Wind speeds will be higher than experienced the last couple of days with the strongest winds likely across Division T and to a lesser extent across Division U. Otherwise, persistent temperatures can be expected with slightly higher relative humidity.

A noticeable warming trend is expected from Wednesday through Saturday. Additionally, there will be an increase in mid-level monsoonal moisture by Friday and Saturday which could produce an isolated thunderstorm on and around the fire perimeter.

INPUTS

WEATHER SUMMARY:

STRONGER WINDS ON RIDGES TODAY. CLEAR, WARM AND DRY FOR MUCH OF THE NEXT WEEK. GOOD RECOVERY LATE AT NIGHT. SEE IMET FORECAST.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

WINTER PRECIPITATION IN THE FIRE AREA WAS BELOW NORMAL, THE FIRE AREA IS IN D1 MODERATE DROUGHT. FUEL MOISTURE IN THE LIVE BRUSH FUELS IS SLIGHTLY BELOW NORMAL FOR THIS TIME OF YEAR. MANZANITA FUEL MOISTURE IS 80% WHICH IS CONSIDERED CRITICAL. THE ENERGY RELEASE COMPONENT OF THE NATIONAL FIRE DANGER RATING SYSTEM IS 72 (97TH PERCENTILE). PROBABILITY OF IGNITION NEAR 100% MID-AFTERNOON IN FULL SUN. DAY LENGTH NEARLY 15 HOURS. FIRE VERY ACTIVE FROM 1400-2000.

SPECIFIC:

BRANCH II

NO MOVEMENT OF THE FIRE IS ANTICIPATED. IGNITION PROBABILITY IN GRASS IS HIGH. ANY FIREBRAND IS A THREAT.

BRANCH III

HEAVY TIMBER AND LITTER FUELS. THE DIVISION R AREA HAS A DISTURBANCE HISTORY OF HARVESTING ACTIVITY. LARGE CLEARCUT PATCHES HAVE GRASS AND BRUSH THAT IS VERY RECEPTIVE TO FIREBRANDS. SINGLE TREE AND GROUP TORCHING POSSIBLE WITH STRONGER WINDS.

BRANCH IV

THE FIRE IS HOLDING IN THE KLAMATH RIVER DRAINAGE. WHEN THE WIND SWITCHES OVER THE DAY FROM SOUTH TO NORTHWEST, DRAINAGES IN DIV U ARE ORIENTED WITH THE WIND DIRECTION. THIS WILL CAUSE ACCELERATION OF THE WIND. SHORT RANGE SPOTTING IS POSSIBLE DOWN CANYON. IF A SPOT FIRE GETS ESTABLISHED IT WILL RUN RAPIDLY THROUGH FINE FUELS.

AIR OPERATIONS: SUNRISE 0544 SUNSET 2047

WEAK MORNING INVERSION SHOULD HAVE LITTLE AFFECT ON AIR OPERATIONS.

SAFETY

- POST A WEATHER WATCH THROUGH THE DAY ON A PROMINENT RIDGE IF POSSIBLE. AS THE WIND MOVES AROUND THE COMPASS THIS WILL GIVE TIME FOR ESCAPE IF NECESSARY.
- STRONG WINDS ON RIDGE TOPS COULD THROW FIRE WEAKENED TREES OR BREAK BRANCHES AND TOPS.
- SCORCHED CANOPY CAN REBURN ESPECIALLY IN DEEP CANYONS WITH TIGHT CROWN SPACING

SNAGS

TREES ARE DROUGHT STRESSED, BEATLE IMPACTED AND FIRE DAMAGED

Watch Out

- Ground cover has burned loosening the stability of the root system
- Some trees may be suffering from insect damage
- Large oak trees are drought stressed

Mitigation

- Remove the hazard if safe to do so
- Flag and report the hazard to personnel
- Be alert while working and driving in hazard area

ENVIROMENTAL HAZARDS

THE FIRE AS SETTLED DOWN AND 'CRITTERS' ARE BECOMING ACTIVE

Watch Out

- Bee hives can become disturbed during suppression repair and mop-up
- Increase in snake activity has been observed – especially at night
- We are in their environment

Mitigation

- Flag hazards when discovered
- Snakes and other wildlife are not aggressive if left alone
- Be on the lookout for 'uncovering' a "sleeping dog"

ELECTRICAL HAZARDS

UTILITY COMPANY IS RE-ENERGIZING THE AREA

Watch out

- Power lines may be hidden
- Utility workers may miss underground service that may be damaged
- Electrical hazards may be in burned out dwellings and otherwise hidden

Mitigation

- Visually check power poles to identify service lines leading to underground service
- Treat all electrical panels and power lines as if they are charged
- Make contact and communicate with utility workers working in your area.

KLAMATHON FIRE INFORMATION

Klamathon Fire Information Line: (530) 842-2266

Media Line: (530) 643-7893

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering the locations specified within the code, even if the area presents a danger to them. Media members should be advised of the nature of possible danger. Members of the media do not have the right to access crime scenes or any area where their presence may interfere with incident operations, mitigation or evidence collection.

- The media may only access private property with the property owner's permission. Fire personnel cannot provide members of the media with authorization to enter private property.
- If approached and questioned by the media and/or the public, talk about your assignment or task at hand. If need be, direct the questioning party to the incident PIO.
- Do not speculate or give opinions
- There is no such thing as an "off the record" comment.

CAL FIRE SOCIAL MEDIA POLICY (Social Media 0691)

Social Media is increasingly being used by public agencies and the media as well as the public. This form of communication continues to grow rapidly in order to supply the public's desire for instant information gratification. All personnel assigned to a CAL FIRE incident will adhere to the CAL FIRE Social Media Policy. Further information about the CAL FIRE Social Media Policy can be obtained from the Information Officer. If you are uncertain, please ask. **Do not post:**

- Inappropriate information, pictures or videos
- Opinions regarding the incident or policy
- Endorsements of any kind

PICTURES AND VIDEO OF INCIDENT

We are in a new era of media. Media no longer means the news/broadcast industry but now refers to anyone that has the capability to shoot video and or photographs and post them onto social media in a matter of minutes. Unfortunately we have seen some instances of video or photographs that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could have unwanted effects. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera can't be looking up, down and all around.

LOST AND FOUND

The Information staff will manage *Lost and Found* items for the incident. If you have lost an item, leave your contact information and what you have lost at the Public Information Trailer at the entrance of the Siskiyou County Fairgrounds.

STRUCTURE DEFENSE TACTICAL ACTIONS

- **Check & Go** – Most appropriate action when no Safety Zone/TRA is present and fire front impact is imminent. Conduct rapid evaluation to check for occupants and evaluate for follow up action. **LEAVE promptly.**
- **Prep & Go** – Structure preparation can be safely completed prior to fire front impact. Potential fire activity is too dangerous to remain and/or there is no Safety Zone/TRA present. **LEAVE before escape routes are compromised.**
- **Prep & Defend** – Appropriate when a Safety Zone is nearby and TRA is present. Adequate time exists to prepare the structure for defense prior to fire front impact. Escape routes must be maintained.
- **Fire Front Following** – Follow-up tactic after passage of the fire front. Involves searching for victims, perimeter control, hot spotting, and ember control.
- **Bump & Run** – Resources move ahead of the fire front extinguishing spot fires and defending structures. Utilize extreme caution.
- **Anchor & Hold** – Resources use large volume fire streams to extinguish structure fires, stop structure-to-structure ignitions, protect exposures, and control embers.
- **Tactical Patrol** – Resources remain mobile and continuously monitor assigned area after fire front passage. Involves aggressive mop up around structures.

Structure defense tactics are a vital part of perimeter control operations.

- *Stopping fire spread significantly eliminates the fire's threat to structures.*
- *Connect contained points along the fire's perimeter – typically near the structures at risk ("Connect the Dots").*
- *Perimeter control and structure defense should be done concurrently.*

LEVELS OF ENGAGEMENT

Consider **PACE**

- **P**Primary Plan (Offense)
 - Focused on firefighter safety and objectives
- **A**lternate Plan (Offense)
 - Fallback plan that closely resembles primary plan
- **C**ontingency Plan (Defense)
 - Focused on firefighter safety, move to a safety zone, temporary refuge areas
- **E**mergency Plan (Defense)
 - Firefighter survival
 - Deployment zones/Refuge areas
 - Fire shelters

Consider **DRAW-D**

- **D**efend – **R**einforce – **A**dvance – **W**ithdraw – **D**elay

IMMEDIATE NEED EVACUATION CHECKLIST

- Co-locate with law enforcement at ICP
- Identify evacuation area utilizing local maps. Include area of incident potential when determining evacuation area.
- Identify traffic control points for entry and exit of resources and civilians
- Identify areas that must be immediately evacuated and label "evacuation order" areas
- Identify areas that are potentially threatened and label "evacuation warning" areas
- Identify community safe refuge areas inside evacuation areas
- Determine and publish evacuation routes
- Identify and clearly communicate the decision points for implementing additional evacuation areas
- Identify areas of special needs population and large animals
- Consider use of public notification systems for evacuations

STRUCTURE DEFENSE FUNDAMENTALS

- Back equipment in for tactical mobility
- Shield apparatus from radiant heat – be aware of structure ignition potential
- Park in a cleared area (watch for power lines, trees)
- Have an engine/crew protection line identified
- Determine if residents are home. Determine best course of action – evacuate if safe to do so or shelter in place at safe location
- Maintain communications with all crew members
- Maintain at least 100 gallons of water reserve in your tank
- Top off your tank at every opportunity (use garden hose)
- For roof access, place owner's ladder at a corner of the structure on the side with the least fire threat and away from power drop
- Keep fire out of heavier fuels (suppress in lighter fuels)
- Clear area around above-ground fuel tank, shutting off tank
- Close windows and doors, including garage, leaving doors unlocked
- Place combustible outside furniture inside the structure
- Charge and place garden hoses strategically around structure for immediate use
- Move wood piles away from structures
- Consider applying foam/gel to the structure (roof and siding) and/or fuels
- **REMEMBER** to follow up with **TACTICAL PATROL!**
