INPUTS

WEATHER SUMMARY:	LIGHT WINDS, DRY
Temp (day): 67-78 max	Temp (night): 28-35 min below inversion; 40-45 above
RH (day): 13-20% min	RH (night): 35-50% max below inversion; 15-20% above
Wind (day): Terrain driven 5-10 mph, then upvalley from SW after 12:00	Wind (Night): SW 4-8, then NE 7-10 G15 after 22:00

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Potential for human ignitions near the fire area; new starts have the potential to make fast runs, especially when in alignment with drainages. Ember cast into the extremely dry brush and light fuels will cause spot fires to ignite easily, and grow rapidly if left unchecked.

Live Fuel Moistures being recorded at the Geysers was 50% on 10/7/19, 10 points BELOW critical levels.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	9-12 feet (2.7-3.6 m)	190-210 ft/min (3.3-8 km/hr)	5 miles (0.8 km)	84%
Grass/Shrub Mix	8-11 feet (2.5-3.3 m)	90-80 ft/min (1-1.6 km/hr)	5 miles (0.8 km)	84%
Shrub	7-10 feet (2-3 m)	25-35 ft/min (0.5-0.6 km/hr)	5 miles (0.8 km)	84%
Timber Understory	10-15 feet (3-4.5 m)	30-40 ft/min (0.6-0.7 km/hr)	7 miles (1.1 km)	84%

****minimum safety zone size for grass and brush fuels is 1/3 acre (0.1 Ha) for a Strike Team of Engines.**

****minimum safety zone size for timber fuels is 2/3 acre (0.25 Ha) for a Strike Team of Engines.**

****minimum safety zone size for WUI/shrub fuels is 3 acres (1.2 Ha) for a Strike Team of Engines.**

SPECIFIC:

- Branch I: Greatest area of potential remains DIV B.
- Branch III / V: Reburn potential exists. Spots could ignite in flashy fuels.
- Branch IV: Minimal fire activity expected.

AIR OPERATIONS:

Strong inversion overnight with marginal improvement by afternoon. Expect limited visibility.
 Mixing height: 3,300 ft. AGL. Minimal transport winds, ~5 mph. Sunrise 0739, Sunset 1811.

SAFETY.

Snags and stump holes are likely in timber areas.

Snags/trees can burn in the upper portions. Look up! Just because there is no fire in the lower trunk doesn't mean it's safe.

Don't fall into the "same old – same old" trap. Fire behavior can change in an instant. **STAY ALERT!**

TRAINING MESSAGE

TRAINERS

REMEMBER TO REVIEW THE TASK BOOK WITH YOUR TRAINEE EACH DAY AND SET GOALS FOR OPERATIONAL PERIODS.

TRAINEES

ALWAYS KEEP YOUR TASK BOOK SECURED.
IF LOST, YOU RUN THE RISK OF LOSING CREDIT FOR THE TASK COMPLETED.

DEMOBING

Prior to demobing please bring the following to Training:

- Task book
 - Evaluations
 - ICS 225's
- If you have all your documents it is not necessary to bring your trainer with you to Training.

Don't train until you get it right, train until you can't get it wrong!!

Any questions please contact the Training Specialist:

- **FLIGHT ARRANGEMENTS MUST BE MADE 48HRS PRIOR TO RELEASE.**
- REPORT TO DEMOB AT APPOINTMENT TIME TO RECEIVE A CHECKOUT FORM (ICS-221), THEN GO TO THE FOLLOWING UNITS TO OBTAIN THE NECESSARY SIGNATURES:
 - ✓ SUPPLY UNIT
 - ✓ COMMUNICATIONS UNIT
 - ✓ GROUND SUPPORT/VEHICLE INSPECTION***
 - ✓ DOCUMENTATION UNIT
 - ✓ TIME UNIT
 - ✓ TRAINING UNIT (IF APPLICABLE)
 - ✓ ACCOMMODATIONS (IF APPLICABLE)

***VEHICLE INSPECTION:

- THE DEMOB UNIT WILL INFORM YOU IF THE VEHICLE NEEDS TO BE INSPECTED.
- YOU MUST HAVE THE ICS-221 DEMOB FORM WITH YOU AT VEHICLE INSPECTION.
- A VEHICLE INSPECTION TIME WILL BE PROVIDED WHEN YOU INITIALLY ARRIVE TO THE DEMOBILIZATION UNIT.
- **DO NOT REPORT FOR VEHICLE INSPECTION PRIOR TO YOUR APPOINTMENT**

HAVE YOUR EQUIPMENT INVENTORY CARD READY WHEN HEADING TO VEHICLE INSPECTION.

RETURN THE COMPLETED ICS-221 FORM TO THE DEMOB UNIT AND TRAVEL HOME SAFE!

KINCADE FINANCE MESSAGE

Shift Tickets:

- DIVS and OPBD must complete shift tickets for all hired equipment, including fallers and runners.
- Turn in completed shift tickets daily to the Time Unit.
- Shift Ticket examples are in the IAP.

eFC-33:

- Report to the Time Unit for initial inputs and updates.

COMP/CLAIMS:

- If any Claims issues arise, document on a ICS-213 and take pictures. Notify the COMP/CLAIMS Unit ASAP for follow-up.
- Computers are setup for IAPS data entry for CAL FIRE personnel.

Out-of-State Resources:

- Single resources report to the Northwest Crews AREP located across from the Finance trailers. Drop off a copy of your agreement/contract as well as CTRs or shift tickets.
- Strike teams report to the OES Incident Support unit located next to Finance trailers. AREPs and forms will be located there.
- Federal Finance will have Demob instructions posted on their trailer.

Media Law

The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, and does not imply that the news media may interfere with incident operations while they are in the areas of concern. If entering such a location that is hazardous, they should be advised; media access cannot be prevented for safety reasons unless their presence would impede CAL FIRE's mitigation of the incident or the disturbing of evidence. When working around the media, remember:

- **Media is not permitted** on private property without the property owners permission.
- If approached and questioned by the media and or the public, talk about your assignment or task at hand. Remember to wear all the appropriate PPE.
- If needed call for an incident PIO through the chain of command.
- Never speculate, give opinions or speak for others.
- There is no such thing as an "off the record" comment.

CAL FIRE Social Media Policy (Social Media 0691)

Social Media is increasingly being used by public agencies, the media as well as the public. This form of communication continues to grow rapidly in order to supply the instant gratification needs of society. Therefore when on a CAL FIRE incident you will adhere to the CAL FIRE Social Media Policy, 0691. You can get further information about the CAL FIRE Social Media Policy from the incident Public Information Officer. While assigned to the incident, there will be no posting of:

- Inappropriate information or materials
- No opinions
- No endorsements
- Inappropriate pictures or videos

Lost and Found

The Information Section will manage Lost and Found items for the incident. If you have lost an item leave your contact information and what you have lost at the Information Section. If you have found an item on the incident bring the item to the Information Section with your contact information as well.

Peer Support Team Message:

KINCADE INCIDENT PEER SUPPORT:

The gravity of this event is large. Many of us have been impacted by the events that have occurred here, as well as past incidents.

The KINCADE Incident Peer Support Team is a multi-agency team that has been assembled to provide Peer Support. The team consist of members from various Local, State, and Federal Departments who represent fire, law enforcement, ems and public safety. Peers are available at the ICP. Assigned Peers and culturally competent Clinicians are available to help on an individual and/or group basis.

Some of the signs and symptoms you may be experiencing include, but are not limited to:

Irritability, lack of sleep, quick to anger, isolation, above average tobacco use, an increase in negative coping mechanisms such as excessive alcohol and/or substance abuse. You might experience lack of appetite, isolate yourself, or various other unexplained reactions to normal every day events.

You may not be experiencing these symptoms now. However, you may find yourself experiencing them when you return to your home or Unit. You may be triggered by a past event, that has impacted you, while assigned to future incidents. A sight, sound, smell, or touch could trigger a memory, that is affecting you now, but you're not sure why?

If you find yourself in this situation and need to talk to someone, please come by the Peer trailer, or contact your Employee Assistance Program (EAP). EAP programs are here to help. It is important to talk to someone and get stuff off your chest vs carrying this around for your career.

We are here to help.

KINDCADE FIRE SUPPRESSION REPAIR GUIDELINES

WORK PRIORITY AREAS

Priority Treatment areas are:

1. Watercourse crossing sites utilized during suppression activities.
2. Firelines, roads, and other areas with exposed soil within 100 feet of a watercourse.
3. Arterial roads; road surfaces and drainage facilities.
4. All dozer lines on slopes.
5. Firelines constructed by hand.
6. Infrastructure damage to property.

REPAIR GUIDELINES

Control lines

- Install waterbars while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression. Waterbars shall have proper angle and open outlets to insure effective drainage. Waterbars spacing should vary depending on slope. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion.
- Waterbars shall only be constructed where the landowner requests them. Waterbars shall be cut diagonally into firm soil at least 6" deep and have a berm at least 6" in height (for a total height of at least 12 inches from the bottom of the cut to the top of the berm). Waterbars should have a 30-45 degree angle to the fall line with an opening left at one end to release water flow. Where feasible, the discharge from waterbars shall be directed into vegetated areas.
- Where slopes exceed the range where dozers can effectively work, waterbars shall be constructed with hand tools.

Waterbar/Cross Drain spacing

Line or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Spacing	200'	150'	100'	75'

Roads

Roads used in fire suppression activities shall be left in the same condition they were found or better.

- Abate dust on native surface roads.
- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Remove outside berms created during suppression activities and incorporate into road surface or re-establish existing berms where applicable.
- Install or maintain waterbars where waterbars previously existed.
- Install new waterbars where needed.
- Install rolling dips where rolling dips previously existed.
- Slash from felled trees adjacent to roads shall be lopped and scattered, chipped or piled for burning.
- Berms and push-piles, adjacent to roads and recently cleared areas shall be spread out to the extent feasible. This may be accomplished by back-blading and/or using ripper shanks or grapples. Debris piled against trees or perched above watercourses is especially important to remove or disperse.

Watercourses

- All slash, loose soil and debris deposited into watercourses during suppression activities shall be removed and stabilized.
- Ford watercourse crossings with continued use shall be stabilized with clean rock to minimize further channel and bank damage.

Concentrations of Slash

- Slash piles created by fire suppression operations within 150' of permanent structures, public roads or private roads shall be lopped and scattered or chipped to create a layer no greater than 18" above the soil surface.
- On properties owned by Bureau of Land Management or California State Parks, slash shall be spread over hand and dozer lines to cover soil to minimize erosion. Slash can be crushed by dozers where feasible.

Miscellaneous Infrastructure

- Fences and gates damaged by suppression efforts shall be repaired to a functional condition. Please inform Situation Unit of any broken fences you find, along with the number of strands and/or type of fence material.

Clean-up

- Scattered trash shall be collected and back-hauled to staging areas, drop points and/or base camp.

**Do not compromise safety for the protection and preservation of archaeological and historic properties.
When possible and prudent:**

1. Be on the lookout for prehistoric and historic archaeological sites. These sites typically occur adjacent to streams and springs, confluences are often especially sensitive. However, sites can occur in other areas too. The most common indicators of prehistoric sites in this area (North Coast Ranges) are scatters of shiny black obsidian flakes from tool making activities and dark midden soils. Historic-era sites include homesteads that contain foundations, rock chimneys, and stone / brick-lined wells. Historic-era mining sites are possible as well.
2. Note, that not much of the area has ever been surveyed for archaeological resources and many sites out there have yet to be discovered.
3. If you observe archaeological resources, flagged or unflagged, attempt to avoid with ground disturbing activities altogether.
4. If avoidance is not possible, minimize ground disturbance. Use a hand crew rather than a dozer to remove fuels from control lines that must cross site areas if possible.
5. Leave all artifacts in place as some may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered resources on a map, better yet, take site coordinates with a GPS. Leave information for the archaeologist so that the sites can be relocated and protected during Fire Suppression Repair. Flag the site in red if possible.
7. If you encounter a burial or other human remains, cease work in that area and contact the archaeologist immediately.

Your help preserving California's non-renewable cultural resources is appreciated.
