

Mendocino Complex

CA-MEU-008674

INCIDENT ACTION PLAN

OPERATIONAL PERIOD

8/14/2018 0700

to

8/15/2018 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Mendocino Complex	2. Operational Period:	Date From: 8/14/2018 Time From: 0700	Date To: 8/15/2018 Time To: 0700
---	-------------------------------	---	-------------------------------------

3. Objective(s):

Management Objectives

- Provide for emergency personnel and public safety at all times.
- Protect property, improvements, and infrastructure.
- Ensure repopulation takes place in a quick, efficient, and effective manner.
- Ensure coordinated, timely and accurate release of public information.
- Foster and maintain relationships with all cooperators and stakeholders.
- Protect economic, natural, cultural and heritage resources.
- Maintain fiscal accountability and keep costs commensurate with values at risk.
- Implement and coordinate suppression repair needs.

Control Objectives

- | | |
|--|---|
| <p>Ranch Objectives:</p> <ul style="list-style-type: none"> -Keep the fire North of Hwy 20 -Keep the fire South of the Brushy Camp Ridge -Keep the fire East of Potter Valley -Keep the fire West of Leesville Lodoga Road | <p>River Objectives:</p> <ul style="list-style-type: none"> - Keep the fire within the established control lines |
|--|---|

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

5. Site Safety Plan Required? Yes No

Mendocino Complex Incident Weather Forecast

FORECAST NO: 16
 PREDICTION FOR: Tuesday Day / Night Shift
 SHIFT DATE: August 14, 2018
 FORECAST ISSUED: 1900 PDT August 13, 2018

NAME OF FIRE: Mendocino Complex
 UNIT: MEU
 Incident Meteorologist: Jeff Tonkin
Jeff Tonkin

WEATHER DISCUSSION: Continued persistent pattern with only subtle changes expected in temperature and relative humidity over the next 2 days...while humidity recoveries remain very poor along midslopes up to ridge-tops. The general west and southwest wind will continue as well...while terrain and slope winds may be more readily observed each afternoon and evening. Smoke movement also persistent moving westward during the morning hours followed by a shift back eastward by mid-day. Hot temperatures will return toward the weekend reaching triple digits along lower elevations.

WEATHER FORECAST TODAY (TUESDAY DAYTIME):

WEATHER: Smoky first half of the day...smoke moving west to east around 1300 hrs. Otherwise sunny.

	<u>(0 – 2500 FT / 0 - 762 M)</u>	<u>(2500FT - Ridge / 762 M - Ridge')</u>
MAX TEMPERATURES:	93 - 98 F / 34 – 37 C	86 – 91 F / 30 – 33 C
MIN HUMIDITY:	11 - 15%	14 – 19%.

WINDS (EYE LEVEL): **(1 MPH = 1.60 KPH)**

Valley Floor to Midslope: South and Southeast 3 to 6 mph until 1300 hrs then South and Southwest 4 to 8 mph afternoon gusts to 15 mph through sunset.

Midslope to Ridge: Northeast to Southeast 3 to 6 mph early...becoming South and southwest 5 to 10 mph with afternoon gusts from 15 to 20 mph through sunset.

LAL: 1 CWR: 0%

HAINES: 4 stable.

SMOKE TRANSPORT WIND: Southwest 15 mph.

WEATHER FORECAST TONIGHT (TUESDAY NIGHT):

WEATHER: Clear....But becoming smoky through sunrise.

MIN TEMPERATURES: Drainages...57 – 62 F / 14 – 17 C. Mid Slope to Ridge...61 – 65 F / 16 – 18 C

MAXIMUM HUMIDITY: Drainages...55 - 65%. Mid Slope to Ridge...25 – 35%

WINDS (EYE LEVEL): **(1 MPH = 1.60 KPH)**

Light east or downslope winds 2 to 5 mph with gusts up to 10 mph along ridgelines.

Extended Forecast Table: Temp/RH - Values Based on Midslope

	Wed Aug 15	Thu Aug 16	Fri Aug 17	Sat Aug 18
Highlights:	Sunny	Sunny	Warming Trend	Getting Hot
Sky / Wx	Partly Cloudy	Partly Cloudy	Sunny	Sunny
Wind: Lower to Mid Slope	S SW or Upslope 5 to 8 mph	W SW or Upslope 3 to 7 mph	W NW or Upslope 3 to 7 mph	W NW or Upslope 3 to 8 mph
Wind: Mid Slope to Ridge	W/SW or Upslope 8 Gust 15 mph	W/SW or Upslope 7 Gust 15 mph	W/NW or Upslope 7 Gust 15 mph	W/NW or Upslope 7 Gust 15 mph
Min Temp / Max RH	65 / 30%	67 / 30%	66 / 30%	65 / 30%
Max Temp / Min RH	95 / 15%	97 / 17%	99 / 19%	101 / 20%

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 017	TYPE OF FIRE: Wildfire
FIRE NAME: Mendocino Complex	OPERATIONAL PERIOD: 08/14/18 0700-0700
DATE ISSUED: 08/13/18	TIME ISSUED: 19:00
UNIT: CA-MEU-008674	SIGNED: <i>Todd Hopkins</i> Typed/printed: Todd Hopkins, FBAN

INPUTS

WEATHER SUMMARY: See attached weather summary in the Fire Weather Forecast

OUTPUTS

FIRE BEHAVIOR

GENERAL: **A Fuels and Fire Behavior Advisory has been issued for much of Northern California******

The fire is now burning through portions of grass, timber litter, brush patches and dense timber stands. Fuel moistures are still extremely low; however, fine dead fuel moistures being shaded by the dense timber stands are recovering to 10% or more, especially on east or north facing slopes. The fire growth continues to want to move towards the east, but with decreasing wind speeds, the fire will want to move in the direction of the slopes. This could lead to the fire wanting to move in a north/northeast direction.

SPECIFIC:

Fuel Type	Rate of Spread (feet per minute)			Flame Length (in feet)			Spotting Distance (miles)		Probability of Ignition (%)	
		Day	Night		Day	Night	Day	Night	Day	Night
Grass	Head	55-134	36-84	Head	6-15	4-10	Tree: .2-.4 Wind: .2-.4	Tree: .1-.2 Wind: .1-.2	70	35
	Flank	5-15	5-11	Flank	2-4	2-4				
	Backing	2-8	1-6	Backing	1-3	1-3				
Brush	Head	46-104	37-75	Head	14-23	12-19	Tree: .2-.3 Wind: .4-.5	Tree: .1-.2 Wind: .3-.4	70	35
	Flank	5-12	5-10	Flank	4-7	4-7				
	Backing	3-6	3-5	Backing	3-6	3-5				
Timber Understory	Head	13-15	9-10	Head	7-8	5-7	Tree: .2-.3 Wind: .2-.3	Tree: .1-.2 Wind: .1-.2	70	35
	Flank	2-3	1-2	Flank	2-4	2-3				
	Backing	>1-1	>1-1	Backing	1-2	1-2				

Fuel Type	Rate of Spread (meters/minute)			Flame Length (in meters)			Spotting Distance (kilometers)		Probability of Ignition (%)	
		Day	Night		Day	Night	Day	Night	Day	Night
Grass	Head	18-45	9-23	Head	2-5	1-3	Tree: .2-.4 Wind: .2-.6	Tree: .2-.3 Wind: .2-.4	70	35
	Flank	5-15	2-6	Flank	1-2	1-2				
	Backing	2-8	1-2	Backing	>1-1	>1-1				
Brush	Head	15-35	10-20	Head	4-7	3-5	Tree: .2-.4 Wind: .6-.9	Tree: .2-.3 Wind: .3-.6	70	35
	Flank	2-4	1-3	Flank	1-2	1-2				
	Backing	1-2	1-2	Backing	1-2	1-2				
Timber Understory	Head	3-4	2-3	Head	2-3	1-2	Tree: .3-.4 Wind: .2-.4	Tree: .1-.3 Wind: .1-.2	70	35
	Flank	1-2	>1-1	Flank	1-2	>1-1				
	Backing	>1-1	>1-1	Backing	1-2	>1-1				

Branch I & II:

Day: Fire behavior will continue to creep and back down slopes to drainages and then make slope reversal runs as it moves towards the north/northeast. Single tree torching will continue throughout the day into the early evening. Day time fine dead fuel moisture will be between 5%-6%. Rates of spreads will be greatest in the north/northeast drainages.

Night: Fire should remain active and want to continue to back down to drainages and then make runs up slope above 2000 feet in the thermal belt. Fire will be topography driven in the evenings. Fine dead fuel moisture is expected to be 10% or higher. Winds will be downslope/downcanyon after 2100.

Branch III & IV: No growth expected. Fire activity is expected to be minimal on the Branch.

AIR OPERATIONS: Terrain, fuels, smoke and an inversion may make it difficult to see resources working on Divisions.

SAFETY

Exceptionally dry fuels and high temperatures warrant a high degree of caution. Identify your safety zones and escape routes.

MENDOCINO HEALTH AND SAFETY MESSAGE

INCIDENT: Mendocino Complex CA-MEU-008674

DATE: August 14, 2018

TIME: 0700-0700

Incident within Incident (IWI) procedures - Review your ICS 206 and know what to do.

Line Construction: Construct line from a safe anchor point, use caution when there is unburned fuel between you and the fire. Conduct thorough briefing for all personnel. If you cannot see the main fire, then stay in contact with someone who can. Ensure LCES in place prior to engagement.

Firing Operations: Follow the Firing Operations Checklist. Conduct thorough briefing. Use qualified personnel. Required PPE to be worn by all personnel involved.

Fire Behavior: Fuels are receptive to fire spread. Be alert to changes in wind direction and expect changes in fire behavior. Flare-ups generally occur in deceptively light fuels, such as grass and light brush or islands within fire perimeters of unburned or partially burned fuels.

Dozer/Heavy Equipment Safety: Utilize good communications working around heavy equipment and maintain safe working distances. Watch for rolling material if working below equipment. Stay out of the dust.

Fatigue: Manage yourself and those around you for fatigue. As fatigue increases, injuries tend to increase also. Keep an eye on your crew and partner, the shift doesn't end until you have driven off the line back to camp safely. Be smart in your decision making.

Mop Up: Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Evaluate unburned islands, and consider re-burn potential.

Structure Defense: Use the Structure Triage Decision Process of S-FACTS. Ensure your survival, consider the fire environment before you commit, and evaluate access in and out of the area. Is clearance around and construction of buildings conducive for structure defense. Is there enough time before the fire arrives to prep structures, do you have a TRA or Safety Zone nearby?

Driving Hazards

- Drive defensively and slow down.
- Hwy 20 and most roads are open to the public.
- Increase following distances on dusty roads. Slow down when you meet opposing traffic.
- Narrow dirt roads with limited passing room. Coordinate your movements on one-lane roads.
- Maintain Situational Awareness. Follow traffic plan.
- Use warning devices when operating near traffic.

Fatigue

- Be alert for signs of fatigue and take breaks as necessary.
- Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1.5 gal. per shift.
- Be alert for signs of heat stress in yourself and others; use the buddy system.
- Eat small meals often and when possible. Drink electrolyte drinks at a 3 waters to 1 sport drink ratio.

MENDOCINO COMPLEX RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
RANCH	STRUCTURE DEFENSE	Triage all structures and ensure there is a Safety Zone or Temporary Refuge Area (TRA) close by before committing. Ensure your survival and consider the fire environment before you commit. There should be good clearance around the structure and construction of buildings conducive for structure defense. Maintain LCES and have trigger points established when to leave the area.
RANCH	DIRECT and INDIRECT LINE CONSTRUCTION	Conduct thorough briefing for all personnel (inside rear cover IRPG). Ensure LCES in place prior to engagement. Establish adequate safety zones. Use Downhill Line Checklist. Follow "Look Up, Look Down, Look Around" procedures. Construct line from a safe anchor point, use caution when there is unburned fuel between you and the fire. If you cannot see the main fire, then stay in contact with someone who can.
RANCH	FIRE BEHAVIOR	Know your LCES and maintain Situational Awareness. Use experienced Look Outs. Adhere to the downhill line construction guidelines. Monitor weather for changes in the wind, temp, and RH. Expect rapid rates of spread with spotting, have a contingency plan with established decision points and safety zones.
RANCH	FIRING OPERATIONS	Follow the Firing Operation Checklist. Assure that lookouts are posted, communications are established with both firing and holding teams, escape routes and safety zones are established and not compromised by the firing operations. Also, it has been approved and relayed to all adjoining forces.
ALL	HEAVY EQUIPMENT	Watch for rolling material and avoid working below heavy equipment. Monitor safe working distances. Avoid working below heavy equipment. Utilize communication with the operator (radio or hand signals). Stay out of the dust.
ALL	DRIVING HAZARDS	Slow Down! Drive defensively! Expect the unexpected around every curve. Drive with headlights and seatbelts on. Narrow roads with limited passing room. Coordinate your movements on one-lane roads. Use warning devices when operating near traffic. Be aware of your level of fatigue before driving.
ALL	FATIGUE/HEAT/DEHYDRATION	Be alert for signs of fatigue and take breaks as necessary. Drink water before, during and after shifts. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible.
ALL	STEEP TERRAIN / ROLLING DEBRIS	Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.
RANCH	AIRCRAFT OPERATIONS	Monitor air-to-ground frequency, they are your eyes in the sky. Use clear, concise statements when directing aircraft. Only utilize aircraft to insert personnel on the line when necessary.
RIVER	FIRE SUPPRESSION REPAIR	Maintain accountability of personnel at all times. See HEAVY EQUIPMENT above and COMPLACENCY below.
ALL	COMPLACENCY	Having the same assignment on the same ground day after day can lead to complacency and make us more vulnerable to accidents. Maintain your situational awareness through to the end of your assignment.
ALL	HAZARD TREES	Identify and isolate the area to provide for the safety of others. Flag and make proper notifications. Do not fall trees out of your certification level.
RANCH	POWER LINES	Follow <i>Power Line Safety</i> guidelines in the IRPG. Extinguish all power poles that are on fire before the fall. Flag area around downed power lines and deny access. Treat all downed power lines as energized.
ALL	PERFORM TAIL GATE SAFETY MEETINGS	Everyone should be briefed on the conditions/circumstances regarding the fire and their assignments per the IRPG. Ensure all personnel have PPE, food, and water.
ALL	HUNTING SEASON	Hunting season opens today. Both BLM and National Forest areas are closed. Hunting is still permitted on private property. Brief all personnel.
BR 3	MERCURY MINES	Be aware of abandoned mercury mines on the East side of Walker Ridge.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY:
"LINE EMERGENCY"

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 1. Closest EMS resource
 2. Communications Unit
- Communications Unit contacts:
 1. Ground or Air ambulance as requested
 2. Operations
 3. Safety
 4. Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

CAMP EMERGENCY:

Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:

1. Communications	4. Operations
2. Safety	5. Crew Supervisor
3. Logistics	6. Comps/Claims

INJURY REPORTING PROCEDURES

CHIEF COMPLAINT _____
 LOCATION OF PATIENT _____
 POINT OF CONTACT _____
 TRANSPORTATION REQUESTED BY: AIR ___ GROUND ___
 POINT OF PICKUP _____
 LAT _____ LONG _____
 PATIENT UNIT ID _____
 IS AN EMT/P WITH PATIENT: YES ___ NO ___
 AGE _____ SEX: MALE ___ FEMALE ___

**ALL EMERGENCIES---Secure the area
and identify witnesses for later investigation.**

Keep an accurate log of events.

Medical Incident Report

"NON-EMERGENCY INCIDENT" WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

"MEDICAL EMERGENCY" IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening Injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 118

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training.
Be Alert. Keep Calm. Think Clearly. Act Decisively.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications

- Other: _____
- Other: _____

Attach Firing Operations Checklist to ICS-214

CAL FIRE WUI Guidelines

STRUCTURE DEFENSE TACTICAL ACTIONS

CHECK AND GO

"Check and Go" is a rapid evaluation to check for occupants requiring removal or rescue.
Structure Triage Category – Threatened Non-Defensible

PREP AND GO

"Prep and Go" implies that some preparation of the structure may be safely completed prior to resources leaving the area. Structure Triage Category – Threatened Non-Defensible

PREP AND DEFEND

"Prep and Defend" is a tactic used when a Safety Zone and TRA are present and adequate time exists to safely prepare a structure for defense prior to the arrival of the fire front.
Structure Triage Category – Threatened Defensible

FIRE FRONT FOLLOWING

"Fire Front Following" is a follow up tactic employed when Check and Go, Prep and Go, or Bump and Run tactics are initially used. A tactic used to come in behind the fire front.

BUMP AND RUN

"Bump and Run" is a tactic where resources typically move ahead of the fire front in the spotting zone to extinguish spot fires and hot spots, and to defend as many structures as possible.

ANCHOR AND HOLD

"Anchor and Hold" is a tactic utilizing control lines and large water streams from fixed water supplies in an attempt to stop fire spread. The goal is to extinguish structure fires, protect exposures, and reduce ember production.

TACTICAL PATROL

"Tactical Patrol" is a tactic where the key element is mobility and continuous monitoring of an assigned area.

LEVELS OF ENGAGEMENT

PACE

Implement PACE. prior to engaging in any structure protection action.

P - Primary Plan [Offense]

Is focused on fire fighter safety and mission objectives

A - Alternate Plan [Offense]

A fall back plan that closely supports the Primary Plan

C - Contingency Plan [Defense]

Focused on the firefighter's safety, move to a safety zone or temporary refuge area

E - Emergency Plan [Defense]

Firefighter survival, deployment zones, fire shelters

ALWAYS HAVE A DEPLOYMENT SITE IDENTIFIED!

DRAW-D

D - Defend – Holding actions, protecting priority areas, protect the structures, hold and improve the line

R - Reinforce – Bring more resources to bear, add resources necessary to *advance* or *defend*

A - Advance – Anchor and Flank, Direct or Indirect Attack, Active burnout operations

W - Withdraw – Cease current activities until conditions modify, Abandon an established position or constructed line in response to an increase in fire intensity, Not a stigma, but a decision to move away from a threat

D - Delay – Wait until the situation has modified sufficiently to allow a different level of engagement, Waiting for conditions to meet pre-identified triggers necessary to *advance* or *defend*, not a lack of effort, but a conscious decision to maximize long term effectiveness

Fire Suppression Repair – Mendocino Complex

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas caused by the fire. We cannot upgrade facilities beyond their pre-fire condition. Any projects too large or complicated to be completed by the Fire Suppression Repair Specialist shall be turned over to the Comp/Claims Unit or the local Unit.

Infrastructure Damage

Fences and gates; culverts/ bridges/ other watercourse crossings; water sources, utility distribution lines; above or below ground; road barriers removed for fire access, trash, debris and supplies left by fire suppression activities; misc. damage to residential property

Natural Resource Damage

Repair of existing problems caused by fire suppression activities (direct effect) to natural resources and to prevent likely future problems such as accelerated erosion caused by winter rains (indirect effect). The goal is to minimize:

- Soil erosion
- Adverse impacts to water quality
- Adverse impacts to protected species of plants and animals

Dozers constructed most of the fire perimeter and all of the contingency lines. Dozer line width ranges greatly. The following measures shall be implemented for constructed dozerline:

- Berms and push-piles shall be dispersed spread out to the extent feasible. This is may be accomplished by back-blading and /or using ripper shanks or grapples if present. Debris piled against trees or perched above watercourses are especially important to correct.
- Waterbreaks shall be installed at a spacing which corresponds to a moderate erosion hazard rating in the California Forest Practice Rules. Maximum spacing shall be as follows:

Prevailing Gradient	0-10%	11-25%	26-50%	>50%
Maximum Waterbreak Spacing	200 Feet	150 Feet	100 Feet	75 Feet

NOTE: This waterbreak spacing information is a general guide for maximum spacing, actual location of waterbreaks should be tailored to the topography and placement should be suited to the best dispersal of water flow.

- Waterbreaks shall be constructed at an approximately 45 degree angle and shall be a minimum depth of 10 inches from the bottom of the cut to the top of the berm. Where possible the discharge from the waterbreaks shall be directed into vegetated areas to minimize erosive forces.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with handtools.
- Roads used in fire suppression activities shall be left in at least as good a condition as they were found. Gravel and soil surface roads shall be watered to prevent excessive dust formation. Where suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable drainage dips shall be installed for drainage.
- Where suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.

Cultural Resources Site Damage

Any disturbance to known or suspected archaeological/historical sites and artifacts must be reported to the Incident Archaeologist immediately. Intentional removal or disturbance to any artifact is not permissible.

**Mendocino Complex
Demobilization Plan
CA-MEU-008674**

Supervisory personnel are to identify resources excess to the needs of the incident at the earliest opportunity. If possible, this should be done within 36 hours in advance of a proposed release by filling out a General Message Form (ICS 213) or Declaration of Excess Resource Sheet. Please include name, request number, date, ETD, ETA, and if available for reassignment. By definition, surplus personnel are available for release if they have met the 2:1 work rest requirements, have rested for a minimum of 8 hours.

Section Chiefs will approve all excess resource lists and the lists will be forwarded to the Resources Unit for processing.

The release priorities are:

- Local Government
- OES
- Hired Equipment
- Cooperating Agencies
- Federal Resources/CAL FIRE Resources

The needs of the incident and off-incident issues may necessitate the modification of these priorities in certain cases.

Information concerning surplus resources will be forwarded to the expanded dispatch by the Demobilization Unit (with ECC Support Team at incident). This information will include the resource name, request number, ETD, and ETA. Additionally, the availability of the resource for a new assignment will be provided.

All government equipment and rental vehicles must be safety inspected prior to release. Safety inspections shall be coordinated with the Ground Support Unit Leader. All deficiencies will be corrected prior to departure for home unless agency head signs a waiver of inspection.

Surplus resources lists will be posted within the ICP and at the Demobilization Unit with a schedule for resources to pick up the checkout form (ICS-221) at the Demobilization Unit and begin the checkout process at the demobilization time given. Finance will be the final stop prior to returning to the Demobilization Unit. All resources must complete the demobilization process. Once the ICS-221 has been completed and returned in to the Demobilization Unit, the resource will be released from the incident to home, re-assigned to another incident, or held as directed by Northern Region Operations Center (North-Ops).

All Resources will meet any agency-specific and/or DMV rest requirements before demobilizing from the incident. The operator must be rested prior to driving. A resource encountering a delay enroute will contact the appropriate home unit or incident.

TRAINING SPECIALIST MESSAGE

**All Mendocino Complex Incident Trainees
Beat the Rush!!!**

In order to receive documented credit for your training assignment you must register with the incident Training Specialist.

**The Training Specialist is available immediately following the morning Briefing.
Location: Next to Plans.**

In order to receive documented credit for your training assignment – you must close out with the Training Specialist before you Demob!!

Bring the following to the “exit interview”

- **A completed and signed ICS 225 Performance Evaluation**
- **A completed Evaluator’s Recommendation**

Forms are available at the Training Office

Trainers / Mentors:

If you are leaving the incident before your assigned trainee, You **MUST** complete a Performance Evaluation, ICS-Form 225 for the period the trainee was assigned to you.

Claudia Soiza - 949.632.7813

Bob Rivelle - 707.498.1761

MENDOCINO COMPLEX INFORMATION

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

Think before you post:

- On official time, do official duties; if using government equipment, do government business.
- Don't use your official position/title for private gain.
- Do share government information that is publically available (such as links to Inciweb, weather reports, feature stories, official evacuation notices etc...) Do not disclose (via any medium) non-public information to further private interests or the private interests of others.
- Do not share information outside official channels that could be associated with a crime or a claim, (for instance do not post on social media about serious accidents, deaths or destroyed property).
- Do not accept compensation for statements made over social media that relate to official duties.
- Never use your official title while engaging in "political activity" (activity directed toward the success or failure of a political party, partisan candidate or partisan political group).
- Federal employees may express their opinions concerning partisan political candidates and political parties on social media when they are off duty and away from the federal workplace.
- If you have questions about content you'd like to post on social media, contact a PIO, they can help you.

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

For approval to post Photo and Video you have taken of the fire, please send to the PIO's incident email at:

MendoComplex2018@gmail.com

LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Public Information Trailer in Base Camp.

MAIL SERVICE

The Information staff will assist you in receiving letters and packages.

Abandoned Mercury Mines

- There are abandoned mercury mines located in Branch IV and X, in Divisions P, Q and RR.
- Access roads to the mines have been flagged off to restrict access to the sites.
- These areas are to be considered Life Safety Hazards for soil disturbance which may expose the underlying hazardous material.
- There are no Health or Inhalation Hazards if the identified are exposed to fire as the mines and material have been capped with soil.
- Restrict access around these areas for all personnel, vehicles, and equipment
- Avoid these areas for implementing control lines, staging areas, or drop points
