Fire Weather Forecast

*Sven Nelaimischkies*

FORECAST NO: 20  
PREDICTION FOR: DAY/NIGHT SHIFT  
SHIFT DATE: August 14, 2018  
TIME/DATE ISSUED: August 13, 2018 2000 PDT

NAME OF FIRE: Carr  
UNIT: CA-SHU  
SIGNED: Sven Nelaimischkies  
Incident Meteorologist (t)

**WEATHER DISCUSSION:**

Smoke will continue to be an inhibiting factor day by day as normal diurnal wind pattern remains. Through the week normal weak afternoon into evening southerly upslope winds will transition overnight into the mornings to northerly down slope/down river drainage flow. The strongest northerly overnight/morning flows will be down the Shasta river into Shasta Lake.

**WEATHER FORECAST FOR TUESDAY:**

**WEATHER:** Smoke and Haze. Continued warm and dry. South winds increasing after 1500 hours.

**MAX TEMPERATURES:** 89-97°F (32-36°C). (Neutral trend.)

**MIN HUMIDITY:** 14-22%. (Neutral trend.)

**20-FOOT WIND:**

**VALLEY -** Downslope/down valley 2-5mph (3-8 km/h) early becoming upslope/upvalley 2-4 mph with gusts to 8 mph (3-6 km/h gust 13 km/h) after 1200.

**MIDSLOPES/RIDGETOP -** North winds 3-6 gust 8 mph (5-10 gust 13 km/h) before 1100 Becoming south to 3-7 gust 11 mph (5-19 gust 20km/h) after 1400.

**HAINES INDEX: 4      INVERSION:** Weak to moderate inversion breaking after 1300

**TUESDAY NIGHT:**

**WEATHER:** Increasing smoke otherwise clear with moderate RH recovery.

**MIN TEMPERATURES:** 57-67°F (14-19°C). (Neutral Trend)

**MAX HUMIDITY:** 40-60% (Neutral Trend)

**20-FOOT WIND:**

**SLOPE/VALLEY -** Downslope/down valley 2-5 mph (3-8 km/h) after 2200.

**RIDGETOP -** North 2-4 mph. ✓

**EXTENDED FORECAST:**

**WEDSDAY AND THURSDAY:** Mostly sunny. Haze and smoke. Max temps...89-97°F (31-36°C). Min RH 12-22%. Diurnal terrain driven winds for midslopes and valleys. South winds during the afternoons with night time north/northwest drainage winds remaining fairly light, and slightly stronger in the Shasta river/Lake Shasta drainage. Haines indices will be stable as well with a more stable upper pattern over the region, becoming more unstable towards mid-week.

**FRIDAY AND SATURDAY:** Mostly sunny. Haze and smoke. Max temps...92-100°F (33-38°C). Min RH 12-22%. Diurnal terrain driven winds for midslopes and valleys. South winds during the afternoons with night time north/northwest drainage winds remaining fairly light, and slightly stronger in the Shasta river/Lake Shasta drainage. Haines indices will be stable as well with a more stable upper pattern over the region, becoming more unstable towards mid week.

**SAFETY THOUGHT:** Increased down river flow onto Shasta Lake will cause variable winds late nights into the mornings, especially on Div P by the lake. Increasing smoke in the lighter diurnal winds will decrease visibility into the week.

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 20	TYPE OF FIRE: Wildland Fire
FIRE NAME: CARR	OPERATIONAL PERIOD: 24hr 8/14 (0700-0700)
DATE ISSUED: 08/13	TIME ISSUED: 2100
UNIT: SHU	SIGNED: D. Boursier FBAN/LTAN

## INPUTS

### WEATHER SUMMARY

**\*\*Hot and Dry with light and variable winds\*\***  
See Weather Forecast in IAP.

## OUTPUTS

### GENERAL: Transition to fuels and topography driven activity.

Hazards throughout the fire area include: interior green islands and slopes, ash pits, fire weakened trees, dust devils, and roll-out.

New starts will see rapid growth and establishment. Smoke columns will contribute to long range spotting.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	< 5' (1.5m)	40 ch/hr (1.2 km/hr)	< ½ mile (.8 km)	89%
Grass/Shrub Mix	< 5' (1.5m)	20 ch/hr (.6 km/hr)	< ½ mile (.8 km)	89%
Timber Understory	< 8' (2.5m)	10 ch/hr (.2 km/hr)	< ¾ mile (1.2 km)	89%
Timber Litter	< 3' (1m)	5 ch/hr (.1 km/hr)	< ¼ mile (.4 km)	89%

**\*\*minimum safety zone size for brush fuels is ¾ acre (.3 Ha) for a Strike Team of Engines.**

### SPECIFIC:

#### Branch I, II & III

Creeping, backing, and smoldering. Dormant heat areas may flare with air movement. Interior islands and green slopes with Southwest wind exposure alignment may see activity. Torching and short crown runs may occur with preheating or steeper terrain. Expect most activity to occur as afternoon winds increase. Roll-out and spotting potential across established lines. Keep alert to unburned islands, fire weakened trees, ash pits, and dust devils.

#### Branch IV and V

Predominately surface fire spread. Expect areas with understory preheating via slash piles, fuel jackpots or topography to transition into canopy. Interior Torching and short crown runs possible. Smoke shading may temper fire behavior. Look for areas of fuels treatment, timber harvest or previous fire activity for safety or control objectives. Roll-out and spotting potential across established lines. Anticipate locations above drainages to be susceptible spotting areas. Overnight inversion locations above 3,000' will see fire activity continue with lower humidity and warmer temperatures.

### AIR OPERATIONS:

I-5 Corridor should remain smoked in for majority of burn period (Div. O and P).  
Mixing height: 7,500 ft. AGL, Transport winds: SW 10 mph, Sunrise 0619, Sunset 2011.

### SAFETY

Thermal changes near water features may cause erratic and often unpredictable fire behavior.

# STRUCTURE DEFENSE GUIDE

## STRUCTURE TRIAGE DECISION PROCESS (S-FACTS)

### SURVIVAL

- Initial Assessment: can you survive here? **If not, LEAVE NOW!**
- Is there a Safety Zone nearby? **If not, LEAVE NOW! (IRPG)**
- Do you have a viable Escape Route?
- What is the decision point at which you will leave based on fire behavior and rate of spread?
- Is there a Temporary Refuge Area (TRA) on site? **If not, LEAVE NOW!**
  - Preplanned area for immediate, temporary refuge
    - Use of fire shelter should not be necessary
  - Is there a viable Escape Route to the TRA or Safety Zone?
- Is "Prep and Go" tactic an option?
- Do you have communications with your supervisor and adjoining forces?
- If safety issues cannot be mitigated, **LEAVE NOW!**

### FIRE ENVIRONMENT

- Can you survive based on current and expected fire behavior? **If not, LEAVE NOW!**
- Look up, Look Down, Look Around Indicators:
  - Fuels (characteristics, moisture, temperature)
    - What will the intensity of the fire be when it arrives?
    - How long will it take to consume the fuels?
  - Wind
    - Current speed/direction
    - Expect changing winds
  - Terrain
    - Are you in a chute, chimney, or saddle? **If yes, LEAVE NOW!**
    - Is wind in alignment with topography?
    - What is your position relative to topography?
    - Are you mid slope or on top of a ridge?
  - Atmospheric Stability
  - Fire Behavior (requires constant monitoring)
    - Spotting, crowning, sheeting, rate of spread?
    - Flame length and height?
- Other weather considerations:
  - What is the current relative humidity?
    - Is there an expected change?
  - Are thunderstorms forecasted?

### ACCESS

- Is access compatible with time and distance factors necessary to utilize as an Escape Route to a Safety Zone?
  - Road surface adequate for speed necessary?
  - Adequate width?
  - Turnaround/turnouts?
  - Bridges within limits for fire apparatus?
  - Drainage ditches/culverts?
  - Steep grades?
  - Is there a safe place to spot apparatus?

## CONSTRUCTION/CLEARANCE

- Does the structure have adequate defensible space, based on topography, fuels, and current and expected fire behavior?
- Can defensible space problems be mitigated quickly?
- Will building materials and yard clutter compromise safety?
- Is the construction wood siding or shake shingle roof?
- Are there vent openings, open eaves, large glass windows facing fire front, decks with vegetation below?
  - Will ember intrusion through attic or foundation vents be a problem?
- What are the contents in the garage and outbuildings?
- Are there hazardous materials present?
- Are there propane tanks, fuel tanks, or power lines?
- Is there an adequate water supply nearby?
- Are additional resources needed to mitigate issues?
- Consider "Prep and Go" or "Prep and Defend" tactics

## TIME CONSTRAINTS

- Is there time for an adequate size up of the structure defense problem?
- Is there time to mitigate safety concerns?
- Is there time and adequate resources to properly prepare and defend the structure?
- Is there time to escape, utilizing Escape Routes, to a Safety Zone? **If not, LEAVE NOW!**

## STAY OR GO

- Tactical decision based on the S-FACTS
- Is it safe to stay? If no, utilize "Check and Go" tactic
- Is there time to prepare the structure for defense and what will the fire behavior be when the fire gets here?
- "Prep and Go" or "Fire Front Following" tactics should be used when it is not safe to "Prep and Defend"

## STRUCTURE TRIAGE CATEGORIES

### **Not-Threatened**

- Safety Zone nearby and TRA present at structure
- Construction features/defensible space make the structure unlikely to ignite
- Residents may/may not have evacuated

### **Threatened Defensible**

- Safety Zone nearby and TRA present at structure
- Construction features/defensible space require structure defense tactics during fire front impact
- Residents may/may not have evacuated

### **Threatened non-Defensible**

- Lack of adequate Safety Zone nearby
- Structure cannot be safely defended
- Residents must be evacuated

## ENTRAPMENT AVOIDANCE

- Are you adhering to the **10 Standard Firefighting Orders?** (IRPG)
- Have you considered the **18 Situations that Shout Watch Out?**
- Have you considered the **Common Denominators of Fire Behavior on Tragedy Fires?** (IRPG)
- Are you maintaining **LCES?** (IRPG)
- Look Up, Look Down, Look Around (IRPG)
- Have Decision Points ("Trigger Points") been established?
- Conduct Risk Management (IRPG)
  - Situational Awareness – Hazard Assessment – Hazard Control – Decision Point – Evaluate

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

**CAL FIRE SOCIAL MEDIA POLICY** – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

**PHOTOGRAPHS AND VIDEOS OF INCIDENT** – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

**LOST AND FOUND** – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well.

**MAIL SERVICE** – The Information Section can assist you with sending and receiving mail. The address is Shasta District Fairgrounds 1890 Briggs St. Anderson CA. 96007

## Peer Support Team Message:

CARR INCIDENT PEER SUPPORT: (916) 591-9004

The gravity of this event is large. Many of us have been impacted by the events that have occurred as well as past incidents.

A peer support team has been assembled and Peers are available at the ICP. The Peer Support contact number is (916)-591-9004, which is available 24/7.

Some of the signs and symptoms you may be experiencing include, but are not limited to:

Irritability, lack of sleep, quick to anger, withdrawal, above average tobacco use, an increase in negative coping mechanisms such as excessive alcohol and/or substance abuse. You might experience lack of appetite, isolate yourself, and various other unexplained responses to normal every day events.

You may not be experiencing these symptoms now or during this fire incident. However, you may find yourself experiencing them when you return to your home or unit. You may find yourself being triggered by a past event that has impacted you, while assigned to future incidents. A sight, sound, smell, or touch could trigger a memory that previously existed, but you may not have been aware of.

If you find yourself in this situation and need to talk to someone contact your Employee Assistance Program (EAP). EAP programs are here to help. It is important to be able to talk to someone and get stuff off your chest vs carrying this around for your career.

## **Cultural and Historic Properties: Fireline Guidance for the Carr Fire Shasta and Trinity Counties, CA**

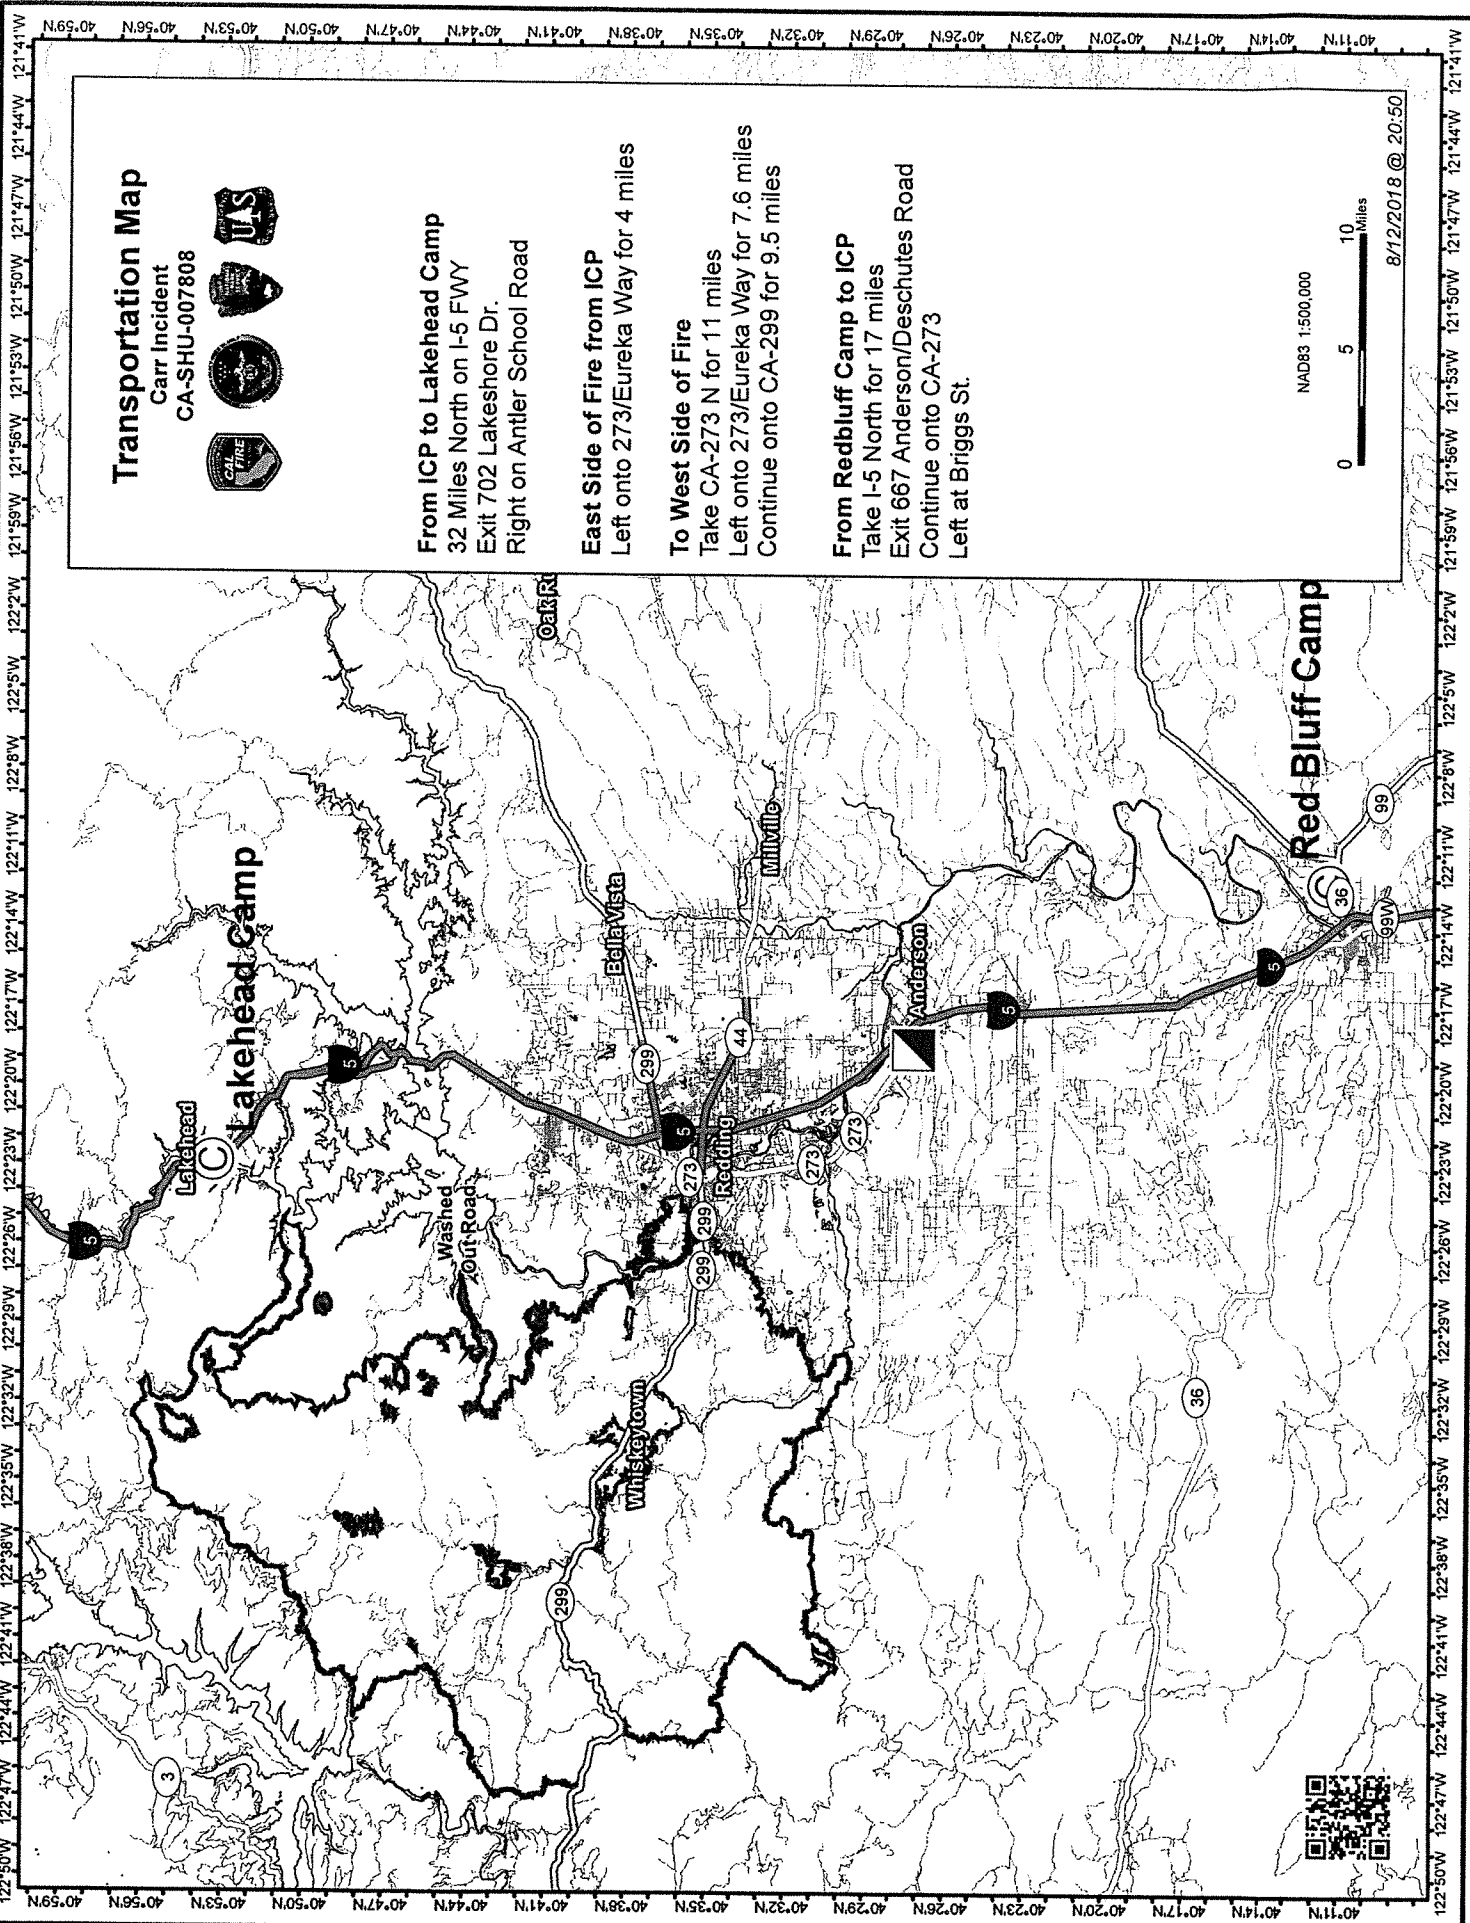

**Do not compromise safety for the protection and preservation of archaeological and historic properties. When possible however:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to springs, streams, and rivers but can occur in other areas as well. Prehistoric sites in this area include scatters of chipped stone flakes, circular depressions in the ground, and/or localized areas of dark soil. Gold Rush era historic mining sites include shallow test pits, horizontal adits, and vertical shafts, rock tailing piles, and/or water ditches. Late 19<sup>th</sup> century copper mining sites in the NE incident area include mine adits on the mountain sides, smelter-remains and home/cabin sites for workers near the Sacramento River, and aerial tramway towers (and cable) in between. Historic homestead sites marked by stone foundations, rock chimneys, wells, ditches, and/or old fruit trees can be found throughout the incident area. Several historic cemeteries are present as well.
2. Known sites will be flagged with pink and black striped or red and white striped plastic flagging tape. Note that much of the area has never been surveyed for archaeological resources and many sites out there have yet to be discovered or flagged.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as they may have been intentionally placed there for religious or ceremonial reasons.
5. Note locations of discovered resources on a map. Better yet take site coordinates with a GPS. Leave information for the archaeologist with the Plans Unit so that the sites can be relocated and protected during Fire Suppression Repair. Use flagging to mark site.
6. If you encounter a burial or other human remains, cease ground disturbing work in the area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
