Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Immediately separate yourself from others.
- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Shortness of breath or difficulty breathing
 - New loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
- Avoid handshakes and communal use items.
- Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.
- Disinfect high touch surfaces often:
 - Radios, phones, doors, pumps, fuel cans, etc.

Social Distancing and Protective Equipment

- Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
- Utilize face coverings as a tool when practical.
- Clean or replace dirty face coverings, equipment, and PPE.

Communications

- Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

Protect yourself, your crew, and your camp!

Find more information: <https://www.nwcg.gov/coronavirus>.

Fire Weather Forecast

FORECAST NO: 18
PREDICTION FOR: Sunday-Sunday Night
DATE: September 27th, 2020
FORECAST ISSUED: 1900 September 26th, 2020

Fire: North Complex West Zone
UNIT: Plumas/Butte
Incident Meteorologist: Kari Fleege
Signed: 

*****RED FLAG WARNING continues through Monday*****
Wind Advisory continues into Monday afternoon

WEATHER DISCUSSION: Windy conditions remain across the fire area into Monday. Strong gap winds will be the main concern tonight, funneling down the large valleys we have on the western and eastern sides of the fire. Localized exposed higher peaks and ridges will also experience some of the strongest winds. An area of high pressure will continue to build across the western U.S., allowing warmer and drier air to settle overhead. Expect poor relative humidity recoveries at night.

TODAY:

WEATHER: Windy. Sunny with patchy smoke and blowing dust.
MAX TEMP: 82-88° **MIN RH:** 19-25%
CHC WTG RAIN: 0% **LAL:** 1

WINDS (20 FEET): Out of the northeast 15-25 mph with gusts to 35 mph.

Exposed Ridges and elongated northeast to southwest oriented valleys (particularly the Big Bend/Jarbo Gap area): Winds out of the northeast diminishing to 15-25 mph with gusts to 35 mph after 1000. Winds increasing again after 1400, to 20-30 mph with gusts around 40 mph. Localized higher gusts possible.

MIXING HEIGHT: 1500 feet until 1000 and reaching 4000 feet around 1400.

TRANSPORT WIND: North 20-25 mph.

VISIBILITY: 1-5 miles.

TONIGHT:

WEATHER: Very windy. Clear, with patchy smoke and blowing dust.
MIN TEMP: 64-70° **MAX RH:** 25-31%
CHC WTG RAIN: 0% **LAL:** 1

WINDS (20 FEET): Winds out of the northeast 20-30 mph with gusts to 40 mph.

Exposed Ridges and elongated northeast to southwest oriented valleys (particularly the Big Bend/Jarbo Gap area): Northeast 25-35 mph with gusts to around 45 mph. Localized gusts to 55 mph possible around Jarbo Gap.

MIXING HEIGHT: Decreasing to around 500 feet AGL overnight.

TRANSPORT WIND: Northeast 20-25 mph.

INVERSION: Moderate temperature inversion developing, and peaking near sunrise at 0500.

EXTENDED OUTLOOK: Monday through Thursday:

A Red Flag Warning will remain in effect into Monday afternoon due to critical fire weather conditions. The strong winds out of the northeast will slowly diminish after 0800 Monday, decreasing to around 5-15 mph with gusts to 25 mph by early afternoon. Well above average temperatures and poor relative humidity recovery will remain as an upper level ridge of high pressure lingers across the western U.S. through the week. Expect afternoon relative humidity values to fall into the teens through the entire week, with overnight recoveries only around 30%.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 18	TYPE OF FIRE: Wildland Fire
FIRE NAME: North Complex West Zone	OPERATIONAL PERIOD: 24hr 9/27 (0700-0700)
DATE ISSUED: 9/26/2020	TIME ISSUED: 1900
UNIT: BTU	SIGNED: Jonathan Pangburn, FBAN 

INPUTS

WEATHER SUMMARY

****RED FLAG WARNING****
See Weather Forecast in IAP.

OUTPUTS

GENERAL:

No major fire activity is expected on the North Complex West Zone, despite the elevated wind, warming temperature, and lowering RH. Smoldering continues as heavy fuels are consumed. Overnight, expect sustained wind & gusts to threaten control lines in both zones, especially with no RH recovery. Crown fire potential still exists, with critical fuel moisture & heavy fuels, increasing into the week with incoming heat, low RH, and decreased smoke cover. Overnight, ember cast still possible with steady downcanyon wind.

Probability of ignition remains elevated overnight, around 40-50%. This value will continue to increase as temperatures warm & humidity falls through the week. Smoke inversion will be mostly absent into Tuesday. Any new starts will have potential for rapid rates of spread and sustained active crown fire.

NOPS has issued a fuels and fire behavior advisory for elevated ERCs & dry fuels. ERC at 90th percentile, 100-hr dead fuel near average, and 1,000-hr dead fuel at 97th percentile. Severe Drought conditions.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	8' (2.4 m)	70 ch/hr (1.4 km/hr)	3/4 mile (1.1 km)	80%
Grass/Shrub Mix	10' (3.0 m)	50 ch/hr (1.0 km/hr)	3/4 mile (1.1 km)	80%
Shrub	20' (6.0 m)	100 ch/hr (2.0 km/hr)	3/4 mile (1.1 km)	80%
Timber Understory	12' (3.6 m)	20 ch/hr (0.4 km/hr)	3/4 mile (1.1 km)	80%
Timber Litter	6' (1.8 m)	10 ch/hr (0.2 km/hr)	3/4 mile (1.1 km)	80%

****minimum safety zone size for brush/plantation is 1-acre (0.4 Ha) for a Strike Team of Engines.**
****minimum safety zone size for timber understory is 1/2-acre (0.2 Ha) for a Strike Team of Engines.**

SPECIFIC:

DIV C / D / F: Little to no fire activity anticipated. Few smokes visible near control lines, with fire smoldering in downed fuels. Substantial fuel loading with ladder fuels in Lost Creek, Bear Gulch, Mooreville Ridge Rd, Squaw Flat Rd and Forbestown. Sunset Hill to Robinson Mills could see fire growth if any spots establish. Watch Lower Forbestown Rd to Rebbie Way for overnight winds on ridgeline and spotting potential.

DIV I / M / R / T: No fire growth expected.

New starts could see active crown fire with overnight winds. Expect rapid rates of spread in brush and timber

AIR OPERATIONS:
 Mostly sunny with patchy smoke.
 Mixing height: 5,000 ft. AGL. Transport winds: NW 5-10 mph. Sunrise 0658, Sunset 1853.

SAFETY

Don't let down your guard down. Tragedies have occurred during mop up, especially in light flashy fuels. Common Denominator #1: Fatal and near-fatal fires often occur on relatively small fires or deceptively quiet areas of large fires. Critical fuel moisture has led to dangerous rates of spread and extreme fire behavior. Expect crown fire and long range spotting during wind events. Escape routes may become compromised due to long range spotting; have more than one route, and consider the time it takes to reach a safety zone or TRA.

Fuels and Fire Behavior Advisory

Northern California Geographic Area

September 7, 2020

Subject: Extended high temperatures continues to rapidly dry out an above normal live fuel load and dead fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures in August and early September coupled with limited precipitation has been expanding extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through September. The thunderstorm event of August 16-17 produced much lightning with limited rainfall that only lowered fire danger for a very brief period. Fires have recently shown or exhibited rapid or dangerous spread rates or generate extreme fire behavior once the any cap of smoke lifts out. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to **above normal fine fuel loading**. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will generally range between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

Fuels – Low Elevation Grass Crop

Sierra Foothills Rangeland Forage Production Data

- 40 years of consistent data
- 2019-20 growing season 4th highest total
- 5 seasons of above normal in a row

Top 5 Growing Seasons	Pounds/Acres
2017-18	5514
1992-93	4696
1982-83	4630
2019-20	4420
2004-05	4410

For more information about the very unseasonable environmental conditions occurring, follow these links:

https://gacc.nifc.gov/oncc/fuelsFireDanger_Bi.php

https://gacc.nifc.gov/oncc/fuelsFireDanger_Erc.php

https://gacc.nifc.gov/oncc/fuelsFireDanger_Hundred.php

<https://vegdril.unl.edu/Home/StateVegDRI.aspx?CA>

https://gacc.nifc.gov/oncc/fuelsFireDanger_Thousand.php

<https://www.esrl.noaa.gov/psd/eddi/>

Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at <https://gacc.nifc.gov/oncc/predictive/weather/index.htm> or potential Red Flag conditions from the National Weather Service and weather at <https://www.wrh.noaa.gov/fire2/cafw/>.

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A, NC03B, NC04, NC05, NC06, NC07 and NC08.

6. Work Assignments:

Construct and improve control line.
 Evaluate the south side of the South Fork of the Feather River for secondary line construction options.
 Perform tactical patrol around structures for the potential of new starts, North of the South Fork of the Feather River.
 Mop up 300' around structures to prevent structure damage, and alleviate citizen concerns.
 Assess structures for hazardous conditions and provide locations as appropriate.
 Develop and prepare to implement structure defense plan.
 Fall hazard trees, and trees that threaten control lines, to mitigate the threat of fire escaping, while maintaining personnel safety.
 Mop up 300' interior along fire perimeter.
 Hold fire within established control lines.
 Remove hose lays and backhaul excess trash/hose/water.

7. Special Instructions:

*****FOR BUTTE CMD, SEE 205 FOR PROPER TONE-BASED ON LOCATION*****

REMS 1, assigned to DIV C is available for all of Branch XX.

6. Work Assignments:
Identify and document suppression repair needs to facilitate timely completion of repairs. Implement Suppression Repair Plan.

When entering or exiting a DIV to conduct Suppression Repair, ALL Resources must check in/out with the DIV.

7. Special Instructions:
*****FOR BUTTE CMD, SEE 205 FOR PROPER TONE-BASED ON LOCATION*****

Use caution, utility vehicles will be working in the fire area clearing downed lines. Drive with your lights on and keep your speed down.

SAFETY MESSAGE

NORTH COMPLEX, WEST ZONE

20.CA.BTU.010751 - September 27, 2020 - 0700 TO 0700

CHANGE IN WEATHER

INCREASED WINDS and WIND SHIFTS IN FIRE AREA

Watch Out

- Increased Fire Behavior due to WIND changing of direction, North Winds and over the next few days.
- High probability for increased fire behavior, potential for the winds to challenging our containment lines.
- Hazard Trees: Be cognizant of the wind challenging the integrity of the fire damaged trees within and outside the fire line.

Mitigation

- Keep informed on predicted fire weather conditions and forecasts
- Base all actions on current and expected fire behavior
- Utilize LCES when: constructing downhill line and going direct, flag hazard trees.

OPERATE WITHIN YOUR LIMITS

WORK / REST, QUALIFICATIONS, DRIVING

Watch Out

- **Mop up** can include roll out, snags, and uneven footing. Watch for ash pits and root bails
- **Hot weather** can lead to dehydration, heat illness, serious medical emergencies
- **Working beyond capabilities** can lead to a failure to identify risks
- **Unsafe vehicle operation** can lead to accidents and serious/catastrophic injury

Mitigation

- Stay alert, preplan actions, communicate, and have a look out. Identify and flag ash pits
- Proper nutrition, rest and hydration reduces fatigue and exhaustion emergencies
- Know your qualification level and be honest about capabilities
- Slow down, maintain a safe distance, turn on lights, allow for extra travel time

DEFENSIVE DRIVING

REDUCE YOUR EXPOSURE

- **Demob:**
 - ✓ Drive safely for conditions on the road and at ground support
 - ✓ **Slow Speeds**, use blinkers, anticipate other drivers
 - ✓ Follow posted routes of travel
 - ✓ **DEMOB:** Be extra cautious while your inspection is being performed. Do a full walk around before you leave.

INCIDENT ACTION PLAN SAFETY ANALYSIS (ICS 215A)

1. Incident Name: North Complex West Zone		2. Incident Number: 20-CA-BTU-10751
3. Date/Time Prepared: Date: 09/26/2020 Time: 1700hrs		4. Operational Period: Date From: 09/27/2020 To: 09/28/2020 Time From: 0700hrs To: 0700hrs
5. Incident Area	6. Hazards/Risks	7. Mitigations
Branch XX, XXIII Div T, Contingencies	Fatigue – physical, mental, dehydration / rhabdomyolysis, other illness	Continually monitor your crew. Know the signs and symptoms of heat illness. 2-1 work rest work cycle, water and caloric intake regime.
Division C, D, F	Firing Plans	Provide a briefing on the plan, use the Go-No-Go checklist and confirm communications.
Branch XX, XXIII Div T	Driving and Roadways Chippers / Crews	DRIVE WITH CAUTION / SLOW DOWN, Drive with lights on, and allow extra time to get to destination. Use Traffic Signs
Branch XX, XXIII Div T	Powerlines / Power Poles	IRPG Pg. 24: Treat all lines as if they are energized. Flag downed powerlines as hazard to others, and notify.
Branch XX, XXIII Div T	Weather and Fire Behavior	Stay mobile and identify escape routes and safety zones and make them known to your personnel.
Branch XX, XXIII Div T, Contingencies	Poor Communications	Review ICS 205 and ensure radio clone is current. Preplan a backup relay plan. Ensure all resources are briefed.
Branch XX, XXIII Div T, Contingencies	Steep, undercut and unstable terrain	Watch footing and maintain downhill tool placement. Be aware of loose material. Look for ash pits/stump holes.
Branch XX, XXIII Div T	Unburned areas / Repopulation	Watch for evacuees; LCES - utilize worst case scenario when working in or around pockets of unburned fuels.
Branch XX, XXIII Div M,R,T	Hazardous trees	IRPG Pg 22: Identify and flag. LOOK UP! No extended breaks under trees. Post lookouts if working under trees.
Branch XX, XXIII Div R,T, Contingencies	Airborne hazards	Be aware of your surroundings, wear proper PPE, utilize SCBA's and N95 masks when appropriate.
Branch XX, XXIII Div T, Contingencies	COVID-19: Reduce exposure potential to yourself, your crew and the public	<u>Wear a mask</u> while in the ICP, while feeding and with the public, and when six feet of social distancing is difficult. Wash hands for at least 20-seconds.
Branch XX, XXIII Div T	Helicopters - water drops and turbulence	Post lookouts and make escape routes and safety zones know. LCES. Watch overhead for hazard trees.
Branch XX, XXIII Div T	Burned residences may contain hazardous materials.	Utilitze "3-stripes You're Out" flagging and notify line supervisor.
Div I, F, T, R, M	Water ways and water craft	Be vigilant working around water with your PPE on.
All incident locations	COVID19: Reduce exposures to yourself, your crew and the public	<u>Wear a mask</u> in ICP, with public, and when 6-feet of distancing is difficult. Wash hands for at least 20-seconds.

SAFETY COMMUNICATION / WEST ZONE

HAZARD TREES

All personnel working on the West Zone Fire need to maintain situational awareness while working in areas around fire damaged trees, "Hazard Trees". Many Divisions and Branches have reported trees both burned and unburned falling during the last 14 operational periods. Remember there are thousands of acres of standing hazard trees posing an extreme life safety hazard to firefighters as well as to the civilian population. Educating and training our personnel on "hazard tree" awareness, identification/mitigation when working, training and responding to these fire damaged tree area is **CRITICAL**.

- Identify the "Hazard Trees" in your divisions or grid.
- Recognize when working in identified "Hazard Tree" areas and provide tailgate safety briefings to your crews.
- Incidents should be focused on firefighter safety with hazard tree considerations.
- Be prepared by locating personnel and vehicles in a wide-open area.
 - Delay or Withdraw until the wind has subsided
 - Wear proper PPE at all times while in the fire perimeter
- Recognize the potential for:
 - Green trees falling without warning as well as fire damaged trees
 - Ground fires rapidly reaching the crowns of large dead stands of trees
 - Trees and limbs falling during air operations or windy conditions
 - Domino effect of when falling limbs and trees come in contact with one another
- **Wind Event:** With the expected gusts of up to 50 miles per hour, recognize the increased potential for "Silent Tree Fall" in the area you and your crew are assigned.

MITIGATIONS

- Branches and Divisions should focus on life safety and safe ingress/egress, as well as suppression options and safe access prior to event
- Lookout-Day and Night when working around fire weakened or drought stressed trees
- Communicate-Brief personnel when working near fire weakened or hazard tree areas
- Escape Routes-May be compromised by falling trees
- Safety Zones-Are identified and large enough for a "Hazard Tree" area.

Douglas M. Ferro

FINANCE MESSAGE

TIME UNIT

We are undergoing a new process to speed up Demob for *Cal Fire - Hired Equipment*. Financial payment documents for *Cal Fire - Hired Equipment* will be completed through E-Mail with DocuSign unless other arrangements have been made prior to Demob

When Demobing from the Incident, please bring the Time Unit the following information...

- EMAIL ADDRESS FOR REPRESENTATIVE WHO WILL SIGN DOCUMENTS
- NAME OF SIGNEE
- PHONE # FOR SIGNEE
- GOLDEN TICKETS

Hired Equipment Suppliers will meet with a Time Representative at Demob, who will assist with gathering all information to ensure proper payment of equipment

***Electronic processing will allow for Faster Processing and Payment to Supplier's**

****Documents can be signed and completed with any Smart Device (Smart Phone, Tablet, Computer) and does NOT require an account with DocuSign to complete**

Any Questions call 925-324-9188 or E-Mail imt4finance@gmail.com

DMOB

NORTH COMPLEX WEST ZONE INCIDENT CA-BTU-010751

- Resources must check-in prior to the Demobilization process.
 - In order to be deemed excess, supervisors must submit an ICS 213 to the Resources Unit.
 - Resources report to Demobilization Unit at the times posted on the tentative DMOB list, which is posted around the Incident Base and posted to the Box Account.
 - Prior to reporting to DMOB, please return all supplies and equipment.
 - Resources will get signatures from the following units:
 - Ground Support
 - Training (If they have a trainee)
 - Documentation
 - Time
 - DMOB
- The following will be done by radio at DMOB**
- Motels
 - Supply
 - Communications

EMERGENCY FIRE SUPPRESSION REPAIR PLAN – NORTH COMPLEX WEST ZONE

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas caused by the fire. We cannot upgrade facilities beyond their pre-fire condition. Fire suppression repair shall be applied to mitigate infrastructure damage and natural resource damage.

Infrastructure Damage: Culverts and other watercourse crossings, water sources, trails, road barriers removed for fire access, trash, debris and supplies left by fire suppression activities; miscellaneous.

Natural Resource Damage: Repair of existing problems caused by fire suppression activities (direct effect) to natural resources and to prevent likely future problems such as accelerated erosion caused by rains (indirect effect). The goal is to minimize soil erosion, adverse impacts to water quality, and adverse impacts to protected species of plants and animals

REPAIR GUIDELINES

General: Restore berms and barriers removed for fire control access.

Drop Points/Staging Areas/Safety Zones: New construction - cross drain and abandon (if applicable). Existing - repair to original condition, remove debris resulting from use. Pick up all trash.

Roads: Reshape soil surfaced roads that were used during fire control operations. Roads should be out-sloped with rolling dips where degradation of the road prism has resulted from fire control operations. Clean out culvert inlets and outlets as needed. Report any damaged culverts to the Fire Suppression Repair Specialist for specific repair guidance. Breach berms, where appropriate, to facilitate drainage.

Firelines: Break apart dozer piles of pushed over trees, vegetation and soil, and spread along tractor roads, tractor fire breaks, or any other areas disturbed during fire suppression activities. Lop and scatter displaced vegetation to a height of less than 30 inches or chip within 100' of a public or unlocked private road or structure. Scatter the lopped material along the fire line. Pull back any excess soil material sidecast along roads or tractor disturbed areas that are located within 100 feet of any watercourse or spring. Install waterbreaks on all constructed or used dozer lines using the following criteria:

Fireline and road gradient(%) oak woodland:	0-10	11-25	26-50	>50
Fireline waterbreak spacing:	150'	100'	75'	50'
Road waterbreak spacing:	300'	200'	150'	100'
Fireline and road gradient(%) Timber	:0-10	11-25	26-50	>50
Fireline waterbreak spacing:	100'	75'	50'	25'
Road waterbreak spacing:	200'	150'	100'	75'

Waterbreaks and/or rolling dips shall be used to reduce the volume and velocity of water by directing it off fire lines as soon as possible at controlled locations. The outfall end of all waterbreaks shall be opened by hand if necessary. Waterbreaks should be located to discharge into natural vegetation. Waterbreaks should cross the fire line at an angle of approximately 45 degrees.

Handlines: Install waterbreaks as needed based on slope and soil erodibility.

All waterbreaks shall be installed diagonally with a minimum cut of 6" into existing grade, and minimum height of 12". Waterbreaks shall be constructed to allow for drainage at the discharge end into non-erodible material.

Slash Piles: Piles within 150' of permanent structures or public roads will be lopped and/or scattered within 18" of the soil surface.

Piles along roads and fences: Lop to fire protection standards to ensure decreased fire risk is obtained. Scatter smaller debris where applicable.

Watercourse Crossings: All slash, soil, and debris deposited into watercourses resulting from fire suppression activities shall be removed and stabilized above the high-water line.

Major watercourse damage, if present, shall be reported to the Fire Suppression Repair Specialist prior to the end of the shift day.

Where fire lines are constructed within 100' of flowing watercourses, slash or straw mulching will be applied. All loose soil must be pulled away from the watercourse and stabilized.

Archaeological or Historic Sites: All potential sites shall be avoided. Contact Incident Archaeologist or the Suppression Repair Specialist.

TRAINING SPECIALIST

CHECK-IN

A Training Specialist is available for trainees on the incident.

All State, Federal and local government agency Trainees working on Position Task Books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

Dennis Martin
Training Specialist
(707) 479-8421

Register using the QR Code

Trainee Check-Out

If you would like to CHECK-OUT / CLOSE OUT your packet with the Training Specialist, please scan the QR code, fill in “ALL” information and “click” submit.

Your completed packet will be emailed back to you

If you have any questions or concerns, please feel free to contact me.

Training Specialist

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.
