WEATHER SUMMARY

\*\*CLEAR AIR; HOT, DRY, UNSTABLE\*\*

See Weather Forecast in IAP.

### **OUTPUTS**

#### GENERAL:

#### **BUTTE ZONE**

Little activity anticipated. Continued unstable, hot, and dry air maintain spotting potential. 1,000-hr dead fuel moisture at 90<sup>th</sup> percentile. Severe Drought conditions. Brush at critical fuel moisture.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

ECCUPATION DESCRIPTION	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	< 5' (1.5 m)	25 ch/hr (0.5 km/hr)	< 1/4 mile (.4 km)	90%
Grass/Shrub Mix	< 5' (1.5 m)	15 ch/hr (0.3 km/hr)	< 1/4 mile (.4 km)	90%
Shrub	< 5' (1.5 m)	5 ch/hr (0.1 km/hr)	< 1/4 mile (.4 km)	90%

Timber Litter	< 3' (0.9 m)	5 ch/hr (0.1 km/hr)	< 1/4 mile (.4 km)	90%

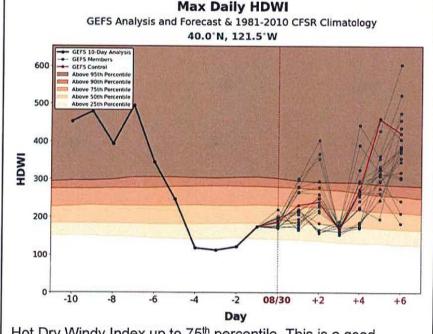

<sup>\*\*</sup>minimum safety zone size is 1/4-acre (0.1 Ha) for a Strike Team of Engines.

### SPECIFIC:

**Branch I:** Butte Creek drainage still may see spotting and roll out. Mainly smoldering fire in understory. No fire growth expected.

**Branch V / X:** No anticipated fire growth.

Look up! Fire weakened trees may fall with wind gusts. These may be difficult to feel at the surface, under sheltering.

Hot Dry Windy Index up to 75<sup>th</sup> percentile. This is a good representation of fire potential and resistance to control.

### AIR OPERATIONS:

Mostly clear.

Mixing height: 8,000 ft. AGL. Transport winds: NW 10 mph, Sunrise 0634, Sunset 1940.

### SAFETY

Fires tend to give you warning that they are about to get up and move! Watch for these thresholds: Temperatures at 90+ degrees, humidity below 20%, and winds more than 20 m.p.h. HEED these thresholds and COMMUNICATE them to those around you.

# **ACCIDENTS AND INJURY REVIEWS**

**CAUSAL AND CONTRIBUTING FACTORS** 

# Burns, Disfigurement and Fatalities have been the result of these factors:

- Personal Protective Equipment (PPE)
  - Know how to use appropriately and wear the PPE issued to you
  - Maintain the PPE issued to you and replace when dirty or worn
  - Understand the limitations of the PPE issued to you
- Communications
  - Know how to use your Handie Talkie / Mobile Radio
  - Understand the communication plan (ICS 205) in the IAP
  - Make instructions clear and confirm the plan and expectations are understood
- Understand the limitations of yourself, your crew and your equipment
  - As a leader, recognizing the strengths and weaknesses of each will provide a higher probability of success when challenged with a common mission or task.

# **OPERATIONAL BRIEFING**

All personnel need a briefing

# Watch Out

- Operational briefing not passed down to lowest level
- Operational picture isn't understood or not followed
- Unauthorized tactics used without preparation or notification

# <u>Mitigation</u>

- Leaders are responsible to complete briefings and ensure their subordinates have a clear understanding of the operational picture
- Leaders will ensure briefings are attended and personnel understand the tactics supporting the overall plan
- The Go-No Go checklist will be used for any unauthorized tactics

# DEFENSIVE DRIVING REDUCE YOUR EXPOSURE

- Drive safely for the conditions of the road
- Expect that someone will be in the road around the next turn
- Anticipate what other drivers may do

### RE: Virtual Finance Support

If you are assigned to a CAL FIRE managed incident, you have noticed that there is no "federal" time unit on site. We have developed a virtual finance section to provide you with your invoices/time sheets. We will need for you to <a href="mailto:scan and email">scan and email</a> your documents to the <a href="mailto:R5.CalFire.Support@firenet.gov">R5.CalFire.Support@firenet.gov</a> email address. (If you do not have a "scanning" app on your phone and/or computer you may visit the clerical trailer. If no clerical trailer is available check in with the Finance Section for assistance.) In the subject line enter:

TIME - Resource # - Company/Person Name - Attachment description - Fire Name/Number

### Contract Crew/Equipment:

We need for you to send us the following information (even if you have submitted it to the CAL FIRE finance unit):

- Contact name, phone number, and email for on-site "leader"
- Resource Order
- Contract (Pages 1-2 and any additional pages referencing equipment/resource information)
- Crew Manifest
- Inspection (if one was done)
- Shift Tickets (signed by you and your incident supervisor) / CTRs (signed by your incident supervisor)

# Administratively Determined (AD) Resources:

We need for you to send us the following information:

- Contact phone number and email
- Resource Order
- Casual Hire Form
- CTRs (signed by your incident supervisor)

#### Federal Employees:

As of right now, we are not planning to create OF-288s for Federal "regular" employees. Each of you can utilize your CTRs as your backup documentation for submitting your time sheets.

IF, however you require an OF-288, we will do our best to accommodate your needs. If you are claiming Hazard Pay, just like always, you must provide a justification for the claim ("H=Hazard") is NOT enough. Use "action verbs" to explain what/why you are claiming the hazard.

#### WHEN YOU ARE CLOSE TO DEMOB:

- Give Finance a "Courtesy Email" 1-2 days prior to make sure all your documents have been received.
- Submit all time documentation (including travel home) ahead of demob.
- Send an email the morning of your demob to the Support email so the demob process can be started from the virtual finance group.

EMAIL: R5.CalFire.Support@firenet.gov

Please do not wait until the end of your assignment to get us your information. Since we are virtual, the process will take additional time.

# FIRE SUPPRESSION REPAIR Butte, Tehama, Glenn COMPLEX: CA-BTU-009692

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities, it is not the repair of areas damaged by the fire. We cannot upgrade facilities beyond their pre-fire condition. Any projects too large or complicated to be completed by the Fire Suppression Repair Group shall be turned over to the local Unit or the Comp/ Claims Unit.

### Start Early!

Fire Suppression Repair needs should be reported on the attached form as soon as discovered. To the extent feasible, repair work should start as soon as practical. However, repair activities shall not hamper or conflict with fire suppression actions. When possible, construct waterbreaks (waterbars) on all dozer lines, handlines, and safety zones concurrent with line construction or mop-up operations. Scattered trash shall be collected and deposited at Drop Points. Police your areas.

# Repair Site Inventory:

Field Observers and Fire Suppression Repair Group resources will be traveling throughout the fire looking for repair needs. All fire line resources are asked to contribute any known issues. The Suppression Repair Group will then evaluate each site, develop a specific repair plan, and schedule an appropriate repair with necessary resources.

## **Infrastructure Damage:**

Report the location and type of suppression damage to infrastructure. Common examples of such features include:

- Fences /gates
- Culvert/ Bridge/ Other watercourse crossings
- Water sources
- Utility distribution line; above/below ground.
- Restore barriers on roads previously closed but opened for suppression activities.
- Remove trash and debris, including flagging and signs when no longer needed.
- Misc. damage to residential property

# Natural Resource Damage:

This category represents repairing existing problems caused by fire suppression activities (direct effect) and to prevent likely future problems such as accelerated erosion caused by winter rains (indirect effect).

- Construct drivable waterbars or rolling dips on unsurfaced roads.
- Construct waterbars on all dozer and hand lines according to the following Specifications: Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed onto least erodible material possible.

Line or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Waterbreak Spacing	100'	100'	75'	50'

- Remove all berms created by suppression activities unless necessary to divert runoff from a sensitive site.
- Clean culverts and drainage facilities plugged with soil and debris by fire suppression activities.
- All slash, soil, and debris deposited into watercourses shall be removed and stabilized.
- All work within 100 feet of a watercourse, cultural site or other sensitive location shall be performed by hand crews to avoid further damage. This applies to all direct and indirect lines.

#### **Cultural Site Damage:**

Report any disturbance to a known or suspected archaeological/historical site through chain of command to the incident Archaeologist and/or the Fireline Suppression Repair Group immediately. This includes any air tanker drops upon a site. Use least disturbing suppression methods possible unless life safety is at risk. Flag site perimeter for identification. Removing or disturbing any artifact is not permissible.

## **Comp Claims Issues:**

Damaged resources that are too large or complex for the Fireline Suppression Group to handle shall be turned over to Comp Claims for processing. Examples of such issues include damage to pavement, bridges, pipelines, etc.

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

# Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

#### Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

#### **Private Water Supplies-**

- Notify property owner as early as possible.
