Beloved Mother, Firefighter, Colleague, and Friend. In the short time she was in California as a firefighter, Diana made many friends within the fire crews here and among the communities she was protecting. Fire Weather Forecast - Butte-Tehama-Glenn Lightning 2020

TIME AND DATE

FORECAST ISSUED: 9/2/2020 1900

ZONE: Glenn/Tehama

Incident Meteorologist

DISCUSSION: Hot and dry conditions will persist under high pressure over the Central Valley. Winds Thursday will once again be lighter than early in the week and mostly terrain driven. Smoke will likely bleed back over the Complex as we move through the day, and this should help limit instability. However, where there is clear air, expect temperatures to rapidly climb with slightly more instability. Humidities will once again bottom out in the 20-25% range. By Friday, we see a wind switch to the south during the afternoon. This will likely bring clear air back over the fires with the potential for some gusty conditions.

SPECIFIC:

DIV A: Backing fire down Long Ridge to Sulphur Creek. Spread toward Rat Trap, Devil's Hole Gulch, & Lazyman Ridge. Watch for slope reversal to Sanford Ridge. Possible torching under any clear air.

DIV B / C / N / Q / T: No fire activity expected.

DIV X: Watch for spotting into S. Fork Cottonwood Creek. Possible fire coming from DIV WW / YY.

DIV V: Possible fire coming from DIV WW / YY, especially on 9/4-9/5.

DIV TT: Backing fire in timber.

DIV WW: Rd 25N08E & 24N85 conducive to torching if any spots cross Riley Ridge Doz line; South Fork Elder Creek has heavier fuel loading, could see slope reversal to Raglin Ridge. Possible nighttime downslope run in Hull Cyn & Digger Creek.

DIV YY: Fire behavior slightly moderated under smoke; surface fire turns to single/group torching with any clear air. North of Snake Ridge on M22, watch for heavier fuel loading in plantations. Fire may pick up activity in Black Flat & Fish Creek. Watch for spread N/NE in Thomes Creek, toward Hammerhorn Mtn & Sugarloaf Mtn, plus Murphy Cyn, Boswell Ridge, & Fish Creek.

CAUTION: **DIV YY, DIV WW, & DIV X: fires may merge around Raglin Ridge | DIV A fire coming from S** AIR OPERATIONS:

Smoky/hazy. Smoke impacts less on North and East.

Mixing height: 5,000 ft. AGL. Transport winds: S/SW 4-6 mph, Sunrise 0641, Sunset 1939.

SAFETY

Don't be fooled by the forecasted decrease in fire behavior. Similar conditions led to slop & spots in DIV A, X, WW, plus crown fire in DIV YY. Fire still has potential for rapid burst upslope runs that can trap personnel.

SNAGS HAZARD TREES and ROCKS

PREVIOUS SHIFT PERSONNEL CONTINUE TO REPORT ISSUES WITH SNAGS

Watch Out

- Ground cover has burned loosening the stability of the root system
- · Oak trees are susceptible to limb fall this time of year as they stressed
- Fire suppression, air drops and dozers can dislodge rocks, logs and boulders

Mitigation

- Remove the hazard if safe to do so
- Flag and report the hazard to personnel
- · Be alert while working and driving in hazard area, listen and 'yell out' to others

LEADERSHIP

THE FOUNDATION TO SAFETY

Watch Out:

- Crews sacrificing safety for the sake of the task
- Ignoring basic safety policies and protocols
- · Things falling through the cracks, breakdown in communications, no clear plan

Mitigation

- Leaders hold themselves accountable to doing the right thing
- Hold one another accountable and to doing the right thing by providing for hazard mitigations before engaging in any task
- · Leaders lookout for their personnel and the crews take care of one another

GENERAL HEALTH

EXHAUSTION MAY COMPROMISE SAFETY!

Watch Out

- Diet can cause chronic feelings of exhaustion
- · Arduous work consumes body fluids, electrolytes at a higher rate
- · Steep terrain and hot dry conditions increases the risk of fatigue and exhaustion

Mitigation

- Eat foods which provide steady energy limit sugary, fatty, fried and processed foods
- Hydrate-proper hydration prevents fatigue Manage work rest ratio while performing work
- Be on the lookout for signs of exhaustion and lookout for one another

FIRE SUPPRESSION REPAIR Butte, Tehama, Glenn COMPLEX: CA-BTU-009692

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities, it is not the repair of areas damaged by the fire. We cannot upgrade facilities beyond their pre-fire condition. Any projects too large or complicated to be completed by the Fire Suppression Repair Group shall be turned over to the local Unit or the Comp/ Claims Unit.

Start Early!

Fire Suppression Repair needs should be reported on the attached form as soon as discovered. To the extent feasible, repair work should start as soon as practical. However, repair activities shall not hamper or conflict with fire suppression actions. When possible, construct waterbreaks (waterbars) on all dozer lines, handlines, and safety zones concurrent with line construction or mop-up operations. Scattered trash shall be collected and deposited at Drop Points. Police your areas.

Repair Site Inventory:

Field Observers and Fire Suppression Repair Group resources will be traveling throughout the fire looking for repair needs. All fire line resources are asked to contribute any known issues. The Suppression Repair Group will then evaluate each site, develop a specific repair plan, and schedule an appropriate repair with necessary resources.

Infrastructure Damage:

Report the location and type of suppression damage to infrastructure. Common examples of such features include:

- Fences /gates
- Culvert/ Bridge/ Other watercourse crossings
- Water sources
- Utility distribution line; above/below ground.
- Restore barriers on roads previously closed but opened for suppression activities.
- Remove trash and debris, including flagging and signs when no longer needed.
- Misc. damage to residential property

Natural Resource Damage:

This category represents repairing existing problems caused by fire suppression activities (direct effect) and to prevent likely future problems such as accelerated erosion caused by winter rains (indirect effect).

- Construct drivable waterbars or rolling dips on unsurfaced roads.
- Construct waterbars on all dozer and hand lines according to the following Specifications: Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed onto least erodible material possible.

Line or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Waterbreak Spacing	100'	100'	75'	50'

- Remove all berms created by suppression activities unless necessary to divert runoff from a sensitive site.
- Clean culverts and drainage facilities plugged with soil and debris by fire suppression activities.
- All slash, soil, and debris deposited into watercourses shall be removed and stabilized.
- All work within 100 feet of a watercourse, cultural site or other sensitive location shall be performed by hand crews to avoid further damage. This applies to all direct and indirect lines.

Cultural Site Damage:

Report any disturbance to a known or suspected archaeological/historical site through chain of command to the incident Archaeologist and/or the Fireline Suppression Repair Group immediately. This includes any air tanker drops upon a site. Use least disturbing suppression methods possible unless life safety is at risk. Flag site perimeter for identification. Removing or disturbing any artifact is not permissible.

Comp Claims Issues:

Damaged resources that are too large or complex for the Fireline Suppression Group to handle shall be turned over to Comp Claims for processing. Examples of such issues include damage to pavement, bridges, pipelines, etc.

- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)
