

INCIDENT ACTION PLAN

NORTH COMPLEX WEST ZONE

CA-BTU-010751

Sunday

9/13/2020 0700

to

9/14/2020 0700

Briefing Frequency - CDF - Tac 29

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: NORTH COMPLEX WEST ZONE	2. Operational Period:	Date From: 9/13/2020 Time From: 0700	Date To: 9/14/2020 Time To: 0700
---	-------------------------------	---	-------------------------------------

3. Objective(s):

- Management Objectives**
- Provide for and maintain public and first responder safety by utilizing the incident safety analysis process.
 - Ensure COVID-19 precautions and best practices are met at all times.
 - Protect the commercial timberland, historical and cultural assets within the affected area, infrastructure, improvements, and watersheds.
 - All management actions and efforts will be focused on serving, safeguarding, and protecting the citizens of Butte and Plumas Counties.
 - Ensure coordinated, timely and accurate release of public information.
 - Be financially responsible for all management and fire suppression tactics.
- Control Objectives**
- Keep the fire North of Lamb Hill.
 - Keep the fire East of Table Mtn.
 - Keep the fire South of Gold Flat.
 - Keep the fire West of Big Peak.

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Immediately separate yourself from others.
- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Shortness of breath or difficulty breathing
 - New loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
- Avoid handshakes and communal use items.
- Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.
- Disinfect high touch surfaces often:
 - Radios, phones, doors, pumps, fuel cans, etc.

Social Distancing and Protective Equipment

- Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
- Utilize face coverings as a tool when practical.
- Clean or replace dirty face coverings, equipment, and PPE.

Communications

- Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

Protect yourself, your crew, and your camp!

Find more information: <https://www.nwccg.gov/coronavirus>.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 4	TYPE OF FIRE: Wildland Fire
FIRE NAME: North Complex West Zone	OPERATIONAL PERIOD: 24hr 9/13 (0700-0700)
DATE ISSUED: 9/12/2020	TIME ISSUED: 1900
UNIT: BTU	SIGNED: Jonathan Pangburn, FBAN 

INPUTS

WEATHER SUMMARY

****AFTERNOON CLEARER AIR, BURN CONDITIONS****
See Weather Forecast in IAP.

OUTPUTS

GENERAL:

Fuel moisture levels remain critical for both live and dead fuels. Warm conditions, low RH, and poor recovery overnight will continue, but expect smoke clearing to start Sunday afternoon. Increasing burn conditions through Tuesday. Overnight RH drop will continue burning.

NOPS has issued a fuels and fire behavior advisory for elevated ERCs & dry fuels. 1,000-hr/100-hr dead fuels, BI, & ERC above 97th percentile. Severe Drought conditions.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	6' (1.8 m)	35 ch/hr (0.7 km/hr)	< 1/4 mile (.4 km)	75%
Grass/Shrub Mix	7' (2.1 m)	25 ch/hr (0.5 km/hr)	< 1/4 mile (.4 km)	75%
Shrub	17' (5.1 m)	55 ch/hr (1.1 km/hr)	< 1/4 mile (.4 km)	75%
Timber Understory	10' (3.1 m)	10 ch/hr (0.2 km/hr)	< 1/4 mile (.4 km)	75%
Timber Litter	5' (1.5 m)	5 ch/hr (0.1 km/hr)	< 1/4 mile (.4 km)	75%

****minimum safety zone size is 1/2-acre (0.2 Ha) for a Strike Team of Engines.**

SPECIFIC:

DIV C / D: No recent fire history around Clipper Mills and Strawberry Valley. Clearing air has potential for crown fire near Lost Creek Reservoir, with extensive understory fuels. Sugar Pine Point to Jackass Flat has spotting potential. Watch for possible updrainage run in Forbestown Ravine.

DIV F: Heavier fuels in Forbestown area, with potential for wind eddies in channels. While the potential for crown runs has diminished, there's still a potential for torching in timber. Fire south of Ponderosa Reservoir will be in older fuel, with understory conducive to torching, even under smoke cover. Forbestown Ravine aligned for updrainage run. Potential for afternoon torching.

DIV I / M: Stringtown area spotting potential and fire run with NE-SW oriented drainages. Heavier accumulations in oak and gray pine will continue to smolder & produce ember cast. Greater winds at lower elevations, with less sheltering. Fine fuels in understory will respond to clear air

DIV R: Fire weakened trees and downed material may lead to ember cast into fine fuels. Bloomer Hill area may try to carry fire to Cherokee, Spring Valley Gulch.

DIV T: Strong wind channeling expected in the Concow/Pulga/Cresta area. Ridgelines carry winds, especially overnight downslope runs. South of Feather River, timber still present for torching. China Gulch will channel any fire spread. Yankee Hill area has fine fuels conducive to spotting.

AIR OPERATIONS:

Limited visibility under smoke, potentially clearing enough to fly after 1400.

Mixing height: 5,000 ft. AGL. Transport winds: SW 15 mph. Sunrise 0645, Sunset 1916.

SAFETY

Anticipate the wind shift. Don't be caught off guard by the potential for torching and crown fire. Today will see potential for rates of spread to almost double compared to the past two days.

Fuels and Fire Behavior Advisory

Northern California Geographic Area

September 7, 2020

Subject: Extended high temperatures continues to rapidly dry out an above normal live fuel load and dead fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures in August and early September coupled with limited precipitation has been expanding extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through September. The thunderstorm event of August 16-17 produced much lightning with limited rainfall that only lowered fire danger for a very brief period. Fires have recently shown or exhibited rapid or dangerous spread rates or generate extreme fire behavior once the any cap of smoke lifts out. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to **above normal fine fuel loading**. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will generally range between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

Fuels – Low Elevation Grass Crop

Sierra Foothills Rangeland Forage Production Data

- 40 years of consistent data
- 2019-20 growing season 4th highest total
- 5 seasons of above normal in a row

Top 5 Growing Seasons	Pounds/Acres
2017-18	5514
1992-93	4696
1982-83	4630
2019-20	4420
2004-05	4410

For more information about the very unseasonable environmental conditions occurring, follow these links:

https://gacc.nifc.gov/oncc/fuelsFireDanger_Bi.php

<https://vegdiri.unl.edu/Home/StateVegDRI.aspx?CA>

https://gacc.nifc.gov/oncc/fuelsFireDanger_Erc.php

https://gacc.nifc.gov/oncc/fuelsFireDanger_Thousand.php

https://gacc.nifc.gov/oncc/fuelsFireDanger_Hundred.php

<https://www.esrl.noaa.gov/psd/eddi/>

Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at <https://gacc.nifc.gov/oncc/predictive/weather/index.htm> or potential Red Flag conditions from the National Weather Service and weather at <https://www.wrh.noaa.gov/fire2/cafw/>.

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A, NC03B, NC04, NC05, NC06, NC07 and NC08.

6. Work Assignments:
Construct contingency line from the 40 Y road to the North Fork of the Feather River.
Fall hazard trees, and trees that threaten control lines, to mitigate the threat of fire escaping, while maintaining personnel safety.
Mop up 100' interior to eliminate threat to the fire line.
Assess structures for hazardous conditions and provide locations as appropriate.

7. Special Instructions:

SAFETY MESSAGE

North Complex, West Zone

September 13, 2020 0700-0700 CA-BTU-10751

CHANGE IN WEATHER

INCREASED WINDS and WIND SHIFTS IN FIRE AREA

Watch Out – Unstable atmosphere will lift the lid off the fire area

- Increased fire behavior due to WIND changing of direction
- Winds will cause decreased smoke, increased temperatures, and lower humidity's
- High probability for increased fire behavior as the air become less stable

Mitigation Watch your watch and intuition

- Keep informed on predicted fire weather conditions and forecasts
- Base all actions on current and expected fire behavior
- Keep a "Heads Up" and monitor weather in your area

FIRE WEAKENED TREES

SNAGS, and WEAKENED TREES PRESENT A SERIOUS RISK

Watch Out Tree and limb fall has been reported throughout the fire area

- Areas having burned several days ago may have standing snags ready to fall
- Trees may fall without warning, afternoon/evening winds may increase potential
- Drought conditions have created snag patches in areas of the fire

Mitigation Situational awareness is the key to mitigating this risk

- Scout line prior to engagement in areas with drought ridden and bug kill trees, scout areas in daylight when possible
- Disengage in areas with weak and fire weakened trees when appropriate
- Flag hazard trees, prevent access as possible, and notify falling modules to mitigate hazard trees

EMOTIONAL FATIGUE

FATIGUE CAN CAUSE US TO SACRIFICE SAFETY FOR THE SAKE OF THE TASK

Watch Out - Emotional fatigue can disguise itself

- Look for short fuse attitudes, sharp tongue responses and change in overall behavior
- Feeling anxious, difficulty concentrating, increased cynicism or pessimism and sense of dread
- Look for signs and symptoms among your fellow workers, irritability, anger, depression

Mitigation - Promote open discussions

- Get as much quality rest as possible
- Practice mindfulness
- Talk about difficult situations with your peers – seek help through Employee Support Services

Each Safety Message is designed for a daily Tailgate Safety discussion

REMAIN FIRE FOCUSED AND COVID-19 AWARE

INCIDENT ACTION PLAN SAFETY ANALYSIS (ICS 215A)

1. Incident Name: North Complex West Zone		2. Incident Number: 20-CA-BTU-10751
3. Date/Time Prepared: Date: 09/012/2020 Time: 1700 hours		4. Operational Period: Date From: 09/13/2020 To: 09/14/2020 Time From: 0700 hours To: 0700 hours
5. Incident Area	6. Hazards/Risks	7. Mitigations
Branch XX Branch XXIII	Fatigue – physical and mental Dehydration / Rhabdomyolysis	Continually monitor your crew. Know the signs and symptoms of heat illness. Plan for a 2-1 Work Rest Work Cycle, water and caloric intake regime
Branch XX Branch XXIII	Poor visibility	Drive with lights on, slow down, know your location on the map, size up escape routes and make known to crew, maintain SA
Branch XX Branch XXIII	Powerlines / Power Poles	IRPG Pg. 24: Treat all lines as if they are energized. Flag downed powerlines as hazard to others and notify. Deny entry
Branch XX Branch XXIII	Weather and Fire Behavior	Stay Mobile and Identify Escape Routes and Safety Zones and make them known to your personnel.
Branch XX Div. C	Poor communications	The radio plan is new and changing, stay alert and in touch with Oroville ECC for any changes.
Branch XX Branch XXIII	Steep, unstable terrain	Watch footing and maintain downhill tool placement. Be aware of loose material. Look for ash pits and stump holes.
Branch XX	Unburned areas	Watch for Evacuees; LCES - utilize worst case scenario when working in or around pockets of unburned fuels.
Branch XX Branch XXIII	Hazardous Trees	IRPG Pg 22: Identify and Flag Hazardous Trees. Eliminate hazardous trees with qualified sawyers or heavy equipment.
Branch XX Branch XXIII	Personal Protective Equipment (PPE)	Wear appropriate PPE for all operations until your supervisor indicates it's safe to remove.
Branch XX Branch XXIII	Airborne Hazards	Be aware of your surroundings, wear proper PPE, utilize SCBA's and N95 masks when appropriate
Branch XX Branch XXIII	COVID-19: Reduce exposure potential to yourself, your crew and the public	<u>Wear a mask</u> while in the ICP, while feeding and with the public, and when six feet of social distancing is difficult. Wash hands for at least 20-seconds.
Branch XX Branch XXIII	Helicopters - Water Drops and Turbulence	Post lookouts and make escape routes and safety zones know. LCES. Watch overhead for hazard trees and wind changes.
Branch XX Branch XXIII	Burnt Residence and other structures Carcinogens and Hazardous Materials	Utilize Three Stripes Your Out flagging and notify line supervisor
Branch XX Branch XXIII	Animals maybe stressed and confused	Do not try to feed, pet, capture or rescue any domestic animals.
Branch XXIII, Div. T, R, M Branch XX, Div. I, F	Water Ways, Water Craft	Be vigilant when working around water with your PPE on, State Parks has two patrol boats available for evacs and rescues.

Peer Support Team Message:

INCIDENT PEER SUPPORT:

We have a few people on the incident for any peer support related needs. The best way to get a hold of them is to call them directly.

Amy Head-916 956-3277

Shawna Powell-530 717-0667

or

CAL FIRE Peer Support/Helpline

916-445-4337

Below are other Team Members not on the incident who can also be contacted directly:

Tony Howard 916-224-1543

Mike Aiello 916-584-0548

Jeremy Sanders 916-281-6472

Warren Parrish 916-823-6641

Nikole Schutz 916-709-0434

Amber Henderson 805-794-1690

Chris Lomanto 916-247-6974

Connie Quarisa 916-213-8697

In addition to peer support, if there is a need, we can have a culturally competent Clinician available on the incident that could meet with you on an individual and/or group basis.

Watch for the signs and symptoms of stress in yourself and the people around you. Try and stay positive and get much needed rest when you can. We can do this, together!

Stay Healthy, Stay Alert and Stay Strong!

CAL FIRE Employees can also contact EAP directly at: 1-866-327-4762

ATTN: Federal Resources (specifically Federal Contracted Resources/ADs)

A process has been developed to submit your invoices/time sheets virtually. If tech-capable, please **scan and email** your documents to 2020.northcomplex.finance.west@firenet.gov email address. In the subject line please start with the word TIME, then add:

TIME - Resource # - Company/Person Name – Attachment description - Fire Name/Number

Otherwise, paper shift tickets and CTR's will continue to be accepted at a designated drop box in Finance Section.

Contract Crew/Equipment:

Please send us the following information (even if you have submitted it to the CAL FIRE finance unit):

- Contact name, phone number, and email for on-site "leader"
- Resource Order
- Contract (Pages 1-2 and any additional pages referencing equipment/resource information)
- Crew Manifest
- Inspection (if one was done)
- Shift Tickets (signed by you and your incident supervisor) / CTRs (signed by your incident supervisor)
- Advance notice of crew swaps

Administratively Determined (AD) Resources:

Please send us the following information:

- Contact phone number and email
- Resource Order and Casual Hire form
- CTRs (signed by your incident supervisor)

Federal Employees:

If you require an OF-288, please email documentation along with a note regarding your last work shift, and we will arrange for you to obtain it (them). If you are claiming no lunch break and/or Hazard Pay, just like always, you must provide a justification for the claim ("H=Hazard") is NOT enough. Use "action verbs" to explain what happened/why you were not able to have a lunch break, and/or claiming the hazard.

Federal S# Requests:

For S# requests related to property loss, please send a completed 213 General Message to the email below.

WHEN YOU ARE CLOSE TO DEMOB:

- Give Finance a "Courtesy Email" 1-2 days prior to make sure all your documents have been received.
- Submit all time documentation (including travel home) ahead of demob.
- Send an email the morning of your demob to the email below so the demob process can be started from the virtual finance group.

EMAIL: 2020.northcomplex.finance.west@firenet.gov

Please **do not wait** until the end of your assignment to get us your information. This is a fluid situation and you may be released to other incidents on short notice. Thank you for your patience as we transition to new way of processing pay documents.

**NORTH COMPLEX WEST ZONE INCIDENT
CA-BTU-010751
REMOTE CHECK-IN**

**Please use this code to Check In to the
NORTH COMPLEX WEST ZONE INCIDENT**

REMEMBER: YOU MUST STILL VISIT TIME UNIT!

DMOB

NORTH COMPLEX WEST ZONE INCIDENT CA-BTU-010751

- Resources must check-in prior to the Demobilization process.
- In order to be deemed excess, supervisors must submit an ICS 213 to the Resources Unit.
- Resources report to Demobilization Unit at the times posted on the tentative DMOB list, which is posted around the Incident Base and posted to the Box Account.
- Prior to reporting to DMOB, please return all supplies and equipment.
- Resources will get signatures from the following units:
 - Ground Support
 - Training (If they have a trainee)
 - Documentation
 - Time
 - DMOB
- The following will be done by radio at DMOB
 - Motels
 - Supply
 - Communications

Local Government Resources on CFAA

If you are demobing from this incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the
instructions on the front of your F-42

OES JOB AIDS, FORMS, F-42 SAMPLES AND CFAA AGREEMENT

EMERGENCY FIRE SUPPRESSION REPAIR PLAN – NORTH COMPLEX WEST ZONE

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas caused by the fire. We cannot upgrade facilities beyond their pre-fire condition. Fire suppression repair shall be applied to mitigate infrastructure damage and natural resource damage.

Infrastructure Damage: Culverts and other watercourse crossings, water sources, trails, road barriers removed for fire access, trash, debris and supplies left by fire suppression activities; miscellaneous.

Natural Resource Damage: Repair of existing problems caused by fire suppression activities (direct effect) to natural resources and to prevent likely future problems such as accelerated erosion caused by rains (indirect effect). The goal is to minimize soil erosion, adverse impacts to water quality, and adverse impacts to protected species of plants and animals

REPAIR GUIDELINES

General: Restore berms and barriers removed for fire control access.

Drop Points/Staging Areas/Safety Zones: New construction - cross drain and abandon (if applicable). Existing - repair to original condition, remove debris resulting from use. Pick up all trash.

Roads: Reshape soil surfaced roads that were used during fire control operations. Roads should be out-sloped with rolling dips where degradation of the road prism has resulted from fire control operations. Clean out culvert inlets and outlets as needed. Report any damaged culverts to the Fire Suppression Repair Specialist for specific repair guidance. Breach berms, where appropriate, to facilitate drainage.

Firelines: Break apart dozer piles of pushed over trees, vegetation and soil, and spread along tractor roads, tractor fire breaks, or any other areas disturbed during fire suppression activities. Lop and scatter displaced vegetation to a height of less than 30 inches or chip within 100' of a public or unlocked private road or structure. Scatter the lopped material along the fire line. Pull back any excess soil material sidecast along roads or tractor disturbed areas that are located within 100 feet of any watercourse or spring. Install waterbreaks on all constructed or used dozer lines using the following criteria:

Fireline and road gradient(%) oak woodland:	0-10	11-25	26-50	>50
Fireline waterbreak spacing:	150'	100'	75'	50'
Road waterbreak spacing:	300'	200'	150'	100'
Fireline and road gradient(%) Timber	0-10	11-25	26-50	>50
Fireline waterbreak spacing:	100'	75'	50'	25'
Road waterbreak spacing:	200'	150'	100'	75'

Waterbreaks and/or rolling dips shall be used to reduce the volume and velocity of water by directing it off fire lines as soon as possible at controlled locations. The outfall end of all waterbreaks shall be opened by hand if necessary. Waterbreaks should be located to discharge into natural vegetation. Waterbreaks should cross the fire line at an angle of approximately 45 degrees.

Handlines: Install waterbreaks as needed based on slope and soil erodibility.

All waterbreaks shall be installed diagonally with a minimum cut of 6" into existing grade, and minimum height of 12". Waterbreaks shall be constructed to allow for drainage at the discharge end into non-erodible material.

Slash Piles: Piles within 150' of permanent structures or public roads will be lopped and/or scattered within 18" of the soil surface.

Piles along roads and fences: Lop to fire protection standards to ensure decreased fire risk is obtained. Scatter smaller debris where applicable.

Watercourse Crossings: All slash, soil, and debris deposited into watercourses resulting from fire suppression activities shall be removed and stabilized above the high-water line.

Major watercourse damage, if present, shall be reported to the Fire Suppression Repair Specialist prior to the end of the shift day.

Where fire lines are constructed within 100' of flowing watercourses, slash or straw mulching will be applied. All loose soil must be pulled away from the watercourse and stabilized.

Archaeological or Historic Sites: All potential sites shall be avoided. Contact Incident Archaeologist or the Suppression Repair Specialist.

All Trainee's

If you are here as a Trainee from the BTU / TGU Incident, you must close out with the Training Specialist and check in under the

North Complex West Zone Incident.

You are on a NEW incident !!!!!!!!!!!!!!!

You can use the QR codes to check out and then check back in, or stop by and I will help you.

Training Specialist

Dennis Martin

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications

- Other: _____
- Other: _____

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

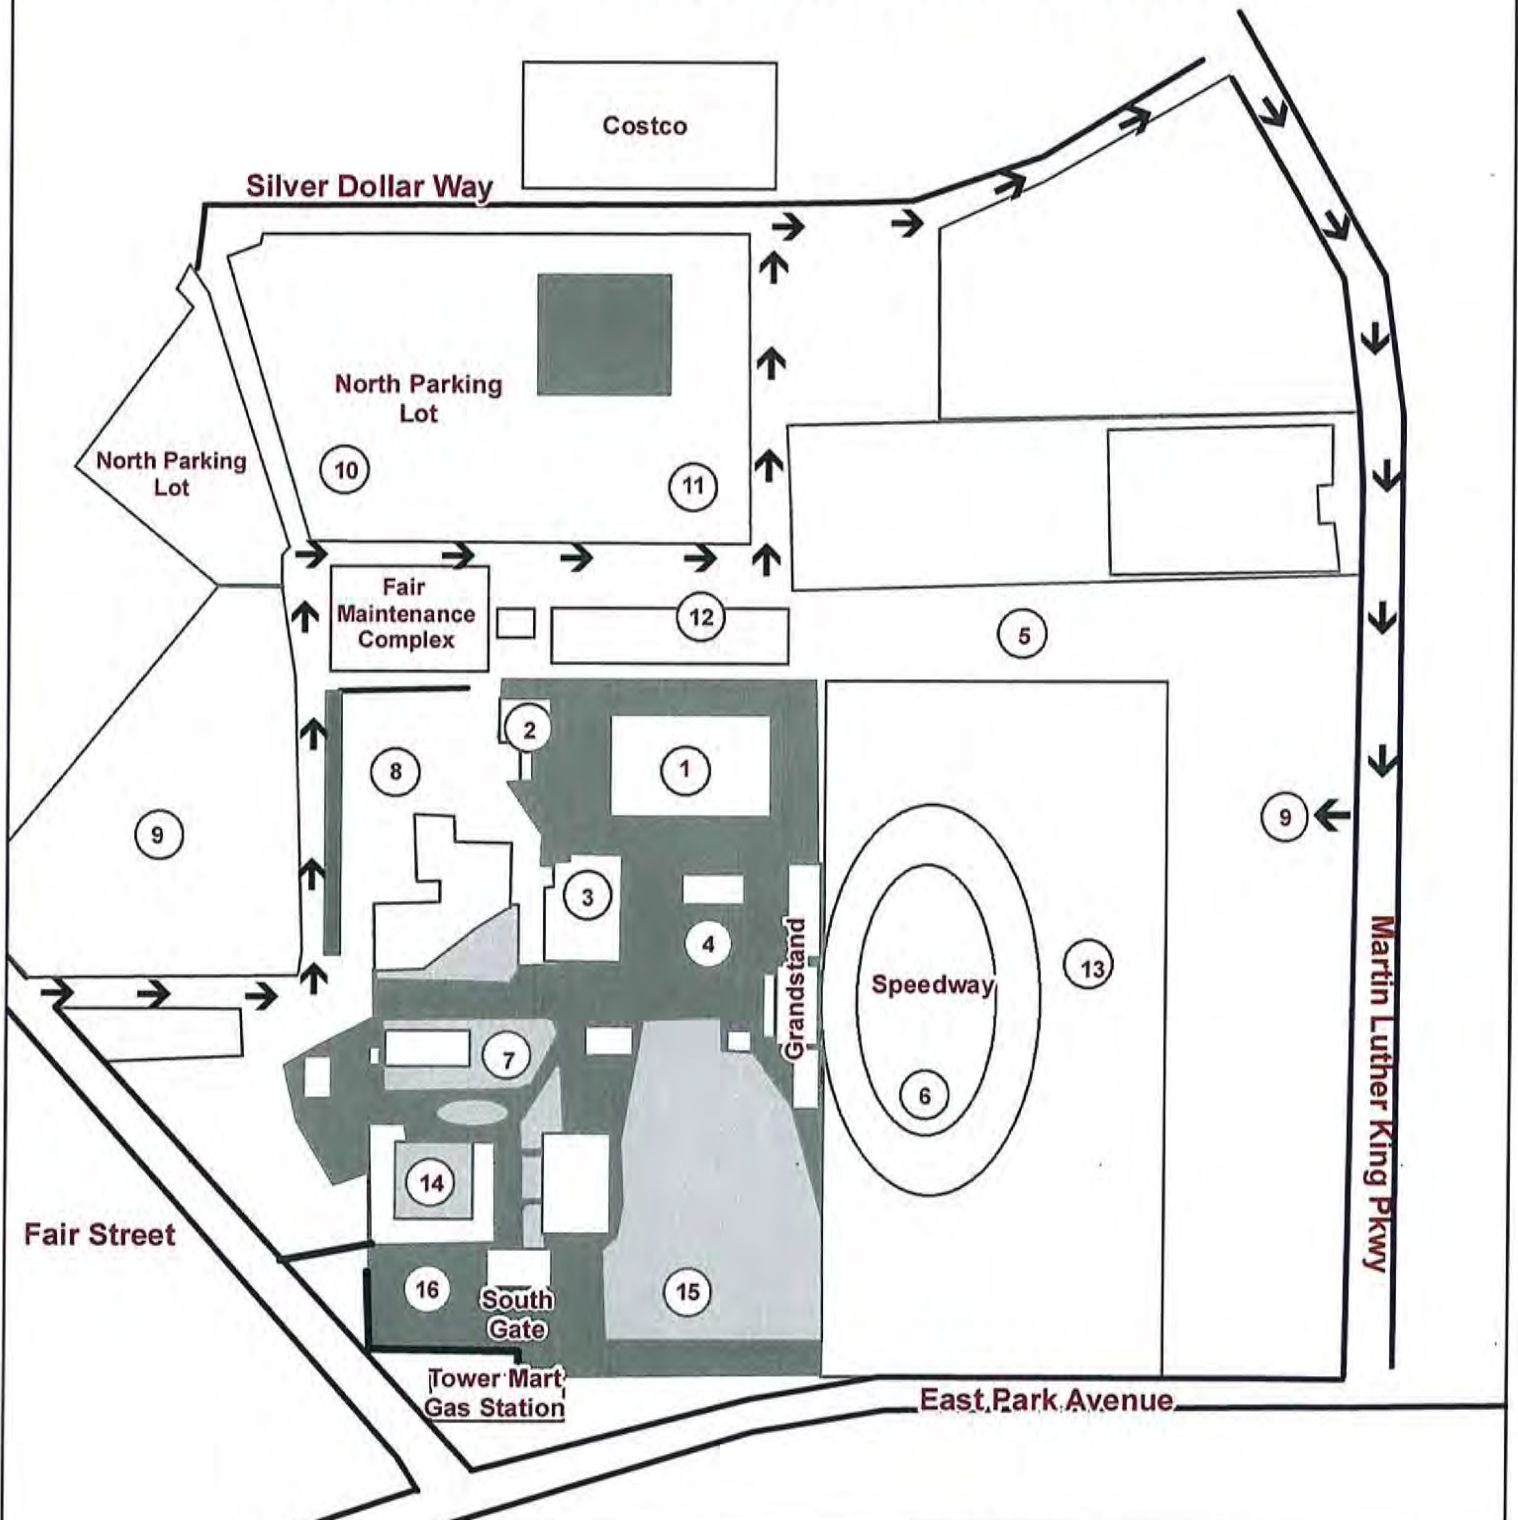

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.
