

Mendocino Complex

CA-MEU-008674

INCIDENT ACTION PLAN

OPERATIONAL PERIOD

8/19/2018 0700

to

8/20/2018 0700

FIRE CODE
PNLEQ18 (1502)

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Mendocino Complex	2. Operational Period:	Date From: 8/19/2018	Date To: 8/20/2018
		Time From: 0700	Time To: 0700

3. Objective(s):

Management Objectives

- Provide for emergency personnel and public safety at all times.
- Protect property, improvements, and infrastructure.
- Ensure repopulation takes place in a quick, efficient, and effective manner.
- Ensure coordinated, timely and accurate release of public information.
- Foster and maintain relationships with all cooperators and stakeholders.
- Protect economic, natural, cultural and heritage resources.
- Maintain fiscal accountability and keep costs commensurate with values at risk.
- Implement and coordinate suppression repair needs.

Control Objectives

Ranch Objectives:

- Keep the fire North of Hwy 20
- Keep the fire South of the Brushy Camp Ridge
- Keep the fire East of Potter Valley
- Keep the fire West of Leesville Lodoga Road

River Objectives:

- Keep the fire within the established control lines

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Mendocino Complex Incident Weather Forecast

FORECAST NO: 21
 PREDICTION FOR: Sunday Day / Night Shift
 SHIFT DATE: August 19, 2018
 FORECAST ISSUED: 1900 PDT August 18, 2018

NAME OF FIRE: Mendocino Complex
 UNIT: MEU
 Incident Met: Jeff Tonkin / *Jeff Tonkin*
 Cell: (707) 672 - 3386

WEATHER DISCUSSION: Today will be the last hot day before subtle cooling begins on Monday. Near single digit afternoon RH's along with very poor recoveries are expected again this afternoon. The general west and southwest wind will be very light during the afternoon hours while light east winds will be felt at night and early morning hours. Smoke will be more widespread and heavier...while lifting is delayed until 1500. Forecast models are hinting at a return of a marine influence on Tuesday and Wednesday.

WEATHER FORECAST TODAY (SUNDAY DAYTIME):

WEATHER: Smoky again today. Slower clearing...around 1500 hrs. Some afternoon high clouds.

	<u>(0 - 2500 FT / 0 - 762 M)</u>	<u>(2500FT - Ridge / 762 M - Ridge')</u>
MAX TEMPERATURES:	96 - 101 F / 35 - 38 C	90 - 95 F / 31 - 35 C
MIN HUMIDITY:	9 - 13%	13 - 17%.
WINDS (EYE LEVEL): (1 MPH = 1.60 KPH)		
<u>Valley Floor to Midslope:</u>	East and Northeast 3 to 6 mph until 1200 hrs then South and Southwest 3 to 5 mph afternoon gusts to 10 mph through sunset.	
<u>Midslope to Ridge:</u>	Northeast to Southeast 3 to 6 mph early...then South and southwest 5 to 10 mph with afternoon gusts to 10 mph.	

HAINES: 4 stable. **SMOKE TRANSPORT WIND:** Southwest 5 mph. **LAL:** 1 **CWR:** 0%

WEATHER FORECAST TONIGHT (SUNDAY NIGHT):

WEATHER: Clear....But smoky.
 MIN TEMPERATURES: Drainages...63 - 67 F / 17 - 20 C. Mid Slope to Ridge...68 - 73 F / 18 - 23 C
 MAXIMUM HUMIDITY: Drainages...40 - 50%. Mid Slope to Ridge...25 - 35%
 WINDS (EYE LEVEL): (1 MPH = 1.60 KPH)
 E and NE winds 3 to 6 mph. Gusts up to 10 mph along ridgelines and along aligned drainages.

Extended Forecast Table: Temp/RH - Values Based on Midslope (2500 FT)

	Mon Aug 20	Tue Aug 21	Wed Aug 23	Thu Aug 24
Highlights:	Begin Cooling Trend	Marine Influence	Marine Influence	Slightly Warmer
Sky / Wx	Smoky	Smoky	High Clouds	High Clouds
Wind: Lower to Mid Slope	S SW or Upslope 3 to 6 mph	East wind early SW late 3 to 6 mph	E early...W or Upslope 3 to 7 mph	W NW or Upslope 3 to 8 mph
Wind: Mid Slope to Ridge	East through noon then W/SW or slope 5-8 mph	W or Upslope 7 Gust 10 mph	W/NW 7 Gust 12 mph	W/NW or Upslope 7 Gust 12 mph
Min Temp / Max RH	67 / 40%	63 / 50%	61 / 60%	65 / 50%
Max Temp / Min RH	94 / 12%	91 / 17%	90 / 21%	92 / 19%

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 022	TYPE OF FIRE: Wildfire
FIRE NAME: Mendocino Complex	OPERATIONAL PERIOD: 08/19/18 0700-0700
DATE ISSUED: 08/18/18	TIME ISSUED: 19:00
UNIT: CA-MEU-008674	SIGNED: <i>Todd Hopkins</i> Todd Hopkins, FBAN

INPUTS

WEATHER SUMMARY: See attached weather summary in the Fire Weather Forecast

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fire is now burning through portions of grass, timber litter, brush patches and dense timber stands. Fire activity is expected to increase with the increase in temperature and decrease in humidity. The fire growth has been wanting to move towards the east, but with decreasing wind speeds, the fire will want to move in the direction of the slopes and deep drainages which is in a north/northeast direction. You will continue to see spots ignite in light flashy fuels as the smoke burns off in the afternoon. Evening winds will shift and come from the east and northeast.

SPECIFIC:

TOP CHART: Standard System of Measurement (Feet, Miles, etc)
 BOTTOM CHART: Metric System of Measurements (Meters, Kilometers, etc)

Fuel Type	Rate of Spread (feet per minute)			Flame Length (in feet)			Spotting Distance (miles)		Probability of Ignition (%)	
		Day	Night		Day	Night	Day	Night	Day	Night
Grass	Head	70-170	46-100	Head	6-17	5-12	Tree: .2-.4	Tree: .1-.3	75	40
	Flank	6-13	5-11	Flank	2-5	2-4				
	Backing	3-6	3-5	Backing	1-4	1-3	Wind: .2-.4	Wind: .1-.2

	Flank	1-2	>1-2	Flank	1-2	>1-1				
	Backing	>1-1	>1-1	Backing	1-2	>1-1	Wind: .2-.4	Wind: .1-.2		

Branch I:

Day: Fire activity will become active once smoke lifts and begins to move out of the area. This will be later in the afternoon with the expected light winds, causing the fire to be fuels and topography driven. Rolling material and spotting is also a high probability over the Eel River Road DIV D as the fire continues to progress down to the road. Fire activity along DIV F and DIV G will primarily move north/northeast following drainages.

Night: Fire will be fuel and topography driven in the evenings, but may increase in ROS in west/east facing drainages with downslope/downcanyon winds. Humidity recovery will be poor above 2000' in the evening causing the fire behavior to be active at night. Evening fuel moistures should make fuels in favor for firing.

Branch II:

Fire activity will increase once smoke clears the area and remain active into the night. With little wind expected, the fire will be fuels and topography driven. The fire between Rattlesnake Glade and Crockett Peak will continue to move to the east/northeast following drainages. Weather and fuel conditions will be in favor for firing in DIV J, DIV K, and DIV L.

Branch III & IV: No growth expected. Fire activity is expected to be minimal on the Branch.

AIR OPERATIONS: Terrain, fuels, smoke and an inversion may make it difficult to see resources working on Divisions.

SAFETY

Watch for ROS changes when firing through fuel model changes.

Mendocino Complex Safety Team Risk Management for Hazard Trees

August, 2018

Hazard trees, both dead (snags) and green trees, are one of the highest risks found in forests on the Ranch Fire. Observe & share hazard tree intel with your crew and others on the fireline.

Ask yourself: How serious is the hazard & what is the probability that it will occur?

Environment:

- Gusty winds from storm cells
- Water/ retardant drops or copter rotor wash
- Night operations
- Steep slopes
- Changing forest health conditions – Diseased/bug-kill areas
- Number and height of hazard trees
- Potential for trees to domino into each other.

Tree Indicators:

- Trees burning for any period of time
- High risk tree species (rot and shallow roots)
- Numerous downed trees
- Dead, broken, or burning tops and limbs
- Absence of needles, bark, or limbs – SNAGS!
- Leaning or hung-up

Hazard Control and Mitigation:

- Utilize qualified sawyers & Falling Bosses
- Establish a secure felling area, minimum of 2 ½ times tree height
- Post a lookout to keep personnel clear of the felling area
- Initiate road closure & traffic control if necessary
- Plan a quick & safe escape route if Plan A does not work
- All eyes on the tree being felled and trees in the falling layout
- Stay clear of the felling area until “All Clear” called by the sawyer
- Flag, sign & map “No Work Zones” in high risk areas.
- Keep clear of water/retardant drops near trees/snags
- Reposition to a safe area in response to high wind forecast

MAINTAIN SITUATIONAL AWARENESS – LOOK UP AND LIVE!

S A F E T Y M E S S A G E

Mendocino Complex

August 19, 2018

LOOKOUTS, COMMUNICATIONS, ESCAPE ROUTES, SAFETY ZONES

Transportation

- ✓ **Driving to and from Incident** - Highway (101) driving is inherently dangerous, large fire equipment only complicates this situation, drive posted speed limits.
- ✓ Driving the local roads in and around Potter Valley and Stonyford, go slow and watch for the public.
- ✓ **The right vehicle for the right road for the right reason.**
- ✓ Scout roads before sending up large suppression vehicles or water tenders.
- ✓ Drive defensively and expect the unexpected from other drivers; lights on, chock vehicles when parked

Situational awareness is a must

- **Roads/** Know the way in and out, know where the fire is heading, what are the fuels, what the spotting potential over the line is, what's happening now—is it probable to continue or not, re-evaluate as needed. Ensure your objectives are clear and tactics well understood by all.
- **Firing Operations/LCES** -Firing operations. With the dry fuel, low RH, and topography there is a degree of risk that the fire could cross our control line. Therefore all personnel need to be aware of escape routes and safety zones! In addition, post experienced lookouts and verify command and tactical frequencies.

Weather

- Closely monitor weather trends, take observations share with your resources. Brief crew daily on current and expected weather.

Date: Prepared 8/18/2018

INCIDENT SAFETY ANALYSIS 215a

Mendocino Complex North Zone - Sunday August 19, 2018

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
Div D E F J G H K L	Extreme Fire Behavior	<p>Spotting is occurring throughout the fire where active burning is occurring, up to 1.5 miles. This can comprise firefighters during indirect operations, and initial attack on spot fires. Assess for need to suppress spots, post lookouts and the need to monitor and patrol.</p> <ul style="list-style-type: none"> • Share weather observations with all personnel assigned to division • Review "Alignments and Patterns for Dangerous Fire Behavior" (IRPG p.73). • Monitor current weather conditions and forecasts. Make sure all personnel receive thorough briefings every shift. • Maintain LCES Advise all personnel if these are compromised or changed. Set trigger points when appropriate. • Adhere to 10 Std Orders, mitigate 18 situations and. • Maintain Situational Awareness
Div D E F L K	Structure Protection & HAZMAT	<ul style="list-style-type: none"> ~ Review "Wildland Urban Interface Firefighting" , IRPG page 12-16 ~ Follow "HAZMAT Incident Operations" on pages 36-38 in IRPG
All	Hazard Trees	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG pages 22 & 23 ~ Post lookouts, or use a spotter in mop-up areas with personnel ~ Don't park vehicles or take breaks in high concentrations of hazard trees ~ Establish trigger points for disengagement during high wind events
All	Helicopter Operations: Bucket Work	<ul style="list-style-type: none"> ~ Review and discuss the "Aviation Watch-Out Situations" on pg 46, IRPG, 2018 ~ Aerial drops onto power lines will cause arcing to ground or arcing to power line towers and poles ~ Drops should be parallel to lines and avoid drift making contact on the power lines ~ Communicate locations of all transmission lines to air resources ~ Keep non-essential personnel away from ALL dip sites ~ Refer to pg 58, IRPG for directing bucket drops. ~ Ensure positive communication with all air resources. ~ Ensure that the mission is necessary. Evaluate the Risk vs Gain for every mission ~ Ensure positive communication with all air resources. Monitor & utilize the correct frequencies ~ Refer to "Directing Bucket or Retardant Drops" IRPG Pg 58 .
Div E/D F/ G	Night Operations	<ul style="list-style-type: none"> ~ Maintain high visibility in work area and wear vest while in busy roadways. ~ Use glow sticks to mark hazards. ~ Stay out of areas with bug killed hazard trees ~ Watch for signs of fatigue ~ Take breaks away from areas of known hazard
Div D F J G H K L	Firing Operations & Devices	<ul style="list-style-type: none"> ~ Only personnel trained in the use of each device will be authorized to use firing equipment. ~ Ensure all personnel are aware of firing operation that may affect them. ~ Ensure lookouts are in place, communications in place for firing and holding forces, and LCES has been briefed ~ Ensure aerial/ground ignition plans California Interagency Incident Management Team "FIRING OPERATIONS PLAN" have been adequately developed and personnel are briefed. <p>Follow all Qualifications and organizational requirements as prescribed in the 'NWCG Standards for Aerial Ignition PMS 501 May 2018.</p> <p>Ensure Firing Boss and Aerial Ignition Pilot are talking on a discreet frequency and both understand heliotech commands</p>

INCIDENT SAFETY ANALYSIS 215a

Div C E F G H J K L	Steep Terrain & Rolling Debris	<ul style="list-style-type: none"> ~ Maintain 8'-10' spacing when working & walking. ~ Don't work directly above or below any personnel. ~ Be on the lookout for rolling rocks, debris, or burning material that could cross your line. ~ Evaluate necessity to send personnel in areas with limited access. ~ Ensure LCES is in place before engagement of assignment. Pg 7 in IRPG, 2018
Div C D E	Power Utilities	<ul style="list-style-type: none"> ~ Notify all personnel of down electrical lines, use check back. ~ Refer to the IRPG pages 24-25 for Power Line Safety ~ Always treat downed wires as energized ~ Identify and avoid high tension transmission lines. ~ Identify and avoid high pressure natural gas lines ~ Identify and avoid damaged gas service near structures ~ Be aware of utility restoration in your work area * All excavators working under power lines you must keep at least 20 ft between your boom and the power lines ~ Flag all hazards, " Three Stripes Your OUT" or use Exclusion Zone.
All	Heat Related Illness (HRI)& Dehydration	<ul style="list-style-type: none"> ~Reference Heat-Related Injury guidelines IRPG 2018 Page 109-110 ~Drink Fluids water and Gatorade throughout operational period, up to 1.5 gallons per shift. ~Carry extra watert on line and cache water at drop points ~Take Frequent breaks, minimum of 10 minutes every hour ~Recognize symptoms of HEAT RELATED ILLNESS which include <ul style="list-style-type: none"> o Lack of energy o Headaches, dizziness o Altered level of consciousness o No hunger, poor eating habits o Hot skin, and lack of sweating
All	Driving & Traffic	<ul style="list-style-type: none"> ~ Highway 20 is now open to the public, watch for distracted drivers ~Practice "Defensive Driving" techniques traveling on all roads in both rural and urban settings ~ Honk horn to alert personnel when backing. Use spotters when available ~ Pull over to allow oncoming traffic to pass on a narrow road base. If required to back-up at night, have the vehicle in front of you turn their headlights to "running lights" to eliminate night blindness while you back out of the way. Utilize a backer. ~ Expect two way traffic on one lane roads. Stay on your side, and approach corners with caution ~ Keep clutter off dash and inside cab. ~ Follow Driving LCES (Lights, Chock blocks, Emergency brake, Seat belts). ~ Headlights ON. Manually turn on Headlights. Most vehicles have "auto" headlights ~ Use at a minimum, the 3 second rule for following distance when driving. ~ Use chock blocks if available, or turn wheels into hill if facing downhill and away from hill if facing uphill. ~ NO cell phone use while driving. It's against the Law and USFS Policy. Pull safely over, off the roadway to make and/or receive a call ~ Ensure that windshields are kept clean of dust and bugs. ~ Seatbelts fastened on all personnel, before wheels turn ~ NO riding in the back of pick-ups. It is against the Law.
Div F G H J	Heavy Equipment Operations	<ul style="list-style-type: none"> •Ensure communications are established with operators •Make positive contact with operator before approaching. • Use hand signals if other communications are unavailable • Maintain a 50'-100' exclusion area around equipment • Use a spotter when backing qualified operators and appropriate overhead. • Close roads or trails if necessary for public safety. • PPE including hearing protection. • Maintain safe working distance from equipment

INCIDENT SAFETY ANALYSIS 215a

All	Line Constructions	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Ensure LCES in place prior to engagement (IRPG p. 7). • Establish adequate safety zones (IRPG p.8). • Follow "Look Up, Look Down, Look Around" procedures (IRPG p. 3-4). • Utilize Risk Management Process (IRPG p.1). *Utilize Downhill Checklist (IRPG p 9)
All	Communications	<ul style="list-style-type: none"> ~ Maintain communication with aviation resources, and suppression organization. ~ Ensure all your resources know frequency and protocol for contacting resources ~ Utilize the ICS 205. Brief others as needed, Communicate hazards to others, acknowledge messages, ask if you dont know
All	Chain Saw Operations	<ul style="list-style-type: none"> ~ Follow "Hazard Tree Safety" guidelines, IRPG pages22-23 ~ Look up, down around for hazard tree indicators ~ Only fell and buck trees within your expertise, and training ~ Follow "Procedural Felling Operations" on page 85 in IRPG ~ Do not fall trees during high wind events
Div F G	UTV use	<ul style="list-style-type: none"> • Ensure equipment is inspected and safe to use. • Only qualified and State Certified operators may use UTV's on the incident. • DOT helmets and full PPE are required. Golf carts may be operated in camp with hard hat. Lights on. • SLOW DOWN

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY:

"LINE EMERGENCY"

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 1. Closest EMS resource
 2. Communications Unit
- Communications Unit contacts:
 1. Ground or Air ambulance as requested
 2. Operations
 3. Safety
 4. Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

CAMP EMERGENCY:

Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:

1. Communications	4. Operations
2. Safety	5. Crew Supervisor
3. Logistics	6. Comps/Claims

INJURY REPORTING PROCEDURES

CHIEF COMPLAINT: _____
 LOCATION OF PATIENT: _____
 POINT OF CONTACT: _____
 TRANSPORTATION REQUESTED BY: AIR ___ GROUND ___
 POINT OF PICKUP: _____
 LAT: _____ LONG: _____
 PATIENT UNIT ID: _____
 IS AN EMT/P WITH PATIENT: YES ___ NO ___
 AGE: _____ SEX: MALE ___ FEMALE ___

**ALL EMERGENCIES---Secure the area
and identify witnesses for later investigation.**

Keep an accurate log of events.

****EMERGENCY****

(530) 417-4562

ICS 206

9. PREPARED BY: (Medical Unit Leader)
STEVE McGARY (FRN)

10. REVIEWED BY: (Safety Officer)
CHAD THOMPSON (ANA)

Medical Incident Report

"NON-EMERGENCY INCIDENT" WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

"MEDICAL EMERGENCY" IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
--------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 118

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): *(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)* Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training.
Be Alert. Keep Calm. Think Clearly. Act Decisively.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications

- Other: _____
- Other: _____

CAL FIRE WUI Guidelines

STRUCTURE DEFENSE TACTICAL ACTIONS

CHECK AND GO

"Check and Go" is a rapid evaluation to check for occupants requiring removal or rescue.
Structure Triage Category – Threatened Non-Defensible

PREP AND GO

"Prep and Go" implies that some preparation of the structure may be safely completed prior to resources leaving the area. Structure Triage Category – Threatened Non-Defensible

PREP AND DEFEND

"Prep and Defend" is a tactic used when a Safety Zone and TRA are present and adequate time exists to safely prepare a structure for defense prior to the arrival of the fire front.
Structure Triage Category – Threatened Defensible

FIRE FRONT FOLLOWING

"Fire Front Following" is a follow up tactic employed when Check and Go, Prep and Go, or Bump and Run tactics are initially used. A tactic used to come in behind the fire front.

BUMP AND RUN

"Bump and Run" is a tactic where resources typically move ahead of the fire front in the spotting zone to extinguish spot fires and hot spots, and to defend as many structures as possible.

ANCHOR AND HOLD

"Anchor and Hold" is a tactic utilizing control lines and large water streams from fixed water supplies in an attempt to stop fire spread. The goal is to extinguish structure fires, protect exposures, and reduce ember production.

TACTICAL PATROL

"Tactical Patrol" is a tactic where the key element is mobility and continuous monitoring of an assigned area.

LEVELS OF ENGAGEMENT

PACE

Implement PACE. prior to engaging in any structure protection action.

P - Primary Plan [Offense]

Is focused on fire fighter safety and mission objectives

A - Alternate Plan [Offense]

A fall back plan that closely supports the Primary Plan

C - Contingency Plan [Defense]

Focused on the firefighter's safety, move to a safety zone or temporary refuge area

E - Emergency Plan [Defense]

Firefighter survival, deployment zones, fire shelters

ALWAYS HAVE A DEPLOYMENT SITE IDENTIFIED!

DRAW-D

D - Defend – Holding actions, protecting priority areas, protect the structures, hold and improve the line

R - Reinforce – Bring more resources to bear, add resources necessary to *advance* or *defend*

A - Advance – Anchor and Flank, Direct or Indirect Attack, Active burnout operations

W - Withdraw – Cease current activities until conditions modify, Abandon an established position or constructed line in response to an increase in fire intensity, Not a stigma, but a decision to move away from a threat

D - Delay – Wait until the situation has modified sufficiently to allow a different level of engagement, Waiting for conditions to meet pre-identified triggers necessary to *advance* or *defend*, not a lack of effort, but a conscious decision to maximize long term effectiveness

Fire Suppression Repair – Mendocino Complex

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas caused by the fire. We cannot upgrade facilities beyond their pre-fire condition. Any projects too large or complicated to be completed by the Fire Suppression Repair Specialist shall be turned over to the Comp/Claims Unit or the local Unit.

Infrastructure Damage

Fences and gates; culverts/ bridges/ other watercourse crossings; water sources, utility distribution lines; above or below ground; road barriers removed for fire access, trash, debris and supplies left by fire suppression activities; misc. damage to residential property

Natural Resource Damage

Repair of existing problems caused by fire suppression activities (direct effect) to natural resources and to prevent likely future problems such as accelerated erosion caused by winter rains (indirect effect). The goal is to minimize:

- Soil erosion
- Adverse impacts to water quality
- Adverse impacts to protected species of plants and animals

Dozers constructed most of the fire perimeter and all of the contingency lines. Dozer line width ranges greatly. The following measures shall be implemented for constructed dozerline:

- Berms and push-piles shall be dispersed spread out to the extent feasible. This is may be accomplished by back-blading and /or using ripper shanks or grapples if present. Debris piled against trees or perched above watercourses are especially important to correct.
- Waterbreaks shall be installed at a spacing which corresponds to a moderate erosion hazard rating in the California Forest Practice Rules. Maximum spacing shall be as follows:

Prevailing Gradient	0-10%	11-25%	26-50%	>50%
Maximum Waterbreak Spacing	200 Feet	150 Feet	100 Feet	75 Feet

NOTE: This waterbreak spacing information is a general guide for maximum spacing, actual location of waterbreaks should be tailored to the topography and placement should be suited to the best dispersal of water flow.

- Waterbreaks shall be constructed at an approximately 45 degree angle and shall be a minimum depth of 10 inches from the bottom of the cut to the top of the berm. Where possible the discharge from the waterbreaks shall be directed into vegetated areas to minimize erosive forces.
- Where slopes exceed the range at which a tractor can effectively work, waterbreaks shall be constructed with handtools.
- Roads used in fire suppression activities shall be left in at least as good a condition as they were found. Gravel and soil surface roads shall be watered to prevent excessive dust formation. Where suppression activities have damaged or rendered road drainage facilities non-functional, waterbreaks or drivable drainage dips shall be installed for drainage.
- Where suppression activities have filled in or damaged inside ditches, the ditches shall be cleaned and left unobstructed.

Cultural Resources Site Damage

Any disturbance to known or suspected archaeological/historical sites and artifacts must be reported to the Incident Archaeologist immediately. Intentional removal or disturbance to any artifact is not permissible.

**Mendocino Complex
Demobilization Plan
CA-MEU-008674**

Supervisory personnel are to identify resources excess to the needs of the incident at the earliest opportunity. If possible, this should be done within 36 hours in advance of a proposed release by filling out a General Message Form (ICS 213) or Declaration of Excess Resource Sheet. Please include name, request number, date, ETD, ETA, and if available for reassignment. By definition, surplus personnel are available for release if they have met the 2:1 work rest requirements, have rested for a minimum of 8 hours.

Section Chiefs will approve all excess resource lists and the lists will be forwarded to the Resources Unit for processing.

The release priorities are:

- Local Government
- OES
- Hired Equipment
- Cooperating Agencies
- Federal Resources/CAL FIRE Resources

The needs of the incident and off-incident issues may necessitate the modification of these priorities in certain cases.

Information concerning surplus resources will be forwarded to the expanded dispatch by the Demobilization Unit (with ECC Support Team at incident). This information will include the resource name, request number, ETD, and ETA. Additionally, the availability of the resource for a new assignment will be provided.

All government equipment and rental vehicles must be safety inspected prior to release. Safety inspections shall be coordinated with the Ground Support Unit Leader. All deficiencies will be corrected prior to departure for home unless agency head signs a waiver of inspection.

Surplus resources lists will be posted within the ICP and at the Demobilization Unit with a schedule for resources to pick up the checkout form (ICS-221) at the Demobilization Unit and begin the checkout process at the demobilization time given. Finance will be the final stop prior to returning to the Demobilization Unit. All resources must complete the demobilization process. Once the ICS-221 has been completed and returned in to the Demobilization Unit, the resource will be released from the incident to home, re-assigned to another incident, or held as directed by Northern Region Operations Center (North-Ops).

All Resources will meet any agency-specific and/or DMV rest requirements before demobilizing from the incident. The operator must be rested prior to driving. A resource encountering a delay enroute will contact the appropriate home unit or incident.

MENDOCINO COMPLEX INFORMATION

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

FEDERAL FIRE SOCIAL MEDIA POLICY

Social media posts can reflect on the professionalism of your crew, your agency and Wildland Firefighting Community. The U.S. Forest Service has enjoyed a reputation as the world leader in wildland firefighting for over 100 years. Protect our legacy with good conduct on the fireline and online. When assigned to a federal fire you are considered a federal employee under the delegation of authority. Even if you are a contractor, AD or from a partner agency we recommend you follow these ethics guidelines which apply to federal employees all the time.

Think before you post:

- On official time, do official duties; if using government equipment, do government business.
- Don't use your official position/title for private gain.
- Do share government information that is publically available (such as links to Inciweb, weather reports, feature stories, official evacuation notices etc...) Do not disclose (via any medium) non-public information to further private interests or the private interests of others.
- Do not share information outside official channels that could be associated with a crime or a claim, (for instance do not post on social media about serious accidents, deaths or destroyed property).
- Do not accept compensation for statements made over social media that relate to official duties.
- Never use your official title while engaging in "political activity" (activity directed toward the success or failure of a political party, partisan candidate or partisan political group).
- Federal employees may express their opinions concerning partisan political candidates and political parties on social media when they are off duty and away from the federal workplace.
- If you have questions about content you'd like to post on social media, contact a PIO, they can help you.

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

For approval to post Photo and Video you have taken of the fire, please send to the PIO's incident email at:

MendoComplex2018@gmail.com

LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Public Information Trailer in Base Camp.
