WINDS:

RIDGETOP - Northwest 8-12 gusts to 15-20 mph. Some higher gust possible highest elevations in the late afternoon and early evening hours. **Erratic winds possible under large columns**.

SLOPE/VALLEY - Light and variable in the morning becoming southwest to northwest after about 1300 5-11 mph gusts to 15 mph upper slopes.

STABILITY/INVERSION: Inversions holding a little longer today but still slightly unstable conditions aloft in the afternoon. Inversions breaking out after about 1300.

OUTLOOK FOR THURSDAY NIGHT: Fair skies except for smoky in vicinity of fire. Min temperatures 55 lower elevations to 72 ridges. Max RH recovery 72 to 77% lower elevations to 38-45% ridges. Highest RH before midnight then decreasing slightly through the morning hours. Ridge winds northwest 8-12 with occasional gusts 15 to 20 mph. Winds strongest in the evening hours. Slope winds southwest to northwest 5-11 mph gusts to 15 mph through about 2100 then becoming downslope to downcanyon to 5 mph.

OUTLOOK FOR FRIDAY: Fair skies except smoky in vicinity of fires. Max temps 86 ridges to 97 lower elevations. Min RH 10-18%. Ridge winds west to northwest 8-12 mph with gusts to 15-20 mph. Slope winds becoming southwest to northwest after about 1300 5-11 mph gusts to 15 mph.

EXTENDED FORECAST FOR SATURDAY: Fair skies except smoky near fires. Cooler with highs Mainly in the 80s to low 90s. Min RH 20 to lower 30% range. Breezy northwest winds through the day.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 005	**TYPE OF FIRE: Wildfire**
FIRE NAME: Mendocino Complex	**OPERATIONAL PERIOD: 08/02/18 0700-0700**
DATE ISSUED: 08/01/18	**TIME ISSUED: 19:00**
UNIT: CA-MEU-008674	**SIGNED: *Todd Hopkin***
	Typed/printed: Todd Hopkins (FBAN)

INPUTS

WEATHER SUMMARY: See attached weather summary in the spot weather forecast

WEATHER: Fair skies but smoky.
TEMPERATURES: Highs above 1500 feet...87-93. Morning mins 70-75.
Highs below 1500 feet...96-98. Morning mins 56-60.
HUMIDITY: Minimum RH above 1500 feet 15-19%. After Max recovery 35-40%
Minimum RH below 1500 feet 10-15% After Max recovery 65-75%
20 FT WINDS:
RIDGETOP - Northwest 8-12 gusts to 15-20 mph. Some higher gust possible highest elevations in the late afternoon and early evening hours. Erratic winds possible under large columns.
SLOPE/VALLEY - Light and variable in the morning becoming southwest to northwest after about 1300 5-11 mph gusts to 15 mph upper slopes.
STABILITY/INVERSION: Inversions holding a little longer today but still slightly unstable conditions aloft in the afternoon. Inversions breaking out after about 1300.

OUTPUTS

FIRE BEHAVIOR

GENERAL:
The fire is burning in a mixture of grass, brush, oak woodlands and scattered pine stands. The grass component is fully cured, with a moderate to heavy fuel loading. The fire spread is being driven by the critical fuel moistures, high temperatures, humidity in the teens, and high mid-afternoon winds. These combinations are leading to erratic fire behavior with long range spotting. Fire activity will remain active into the late evening with evening winds and poor humidity recovery.

Probability of Ignition: 93%
100 HRFM: 7% (At 97th Percentile)
FDFM: 3%
BI: 76 (Above 97th Percentile)
ERC: 78 (Above 97th Percentile)
1000 HRFM: 8% (At 97th Percentile

SPECIFIC: ***Fuel Types are similar for all Branches***

Fuel Type	*Rate of Spread (ft/min)*		*Flame Length (in feet)*		*Spotting Distance (mi)*	*Transition to Crown Fire?*
Grass	Head	106-250	Head	8-20	From Trees: .5 - .7	Yes / Torching
	Flank	8-19	Flank	2-5		
	Backing	4-10	Backing	1-4	From Wind: .4 - .7	
Brush	Head	91-204	Head	20-32	From Trees: .3 - .5	Yes / Torching
	Flank	6-15	Flank	5-9		
	Backing	3-8	Backing	4-7	From Wind: .4 - 1	
Timber Understory	Head	21-22	Head	8-11	From Trees: .3 - .5	Yes / Torching
	Flank	1-2	Flank	2-3		
	Backing	>1-1	Backing	1-2	From Wind: .4 - .5	

AIR OPERATIONS:
Smoke may make it difficult to see resources working on Divisions.
Sunrise: 0614 Sunset: 2024

SAFETY

- EXPECT SPOTTING!!! Smoke columns will cap out and then collapse producing erratic winds and spot fires in all directions!!!
- POST LOOKOUTS!!! Don't become complacent! Identify your safety zones and escape routes.

NorCal Interagency Incident Management Team

MENDOCINO HEALTH AND SAFETY MESSAGE

INCIDENT: Mendocino Complex CA-MEU-008674	DATE: August 2, 2018 TIME: 0700-0700

Major Hazards and Risks: Extreme Fire Behavior; Drought Stricken Fuels; and Fatigue.

Dozer/Heavy Equipment Safety: Utilize good communications working around heavy equipment and maintain safe working distances. Watch for rolling material if working below equipment. Stay out of the dust.

Extreme Fire Behavior: Drought stricken fuels are receptive to fire spread. A small amount of wind on this dry fuel changes the game dramatically!! Be alert to changes in wind direction and expect changes in fire behavior. Flare-ups generally occur in deceptively light fuels, such as grass and light brush or islands within fire perimeters of unburned or partially burned fuels.

Firing Operations: Follow the Firing Operations Checklist. Conduct thorough briefing. Use qualified personnel. Required PPE to be worn by all personnel involved. Utilize Risk Mgmt. Process in the IRPG for implementing the plan. Maintain LCES during burning operations.

Personnel: Manage yourself and those around you for fatigue; many have driven long distances or been deployed for extended periods. As fatigue increases, injuries tend to increase also. Keep an eye on your crew and partner.

Hydration: By the time your body tells you it's time to drink – you are already DEHYDRATED!!! On a regular basis drink fluids to maintain an appropriate energy level for any expected work assignment. Remember, you are the only one that knows your limitations.

Hazard trees: Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Review and follow **Hazard Tree Safety** in your IRPG.

Incident within Incident (IWI) procedures - Review your ICS 206 and know what to do.

We are **ALL** Safety Officers !!!

Tailgate Safety

- **Accountability:** everyone checks in and everyone checks out. Supervisors know where their crews are at all times.
- **Communication:** everyone knows the com-plan
- **Briefing:** everyone knows the game plan, everyone knows the contingency plan.
- **Safety gear:** everyone has the appropriate safety gear and in good working condition.
- **LCES:** they are clear and made known to everyone.

Heat / Fatigue / Dehydration

- Be alert for signs of fatigue, take breaks as necessary.
- Drink water frequently, up to 1.5 gal. per shift.
- Monitor firefighters. Ensure that work /rest cycles are being followed.
- Be alert for signs of heat stress; use the buddy system.
- Eat small meals often and when possible
- Drink electrolyte drinks at a 3 water to 1 sport drink ratio.

Incident Safety Officer: **Chad Thompson SOF1(T)**

Incident Commander: **Sean Kavanaugh**

NorCal Interagency Incident Management Team

MENDOCINO COMPLEX RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	**EXTREME FIRE BEHAVIOR**	Know your LCES and maintain Situational Awareness. Use experienced Look Outs. Adhere to the downhill line construction guidelines. Monitor weather for changes in the wind, temp, and RH. Expect rapid rates of spread with spotting, have a contingency plan with established decision points and safety zones.
ALL	**FATIGUE/HEAT/DEHYDRATION**	Be alert for signs of fatigue and take breaks as necessary. Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1.5 gal. per shift. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible Drink electrolyte drinks at a 3 water to 1 electrolyte drink ratio.
ALL	**LINE CONSTRUCTION**	Conduct thorough briefing for all personnel (inside rear cover IRPG). Ensure LCES in place prior to engagement. Establish adequate safety zones. Use Downhill Line Checklist. Follow "Look Up, Look Down, Look Around" procedures. Utilize Risk Management Process. Reference the IRPG.
ALL	**STEEP TERRAIN / ROLLING DEBRIS**	Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.
ALL	**HAZARD TREES**	Identify and isolate the area to provide for the safety of others. Flag and make proper notifications. Do not fall trees out of your certification level.
ALL	**FIRING OPERATIONS**	Follow the Firing Operation Checklist. Assure that: Lookouts are posted, communications are established with both firing and holding teams, escape routes and safety zones are established and not compromised by the firing operations. Also, it has been approved and relayed to all adjoining forces.
ALL	**DRIVING HAZARDS**	**Slow Down!** Drive defensively! Expect the unexpected around every curve. Drive with headlights and seatbelts on. Narrow roads with limited passing room. Coordinate your movements on one-lane roads. Use warning devices when operating near traffic.
ALL	**AIRCRAFT OPERATIONS**	Monitor air-to-ground frequency, they are your eyes in the sky. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Only utilize aircraft to insert personnel on the line when necessary.
ALL	**HEAVY EQUIPMENT**	Watch for rolling material and avoid working below heavy equipment. Monitor safe working distances. Avoid working below heavy equipment. Utilize communication with the operator (radio or hand signals) Stay out of the dust
ALL	**POWER LINES**	Follow ***Power Line Safety*** guidelines in the IRPG. Extinguish all power poles that are on fire before the fall. Communicate power line hazards to supervisor and hazard flag accordingly. Flag area around downed power lines and deny access. Treat all downed power lines as energized.
ALL	**PERFORM TAIL GATE SAFETY MEETINGS**	Everyone should be briefed on the conditions/circumstances regarding the fire and their assignments per the IRPG. Ensure all personnel have PPE, food, and water.

Incident Name: **Mendocino Complex** **ICS 215a**	DATE PREPARED: **August 01, 2018 1900hrs** Prepared by: Chad Thompson SOF1(T) IMT2	OPERATIONAL PERIOD **August 02, 2018 0700-0700**

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY:
"LINE EMERGENCY"

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  1. Closest EMS resource
  2. Communications Unit
- Communications Unit contacts:
  1. Ground or Air ambulance as requested
  2. Operations
  3. Safety
  4. Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

CAMP EMERGENCY:

Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
  1. Communications
  2. Safety
  3. Logistics
  4. Operations
  5. Crew Supervisor
  6. Comps/Claims

INJURY REPORTING PROCEDURES

CHIEF COMPLAINT_____
LOCATION OF PATIENT_____

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ **Time:** _____

Firing Supervisor _____

1. **Personnel Briefing**

   - ☐ Objectives
   - ☐ Conditions (fire environment)
   - ☐ Resource assignments identified
     - ☐ Firing personnel
     - ☐ Holding forces
     - ☐ Lookouts
   - ☐ Ignition plan/sequence
   - ☐ Communication Plan
   - ☐ Contingency Plan
   - ☐ Safety issues

2. **Go / No-Go**

   - ☐ All personnel briefed
   - ☐ Weather forecast reviewed
   - ☐ Resources in place
   - ☐ Lookouts posted as needed
   - ☐ Anchor and termination firing points identified
   - ☐ Communications systems in place
   - ☐ Fire behavior forecast reviewed
   - ☐ Escape routes and safety zones established and made known
   - ☐ Adjoining forces/Air Attack notified

3. **Approval Prior To Firing**

   - ☐ Division Supervisor
   - ☐ Branch Director
   - ☐ Operations

4. **Other Notifications**

   - ☐ Other: _____
   - ☐ Other: _____

Attach Firing Operations Checklist to ICS-214

Rev 2.8.2011

STRUCTURE DEFENSE TACTICAL ACTIONS

CHECK AND GO
"Check and Go" is a rapid evaluation to check for occupants requiring removal or rescue.
Structure Triage Category – Threatened Non-Defensible

PREP AND GO
"Prep and Go" implies that some preparation of the structure may be safely completed prior to resources leaving the area. Structure Triage Category – Threatened Non-Defensible

PREP AND DEFEND
"Prep and Defend" is a tactic used when a Safety Zone and TRA are present and adequate time exists to safely prepare a structure for defense prior to the arrival of the fire front.
Structure Triage Category – Threatened Defensible

FIRE FRONT FOLLOWING
"Fire Front Following" is a follow up tactic employed when Check and Go, Prep and Go, or Bump and Run tactics are initially used. A tactic used to come in behind the fire front.

BUMP AND RUN
"Bump and Run" is a tactic where resources typically move ahead of the fire front in the spotting zone to extinguish spot fires and hot spots, and to defend as many structures as possible.

ANCHOR AND HOLD
"Anchor and Hold" is a tactic utilizing control lines and large water streams from fixed water supplies in an attempt to stop fire spread. The goal is to extinguish structure fires, protect exposures, and reduce ember production.

TACTICAL PATROL
"Tactical Patrol" is a tactic where the key element is mobility and continuous monitoring of an assigned area.

LEVELS OF ENGAGEMENT

PACE

Implement PACE. prior to engaging in any structure protection action.

P - Primary Plan [Offense]
Is focused on fire fighter safety and mission objectives

A - Alternate Plan [Offense]
A fall back plan that closely supports the Primary Plan

C - Contingency Plan [Defense]
Focused on the firefighter's safety, move to a safety zone or temporary refuge area

E - Emergency Plan [Defense]
Firefighter survival, deployment zones, fire shelters

ALWAYS HAVE A DEPLOYMENT SITE IDENTIFIED!

DRAW-D

D - Defend – Holding actions, protecting priority areas, protect the structures, hold and improve the line

R - Reinforce – Bring more resources to bear, add resources necessary to *advance* or *defend*

A - Advance – Anchor and Flank, Direct or Indirect Attack, Active burnout operations

W - Withdraw – Cease current activities until conditions modify, Abandon an established position or constructed line in response to an increase in fire intensity, Not a stigma, but a decision to move away from a threat

D - Delay – Wait until the situation has modified sufficiently to allow a different level of engagement, Waiting for conditions to meet pre-identified triggers necessary to *advance* or *defend,* not a lack of effort, but a conscious decision to maximize long term effectiveness

TRAINING SPECIALIST MESSAGE

All Mendocino Complex Incident Trainees
Beat the Rush!!!

In order to receive documented credit for your training assignment you must register with the incident Training Specialist.

The Training Specialist is available immediately following the morning Briefing.
Location: Next to Plans.

In order to receive documented credit for your training assignment – you must close out with the Training Specialist before you Demob!!

Bring the following to the "exit interview"

- ***A completed and signed ICS 225 Performance Evaluation***
- ***A completed Evaluator's Recommendation***

Forms are available at the Training Office

Remember: No documentation – it didn't happen!

Claudia Soiza - 949.632.7813

Dottie Shaw – 619.971.1701

MENDOCINO COMPLEX CA-MEU 008674
Incident Trainee/Trainer Data Form

Training Specialists: Claudia Soiza 949.632.7813 – Dottie Shaw (t) 619.971.1701

- All Incident trainees, including those on Firefighting Modules at your earliest opportunity complete this form and see the Training Specialist.
- Prior to or as you process through DEMOB, remember to close your training package. To close your training package bring: 1) A performance rating from your trainer. (ICS 225)
  2) Your task book that has as many entries as possible by your Trainer.

Trainee Data

Trainee Name: _____ ICS Trainee Position: _____

Request # (A,C,E, or O):_____ Agency Designator (MACS ID Ex. CA-ANF):_____

Ordered as Trainee? Y N _____ Regional Priority Trainee _____ Local Forest Trainee ____ IMT Trainee

Date Assigned: _____ Cell / Contact # While on Incident: _____

Training Records Mailed To: (Fire Chief, Training Officer):

Name: _____ Title_____

Name of Agency/Unit: _____

Agency/Unit Address: _____

City: _____ State: _____ Zip Code: _____ Phone: _____

Trainee Prerequisites

1. Possesses valid Red Card or agency certification card? ___Yes ___No

2. Trainee has current position task book issued by home unit? ___Yes ___No

Current Task Book Progress (Circle) 0% 25% 50% 75% 90%

Priority Open Task in PTB (What do you need to accomplish on this incident?)

Trainer/Evaluator Data

Trainer / Evaluator Name: _____ ICS position on fire: _____

MENDOCINO COMPLEX IAP INSERT

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

Think before you post:

- On official time, do official duties; if using government equipment, do government business.
- Don't use your official position/title for private gain.
- Do share government information that is publically available (such as links to Inciweb, weather reports, feature stories, official evacuation notices etc...) Do not disclose (via any medium) non-public information to further private interests or the private interests of others.
- Do not share information outside official channels that could be associated with a crime or a claim, (for instance do not post on social media about serious accidents, deaths or destroyed property).
- Do not accept compensation for statements made over social media that relate to official duties.
- Never use your official title while engaging in "political activity" (activity directed toward the success or failure of a political party, partisan candidate or partisan political group).
- Federal employees may express their opinions concerning partisan political candidates and political parties on social media when they are off duty and away from the federal workplace.
- If you have questions about content you'd like to post on social media, contact a PIO, they can help you.

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

For approval to post Photo and Video you have taken of the fire, please send to the PIO's incident email at:
MendoComplex2018@gmail.com

LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Public Information Trailer in Base Camp.

MAIL SERVICE

The Information staff will assist you in receiving letters and packages. Mailing address for Mendocino Complex Fire personnel to have mail sent to:
