

Red Bank Incident

CA-TGU-009386

Incident Action Plan

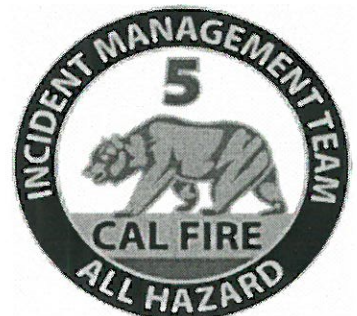

Operational Period

Sep 9th - Sep 10th 2019

0700 - 0700

BOX

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">RED BANK</p>	2. Operational Period:	Date From: 9/9/2019	Date To: 9/10/2019	
		Time From: 0700	Time To: 0700	

3. Objective(s):

Management Objectives

- Utilize Incident Risk Analysis to identify hazardous conditions and apply mitigations to provide for responder and public safety throughout the duration of the incident.
- Utilize appropriate strategy and tactics to ensure protection of infrastructure, private property, and transportation routes.
- Accurately track costs and provide fiscal accountability while ensuring the needs of the incident are met.
- Ensure accurate, timely, and coordinated information is disseminated to the public and stakeholders using social media and community outreach.
- Maintain positive working relations and communications with cooperators by recognizing the needs of the various agencies.
- Continue collaboration and cooperation with South Fire Incident Management Team to ensure operational objectives are met.

Control Objectives

- Keep the fire
- West of Red Bank Oaks
 - East of Hammer Place
 - North of the Sunflower Jeep Trail
 - South of Hwy 36 West

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Red Bank Fire Weather Forecast

FORECAST NO: 3

NAME OF FIRE: Red Bank Fire

PREDICTION FOR: 0700 Mon-0700 Tue (24 hour)

UNIT: CA-TGU

SHIFT DATE: 9/9/19-9/10/19

SIGNED:

TIME AND DATE

Incident Meteorologist: Ryan Walbrun-IMET

FORECAST ISSUED: 1900 hours on 9/8

WEATHER DISCUSSION: Favorable fire weather conditions will continue on Monday with a trough of low pressure along the West Coast. This will keep temperatures near or slightly below normal with generally light winds. The day will start out cool and moist with nearly full humidity recovery this morning. As temperatures warm into the mid 80s the surface based inversion will mix out by midday or early afternoon. Afternoon humidity values will bottom out around 25% by 1500 hours. Light south winds in the morning will turn Northwest in the afternoon but wind speeds will remain light. An incoming trough may generate some afternoon clouds across the coastal range hills west of the Red Bank Fire. For the evening hours expect winds to ease by sunset with good night time humidity recovery and overnight lows around 55.

Weather Forecast for Monday:

WEATHER: Morning smoke mainly from the South Fire lifting then hazy sunshine.

HIGH TEMPERATURES: 81-86. Little change.

HUMIDITY: Afternoon minimum 23-33%. Little change.

20 FT WINDS: Light winds in the morning becoming Northwest 4-8 mph with a few gusts 12 mph after 1500 hours. Strongest winds Branch V. Winds in Branch III on the west side will be more diurnally driven with afternoon upslope into the drainages.

STABILITY/INVERSION: Surface based inversion in the morning lifting by 1200. Good smoke dispersion.

Monday Night: Northwest winds 4-8 mph through 2200 hours then easing. Good humidity recovery 70-90%. Low temperatures 55-60 by Tuesday morning.

Tuesday Forecast: An incoming system will bring some increased northwest winds 6-12 mph gusts 15 mph by afternoon. There will be some increasing clouds over the hills west of the Red Bank Fire. The system will have enough moisture to generate a chance of showers over the hills but NOT over the Red Bank Fire on Tuesday afternoon. Tuesday will be the coolest day of the week with highs around 80.

Extended Forecast: Behind the Tuesday front high pressure will begin to build. This will lead to a period of mainly light north to northeast winds Wednesday morning. These North Winds can often be an ominous signal but right now the wind speeds look light and will coincide with a cool and moist airmass. Building high pressure Wednesday afternoon through Friday leads to a warming and drying trend as afternoon highs warm back into the lower to mid 90s with humidity values back to around 25%. Generally light diurnal winds forecast for late in the week. The weekend looks seasonable with stable high pressure and normal temps.

SAFETY INFORMATION: Take advantage of the moderated fire weather conditions and plan your actions accordingly. Thanks to those sending and taking Weather Observations. Observe the weather to avoid complacency. Is the trend warmer or drier?

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 3	TYPE OF FIRE: Wildland Fire
FIRE NAME: Red Bank	OPERATIONAL PERIOD: 24hr 9/09 (0700-0700)
DATE ISSUED: 09/08	TIME ISSUED: 2100
UNIT: TGU	SIGNED: //Troy Velin// 

INPUTS

WEATHER SUMMARY

See Weather Forecast in IAP.

OUTPUTS

FIRE BEHAVIOR:

Fire activity will be moderated today under light winds and higher humidity's. I do not expect uncontrolled growth on the fire today.

GENERAL:

Fuels in the area range from grass in the lower elevations (cured), and heavy brush in mid elevations (below avg fuel moistures). The fire is in a Fuels and Fire Behavior Advisory for above avg fuel loading.

The topography ranges from rolling hills to steep drainages. The drainages can be narrow and will funnel predominant winds. Ridgetops are also narrow, expect slop overs and spots on fire challenged ridgetops.

Fuel moistures – Sunflower 2000' elevation

- Chamise – 43%.
- Manzanita – 54%

SPECIFIC:

Branch I
DIV's A and B – Minimal fire activity, creeping, smoldering.

Branch III
Minimal fire activity, creeping, smoldering.

Branch V
Consumption of interior fuels will continue.

Branch VII
Minimal fire activity.

All Branches
Interior islands will continue to consume.

AIR OPERATIONS:

Clear except areas of smoke. No inversion expected.

SAFETY

Fire weakened trees and trees damaged from the snow storm in February will need to be monitored.

RED BANK HEALTH AND SAFETY MESSAGE

Maintain Situational Awareness!!!

INCIDENT: Red Bank Incident CA-TGU-009386 | DATE: September 9, 2019 | TIME: 0700-0700

Major Hazards and Risks:

DRIVING—RECEPTIVE FUELS—TERRAIN—FATIGUE—NARROW ROADS

Situational Awareness: access your current situation constantly, maintain radio communication with your division, adjacent divisions, and monitor air-to-ground frequencies to understand what is happening around you at all times. Pay attention to any changes in fire behavior, wind, or any other circumstances.

Mop Up: Conduct a thorough briefing for all personnel. Use all PPE, including eye protection. Maintain proper spacing. Be alert for stump holes. Evaluate unburned islands and stay alert.

Complacency: The strongest weapon against complacency is good leadership. Clearly communicate leader's intent, stay engaged and empower your subordinates. Motivation is the cure for complacency!

Driving: Keep your speeds down on all roads. Be alert for civilian traffic in the fire areas. There are many narrow roads. Park apparatus off the roadway and utilize warning lights. Wear your seatbelts!

Fatigue: Take frequent nutrition and hydration breaks throughout the day. Hydrate with a 2 water to 1 electrolyte drink ratio. Monitor Personnel for fatigue.

Steep slopes/rolling material: Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.

Potential Fire Behavior: Be prepared for new fires to start. Fuels are receptive to fire. Consider P.A.C.E and know your L.C.E.S. Don't be lulled into a false sense of security.

Lookouts, Communication, Escape routes, Safety zones

TAILGATE SAFETY

- **Accountability:** Supervisors know where their crews are at all times
- **Hydration and Nutrition:** Monitor each other for proper hydration and nutrition
- **Communication:** Everyone knows the comm plan and follows it.
- **Briefing:** Leaders intent is fully communicated, and safety briefing is provided
- **Safety gear:** Everyone has the appropriate PPE and is using it
- **LCES:** They are clear and made known to everyone

Planning For Medical Emergencies

Supervisors and all firefighters need to Review your ICS 206 ask and be able to answer the following questions:

What are we going to do if someone gets hurt?

- Is there personnel and equipment available to assist?

How will we get them out of here?

- What is your best extraction and transport method? Road, helispot, hoist? Primary plan and contingency plan in place?

How long will it take to get them to the hospital?

- Will you request air or ground resources?
- Are helicopters able to fly?

Incident Safety Officer: Dan McNamara, SOFI

Incident Commander: Mike Parkes

RED BANK INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS/CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	COMMUNICATION	Maintain radio communication with your supervisor. Monitor your assigned tactical frequency along with the adjacent division radio tactical frequencies. Monitor air-to-ground frequency so they can be your eyes in the sky. Understand your ICS 205 Communication Plan and follow it.
ALL	COMPLACENCY	Don't under estimate the task at hand. Wear full PPE while on the line. Don't get caught off guard
ALL	FIRE BEHAVIOR	Know your LCES and maintain Situational Awareness. Use experienced Look Outs. Adhere to the downhill line construction guidelines. Monitor weather for changes in the wind, temp, and RH during the shift. Have a contingency plan with established decision points and safety zones.
ALL	FATIGUE/HEAT/DEHYDRATION	Be alert for signs of fatigue and take breaks as necessary. Monitor incoming resources for level of fatigue. Drink water before, during and after shifts, up to 1.5 gal. per shift. Be alert for signs of heat stress in yourself and others; use the buddy system. Eat small meals often and when possible Drink electrolyte drinks at a 3 water to 1 sport drink ratio.
ALL	STEEP TERRAIN / ROLLING DEBRIS	Watch your footing while hiking in steep terrain. Be careful of loose rolling debris. Maintain Situational Awareness.
ALL	HAZARD TREES	Identify and isolate the area to provide for the safety of others. Flag and make proper notifications. Do not fall trees out of your certification level.
ALL	LINE CONSTRUCTION	Conduct thorough briefing for all personnel (inside rear cover IRPG). Ensure LCES in place prior to engagement. Establish adequate safety zones. Use Downhill Line Checklist. Follow "Look Up, Look Down, Look Around" procedures. Utilize Risk Management Process. Reference the IRPG.
ALL	DRIVING HAZARDS	Slow Down! Drive defensively! Expect the unexpected around every curve. Drive with headlights and seatbelts on. Narrow roads with limited passing room. Coordinate your movements on one-lane roads, follow traffic plans.
ALL	AIRCRAFT OPERATIONS	Monitor air-to-ground frequency, they are your eyes in the sky. Use air-to-ground frequency to communicate with aircraft. Use clear, concise statements when directing aircraft. Only utilize aircraft to insert personnel on the line when necessary.
ALL	DOZER SAFETY	Watch for rolling material. Monitor safe working distances. Avoid working below dozer. Utilize communication with the operator (radio or hand signals)
ALL	PERFORM TAIL GATE SAFETY MEETINGS	Everyone should be briefed on the conditions and circumstances regarding the fire and their assignments per the IRPG.

8. MEDICAL EMERGENCY PROCEDURES

EMERGENCY FREQUENCY:

“LINE EMERGENCY”

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
 1. Closest EMS resource
 2. Communications Unit
- Communications Unit contacts:
 1. Ground or Air ambulance as requested
 2. Operations
 3. Safety
 4. Medical Unit
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
 1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

CAMP EMERGENCY:

Contact Medical Unit with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:

1. Communications	4. Operations
2. Safety	5. Crew Supervisor
3. Logistics	6. Comps/Claims

INJURY REPORTING PROCEDURES

CHIEF COMPLAINT _____
 LOCATION OF PATIENT _____
 POINT OF CONTACT _____
 TRANSPORTATION REQUESTED BY: AIR ___ GROUND ___
 POINT OF PICKUP _____
 LAT _____ LONG _____
 PATIENT UNIT ID _____
 IS AN EMT/P WITH PATIENT: YES ___ NO ___
 AGE _____ SEX: MALE ___ FEMALE ___

**ALL EMERGENCIES---Secure the area
and identify witnesses for later investigation.**

Keep an accurate log of events.

FINANCE MESSAGE
REDBANK INCIDENT
CA-TGU-009386

Absolutely no offsite feeding is allowed without prior approval!!

CAL FIRE PERSONNEL

Make sure to stop by the Time Unit and start or update your FC-33.

LOCAL GOVERNMENT RESOURCES

Make sure you check in with Cal OES to start your F-42 Paperwork.

ALL HIRED EQUIPMENT

Check in with Equipment Time ASAP to drop off your agreement and start your pay document.

ALL SUPERVISORS OF HIRED EQUIPMENT

Shift Tickets for hired equipment need to be signed and turned in to Equipment Time daily. Ensure the shift ticket is filled out completely (including evaluation), accurately and legibly.

PROPERTY DAMAGE or INJURIES

Please report any property damage caused by suppression activities and/or injuries to the COMP/CLAIMS Unit Leader.

TIFFANY TRACY
FINANCE SECTION CHIEF

PUBLIC INFORMATION SECTION

Incident Information Line: (530) 690-5699

STATUS	
Incident Start Date: 9/5/19	Incident Start Time: 12:19 p.m.
Cause: Lightning	Acres:
Containment:	Total Personnel:

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.
Address mail to: Red Banks Incident, Tehama County Fairgrounds.
ATTN: Name and Request Number 650 Antelope Blvd, Red Bluff CA 96080

INCIDENT MANAGEMENT TEAM 5

DEMOBILIZATION MESSAGE Red Bank Incident CA-TGU-009386

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

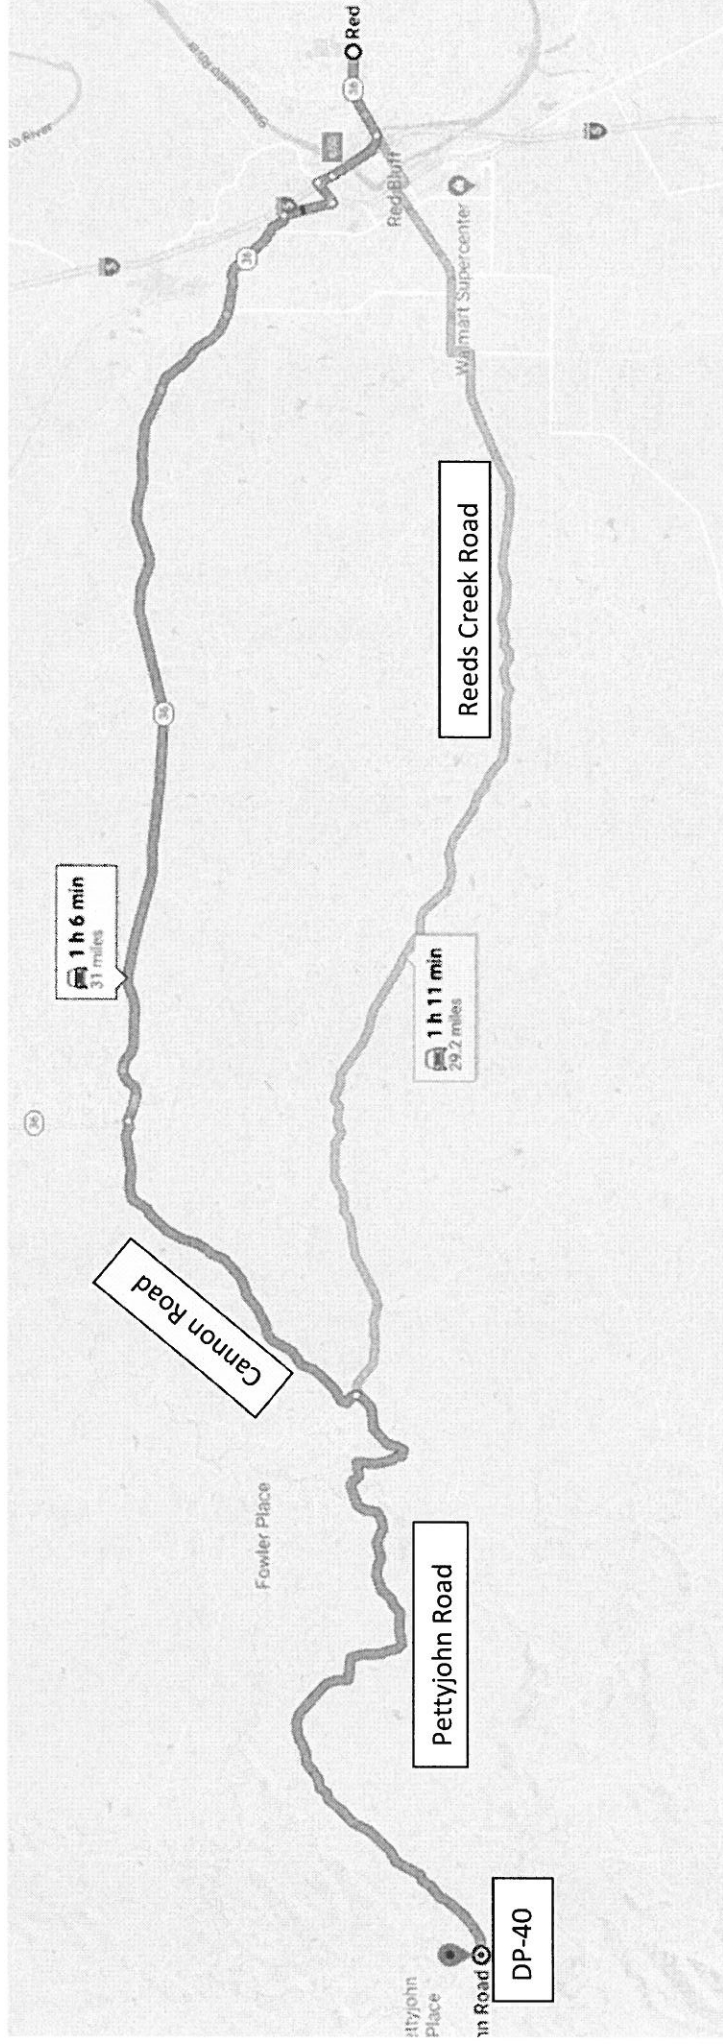

BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

BE THOROUGH AND EFFICIENT

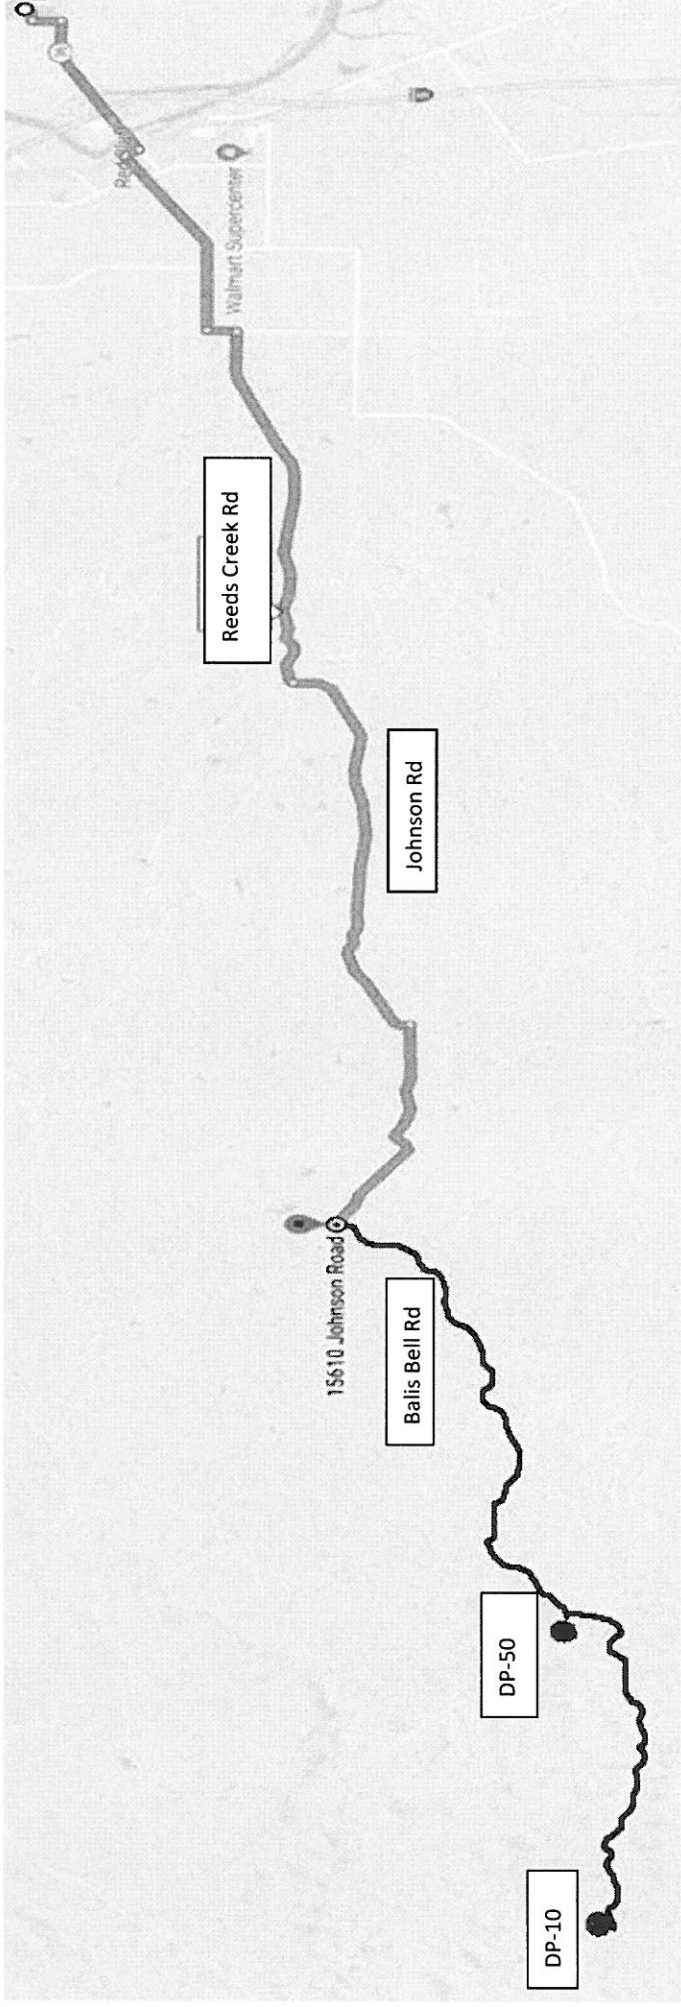

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.
