## Fire and COVID-19 Briefing Checklist

## Self-Awareness / Screening

- Immediately separate yourself from others.
- Notify supervisor if you or others experience:
  - o Cough, more than expected
  - Shortness of breath or difficulty breathing
  - New loss of taste or smell
  - 。 Fever
  - 。 Chills
  - Sore throat
  - 。 Muscle pain
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

## Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
- Avoid handshakes and communal use items.
- Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.
- Disinfect high touch surfaces often:
  - 。 Radios, phones, doors, pumps, fuel cans, etc.

## Social Distancing and Protective Equipment

- □ Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
- Utilize face coverings as a tool when practical.
- Clean or replace dirty face coverings, equipment, and PPE.

## Communications

Face coverings and social distancing complicate communications.
 Ensure effective sender/receiver messaging.

## Protect yourself, your crew, and your camp!

NFES 002646 (06/2020)

#### Fire Weather Forecast

FORECAST NO: 20

PREDICTION FOR: Tuesday-Tuesday night

DATE: September 7th, 2020

FORECAST ISSUED: 1900 September 8th, 2020

ZONE: Glenn/Tehama

UNIT: CA-TGU

Incident Meteorologist: Derek Williams

Signed: A A March

WEATHER DISCUSSION: \*\*\*Red Flag Conditions for gusty winds and low humidity through 8 am

**Wednesday\*\*\*** Despite a significant drop in temperatures as a result of a dry cold front, critical fire weather conditions are expected today with stronger north-northeast winds with gusts approaching 35 mph and low humidity in the teens. A few high clouds are expected with otherwise much clearer skies as smoke is pushed to the south and southwest. Winds are expected to slowly diminish through the day and tonight with poor overnight recoveries as even drier air is filtered into the region from the northeast.

TODAY:

WEATHER: Mostly sunny with a few high clouds.

MAX TEMP: 3000 feet: 86-90°

5000 feet: 77-81°

MIN RH:

3000 feet: 10-15%

5000 feet: 13-18%

CHC WTG RAIN: 0%

LAL: 1

WINDS: (20 FOOT) 3000 feet: N 15-20 mph with gusts to 30 mph in the morning, except NE in Branch XXX. Slowly

decreasing through the day.

5000 feet: N 15-25 mph with gusts to 35 mph in the morning, except NE in Branch XXX. Slowly

decreasing through the day.

MIXING HEIGHT: 800 feet rising to 6500 feet by 1600.

TRANSPORT WIND: N-NE at 15-20 mph.

VISIBILITY: Increasing through the day to beyond 10 miles.

TONIGHT:

WEATHER: Mostly clear with poor RH recoveries.

MIN TEMP: 3000 feet: 60-65° 5000 feet: 58-63°

MAX RH:

3000 feet: 18-23%

5000 feet: 15-20%

CHC WTG RAIN: 0%

LAL: 1

WINDS: (20 FEET) 3000 feet: N 9-12 mph with gusts to 18 mph, except ENE in Branch XXX. Slowly decreasing overnight. 5000 feet: N 10-15 mph with gusts to 20 mph, except ENE in Branch XXX. Slowly decreasing overnight.

MIXING HEIGHT: Decreasing to 800 feet AGL overnight.

TRANSPORT WIND: NE 10-15 mph.

**EXTENDED OUTLOOK: Wednesday through Friday:** Expect a light east to northeast wind Wednesday with light terrain-driven winds setting up Thursday and Friday. Light transport winds should allow smoke to build back over the area suppressing instability and keeping temperatures down a few degrees. Cooler temperatures overall in the 80s to lower 90s with RH gradually improving through the end of the week.

### FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 21 TYPE OF FIRE: Wildland Fire

FIRE NAME: BTU/TGU Lightning Complex OPERATIONAL PERIOD: 24hr 9/8 (0700-0700)

DATE ISSUED: 9/7/2020 TIME ISSUED: 1900

UNIT: TGU SIGNED: Jonathan Pangburn, FBAN

#### **INPUTS**

#### WEATHER SUMMARY

\*\*RED FLAG WARNING: LOW RH WITH GUSTY NORTH WIND\*\*

See Weather Forecast in IAP.

#### **OUTPUTS**

#### GENERAL:

Critical fuel moisture will meet clear air, with a warm, dry North wind. Expect low RH and clear skies to increase fire behavior, continuing after sunset.

NOPS has issued a fuels and fire behavior advisory for elevated ERCs & dry fuels. 1,000-hr dead fuels above 90<sup>th</sup> percentile; 100-hr & ERC near 90<sup>th</sup> percentile. Severe Drought conditions.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	7' (2.1 m)	35 ch/hr (0.7 km/hr)	< 1/2 mile (.8 km)	90%
Grass/Shrub Mix	9' (2.7 m)	20 ch/hr (0.4 km/hr)	< 1/2 mile (.8 km)	90%
Shrub	20' (6.0 m)	35 ch/hr (0.7 km/hr)	< 1/2 mile (.8 km)	90%
Timber Understory	12' (3.6 m)	10 ch/hr (0.2 km/hr)	< 1/2 mile (.8 km)	90%
Timber Litter	6' (1.8 m)	5 ch/hr (0.1 km/hr)	< 1/2 mile (.8 km)	90%

<sup>\*\*</sup>minimum safety zone size for shrub fuels is 1-acre (0.4 Ha) for a Strike Team of Engines.

#### SPECIFIC:

**DIV A:** Expect torching; active crown fire possible on 35 Rd near DP-42 to 43, near Murphy Glades with heavy ladder fuels under timber. Watch for Hopkins & Willow Basin Fires to make a run once they move west of the 2017 Buck Fire footprint, toward Devil's Hole Gulch/Lazyman Ridge & North Yolla Bolly.

**DIV X**: Watch for spotting & spread toward Oven Lid & DP-41. Group torching likely, with spotting potential into North Fork Elder Creek, Fish Creek, Whisky Ridge.

**DIV WW:** Any clear air will promote crowning and spotting. Watch for any spots, especially north of 25N08E & along Raglin Ridge.

**DIV YY:** Single/group torching will continue under any clear air. North of Snake Ridge on M22, watch for heavier fuel loading in plantations. Fire may pick up activity in Black Flat, Fish Creek, Thomes Creek, and Boswell Ridge, especially with wind aligned with channels and ridges.

**DIV ZZ:** Expect torching; potential for short crown runs. Active fire behavior and spotting potential through nighttime with clear air. Watch for spread and spotting into 25N27, Fish Ridge, & M22.

#### DIV B / C / N / Q / T / V / TT: No fire activity expected.

#### AIR OPERATIONS:

Smoky, limited visibility, leading to clearer air.

Mixing height: 6,500 ft. AGL. Transport winds: N/NE 15-20 mph. Sunrise 0647, Sunset 1931.

#### SAFETY

Fuels driven fire behavior. North wind today and tonight will allow for clear air, which will lead to extreme fire behavior through Wednesday morning.

Drought primed, dry fuels; a record heat wave for 4 days; and a cold, dry front – don't repeat 1910 Big Burn!

<sup>\*\*</sup>minimum safety zone size for timber fuels is 1/2-acre (0.2 Ha) for a Strike Team of Engines.

## **Fuels and Fire Behavior Advisory**

## Northern California Geographic Area

September 7, 2020

Subject: Extended high temperatures continues to rapidly dry out an above normal live fuel load and dead fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures in August and early September coupled with limited precipitation has been expanding extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through September. The thunderstorm event of August 16-17 produced much lightning with limited rainfall that only lowered fire danger for a very brief period. Fires have recently shown or exhibited rapid or dangerous spread rates or generate extreme fire behavior once the any cap of smoke lifts out. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to above normal fine fuel loading. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will generally range between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

## Fuels - Low Elevation Grass Crop

#### Sierra Foothills Rangeland Forage Production Data

- 40 years of consistent data
- 2019-20 growing season 4<sup>th</sup> highest total
- 5 seasons of above normal in a row

<b>Top 5 Growing Seasons</b>	Pounds/Acres
2017-18	5514
1992-93	4696
1982-83	4630
2019-20	4420
2004-05	4410

For more information about the very unseasonable environmental conditions occurring, follow these links: https://gacc.nifc.gov/oncc/fuelsFireDanger Bi.php https://gacc.nifc.gov/oncc/fuelsFireDanger Erc.php https://gacc.nifc.gov/oncc/fuelsFireDanger Hundred.php

https://vegdri.unl.edu/Home/StateVegDRI.aspx?CA https://gacc.nifc.gov/oncc/fuelsFireDanger Thousand.php https://www.esrl.noaa.gov/psd/eddi/

#### Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

#### Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at https://gacc.nifc.gov/oncc/predictive/weather/index.htm or potential Red Flag conditions from the National Weather Service and weather at https://www.wrh.noaa.gov/fire2/cafw/.

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A, NC03B, NC04, NC05, NC06, NC07 and NC08.

Construct indirect line where appropriate.

Construct indirect line along the 35 Road.

Hold fire within established control lines.

Mop up 200' interior to eliminate threat to the fire line.

Backhaul excess trash/hose/water to DP31.

Perform tactical patrol around structures for the potential of new starts.

Mop up 200' around structures to prevent structure damage, and alleviate citizen concerns.

Scout division to validate/identify control lines going west.

#### 7. Special Instructions:

Limited designated Safety Officers and limited designated Line Medics. These positions are typically associated with team deployments however with resource draw down they are extremely limited.

Strike Team Leaders identify Safety Officer and Line Medic qualification and make them known to your Division Supervisor. You're responsible for your own lookout, identify one and make it known.

\*\*\*No heavy equipment usage in the wilderness area.\*\*\* Briefing will be broadcasted on CDF TAC 29.

6. Work Assignments:	············		<del>-</del>	L		vo-oiii Eidni	J. 30-1300	UI JI	

Construct indirect line where appropriate.

Construct indirect line along the 35 Road.

Hold fire within established control lines.

Mop up 200' interior to eliminate threat to the fire line.

Backhaul excess trash/hose/water to DP31.

Perform tactical patrol around structures for the potential of new starts.

Mop up 200' around structures to prevent structure damage, and alleviate citizen concerns.

Scout division to validate/identify control lines going west.

#### 7. Special Instructions:

Limited designated Safety Officers and limited designated Line Medics. These positions are typically associated with team deployments however with resource draw down they are extremely limited.

Strike Team Leaders identify Safety Officer and Line Medic qualification and make them known to your Division Supervisor.

You're responsible for your own lookout, identify one and make it known.

\*\*\*No heavy equipment usage in the wilderness area.\*\*\* Briefing will be broadcasted on CDF TAC 29.

# SAFETY MESSAGE

## **Butte Tehama Glenn Complex**

September 8, 2020 0700-0700 CA-BTU-009692

## **HIDDEN HAZARDS**

## EXTENDED DAYS OF BURNING VEGETATION CREATES UNSEEN HAZARDS

#### Watch Out - Be on the lookout for hidden hazards

- · Avoid trees that have been burning for long periods of time
- Areas of the burn having been logged and stumps remain
- Utility poles within and around the fire perimeter

#### Mitigation - If it doesn't look right make it known

- Flag hazard trees and communicate the dangers to your supervisor
- Stump holes are difficult to identify, use your hand tool to feel for ground depth
- "Look-Up", evaluate and identify and make known Hazardous Utility Poles in your work area

## **DRIVING**

# DRIVING CONTRIBUTES TO ONE OF THE LEADING CAUSES OF FIREFIGHTER FATLITIES

Watch Out - Maintain a high level of situational awareness in all driving situations and while working near roadways "SLOW DOWN"

- Very narrow, steep roads exist throughout the fire area
- Some areas of the fire require long travel times
- Smoke conditions at times are compromise visibility

## Mitigation - Drive with a high level of Situational Awareness and adjust driving techniques per your situation

- Don't "thread the needle". Don't take your vehicle where it doesn't belong
- Use spotters and back-up personnel in tight situations
- If you're feeling drowsy, don't drive, stop and rest, change drivers or contact ground support and request a relief driver

## **DEMOB**

#### ACCIDENTS CAN HAPPEN DURING DEMOB

### Watch Out - Be on the lookout for vehicle and pedestrian congestion

- · Vehicles will be moving in tight areas around Ground Support and parking areas
- Increased backing and maneuvering of vehicles in tight spots
- Crews may be in a hurry to leave the incident due to reassignment

## Mitigation - Maintain high levels of situational awareness throughout the demob process

- Provide back-up and spotter personnel more than one may be required
- Drive safely and be on the lookout for ICP pedestrian traffic
- Drive safely and monitor fatigue when traveling to home unit or new incident

Each Safety Message is designed for a daily Tailgate Safety discussion

**REMAIN FIRE FOCUSED AND COVID-19 AWARE**

### TEHAMA / GLENN COMPLEX INFORMATION SHEET

Fire Information Line: (530)505-1165

Please scan the QR Below for CAL FIRE's Social Media Policy 0691.

#### **INCIDENT MAIL**

The PIO Trailer will receive mail/packages shipped to the Incident. Please ensure all mail addressed to the incident follows the format below:

(YOUR NAME, YOUR ORDER NUMBER)
C/O BTU/TGU LIGHTNING COMPLEX BASE CAMP
PUBLIC INFORMATION TRAILER
TEHAMA DISTRICT FAIRGROUNDS
650 ANTELOPE BLVD, RED BLUFF, CA 96080

#### **LOST AND FOUND**

Any items that are found, please bring them to the PIO Trailer located at the entrance to Base Camp and leave them with PIO staff. Please leave your name and contact information and description of lost items so we can attempt to reunite you with your items.

#### FINANCE MESSAGE

# ALL RESOURCES ASSIGNED TO THE COMPLEX WILL UTILIZE THE INCIDENT & REQUEST NUMBER ORDERED ON

## FEDERAL RESOURCES FINANCE CHECK-IN PROCESS

ATTENTION: For All Federal Resources NOT Within the 10,000-20,000 Resource Numbering Scheme, please read AND follow the instructions below:

If you have a resource order number that <u>does not</u> fall within the 10,000 to 20,000 numbering scheme, you are being supported through the Federal Virtual Finance Section. All documentation need to be emailed to the address below. Items needed, such as:

- Resource Order
- Contract, Casual Hire Forms,
- Shift Tickets,
- Crew Time Reports,
- Receipts, etc

Email: <u>R5.CalFire.Support@firenet.gov</u>. The team is established to support all of your needs virtually.

There may need to be follow-up communications with the CalFire personnel after they receive it. We will ensure that all resources are supported while minimizing confusion.

# ATTENTION: For All Federal Resources that ARE WITHIN the 10,000 TO 20,000 Numbering Scheme – ONLY – please read AND follow the instructions below:

Any resource ordered for this incident that fall within the 10,000 to 20,000 numbering scheme will need to go through this virtual CHECK-IN Process.

**Step One**: prior to checking in, you will be required to provide electronic copies of the following, if applicable:

(1) Completed Sending Unit COVID-19 Checklist

(2) Resource order

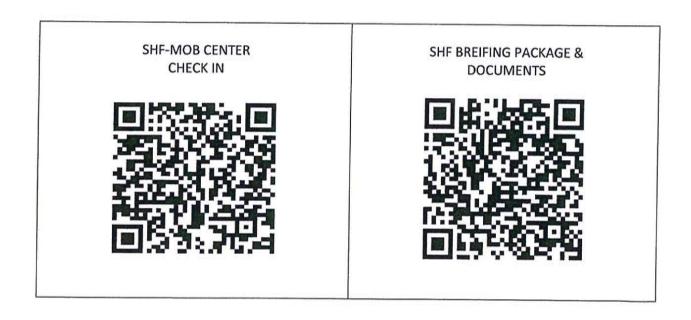

- (3) Incident Qualification Card (REDCARD)
- (4) Contract/Agreement/Casual Hire agreement

Send <u>all</u> documents to <u>shf.mobcenter.fsc3@gmail.com</u>

Email Subject Line Example: CHECKIN/CA-BTU-009692/ Resource Order No/Last, Name/First/Job Abbev Subject: CheckIn/CA-BTU-009692/O-12000/Last Name, First Name/OSC2

**Step Two:** Once you arrive at the specified location on your resource order, please check in using the **QR code or the link below**.

**Step Three:** Contact the MOB Center Manager (MCM) at (530) 638-2431. The MOB manager will provide you with further instructions.

#### **DMOB**

### BUTTE, TEHAMA, GLENN COMPLEX INCIDENT CA-BTU-009692

- Resources must check-in prior to the Demobilization process.
- In order to be deemed excess, supervisors must submit an ICS 213 to the Resources Unit.
- Resources report to the Demobilization Unit at the times posted on the tentative DMOB list, which is posted around the Incident Base and to the Box account.
- Prior to reporting to DMOB, please return all supplies and equipment.
- Resources will get signatures from the following units:
  - Ground Support (Vehicle Inspection)
     All rental vehicles MUST be inspected
  - o Training (If they have a trainee)
  - o Documentation
  - o Time
  - o DMOB
- The following will be done by radio at DMOB
  - o Motels
  - o Supply
  - o Communications

#### Local Government Resources on CFAA

If you are demobing from an incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief or the Incident Commander
One of them must sign your 42's

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

You're OES AREP on the BTU/TGU Complex
Patrick Titus
916-634-9225

#### FIRE SUPPRESSION REPAIR Butte, Tehama, Glenn COMPLEX: CA-BTU-009692

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities, it is not the repair of areas damaged by the fire. We cannot upgrade facilities beyond their pre-fire condition. Any projects too large or complicated to be completed by the Fire Suppression Repair. Group shall be turned over to the local Unit or the Comp/ Claims Unit.

Start Early!

Fire Suppression Repair needs should be reported on the attached form as soon as discovered. To the extent feasible, repair work should start as soon as practical. However, repair activities shall not hamper or conflict with fire suppression actions. When possible, construct waterbreaks (waterbars) on all dozer lines, handlines, and safety zones concurrent with line construction or mop-up operations. Scattered trash shall be collected and deposited at Drop Points. Police your areas.

Repair Site Inventory:

Field Observers and Fire Suppression Repair Group resources will be traveling throughout the fire looking for repair needs. All fire line resources are asked to contribute any known issues. The Suppression Repair Group will then evaluate each site, develop a specific repair plan, and schedule an appropriate repair with necessary resources.

**Infrastructure Damage:** 

Report the location and type of suppression damage to infrastructure. Common examples of such features include:

- Fences /gates
- Culvert/ Bridge/ Other watercourse crossings
- Water sources
- Utility distribution line; above/below ground.
- Restore barriers on roads previously closed but opened for suppression activities.
- Remove trash and debris, including flagging and signs when no longer needed.
- Misc. damage to residential property

#### Natural Resource Damage:

This category represents repairing existing problems caused by fire suppression activities (direct effect) and to prevent likely future problems such as accelerated erosion caused by winter rains (indirect effect).

- Construct drivable waterbars or rolling dips on unsurfaced roads.
- Construct waterbars on all dozer and hand lines according to the following Specifications: Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed onto least erodible material possible.

Line or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Waterbreak Spacing	100'	100'	75'	50'

- Remove all berms created by suppression activities unless necessary to divert runoff from a sensitive site.
- Clean culverts and drainage facilities plugged with soil and debris by fire suppression activities.
- All slash, soil, and debris deposited into watercourses shall be removed and stabilized.
- All work within 100 feet of a watercourse, cultural site or other sensitive location shall be performed by hand crews to avoid further damage. This applies to all direct and indirect lines.

#### **Cultural Site Damage:**

Report any disturbance to a known or suspected archaeological/historical site through chain of command to the incident Archaeologist and/or the Fireline Suppression Repair Group immediately. This includes any air tanker drops upon a site. Use least disturbing suppression methods possible unless life safety is at risk. Flag site perimeter for identification. Removing or disturbing any artifact is not permissible.

#### Comp Claims Issues:

Damaged resources that are too large or complex for the Fireline Suppression Group to handle shall be turned over to Comp Claims for processing. Examples of such issues include damage to pavement, bridges, pipelines, etc.

#### CAL FIRE

### INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

#### California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

#### Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

#### Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

#### **Aviation Operations-**

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

#### Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

#### Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

#### Management and Supervision-

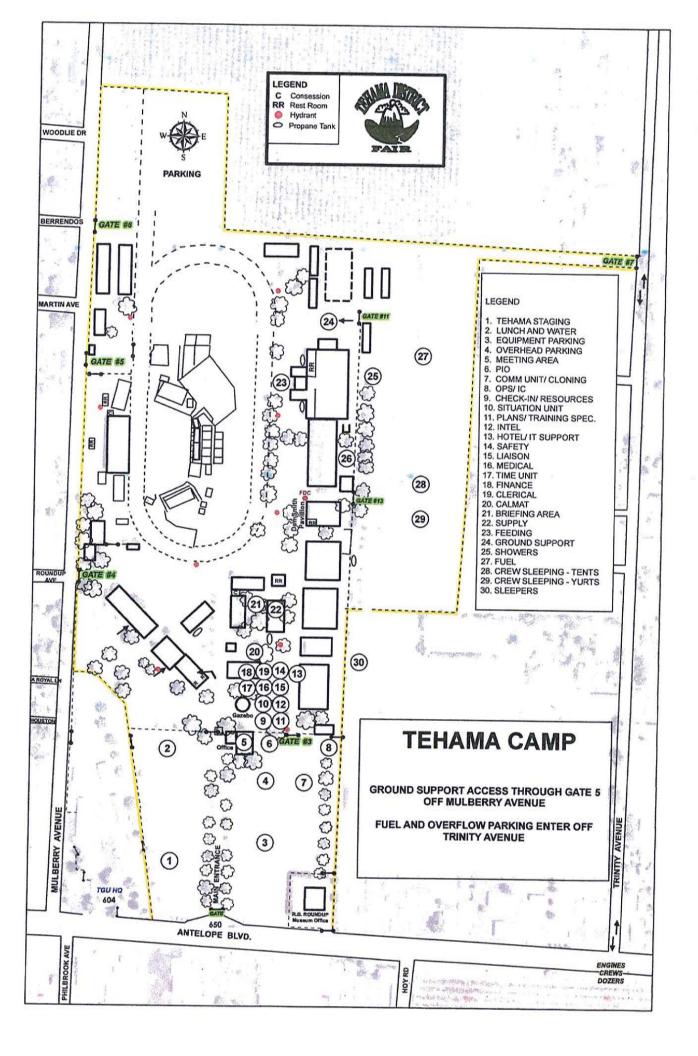

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.
