Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Immediately separate yourself from others.
- Notify supervisor if you or others experience:
 - 。 Cough, more than expected
 - Shortness of breath or difficulty breathing
 - New loss of taste or smell
 - Fever
 - 。 Chills
 - 。 Sore throat
 - Muscle pain
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
- Avoid handshakes and communal use items.
- Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.
- Disinfect high touch surfaces often:
 - 。 Radios, phones, doors, pumps, fuel cans, etc.

Social Distancing and Protective Equipment

- □ Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
- Utilize face coverings as a tool when practical.
- Clean or replace dirty face coverings, equipment, and PPE.

Communications

Face coverings and social distancing complicate communications.
 Ensure effective sender/receiver messaging.

Protect yourself, your crew, and your camp!

Fire Weather Forecast - Butte-Tehama-Glenn Lightning 2020

ZONE: Butte UNIT: CA-BTU

SIGNED:

Mike Ottenweller

Incident Meteorologist

HOT DRY AND UNSTABLE TODAY

DISCUSSION: Clear skies early should allow for a very quick warm up today. This will create another hot and dry day across the zone with moderate instability. Winds will be breezy out of the north along the ridges in the morning, but should become lighter and more slope driven during the day. Winds overnight into Tuesday will align with the slope and become gusty, especially in NE-SW oriented valleys. This will yield very poor recoveries, especially at higher elevations. The rest of the week will continue to feature hot and dry conditions with increasing smoke.

^{**}minimum safety zone size is 1/4-acre (0.1 Ha) for a Strike Team of Engines.

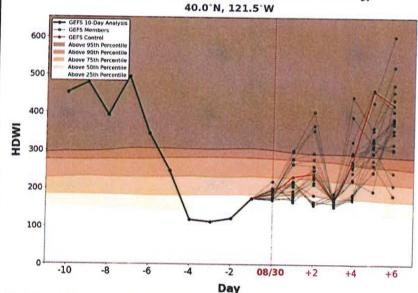

SPECIFIC:

Branch I: Butte Creek drainage still may see spotting and roll out. Mainly smoldering fire in understory. No fire growth expected.

Branch V / X: No anticipated fire growth.

Look up! Fire weakened trees may fall with wind gusts. These may be difficult to feel at the surface, under sheltering.

Max Daily HDWI GEFS Analysis and Forecast & 1981-2010 CFSR Climatology 40.0°N, 121.5°W

Hot Dry Windy Index up to 75th percentile. This is a good representation of fire potential and resistance to control.

AIR OPERATIONS:

Mostly clear.

Mixing height: 8,000 ft. AGL. Transport winds: NW 10 mph, Sunrise 0634, Sunset 1940.

SAFETY

Fires tend to give you warning that they are about to get up and move! Watch for these thresholds: Temperatures at 90+ degrees, humidity below 20%, and winds more than 20 m.p.h. HEED these thresholds and COMMUNICATE them to those around you.

SPECIFIC:

DIV A: Torching & spotting Van Ridge & Sulphur Spring, moving to Syd Cabin Ridge & S Fork Cottonwood Crk

DIV B: Fire will threaten line on Brushy Ridge toward Turkey Mullen Gulch.

DIV X: Torching & spotting. Active fire behavior toward Slides Glade and Oven Lid.

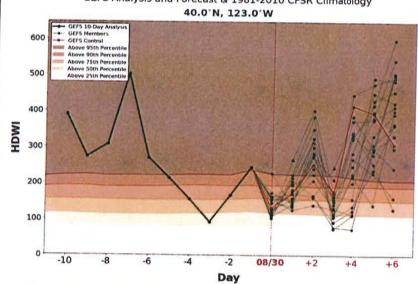

DIV V: Fire will test line, toward Grau Mine & North Fork Elder Creek.

DIV C / N / Q / T: No fire activity expected.

Watch for Tathum & Glade fires coming from south, impacting DIV A, X, V & Raglin Ridge Road

Max Daily HDWI

GEFS Analysis and Forecast & 1981-2010 CFSR Climatology

Hot Dry Windy Index down to around 50th percentile. This is a good representation of fire potential and resistance to control.

AIR OPERATIONS:

Mostly clear. Possible plume development obscuring southern DIVS & Glenn Zone. Mixing height: 10,000 ft. AGL. Transport winds: NE 8 mph, Sunrise 0638, Sunset 1944.

SAFETY

Fires tend to give you warning that they are about to get up and move! Watch for these thresholds: Temperatures at 90+ degrees, humidity below 20%, and winds more than 20 m.p.h. HEED these thresholds and COMMUNICATE them to those around you.

ACCIDENTS AND INJURY REVIEWS

CAUSAL AND CONTRIBUTING FACTORS

Burns, Disfigurement and Fatalities have been the result of these factors:

- Personal Protective Equipment (PPE)
 - Know how to use appropriately and wear the PPE issued to you
 - Maintain the PPE issued to you and replace when dirty or worn
 - Understand the limitations of the PPE issued to you
- Communications
 - Know how to use your Handie Talkie / Mobile Radio
 - Understand the communication plan (ICS 205) in the IAP
 - Make instructions clear and confirm the plan and expectations are understood
- Understand the limitations of yourself, your crew and your equipment
 - As a leader, recognizing the strengths and weaknesses of each will provide a higher probability of success when challenged with a common mission or task.

OPERATIONAL BRIEFING

All personnel need a briefing

Watch Out

- Operational briefing not passed down to lowest level
- Operational picture isn't understood or not followed
- Unauthorized tactics used without preparation or notification

<u>Mitigation</u>

- Leaders are responsible to complete briefings and ensure their subordinates have a clear understanding of the operational picture
- Leaders will ensure briefings are attended and personnel understand the tactics supporting the overall plan
- The Go-No Go checklist will be used for any unauthorized tactics

DEFENSIVE DRIVING REDUCE YOUR EXPOSURE

- Drive safely for the conditions of the road
- Expect that someone will be in the road around the next turn
- ✓ Anticipate what other drivers may do

RE: Virtual Finance Support

If you are assigned to a CAL FIRE managed incident, you have noticed that there is no "federal" time unit on site. We have developed a virtual finance section to provide you with your invoices/time sheets. We will need for you to scan and email your documents to the R5.CalFire.Support@firenet.gov email address. (If you do not have a "scanning" app on your phone and/or computer you may visit the clerical trailer. If no clerical trailer is available check in with the Finance Section for assistance.) In the subject line enter:

TIME - Resource # - Company/Person Name - Attachment description - Fire Name/Number

Contract Crew/Equipment:

We need for you to send us the following information (even if you have submitted it to the CAL FIRE finance unit):

- Contact name, phone number, and email for on-site "leader"
- Resource Order
- Contract (Pages 1-2 and any additional pages referencing equipment/resource information)
- Crew Manifest
- Inspection (if one was done)
- Shift Tickets (signed by you and your incident supervisor) / CTRs (signed by your incident supervisor)

Administratively Determined (AD) Resources:

We need for you to send us the following information:

- Contact phone number and email
- Resource Order
- Casual Hire Form
- CTRs (signed by your incident supervisor)

Federal Employees:

As of right now, we are not planning to create OF-288s for Federal "regular" employees. Each of you can utilize your CTRs as your backup documentation for submitting your time sheets.

IF, however you require an OF-288, we will do our best to accommodate your needs. If you are claiming Hazard Pay, just like always, you must provide a justification for the claim ("H=Hazard") is NOT enough. Use "action verbs" to explain what/why you are claiming the hazard.

WHEN YOU ARE CLOSE TO DEMOB:

- Give Finance a "Courtesy Email" 1-2 days prior to make sure all your documents have been received.
- Submit all time documentation (including travel home) ahead of demob.
- Send an email the morning of your demob to the Support email so the demob process can be started from the virtual finance group.

EMAIL: R5.CalFire.Support@firenet.gov

Please do not wait until the end of your assignment to get us your information. Since we are virtual, the process will take additional time.

FIRE SUPPRESSION REPAIR Butte, Tehama, Glenn COMPLEX: CA-BTU-009692

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities, it is not the repair of areas damaged by the fire. We cannot upgrade facilities beyond their pre-fire condition. Any projects too large or complicated to be completed by the Fire Suppression Repair Group shall be turned over to the local Unit or the Comp/ Claims Unit.

Start Early!

Fire Suppression Repair needs should be reported on the attached form as soon as discovered. To the extent feasible, repair work should start as soon as practical. However, repair activities shall not hamper or conflict with fire suppression actions. When possible, construct waterbreaks (waterbars) on all dozer lines, handlines, and safety zones concurrent with line construction or mop-up operations. Scattered trash shall be collected and deposited at Drop Points. Police your areas.

Repair Site Inventory:

Field Observers and Fire Suppression Repair Group resources will be traveling throughout the fire looking for repair needs. All fire line resources are asked to contribute any known issues. The Suppression Repair Group will then evaluate each site, develop a specific repair plan, and schedule an appropriate repair with necessary resources.

Infrastructure Damage:

Report the location and type of suppression damage to infrastructure. Common examples of such features include:

- Fences /gates
- Culvert/ Bridge/ Other watercourse crossings
- Water sources
- Utility distribution line; above/below ground.
- Restore barriers on roads previously closed but opened for suppression activities.
- Remove trash and debris, including flagging and signs when no longer needed.
- Misc. damage to residential property

Natural Resource Damage:

This category represents repairing existing problems caused by fire suppression activities (direct effect) and to prevent likely future problems such as accelerated erosion caused by winter rains (indirect effect).

- Construct drivable waterbars or rolling dips on unsurfaced roads.
- Construct waterbars on all dozer and hand lines according to the following Specifications: Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed onto least erodible material possible.

Line or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Waterbreak Spacing	100'	100'	75'	50'

- Remove all berms created by suppression activities unless necessary to divert runoff from a sensitive site.
- Clean culverts and drainage facilities plugged with soil and debris by fire suppression activities.
- All slash, soil, and debris deposited into watercourses shall be removed and stabilized.
- All work within 100 feet of a watercourse, cultural site or other sensitive location shall be performed by hand crews to avoid further damage. This applies to all direct and indirect lines.

Cultural Site Damage:

Report any disturbance to a known or suspected archaeological/historical site through chain of command to the incident Archaeologist and/or the Fireline Suppression Repair Group immediately. This includes any air tanker drops upon a site. Use least disturbing suppression methods possible unless life safety is at risk. Flag site perimeter for identification. Removing or disturbing any artifact is not permissible.

Comp Claims Issues:

Damaged resources that are too large or complex for the Fireline Suppression Group to handle shall be turned over to Comp Claims for processing. Examples of such issues include damage to pavement, bridges, pipelines, etc.

CAL FIRE

INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

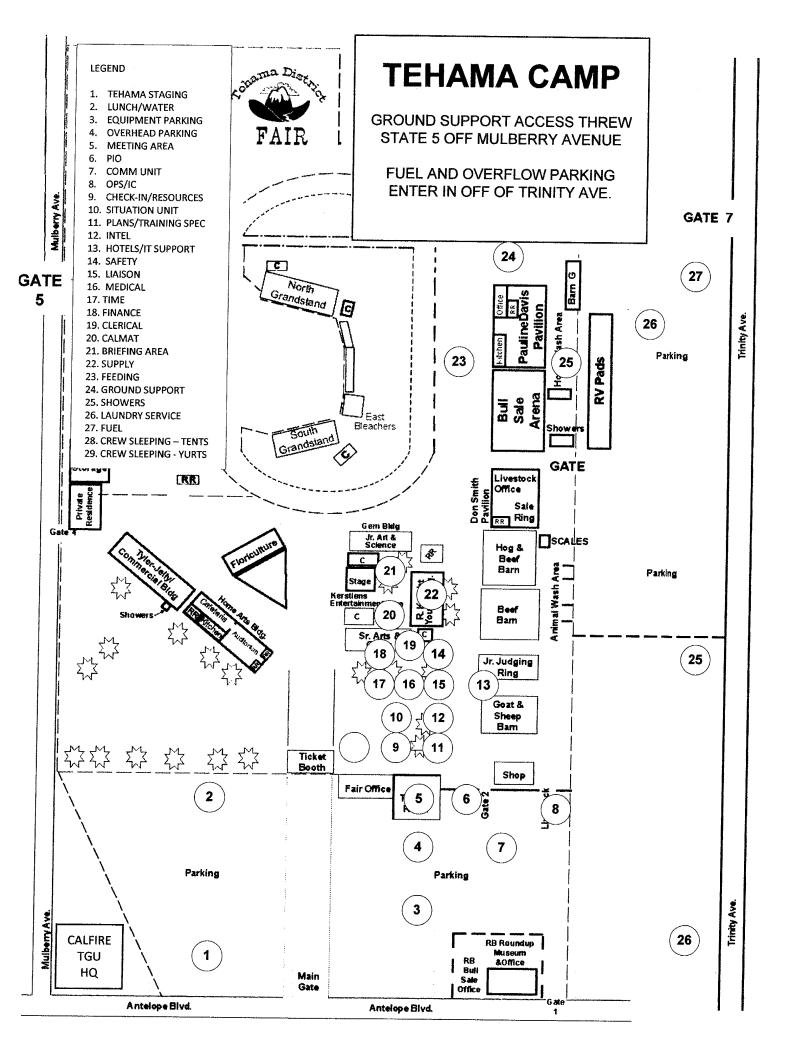

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.
