FIRE WEATHER WATCH FOR HOT DRY AND WINDY MONDAY NIGHT-WEDNESDAY

<u>DISCUSSION</u>: The heatwave peaks today and tomorrow. Temperatures could easily rise to 105F in the lower elevations with near 100F even for higher elevations. Humidities will follow suit dropping into the 10-15% range by the afternoon. Smoke will once again be our major player. As it lingers over the fire, it will keep instability in check. However, once again, the south and west sides will have the best chance for clear air allowing for the best chance for instability and isolated gusts. Expect some gusty NW (downslope) winds to develop in the evening. Monday night brings a N-NE wind event. This coupled with very hot and dry conditions will make for dangerous conditions and a Fire Weather Watch is in effect.

WEATHER SUMMARY

HOT, DRY, STABLE, SMOKE INVERSION

See Weather Forecast in IAP.

OUTPUTS

GENERAL:

Similar to yesterday: reduced fire behavior during the day with smoke cover. Upslope daytime winds 4-8 mph. Overnight, better RH recovery will limit fire behavior.

1,000-hr dead fuels above 90th percentile; 100-hr & ERC near 90th percentile. Severe Drought conditions. Brush at critical fuel moisture.

Low rate of spread & reduced spotting potential under smoke conditions. Any clear air will promote moderate to rapid growth and spotting with POI up to 80%

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	5' (1.5 m)	25 ch/hr (0.5 km/hr)	< 1/4 mile (.4 km)	60%
Grass/Shrub Mix	6' (1.8 m)	20 ch/hr (0.4 km/hr)	< 1/4 mile (.4 km)	60%
Shrub	15' (4.5 m)	30 ch/hr (0.6 km/hr)	< 1/4 mile (.4 km)	60%
Timber Understory	10' (3.0 m)	10 ch/hr (0.2 km/hr)	< 1/4 mile (.4 km)	60%
Timber Litter	5' (1.5 m)	5 ch/hr (0.1 km/hr)	< 1/4 mile (.4 km)	60%

^{**}minimum safety zone size for is 1/2-acre (0.2 Ha) for a Strike Team of Engines.

SPECIFIC:

DIV A: Continued low intensity, west of Sanford Ridge toward Rat Trap & Lazyman Ridge. Possible torching under any clear air, plus possible upslope run & spotting to Humboldt Trail, 35 Road, & Murphy Glades. Watch for Hopkins & Willow Basin Fires to make a run along Buck Ridge, Devil's Hole Gulch/Lazyman Ridge, & North Yolla Bolly.

DIV X: Continued fire progression in Sulphur Creek & South Fork Cottonwood Creek.

DIV WW: Rd 25N08E & 24N85 watch for any spots across Riley Ridge Dozer line; South Fork Elder Creek has heavier fuel loading. There is still a potential for slope reversal and a rapid run to Raglin Ridge. Any clear air will promote crowning and spotting.

DIV YY: Surface fire turning to single/group torching with any clear air. North of Snake Ridge on M22, watch for heavier fuel loading in plantations. Fire may pick up activity in Black Flat, Fish Creek, Thomes Creek, and Boswell Ridge, especially with wind aligned with channels and ridges.

DIV B / C / N / Q / T / V / TT: No fire activity expected.

AIR OPERATIONS:

Smoky, limited visibility.

Mixing height: 5,000 ft. AGL. Transport winds: SW 10, then W 15-20 mph, Sunrise 0643, Sunset 1934.

SAFETY

Make sure to identify escape routes and safety zones early in the shift before dark. Relatively quiet areas of the fire have had substantial flare ups, with group torching.

#### FIRE SUPPRESSION REPAIR Butte, Tehama, Glenn COMPLEX: CA-BTU-009692

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities, it is not the repair of areas damaged by the fire. We cannot upgrade facilities beyond their pre-fire condition. Any projects too large or complicated to be completed by the Fire Suppression Repair Group shall be turned over to the local Unit or the Comp/ Claims Unit.

Start Early!

Fire Suppression Repair needs should be reported on the attached form as soon as discovered. To the extent feasible, repair work should start as soon as practical. However, repair activities shall not hamper or conflict with fire suppression actions. When possible, construct waterbreaks (waterbars) on all dozer lines, handlines, and safety zones concurrent with line construction or mop-up operations. Scattered trash shall be collected and deposited at Drop Points. Police your areas.

Repair Site Inventory:

Field Observers and Fire Suppression Repair Group resources will be traveling throughout the fire looking for repair needs. All fire line resources are asked to contribute any known issues. The Suppression Repair Group will then evaluate each site, develop a specific repair plan, and schedule an appropriate repair with necessary resources.

**Infrastructure Damage:** 

Report the location and type of suppression damage to infrastructure. Common examples of such features include:

- Fences /gates
- Culvert/ Bridge/ Other watercourse crossings
- Water sources
- Utility distribution line; above/below ground.
- Restore barriers on roads previously closed but opened for suppression activities.
- Remove trash and debris, including flagging and signs when no longer needed.
- Misc. damage to residential property

#### Natural Resource Damage:

This category represents repairing existing problems caused by fire suppression activities (direct effect) and to prevent likely future problems such as accelerated erosion caused by winter rains (indirect effect).

- Construct drivable waterbars or rolling dips on unsurfaced roads.
- Construct waterbars on all dozer and hand lines according to the following Specifications: Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed onto least erodible material possible.

Line or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Waterbreak Spacing	100'	100'	75'	50'

- Remove all berms created by suppression activities unless necessary to divert runoff from a sensitive site.
- Clean culverts and drainage facilities plugged with soil and debris by fire suppression activities.
- All slash, soil, and debris deposited into watercourses shall be removed and stabilized.
- All work within 100 feet of a watercourse, cultural site or other sensitive location shall be performed by hand crews to avoid further damage. This applies to all direct and indirect lines.

#### **Cultural Site Damage:**

Report any disturbance to a known or suspected archaeological/historical site through chain of command to the incident Archaeologist and/or the Fireline Suppression Repair Group immediately. This includes any air tanker drops upon a site. Use least disturbing suppression methods possible unless life safety is at risk. Flag site perimeter for identification. Removing or disturbing any artifact is not permissible.

#### Comp Claims Issues:

Damaged resources that are too large or complex for the Fireline Suppression Group to handle shall be turned over to Comp Claims for processing. Examples of such issues include damage to pavement, bridges, pipelines, etc.
