FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1	TYPE OF FIRE: Wildland
FIRE NAME: Kincade	OPERATIONAL PERIOD: 10/25-10/26, 0700-0700
DATE ISSUED: 10/24/2019	TIME ISSUED: 2000
UNIT: CA-LNU-019376	SIGNED:  Typed/printed: Jonathan Pangburn, FBAN (T)

INPUTS

WEATHER SUMMARY: **WARM & DRY, LIGHT NW WINDS**

Poor RH recovery.

Temp: 76-81 max; 52-57 min

RH: 17% min; 27% max

Wind: NW 5-10 day; N 5-10 night

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Expect varying windows for direct attack versus indirect, as related to flame lengths and rates of speed, based upon forecast wind and smoke coverage. Moderated fire behavior with onshore wind flow, prior to next offshore wind event.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	< 5' (1.5 m)	40-60 ft/min (1 km/hr)	< 0.2 mile (0.3 km)	75%
Grass/Shrub Mix	< 5' (1.5 m)	40-60 ft/min (1 km/hr)	< 0.2 mile (0.3 km)	75%
Shrub	< 5' (1.5 m)	40-60 ft/min (1 km/hr)	< 0.2 mile (0.3 km)	75%
Timber Understorey	< 15' (4.5 m)	10-25 ft/min (0.2-0.4 km/hr)	< 0.3 mile (0.5 km)	75%

****minimum safety zone size is 1/4 acre (0.1 Ha) for a Strike Team of Engines.**

SPECIFIC:

Grass Fuels: Grass fuels will dry out quickly. Fine flashy fuels make for receptive fuel bed.

Shrub Fuels: Short slope driven runs are likely in drainages.

Timber Fuels: Expect isolated runs upslope, and some single tree torching in heavier fuels of Cobb Mountain area. Flame lengths may reach up to 15'.

AIR OPERATIONS:

Anticipate mixed visibility with consumption of fuels and partial shading from smoke.
Mixing height: 2,700 ft. AGL, Transport winds: NW 10 mph, Sunrise 0731, Sunset 1820.

SAFETY

Changes in fire behavior are often subtly signaled by atmospheric changes that can go unnoticed when firefighters are focused on more tangible effects of fire and terrain.

Media Law

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede CAL FIRE's mitigation of the incident or the disturbing of evidence. When working around the media, remember:

- Media is **not permitted** on private property without the property owners permission.
- If approached and questioned by the media and or the public, talk about your assignment or task at hand. Remember to wear all the appropriate PPE.
- If needed call for an incident PIO through the chain of command.
- Never speculate, give opinions or speak for others.
- There is no such thing as an "off the record" comment.

**Archaeological and Historic Properties:
General Fire-line Guidance.**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that not much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
