# Fire and COVID-19 Briefing Checklist

# Self-Awareness / Screening

- Immediately separate yourself from others.
- Notify supervisor if you or others experience:
  - Cough, more than expected
  - Shortness of breath or difficulty breathing
  - New loss of taste or smell
  - . Fever
  - Chills
  - Sore throat
  - . Muscle pain
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

# Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
- Avoid handshakes and communal use items.
- Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.
- Disinfect high touch surfaces often:
  - 。 Radios, phones, doors, pumps, fuel cans, etc.

# Social Distancing and Protective Equipment

- □ Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
- Utilize face coverings as a tool when practical.
- Clean or replace dirty face coverings, equipment, and PPE.

## **Communications**

Face coverings and social distancing complicate communications.
 Ensure effective sender/receiver messaging.

# Protect yourself, your crew, and your camp!

#### Fire Weather Forecast – Butte-Tehama-Glenn Lightning 2020

FORECAST NO: 11

PREDICTION FOR: Sunday-Sunday night. SHIFT DATE: 08/30-31/2020 0700-0700

TIME AND DATE

FORECAST ISSUED: 08/29/2020 1900

**ZONE:** Butte UNIT: CA-BTU SIGNED:

# \*\*\*HOT, DRY and UNSTABLE TODAY WITH POOR RH RECOVERY TONIGHT\*\*\*

**DISCUSSION**: Today will start very similar to Saturday. Smoke through the day will once again help to keep temperatures a few degrees cooler and minimum humidites a bit moister. Winds will be diurnal and slope-driven, similar to Saturday. By late in the day, a system to our north will bring a northerly wind influence. This should help to clear some of the smoke during the evening. It will also lead to very poor recoveries overnight Sunday into Monday. With clear and very dry air on Monday, this will lead to an unstable atmosphere through the entire day. Favorable NE wind alignment is expected overnight Monday into Tuesday creating another night of poor recovery. Expect hot and dry conditions to continue through the week.

Little activity anticipated. Continued unstable, hot, and dry air maintain spotting potential. 1,000-hr dead fuel moisture at 90<sup>th</sup> percentile. Severe Drought conditions. Brush at critical fuel moisture.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

<b>医现代外外表现象的变形形式</b>	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition	
Grass	< 5' (1.5 m)	20 ch/hr (0.4 km/hr)	< 1/4 mile (.4 km)	90%

<sup>\*\*</sup>minimum safety zone size is 1/4-acre (0.1 Ha) for a Strike Team of Engines.

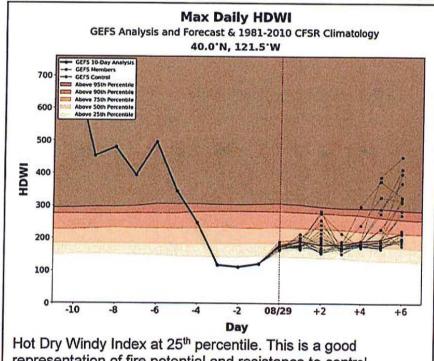

#### SPECIFIC:

Hot and dry air may create active fire behavior. Watch for roll out & spotting with high probability of ignition.

**Branch I:** Butte Creek drainage still may see spotting and roll out. Mainly smoldering fire in understory. No fire growth expected.

Branch V / X: No anticipated fire growth.

High potential remains for upslope runs and roll out. Watch for spotting through the night, especially with N wind arriving.

# representation of fire potential and resistance to control.

#### AIR OPERATIONS:

Smoky. Reduced visibility. Smoke may limit air assets.

Mixing height: 6,000 ft. AGL. Transport winds: SW 5 mph, Sunrise 0633, Sunset 1941.

#### SAFETY

Ensure safety zones are large enough for the intense heat and fire behavior associated with the fuel loading.

Watch Out #16: Getting frequent spot fires across the fireline!!!

#### SPECIFIC:

DIV A / B: Torching & spotting. Fire will continue to threaten line on Brushy Ridge, toward Turkey Mullen Gulch, Handy Camp Gulch, Sulphur Spring, and South Fork Cottonwood Creek.

DIV X: Torching & spotting. Active fire behavior toward Slides Glade and Oven Lid.

DIV V: Roll out & spotting. Spread toward Grau Mine & North Fork Elder Creek.

DIV C / N / Q / T: No fire activity expected.

Rapid rates of spread & extremely high potential for spotting. Watch for spotting through the night, especially with N wind arriving around 0200.

Watch for Tathum & Glade fires coming from south, impacting DIV A, X, V

#### AIR OPERATIONS:

Smoky. Reduced visibility. Smoke may limit air assets.

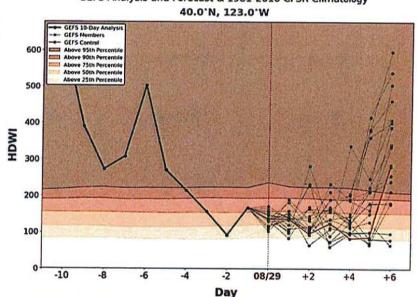

Mixing height: 5,000 ft. AGL. Transport winds: E/NE 7 mph, Sunrise 0637, Sunset 1945.

#### SAFETY

Ensure safety zones are large enough for the intense heat and fire behavior associated with the fuel loading. Watch Out #16: Getting frequent spot fires across the fireline!!!

#### Max Daily HDWI

GEFS Analysis and Forecast & 1981-2010 CFSR Climatology

Hot Dry Windy Index down to around 50th percentile. This is a good representation of fire potential and resistance to control.

# **Watch Out**

# **FATIGUE**

# Fatigue is a Major safety issue

- Extended days on duty can lead to injuries and sickness
- Hot weather can lead to dehydration, heat related illiness, serious medical condtions.
- Inability to focus, confusion.

# Mitigation

- Pace yourself and your crew.
- Hydrate! Hydrate! Hydrate!
- Watch out for each other. Take care of your crew

# UNDERSTANDING THE PLAN

# Everyone needs a breifing

### Watch Out

- Operational briefing not passed down to lowest level.
- Objectives not clear.
- Lack of participation at briefing.

# **Mitigation**

- Leaders to provide complete briefings and ensure their subordinates have a clear understanding of the plans intent.
- Supervisors will ensure briefings are attended and personnel understand their role.
- All personnel who have not received a briefing shall notify their direct supervisor prior to engaging.

# **DEFENSIVE DRIVING**

# REDUCE YOUR EXPOSURE

- SLOW DOWN! SLOW DOWN! SLOW DOWN!
  - Drive safely for the conditions of the road
  - Expect that someone will be in the road around the next turn
  - Anticipate what other drivers may do

### RE: Virtual Finance Support

If you are assigned to a CAL FIRE managed incident, you have noticed that there is no "federal" time unit on site. We have developed a virtual finance section to provide you with your invoices/time sheets. We will need for you to <a href="mailto:scan and email">scan and email</a> your documents to the <a href="mailto:R5.CalFire.Support@firenet.gov">R5.CalFire.Support@firenet.gov</a> email address. (If you do not have a "scanning" app on your phone and/or computer you may visit the clerical trailer. If no clerical trailer is available check in with the Finance Section for assistance.) In the subject line enter:

TIME - Resource # - Company/Person Name - Attachment description - Fire Name/Number

### Contract Crew/Equipment:

We need for you to send us the following information (even if you have submitted it to the CAL FIRE finance unit):

- Contact name, phone number, and email for on-site "leader"
- Resource Order
- Contract (Pages 1-2 and any additional pages referencing equipment/resource information)
- Crew Manifest
- Inspection (if one was done)
- Shift Tickets (signed by you and your incident supervisor) / CTRs (signed by your incident supervisor)

# Administratively Determined (AD) Resources:

We need for you to send us the following information:

- Contact phone number and email
- Resource Order
- Casual Hire Form
- CTRs (signed by your incident supervisor)

#### Federal Employees:

As of right now, we are not planning to create OF-288s for Federal "regular" employees. Each of you can utilize your CTRs as your backup documentation for submitting your time sheets.

IF, however you require an OF-288, we will do our best to accommodate your needs. If you are claiming Hazard Pay, just like always, you must provide a justification for the claim ("H=Hazard") is NOT enough. Use "action verbs" to explain what/why you are claiming the hazard.

#### WHEN YOU ARE CLOSE TO DEMOB:

- Give Finance a "Courtesy Email" 1-2 days prior to make sure all your documents have been received.
- Submit all time documentation (including travel home) ahead of demob.
- Send an email the morning of your demob to the Support email so the demob process can be started from the virtual finance group.

EMAIL: R5.CalFire.Support@firenet.gov

Please do not wait until the end of your assignment to get us your information. Since we are virtual, the process will take additional time.

# FIRE SUPPRESSION REPAIR Butte, Tehama, Glenn COMPLEX: CA-BTU-009692

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities, it is not the repair of areas damaged by the fire. We cannot upgrade facilities beyond their pre-fire condition. Any projects too large or complicated to be completed by the Fire Suppression Repair Group shall be turned over to the local Unit or the Comp/ Claims Unit.

Start Early!

Fire Suppression Repair needs should be reported on the attached form as soon as discovered. To the extent feasible, repair work should start as soon as practical. However, repair activities shall not hamper or conflict with fire suppression actions. When possible, construct waterbreaks (waterbars) on all dozer lines, handlines, and safety zones concurrent with line construction or mop-up operations. Scattered trash shall be collected and deposited at Drop Points. Police your areas.

Repair Site Inventory:

Field Observers and Fire Suppression Repair Group resources will be traveling throughout the fire looking for repair needs. All fire line resources are asked to contribute any known issues. The Suppression Repair Group will then evaluate each site, develop a specific repair plan, and schedule an appropriate repair with necessary resources.

Infrastructure Damage:

Report the location and type of suppression damage to infrastructure. Common examples of such features include:

- Fences /gates
- Culvert/ Bridge/ Other watercourse crossings
- Water sources
- Utility distribution line; above/below ground.
- Restore barriers on roads previously closed but opened for suppression activities.
- Remove trash and debris, including flagging and signs when no longer needed.
- Misc. damage to residential property

#### Natural Resource Damage:

This category represents repairing existing problems caused by fire suppression activities (direct effect) and to prevent likely future problems such as accelerated erosion caused by winter rains (indirect effect).

- Construct drivable waterbars or rolling dips on unsurfaced roads.
- Construct waterbars on all dozer and hand lines according to the following Specifications: Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed onto least erodible material possible.

Line or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Waterbreak Spacing	100'	100'	75'	50'

- Remove all berms created by suppression activities unless necessary to divert runoff from a sensitive site.
- Clean culverts and drainage facilities plugged with soil and debris by fire suppression activities.
- All slash, soil, and debris deposited into watercourses shall be removed and stabilized.
- All work within 100 feet of a watercourse, cultural site or other sensitive location shall be performed by hand crews to avoid further damage. This applies to all direct and indirect lines.

#### **Cultural Site Damage:**

Report any disturbance to a known or suspected archaeological/historical site through chain of command to the incident Archaeologist and/or the Fireline Suppression Repair Group immediately. This includes any air tanker drops upon a site. Use least disturbing suppression methods possible unless life safety is at risk. Flag site perimeter for identification. Removing or disturbing any artifact is not permissible.

## Comp Claims Issues:

Damaged resources that are too large or complex for the Fireline Suppression Group to handle shall be turned over to Comp Claims for processing. Examples of such issues include damage to pavement, bridges, pipelines, etc.

# CAL FIRE

# INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

# California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

# Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

# Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

#### **Aviation Operations-**

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

# **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

### Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

# Management and Supervision-

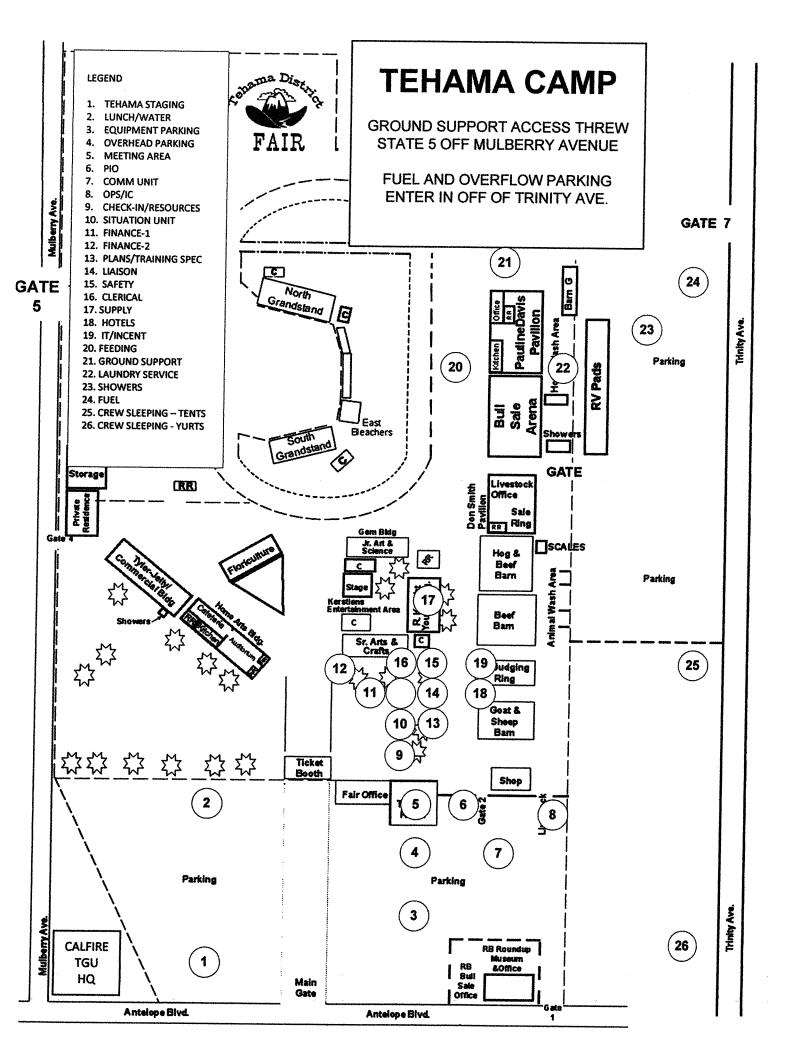

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- · Review this check list and brief daily.
