Fire Weather Forecast

FORECAST NO: 18
PREDICTION FOR: DAY/NIGHT SHIFT
SHIFT DATE: August 12, 2018
TIME/DATE ISSUED: August 11, 2018 2000 PDT

Sven Nelaimischkies
NAME OF FIRE: Carr
UNIT: CA-SHU
SIGNED: Sven Nelaimischkies
Incident Meteorologist (t)

WEATHER DISCUSSION:

Winds will be lighter today than yesterday but still increase out of the southwest during the afternoon. Smoke will slowly become a inhibiting factor day by day as a return to a more normal diurnal wind pattern returns. Through the week normal weak afternoon into evening southerly upslope winds will transition overnight into the mornings to northerly down slope/down river drainage flow. The strongest northerly overnight/morning flows will be down the Shasta river into Shasta Lake.

WEATHER FORECAST FOR SUNDAY:

WEATHER: Smoke and Haze. Continued warm and dry. South winds increasing after 1500 hours.

MAX TEMPERATURES: 88-95°F (31-35°C). Nuetral trend.

MIN HUMIDITY: 14-22%. Nuetral trend.

20-FOOT WIND:

VALLEY - Downslope/downvalley 2-5mph (3-8 km/h) early becoming upslope/upvalley 2-4 mph with gusts to 8 mph (3-6 km/h gust 13 km/h) after 1200.

MIDSLOPES/RIDGETOP- North winds 3-6 gust 8 mph (5-10 gust 13 km/h) before 1100 Becoming south to 3-7 gust 11 mph (5-19 gust 20km/h) after 1400.

HAINES INDEX: 4 **INVERSION:** Weak to moderate inversion breaking after 1300

SUNDAY NIGHT:

WEATHER: Increasing smoke otherwise clear with moderate RH recovery.

MIN TEMPERATURES: 57-67°F (14-19°C). (Nuetral Trend)

MAX HUMIDITY: 40-60% (Nuetral Trend)

20-FOOT WIND:

SLOPE/VALLEY - Downslope/downvalley 2-5 mph (3-8 km/h) after 2200.

RIDGETOP - North 2-4 mph.

EXTENDED FORECAST:

MONDAY THROUGH THURSDAY: Mostly sunny. Haze and smoke. Max temps...89-97°F (31-36°C). Min RH 12-22%. A return to diurnal terrain driven winds for midslopes and valleys. South winds for the ridges during the afternoons with night time north/northwest drainage winds but remaining fairly light. Haines indices will be trending more stable as well with a more stable upper pattern over the region, becoming more unstable towards mid week.

SAFETY THOUGHT: Increased down river flow onto Shasta Lake will cause variable winds late nights into the mornings, especially on Div P. Increasing smoke in the lighter diurnal winds will decrease visibility into the week.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 18	TYPE OF FIRE: Wildland Fire
FIRE NAME: CARR	OPERATIONAL PERIOD: 24hr 8/12 (0700-0700)
DATE ISSUED: 08/11	TIME ISSUED: 2100

INPUTS

WEATHER SUMMARY

****Hot and Dry with light and variable winds****
See Weather Forecast in IAP.

OUTPUTS

GENERAL: **Transition to fuels and topography driven activity.**

Hazards throughout the fire area include: interior green islands and slopes, ash pits, fire weakened trees, dust devils, and roll-out.

New starts will see rapid growth and establishment. Smoke columns will contribute to long range spotting.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	< 5' (1.5m)	40 ch/hr (1.2 km/hr)	< ½ mile (.8 km)	89%
Grass/Shrub Mix	< 5' (1.6m)	20 ch/hr (.6 km/hr)	< ½ mile (.8 km)	89%
Timber Understory	< 8' (2.5m)	10 ch/hr (.2 km/hr)	< ¾ mile (1.2 km)	89%
Timber Litter	< 3' (1m)	5 ch/hr (.1 km/hr)	< ¼ mile (.4 km)	89%

****minimum safety zone size for brush fuels is ¾ acre (.3 Ha) for a Strike Team of Engines.**

SPECIFIC:

Branch I, II & III
Creeping, backing, and smoldering. Dormant heat areas may flare with air movement. Interior islands and green slopes with Southwest wind exposure alignment may see activity. Torching and short crown runs may occur with preheating or steeper terrain. Expect the largest growth to occur as afternoon winds increase. Roll-out and spotting potential across established lines. Keep alert to unburned islands, fire weakened trees, ash pits, and dust devils.

Branch IV and V
Predominately surface fire spread. Expect areas with understory preheating via slash piles, fuel jackpots or topography to transition into canopy. Interior Torching and short crown runs possible. Smoke shading may temper fire behavior. Look for areas of fuels treatment, timber harvest or previous fire activity for safety or control objectives. Roll-out and spotting potential across established lines. Anticipate drainages below control lines to be susceptible to spotting areas.

AIR OPERATIONS:
I-5 Corridor should remain smoked in for majority of burn period (Div. O and P).
Mixing height: 8,000 ft. AGL, Transport winds: SW 10-15 mph, Sunrise 0617, Sunset 2014.

SAFETY

Be aware of not only the "Fire Environment" you are currently in but also the one you are transitioning into.

SAFETY MESSAGE/PLAN (ICS 208)

INCIDENT NAME:
CARR FIRE CA-SHU-007808

Operational Period: Date From: 8/12/18 Date to: 8/13/18
Time From: 0700 Time to: 0700

“Never tell people how to do things. Tell them what to do and they will surprise you with their ingenuity.”

MAJOR HAZARDS AND RISKS

Driving

Drive defensively!!! Steep, narrow, dusty roads throughout fire area. Maintain safe following distances and appropriate speed when traversing roads. Roads are being heavily impacted by fire suppression, recovery, and the repopulation. Work with Division Supervisors to mark intersections, dead end roads, and speed limitations. Communicate on tactical channels when driving on one lane roads.

Fatigue/Complacency

Stay alert and engaged to maintain situational awareness. Focus on process instead of outcome. Continuously learn and adapt to new challenges. Recognize your blind spots and look for vulnerabilities. Be alert for signs of fatigue and take breaks as necessary.

Hydration/Nutrition

Drink plenty of fluids throughout the day and eat accordingly. Balance electrolyte drinks at a 3:1 water to sport drink ratio. Address dehydration concerns immediately upon symptom onset. Keep up on personal hygiene. After strenuous work, continue drinking to replace fluid losses.

Communications

Confirm all personnel have latest clone, test prior to going to line. Utilize human repeaters as necessary. Use proper terminology. Avoid using squirrel channels.

Stump holes/Ash Pits

Ash pits are an inherent and hidden risk to firefighters that can cause serious burns and injuries. Wear all PPE. Flag hazardous areas and watch for stumps that have been smoldering for multiple days.

Fire Behavior/Weather

Red Flag weather conditions forecasted. Maintain situational awareness of current and expected weather. Communicate changes in weather conditions.

Accountability

Be responsible for your personal and resource accountability. Maintain proper communications with your forces, your supervisor and adjoining forces. Give clear instructions and ensure they are understood. Make sure Safety Zones are known for work areas.

SNAGS

HAZARD TREE INDICATORS: Trees have been burning for an extended period of time. High risk tree species (rot and shallow root system). Numerous down trees. Dead or broken tops and limbs overhead. Accumulation of down limbs. Absence of needles, bark or limbs. Leaning or hung-up trees. Water or retardant drops in the area have broken or weakened limbs in the canopy.

STRUCTURE DEFENSE GUIDE

STRUCTURE TRIAGE DECISION PROCESS (S-FACTS)

SURVIVAL

- Initial Assessment: can you survive here? **If not, LEAVE NOW!**
- Is there a Safety Zone nearby? **If not, LEAVE NOW! (IRPG)**
- Do you have a viable Escape Route?
- What is the decision point at which you will leave based on fire behavior and rate of spread?
- Is there a Temporary Refuge Area (TRA) on site? **If not, LEAVE NOW!**
 - Preplanned area for immediate, temporary refuge
 - Use of fire shelter should not be necessary
 - Is there a viable Escape Route to the TRA or Safety Zone?
- Is "Prep and Go" tactic an option?
- Do you have communications with your supervisor and adjoining forces?
- If safety issues cannot be mitigated, **LEAVE NOW!**

FIRE ENVIRONMENT

- Can you survive based on current and expected fire behavior? **If not, LEAVE NOW!**
- Look up, Look Down, Look Around Indicators:
 - Fuels (characteristics, moisture, temperature)
 - What will the intensity of the fire be when it arrives?
 - How long will it take to consume the fuels?
 - Wind
 - Current speed/direction
 - Expect changing winds
 - Terrain
 - Are you in a chute, chimney, or saddle? **If yes, LEAVE NOW!**
 - Is wind in alignment with topography?
 - What is your position relative to topography?
 - Are you mid slope or on top of a ridge?
 - Atmospheric Stability
 - Fire Behavior (requires constant monitoring)
 - Spotting, crowning, sheeting, rate of spread?
 - Flame length and height?
- Other weather considerations:
 - What is the current relative humidity?
 - Is there an expected change?
 - Are thunderstorms forecasted?

ACCESS

- Is access compatible with time and distance factors necessary to utilize as an Escape Route to a Safety Zone?
 - Road surface adequate for speed necessary?
 - Adequate width?
 - Turnaround/turnouts?
 - Bridges within limits for fire apparatus?
 - Drainage ditches/culverts?
 - Steep grades?
 - Is there a safe place to spot apparatus?

CONSTRUCTION/CLEARANCE

- Does the structure have adequate defensible space, based on topography, fuels, and current and expected fire behavior?
- Can defensible space problems be mitigated quickly?
- Will building materials and yard clutter compromise safety?
- Is the construction wood siding or shake shingle roof?
- Are there vent openings, open eaves, large glass windows facing fire front, decks with vegetation below?
 - Will ember intrusion through attic or foundation vents be a problem?
- What are the contents in the garage and outbuildings?
- Are there hazardous materials present?
- Are there propane tanks, fuel tanks, or power lines?
- Is there an adequate water supply nearby?
- Are additional resources needed to mitigate issues?
- Consider "Prep and Go" or "Prep and Defend" tactics

TIME CONSTRAINTS

- Is there time for an adequate size up of the structure defense problem?
- Is there time to mitigate safety concerns?
- Is there time and adequate resources to properly prepare and defend the structure?
- Is there time to escape, utilizing Escape Routes, to a Safety Zone? **If not, LEAVE NOW!**

STAY OR GO

- Tactical decision based on the S-FACTS
- Is it safe to stay? If no, utilize "Check and Go" tactic
- Is there time to prepare the structure for defense and what will the fire behavior be when the fire gets here?
- "Prep and Go" or "Fire Front Following" tactics should be used when it is not safe to "Prep and Defend"

STRUCTURE TRIAGE CATEGORIES

Not-Threatened

- Safety Zone nearby and TRA present at structure
- Construction features/defensible space make the structure unlikely to ignite
- Residents may/may not have evacuated

Threatened Defensible

- Safety Zone nearby and TRA present at structure
- Construction features/defensible space require structure defense tactics during fire front impact
- Residents may/may not have evacuated

Threatened non-Defensible

- Lack of adequate Safety Zone nearby
- Structure cannot be safely defended
- Residents must be evacuated

ENTRAPMENT AVOIDANCE

- Are you adhering to the **10 Standard Firefighting Orders?** (IRPG)
- Have you considered the **18 Situations that Shout Watch Out?**
- Have you considered the **Common Denominators of Fire Behavior on Tragedy Fires?** (IRPG)
- Are you maintaining **LCES?** (IRPG)
- Look Up, Look Down, Look Around (IRPG)
- Have Decision Points ("Trigger Points") been established?
- Conduct Risk Management (IRPG)
 - Situational Awareness – Hazard Assessment – Hazard Control – Decision Point – Evaluate

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail. The address is Shasta District Fairgrounds 1890 Briggs St. Anderson CA. 96007

Peer Support Team Message:

CARR INCIDENT PEER SUPPORT: (916) 591-9004

The gravity of this event is large. Many of us have been impacted by the events that have occurred as well as past incidents.

A peer support team has been assembled and Peers are available at the ICP. The Peer Support contact number is (916)-591-9004, which is available 24/7.

Some of the signs and symptoms you may be experiencing include, but are not limited to:

Irritability, lack of sleep, quick to anger, withdrawal, above average tobacco use, an increase in negative coping mechanisms such as excessive alcohol and/or substance abuse. You might experience lack of appetite, isolate yourself, and various other unexplained responses to normal every day events.

You may not be experiencing these symptoms now or during this fire incident. However, you may find yourself experiencing them when you return to your home or unit. You may find yourself being triggered by a past event that has impacted you, while assigned to future incidents. A sight, sound, smell, or touch could trigger a memory that previously existed, but you may not have been aware of.

If you find yourself in this situation and need to talk to someone contact your Employee Assistance Program (EAP). EAP programs are here to help. It is important to be able to talk to someone and get stuff off your chest vs carrying this around for your career.

Cultural and Historic Properties: Fireline Guidance for the Carr Fire Shasta and Trinity Counties, CA

Do not compromise safety for the protection and preservation of archaeological and historic properties. When possible however:

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to springs, streams, and rivers but can occur in other areas as well. Prehistoric sites in this area include scatters of chipped stone flakes, circular depressions in the ground, and/or localized areas of dark soil. Gold Rush era historic mining sites include shallow test pits, horizontal adits, and vertical shafts, rock tailing piles, and/or water ditches. Late 19th century copper mining sites in the NE incident area include mine adits on the mountain sides, smelter-remains and home/cabin sites for workers near the Sacramento River, and aerial tramway towers (and cable) in between. Historic homestead sites marked by stone foundations, rock chimneys, wells, ditches, and/or old fruit trees can be found throughout the incident area. Several historic cemeteries are present as well.
2. Known sites will be flagged with pink and black striped or red and white striped plastic flagging tape. Note that much of the area has never been surveyed for archaeological resources and many sites out there have yet to be discovered or flagged.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as they may have been intentionally placed there for religious or ceremonial reasons.
5. Note locations of discovered resources on a map. Better yet take site coordinates with a GPS. Leave information for the archaeologist with the Plans Unit so that the sites can be relocated and protected during Fire Suppression Repair. Use flagging to mark site.
6. If you encounter a burial or other human remains, cease ground disturbing work in the area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
