## INCIDENT ACTION PLAN

### OPERATIONAL PERIOD

8/4/2018 0700

to

8/5/2018 0700

0001 (C) 81-4-8

\*CORRECTED\*

## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> Mendocino Complex	<b>2. Operational Period:</b>	Date From: 8/4/2018 Time From: 0700	Date To: 8/5/2018 Time To: 0700
---	-------------------------------	--	------------------------------------

**3. Objective(s):**

Management Objectives

- Provide for emergency personnel and public safety at all times.
- Protect property, improvements, and infrastructure.
- Ensure repopulation takes place in a quick, efficient, and effective manner.
- Ensure coordinated, timely and accurate release of public information.
- Foster and maintain relationships with all cooperators and stakeholders.
- Protect economic, natural, cultural and heritage resources.
- Maintain fiscal accountability and keep costs commensurate with values at risk.

Control Objectives

Ranch Objectives:

- Keep the fire North of Hwy 20
- Keep the fire South of the Snow Mountain Wilderness Area
- Keep the fire East of Potter Valley
- Keep the fire West of Leesville Lodoga Rd

River Objectives:

- Keep the fire North of Pine Mountain Road
- Keep the fire South of Blue Lake Road
- Keep the fire East of Old River Road
- Keep the fire West of Hwy 29

**General Situational Awareness:**

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

**5. Site Safety Plan Required?** Yes  No

**Approved Site Safety Plan(s) Located at:**

**6. Incident Action Plan**

## INCIDENT Weather Forecast

**FORECAST NO:** 6

**NAME OF FIRE:** Mendocino Complex

**PREDICTION FOR:** Saturday/Sat night SHIFT

**UNIT:** Mendocino

**SHIFT DATE:** 8/4-8/5

**SIGNED:** Mike Smith *Mike Smith*

**TIME AND DATE**

**Incident Meteorologist**

**FORECAST ISSUED:** 2000 August 3, 2018

**...Warm, Dry and Breezy conditions continuing....NWS Red Flag Warning Today...**

**WEATHER DISCUSSION:** A weak weather system will be passing to the north of the fire area today. This will bring some increase in ridge winds but also noticeably cooler temperatures and higher humidity. Dry air from aloft could surface to the ridges during the early morning hours again this morning so some ridgetops could start out the day with very poor humidity recovery. Stability over the fire should remain about neutral to slightly stable so Pyro cumulus clouds, strong indrafts and collapsing columns with downdrafts and erratic winds will still be possible. Sunday will see slightly warmer temperatures and lower RH values during the day but will also likely see a small decrease in winds and slightly more stable conditions as well as a little better morning RH recovery. The southwest U.S upper level high pressure system will rebuild during the first half of next week bringing a warming trend Monday through mid week. with conditions expected to return to those similar to the first week of this fire.

### **WEATHER FORECAST:**

**WEATHER:** Fair skies but smoky.

**TEMPERATURES:** Highs above 1500 feet...78-85. Morning mins 63-67.  
Highs below 1500 feet...86-90. Morning mins 50-55.

**HUMIDITY:** Minimum RH above 1500 feet 21-26%. After Max recovery of 40-50% evening hours dropping to around 25-35% by the early morning hours.  
Minimum RH below 1500 feet 19-25% After Max recovery of 70-80%

#### **20 FT WINDS:**

**RIDGETOP** - Northwest 10-15 gusts to 22-28 mph. **\*\* Erratic winds possible**  
**Under large columns. \*\***

**SLOPE/VALLEY** - Light and variable in the morning becoming southwest to northwest after about 1300 5-12 mph gusts to 18 mph upper slopes.

**STABILITY/INVERSION:** Inversions holding through about 1200. Neutral stability aloft in the afternoon.

**OUTLOOK FOR SATURDAY NIGHT:** Fair skies except for smoky in vicinity of fire. Min temperatures around 50 lower elevations to 66 ridges. Max RH recovery 75 to 85% lower elevations to 45-55% ridges during the evening. Highest RH before midnight then decreasing into the 30-40% range through the morning hours. Ridge winds northwest 9-15 mph with occasional gusts 20 to 25 mph. Winds strongest in the evening hours. Slope winds southwest to northwest 5-12 mph gusts to 18 mph through about 2200 then becoming downslope to downcanyon to 5 mph.

**OUTLOOK FOR SUNDAY:** Fair skies except smoky in vicinity of fires. Max temps 81 ridges to 93 lower elevations. Min RH 19-24%. Ridge winds west to northwest 8-12 mph with gusts to 15-20 mph. Slope winds becoming southwest to northwest after about 1300 6-10 mph gusts to 15 mph.

**EXTENDED FORECAST FOR MONDAY:** Fair skies.. Warmer and slightly drier. Continued Breezy West to Northwest winds.

# FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 007	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Mendocino Complex	<b>OPERATIONAL PERIOD:</b> 08/04/18 0700-0700
<b>DATE ISSUED:</b> 08/03/18	<b>TIME ISSUED:</b> 19:00
<b>UNIT:</b> CA-MEU-008674	<b>SIGNED:</b> <i>Todd Hopkins</i> <b>Typed/printed:</b> Todd Hopkins (FBAN)

## INPUTS

**WEATHER SUMMARY:** See attached weather summary in the Fire Weather Forecast

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

The fire is burning in a mixture of grass, brush, oak woodlands and scattered pine stands. The grass component is fully cured, with a moderate to heavy fuel loading. The fire spread is being driven by the critical fuel moistures, high temperatures, humidity in the teens, and high mid-afternoon winds. These combinations are leading to erratic fire behavior with long range spotting. Fire activity will remain active into the late evening with evening winds and poor humidity recovery. Even with the higher forecasted humidity, fire activity will remain active with long range spotting with fuel moistures still being at critical levels.

**Probability of Ignition:** 80%      **FDFM:** 4%      **ERC:** 77 (Above 97<sup>th</sup> Percentile)  
**100 HRFM:** 7% (At 97<sup>th</sup> Percentile)      **BI:** 74 (Above 97<sup>th</sup> Percentile)      **1000 HRFM:** 8% (Above 97<sup>th</sup> Percentile)

**SPECIFIC:**      **\*\*\*Fuel Types are similar for all Branches\*\*\***

Fuel Type	Rate of Spread (ft/min)		Flame Length (in feet)		Spotting Distance (mi)
Grass	Head	128-297	Head	8-21	From Trees: .3 - .5 From Wind: .3 - 1
	Flank	7-16	Flank	2-5	
	Backing	3-9	Backing	1-4	
Brush	Head	112-259	Head	22-35	From Trees: .3 - .5 From Wind: .4 - 1.3
	Flank	6-14	Flank	4-8	
	Backing	3-7	Backing	4-6	
Timber Understory	Head	20-25	Head	9-12	From Trees: .3 - .5 From Wind: .3 - .4
	Flank	1-2	Flank	2-3	
	Backing	>1-1	Backing	1-2	

**\*\*\*WIND SPEEDS TODAY WILL PRESENT THE POSSIBILITY OF ACTIVE CROWN FIRE RUNS\*\*\***

**CROWN FIRE: Winds < 24 mph: Transition to Crown: YES, Type of Fire Behavior: TORCHING**

**Winds > 24 mph: Transition to Crown: YES, Type of Fire Behavior: ACTIVE CROWN FIRE**

**\*\*\*EXPECT SPOT FIRES WHEN PROBABILITY OF IGNITION IS GREATER THAN 60%\*\*\***

#### AIR OPERATIONS:

Smoke may make it difficult to see resources working on Divisions.  
 Sunrise: 0616    Sunset: 2022

### SAFETY

- EXPECT SPOTTING!!! Smoke columns will cap out and then collapse producing erratic winds and spot fires in all directions!!!
- POST LOOKOUTS!!! Don't become complacent! Identify your safety zones and escape routes.

# Fuels and Fire Behavior Advisory Northwestern California

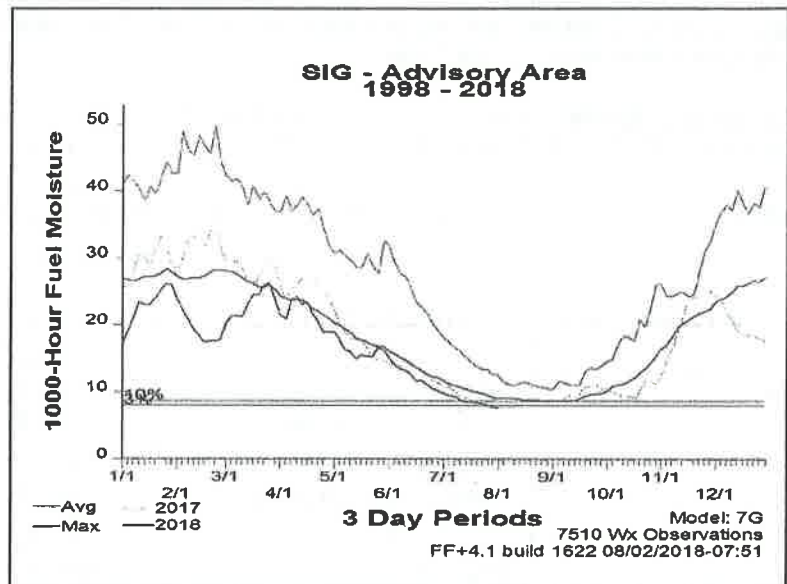

August 3, 2018 – August 17, 2018

**Subject:** Potential for extreme fire behavior and rapid fire spread due to low live and dead fuel moistures and elevated fire danger rating values across much of the northwestern California Predictive Services Areas (PSA).

**Discussion:** A drier than normal rainy season has led to drier than normal fuels and soils across the North Ops region. Wet spring weather was also ideally timed to produce a heavier than normal fine fuel crop at mid and lower elevations and a near to slightly above normal green-up phase among perennial live fuels. Perennial live fuels are also now on their annual drying trend. Now that these fuels are readily available, extreme fire behavior can be expected from continuous fuels independent of topography or wind influences.

## Difference from normal conditions:

The fine fuel crop in the foothills of the eastern Sacramento Valley had reached more than 180% of normal, higher than the 120% reading last year. North Ops' western PSA's 1000-hr fuel moisture charts show heavier fuels are drier than normal and at or below 10th percentile values. In some instances, they are setting new record minimum values. Extreme fire behavior and rapid fire spread have been observed at elevations below 7000 ft. and these conditions will spread to even higher elevations during August.

## Concerns to Firefighters and the Public:

- Any time the fire establishes itself in a continuous fuel bed, large fire growth is highly likely and containment measures may be ineffective.
- Large fire growth and intensity should be expected with any new or on going fires, particularly under critical fire weather conditions. This includes all areas of fire perimeters, even the normally less active flanks and heel.
- Energy Release Component (ERC) values at numerous weather stations have been running well above average. Some are above the 90<sup>th</sup> percentile or setting new record highs. Ignition potential remains very high, and new or spot fires can rapidly grow and outpace suppression efforts.
- Neither previous-year fire scars nor fuel transitions are acting as typically effective fire spread barriers.

## Mitigation Measures:

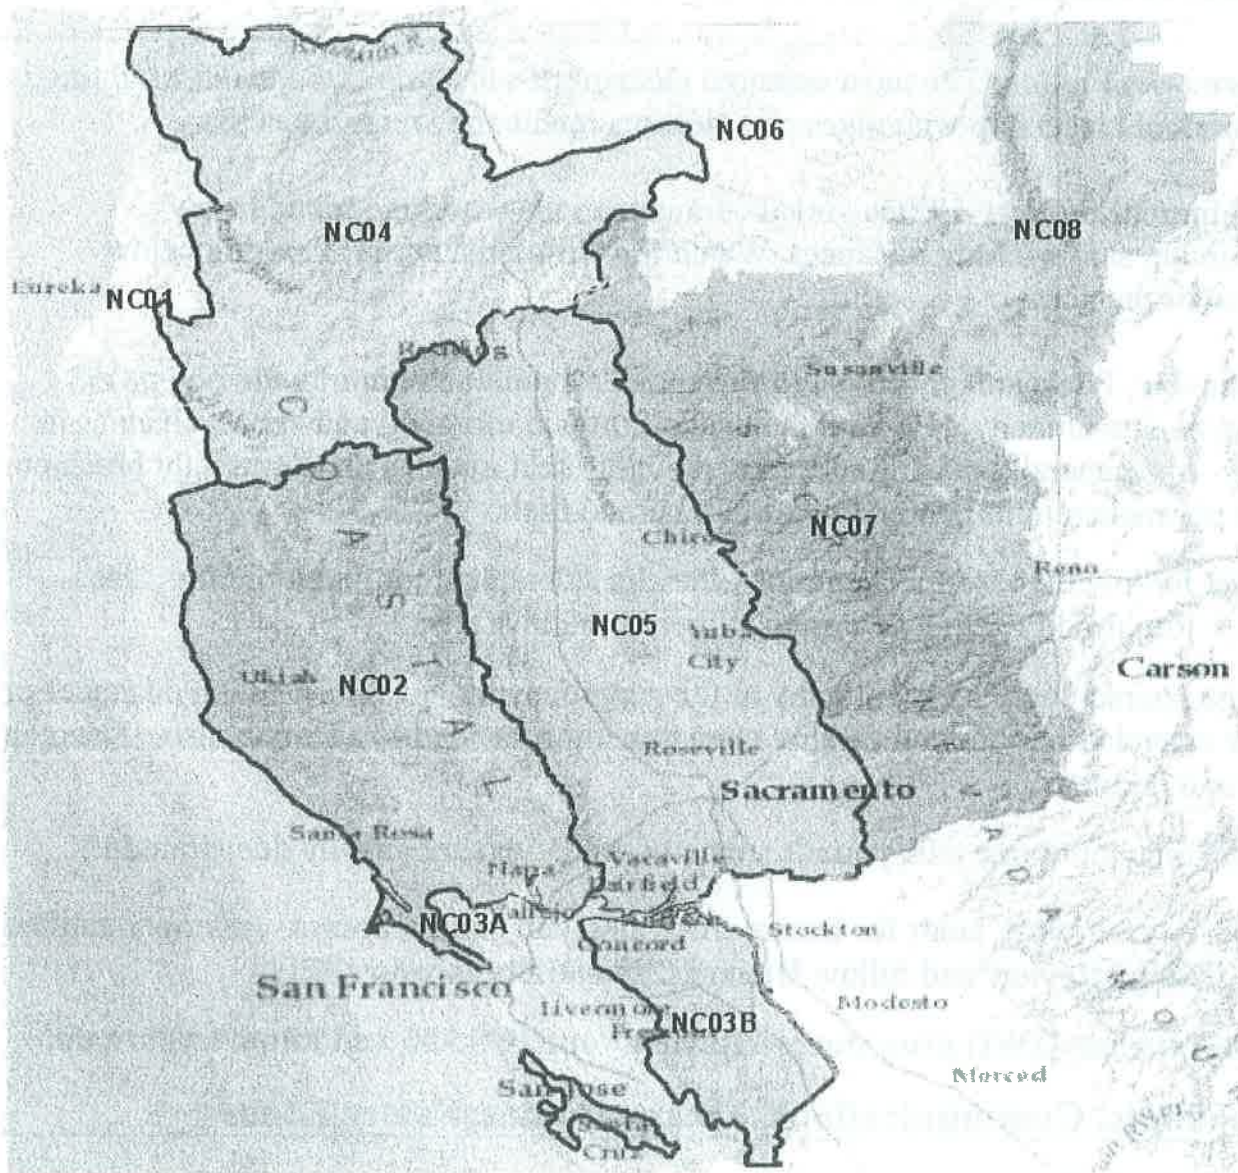

- Brief all incoming resources about these conditions, especially out-of-area resources unfamiliar with local conditions.
- Modify tactics to account for potential high rates of spread and high resistance to control.
- Ensure firefighters have LCES for both direct and indirect tactics, and evaluate hourly.
- Assume that fire growth and behavior may exceed anything previously experienced.

**Area of Concern:** Diablo-Santa Cruz Mountains north through Mid-Coast to Mendocino and Northwest Mountains and east through the Sacramento Valley and Foothills PSA's

# Fuels and Fire Behavior Advisory Northwestern California August 3, 2018 – August 17, 2018

Issued By: ONCC Predictive Services

Nationally additional Fuels and Fire Behavior Advisories can be found at the following website:  
[Fuels and Fire Behavior Advisories](#)

**MENDOCINO HEALTH AND SAFETY MESSAGE**

**INCIDENT:** Mendocino Complex CA-MEU-008674 | **DATE:** August 4, 2018 | **TIME:** 0700-0700

**Major Hazards and Risks: Extreme Fire Behavior, Fatigue, Heavy Equipment.**

**Know who you are working for:** The most essential element of successful wildland firefighting is competent and confident leadership who gives clear leaders intent and work objectives.

**Dozer/Heavy Equipment Safety:** Utilize good communications working around heavy equipment and maintain safe working distances. Watch for rolling material if working below equipment. Stay out of the dust.

**Extreme Fire Behavior:** Fuels are receptive to fire spread. A small amount of wind on this dry fuel changes the game dramatically!! Be alert to changes in wind direction and expect changes in fire behavior. Flare-ups generally occur in deceptively light fuels, such as grass and light brush or islands within fire perimeters of unburned or partially burned fuels.

**Firing Operations:** Follow the Firing Operations Checklist. Conduct thorough briefing. Use qualified personnel. Required PPE to be worn by all personnel involved.

**Personnel:** Manage yourself and those around you for fatigue; many have driven long distances or been deployed for extended periods. As fatigue increases, injuries tend to increase also. Keep an eye on your crew and partner.

**Hydration:** By the time your body tells you it's time to drink – you are already dehydrated!!!

**Hazard trees:** Survey your work areas for hazard trees, flag and restrict access, use only qualified personnel for tree felling. Review and follow **Hazard Tree Safety** in your IRPG.

**Incident within Incident (IWI) procedures - Review your ICS 206 and know what to do.**

**Lookouts, Communications, Escape Routes, Safety Zones**

**Tailgate Safety**

- **Accountability:** everyone checks in and everyone checks out. Supervisors know where their crews are at all times.
- **Communication:** everyone knows the com-plan.
- **Briefing:** everyone knows the game plan, everyone knows the contingency plan.
- **Safety gear:** everyone has the appropriate safety gear and in good working condition.
- **LCES:** they are clear and made known to everyone.

**Heat / Fatigue / Dehydration**

- Be alert for signs of fatigue, take breaks as necessary.
- Drink water frequently, up to 1.5 gal. per shift.
- Monitor firefighters. Ensure that work /rest cycles are being followed.
- Be alert for signs of heat stress; use the buddy system.
- Eat small meals often and when possible.
- Drink electrolyte drinks at a 3 water to 1 sport drink ratio.

## MENDOCINO COMPLEX RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	<b>EXTREME FIRE BEHAVIOR</b>	Know your LCES and maintain Situational Awareness. Use experienced Look Outs. Adhere to the downhill line construction guidelines. Monitor weather for changes in the wind, temp, and RH. Expect rapid rates of spread with spotting, have a contingency plan with established decision points and safety zones.
ALL	<b>FATIGUE/HEAT/DEHYDRATION</b>	Be alert for signs of fatigue and take breaks as necessary. Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1.5 gal. per shift. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible. Drink electrolyte drinks at a 3 water to 1 electrolyte drink ratio.
ALL	<b>DIRECT and INDIRECT LINE CONSTRUCTION</b>	Conduct thorough briefing for all personnel (inside rear cover IRPG). Ensure LCES in place prior to engagement. Establish adequate safety zones. Use Downhill Line Checklist. Follow "Look Up, Look Down, Look Around" procedures. Construct line from a safe anchor point, use caution when there is unburned fuel between you and the fire. If you cannot see the main fire, then stay in contact with someone who can. Utilize Risk Management Process, reference the IRPG.
ALL	<b>STEEP TERRAIN / ROLLING DEBRIS</b>	Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.
ALL	<b>HAZARD TREES</b>	Identify and isolate the area to provide for the safety of others. Flag and make proper notifications. Do not fall trees out of your certification level.
ALL	<b>FIRING OPERATIONS</b>	Follow the Firing Operation Checklist. Assure that lookouts are posted, communications are established with both firing and holding teams, escape routes and safety zones are established and not compromised by the firing operations. Also, it has been approved and relayed to all adjoining forces.
ALL	<b>DRIVING HAZARDS</b>	<b>Slow Down!</b> Drive defensively! Expect the unexpected around every curve. Drive with headlights and seatbelts on. Narrow roads with limited passing room. Coordinate your movements on one-lane roads. Use warning devices when operating near traffic.
ALL	<b>AIRCRAFT OPERATIONS</b>	Monitor air-to-ground frequency, they are your eyes in the sky. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Only utilize aircraft to insert personnel on the line when necessary.
ALL	<b>HEAVY EQUIPMENT</b>	Watch for rolling material and avoid working below heavy equipment. Monitor safe working distances. Avoid working below heavy equipment. Utilize communication with the operator (radio or hand signals). Stay out of the dust.
ALL	<b>POWER LINES</b>	Follow <b>Power Line Safety</b> guidelines in the IRPG. Extinguish all power poles that are on fire before the fall. Communicate power line hazards to supervisor and hazard flag accordingly. Flag area around downed power lines and deny access. Treat all downed power lines as energized.
ALL	<b>PERFORM TAIL GATE SAFETY MEETINGS</b>	Everyone should be briefed on the conditions/circumstances regarding the fire and their assignments per the IRPG. Ensure all personnel have PPE, food, and water.
BR 3	<b>MERCURY MINES</b>	Be aware of abandoned mercury mines on the East side of Walker Ridge.

**8. MEDICAL EMERGENCY PROCEDURES**

**EMERGENCY FREQUENCY:**

**"LINE EMERGENCY"**

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  1. Closest EMS resource
  2. Communications Unit
- Communications Unit contacts:
  1. Ground or Air ambulance as requested
  2. Operations
  3. Safety
  4. Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

**CAMP EMERGENCY:**

Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
 

1. Communications	4. Operations
2. Safety	5. Crew Supervisor
3. Logistics	6. Comps/Claims

**INJURY REPORTING PROCEDURES**

CHIEF COMPLAINT \_\_\_\_\_  
 LOCATION OF PATIENT \_\_\_\_\_  
 POINT OF CONTACT \_\_\_\_\_  
 TRANSPORTATION REQUESTED BY: AIR \_\_\_ GROUND \_\_\_  
 POINT OF PICKUP \_\_\_\_\_  
 LAT \_\_\_\_\_ LONG \_\_\_\_\_  
 PATIENT UNIT ID \_\_\_\_\_  
 IS AN EMT/P WITH PATIENT: YES \_\_\_ NO \_\_\_  
 AGE \_\_\_\_\_  
 SEX: MALE \_\_\_ FEMALE \_\_\_

**ALL EMERGENCIES---Secure the area and identify witnesses for later investigation.**

**Keep an accurate log of events.**

**\*\*IN CAMP EMERGENCY\*\***

# FIRING OPERATION CHECKLIST

Location: \_\_\_\_\_

Date: \_\_\_\_\_ Time: \_\_\_\_\_

Firing Supervisor \_\_\_\_\_

## 1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
  - Firing personnel
  - Holding forces
  - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

## 2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

## 3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

## 4. Other Notifications

- Other: \_\_\_\_\_
- Other: \_\_\_\_\_

Attach Firing Operations Checklist to ICS-214

# CAL FIRE WUI Guidelines

## STRUCTURE DEFENSE TACTICAL ACTIONS

### **CHECK AND GO**

"Check and Go" is a rapid evaluation to check for occupants requiring removal or rescue.  
Structure Triage Category – Threatened Non-Defensible

### **PREP AND GO**

"Prep and Go" implies that some preparation of the structure may be safely completed prior to resources leaving the area. Structure Triage Category – Threatened Non-Defensible

### **PREP AND DEFEND**

"Prep and Defend" is a tactic used when a Safety Zone and TRA are present and adequate time exists to safely prepare a structure for defense prior to the arrival of the fire front.  
Structure Triage Category – Threatened Defensible

### **FIRE FRONT FOLLOWING**

"Fire Front Following" is a follow up tactic employed when Check and Go, Prep and Go, or Bump and Run tactics are initially used. A tactic used to come in behind the fire front.

### **BUMP AND RUN**

"Bump and Run" is a tactic where resources typically move ahead of the fire front in the spotting zone to extinguish spot fires and hot spots, and to defend as many structures as possible.

### **ANCHOR AND HOLD**

"Anchor and Hold" is a tactic utilizing control lines and large water streams from fixed water supplies in an attempt to stop fire spread. The goal is to extinguish structure fires, protect exposures, and reduce ember production.

### **TACTICAL PATROL**

"Tactical Patrol" is a tactic where the key element is mobility and continuous monitoring of an assigned area.

## LEVELS OF ENGAGEMENT

### **PACE**

Implement PACE. prior to engaging in any structure protection action.

#### **P - Primary Plan [Offense]**

Is focused on fire fighter safety and mission objectives

#### **A - Alternate Plan [Offense]**

A fall back plan that closely supports the Primary Plan

#### **C - Contingency Plan [Defense]**

Focused on the firefighter's safety, move to a safety zone or temporary refuge area

#### **E - Emergency Plan [Defense]**

Firefighter survival, deployment zones, fire shelters

### **ALWAYS HAVE A DEPLOYMENT SITE IDENTIFIED!**

### **DRAW-D**

**D - Defend** – Holding actions, protecting priority areas, protect the structures, hold and improve the line

**R - Reinforce** – Bring more resources to bear, add resources necessary to *advance* or *defend*

**A - Advance** – Anchor and Flank, Direct or Indirect Attack, Active burnout operations

**W - Withdraw** – Cease current activities until conditions modify, Abandon an established position or constructed line in response to an increase in fire intensity, Not a stigma, but a decision to move away from a threat

**D - Delay** – Wait until the situation has modified sufficiently to allow a different level of engagement, Waiting for conditions to meet pre-identified triggers necessary to *advance* or *defend*, not a lack of effort, but a conscious decision to maximize long term effectiveness

## Fire Suppression Repair – Mendocino Complex

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas caused by the fire. We cannot upgrade facilities beyond their pre-fire condition. Any projects too large or complicated to be completed by the Fire Suppression Repair Specialist shall be turned over to the Comp/Claims Unit or the local Unit.

### Infrastructure Damage

Fences and gates; culverts/ bridges/ other watercourse crossings; water sources, utility distribution lines; above or below ground; road barriers removed for fire access, trash, debris and supplies left by fire suppression activities; misc. damage to residential property

### Natural Resource Damage

Repair of existing problems caused by fire suppression activities (direct effect) to natural resources and to prevent likely future problems such as accelerated erosion caused by winter rains (indirect effect). The goal is to minimize:

- Soil erosion
- Adverse impacts to water quality
- Adverse impacts to protected species of plants and animals

Dozers constructed most of the fire perimeter and all of the contingency lines. Dozer line width ranges greatly. The following measures shall be implemented for constructed dozerline:

- Berms and push-piles shall be dispersed spread out to the extent feasible. This is may be accomplished by back-blading and /or using ripper shanks or grapples if present. Debris piled against trees or perched above watercourses are especially important to correct.
- Waterbreaks shall be installed at a spacing which corresponds to a moderate erosion hazard rating in the California Forest Practice Rules. Maximum spacing shall be as follows:

Prevailing Gradient	0-10%	11-25%	26-50%	>50%
Maximum Waterbreak Spacing	200 Feet	150 Feet	100 Feet	75 Feet

*NOTE: This waterbreak spacing information is a general guide for maximum spacing, actual location of waterbreaks should be tailored to the topography and placement should be suited to the best dispersal of water flow.*

- Waterbreaks shall be constructed at an approximately 45 degree angle and shall be a minimum depth of 10 inches from the bottom of the cut to the top of the berm. Where possible the discharge from the waterbreaks shall be directed into vegetated areas to minimize erosive forces.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with handtools.
- Roads used in fire suppression activities shall be left in at least as good a condition as they were found. Gravel and soil surface roads shall be watered to prevent excessive dust formation. Where suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable drainage dips shall be installed for drainage.
- Where suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.

### Cultural Resources Site Damage

Any disturbance to known or suspected archaeological/historical sites and artifacts must be reported to the Incident Archaeologist immediately. Intentional removal or disturbance to any artifact is not permissible.

## ***TRAINING SPECIALIST MESSAGE***

**All Mendocino Complex Incident Trainees  
Beat the Rush!!!**

**In order to receive documented credit for your  
training assignment you must register with the  
incident Training Specialist.**

**The Training Specialist is available immediately  
following the morning Briefing.  
Location: Next to Plans.**

**In order to receive documented credit for your training  
assignment – you must close out with the Training  
Specialist before you Demob!!**

**Bring the following to the “exit interview”**

- **A completed and signed ICS 225 Performance  
Evaluation**
- **A completed Evaluator’s Recommendation**

**Forms are available at the Training Office**

**Remember: No documentation – it didn’t  
happen!**

Claudia Soiza - 949.632.7813

Dottie Shaw – 619.971.1701

**MENDOCINO COMPLEX CA-MEU 008674**  
**Incident Trainee/Trainer Data Form**

Training Specialists: Claudia Soiza 949.632.7813 – Dottie Shaw (t) 619.971.1701

- All Incident trainees, including those on Firefighting Modules at your earliest opportunity complete this form and see the Training Specialist.
- Prior to or as you process through DEMOB, remember to close your training package. To close your training package bring: 1) A performance rating from your trainer. (ICS 225)  
2) Your task book that has as many entries as possible by your Trainer.

**Trainee Data**

Trainee Name: \_\_\_\_\_ ICS Trainee Position: \_\_\_\_\_

Request # (A,C,E, or O): \_\_\_\_\_ Agency Designator (MACS ID Ex. CA-ANF): \_\_\_\_\_

# MENDOCINO COMPLEX IAP INSERT

## MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

## CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

## FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

### **Think before you post:**

- On official time, do official duties; if using government equipment, do government business.
- Don't use your official position/title for private gain.
- Do share government information that is publically available (such as links to Inciweb, weather reports, feature stories, official evacuation notices etc...) Do not disclose (via any medium) non-public information to further private interests or the private interests of others.
- Do not share information outside official channels that could be associated with a crime or a claim, (for instance do not post on social media about serious accidents, deaths or destroyed property).
- Do not accept compensation for statements made over social media that relate to official duties.
- Never use your official title while engaging in "political activity" (activity directed toward the success or failure of a political party, partisan candidate or partisan political group).
- Federal employees may express their opinions concerning partisan political candidates and political parties on social media when they are off duty and away from the federal workplace.
- If you have questions about content you'd like to post on social media, contact a PIO, they can help you.

## PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

For approval to post Photo and Video you have taken of the fire, please send to the PIO's incident email at: [MendoComplex2018@gmail.com](mailto:MendoComplex2018@gmail.com)

## LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Public Information Trailer in Base Camp.

## MAIL SERVICE

The Information staff will assist you in receiving letters and packages. Mailing address for Mendocino Complex Fire personnel to have mail sent to:  
(Persons Name, O-Number)  
C/O Mendocino Complex Incident  
Ukiah CAL FIRE Station  
2690 N. State St.  
Ukiah, CA 93601
