## FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 6	<b>TYPE OF FIRE:</b> Wildland
<b>FIRE NAME:</b> Kincade	<b>OPERATIONAL PERIOD:</b> 10/30-10/31, 0700-0700
<b>DATE ISSUED:</b> 10/29/2019	<b>TIME ISSUED:</b> 2000
<b>UNIT:</b> CA-LNU-019376	<b>SIGNED:</b> 
<b>Typed/printed:</b> Jonathan Pangburn FBAN (T)	

### INPUTS

**WEATHER SUMMARY: RED FLAG WARNING FOR STRONG NE WINDS UNTIL 16:00**

Temp (day): 65-75 max	Temp (night): 28-38 min
RH (day): 5-15% min	RH (night): 18-28% max
Wind (day): NE 5-15 mph, then SW 5-10 mph after 12:00	Wind (Night): SW 4-8, then NE after 22:00

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

The fire will have the potential to make fast down canyon runs when in alignment with drainages, and even faster rates of spread when running up hill. Ember cast into the extremely dry brush and light fuels will cause spot fires to ignite easily, and grow rapidly if left unchecked.

Live Fuel Moistures being recorded at the Geysers was 50% on 10/7/19, 10 points BELOW critical levels.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	7-10 feet (2-3 m)	160-190 ft/min (3-3.5 km/hr)	5 miles (0.8 km)	72%
Grass/Shrub Mix	7-10 feet (2-3 m)	60-80 ft/min (1-1.5 km/hr)	5 miles (0.8 km)	72%
Shrub	7-10 feet (2-3 m)	25-35 ft/min (0.5-0.6 km/hr)	5 miles (0.8 km)	72%
Timber Understory	10-15 feet (3-5 m)	25-35 ft/min (0.5-0.6 km/hr)	6 miles (1 km)	72%

**\*\*minimum safety zone size for grass and brush fuels is 1/3 acre (0.1 Ha) for a Strike Team of Engines.**

**\*\*minimum safety zone size for timber fuels is 2/3 acre (0.25 Ha) for a Strike Team of Engines.**

**\*\*minimum safety zone size for WUI/shrub fuels is 3 acres (1.2 Ha) for a Strike Team of Engines.**

##### SPECIFIC:

**Grass Fuels:** Fuels remain very receptive for ignitions, and will spread rapidly in the strong winds.

**Shrub Fuels:** Moisture levels are below critical and will enable fires to grow easily in any location.

**Timber Fuels:** Single and group tree torching may occur in DIV A, B, D, E, F, and P. Flame lengths will reach >15', and produce good ember cast down wind.

**Branch I:** Watch for torching, especially toward Cobb Mtn. and Mt. Saint Helena, along with high spotting potential. Wind shift will push head fire.

##### AIR OPERATIONS:

Visibility will be greatly reduced in the drainages until the inversions lift. Expect erratic wind conditions over all ridges.

Mixing height: 4,000 ft. AGL. Transport winds will push smoke out to the SW. Sunrise 0736, Sunset 1815.

### SAFETY

**Escape routes:** Be prepared to have multiple locations identified due to the possibility of debris blocking your route.

High winds will have the ability to break off branches and tops of healthy tress, and blow over those weakened by fire.

**Weather getting hotter and drying.**

**Wind increases or changes direction.**

- ⇒ The Geysers area contain vertical and horizontal mines shafts, look down for vertical mines and stay away from horizontal mine openings.
- ⇒ Earthquakes are prevalent throughout the Geysers, LOOK OUT for rolling rocks and take earthquake precautions if earthquakes are felt.
- ⇒ Hydrogen Sulfide (H<sub>2</sub>S) in parts per million can be hazardous, if available utilize air monitoring equipment to detect for this hazard.
- ⇒ Natural steam vents exist in many areas. DO NOT mistake steam for smoke you may be BURNED.
- ⇒ Reclaimed hydrants are painted PURPLE do not drink water from the hydrant system in the Geysers.

### Media Law

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede CAL FIRE's mitigation of the incident or the disturbing of evidence. When working around the media, remember:

- **Media is not permitted** on private property without the property owners permission.
- If approached and questioned by the media and or the public, talk about your assignment or task at hand. Remember to wear all the appropriate PPE.
- If needed call for an incident PIO through the chain of command.
- Never speculate, give opinions or speak for others.
- There is no such thing as an "off the record" comment.

### CAL FIRE Social Media Policy (Social Media 0691)

Social Media is increasingly being used by public agencies, the media as well as the public. This form of communication continues to grow rapidly in order to supply the instant gratification needs of society. Therefore when on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, 0691. You can get further information about the CAL FIRE Social Media Policy from the incident Public Information Officer. While assigned to the incident, there will be no posting of:

- Inappropriate information or materials
- No opinions

# Peer Support Team Message:

## KINCADE INCIDENT PEER SUPPORT:

The gravity of this event is large. Many of us have been impacted by the events that have occurred here, as well as past incidents.

The KINCADE Incident Peer Support Team is a multi-agency team that has been assembled to provide Peer Support. The team consist of members from various Local, State, and Federal Departments who represent fire, law enforcement, ems and public safety. Peers are available at the ICP. Assigned Peers and culturally competent Clinicians are available to help on an individual and/or group basis.

Some of the signs and symptoms you may be experiencing include, but are not limited to:

Irritability, lack of sleep, quick to anger, isolation, above average tobacco use, an increase in negative coping mechanisms such as excessive alcohol and/or substance abuse. You might experience lack of appetite, isolate yourself, or various other unexplained reactions to normal every day events.

You may not be experiencing these symptoms now. However, you may find yourself experiencing them when you return to your home or Unit. You may be triggered by a past event, that has impacted you, while assigned to future incidents. A sight, sound, smell, or touch could trigger a memory, that is affecting you now, but you're not sure why?

If you find yourself in this situation and need to talk to someone, please come by the Peer trailer, or contact your Employee Assistance Program (EAP). EAP programs are here to help. It is important to talk to someone and get stuff off your chest vs carrying this around for your career.

We are here to help.

## **Archaeological and Historic Properties: General Fire-line Guidance.**

**Do not compromise safety for the protection and preservation of archaeological and historic properties.  
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that not much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
