

INCIDENT ACTION PLAN

NORTH COMPLEX WEST ZONE

CA-BTU-010751

Monday

9/28/2020 0700
to
9/29/2020 0700

Briefing Frequency - CDF - Tac 29

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: NORTH COMPLEX WEST ZONE	2. Operational Period:	Date From: 9/28/2020	Date To: 9/29/2020
		Time From: 0700	Time To: 0700

3. Objective(s):

Management Objectives

- Provide for and maintain public and first responder safety by utilizing the incident safety analysis process.
- Ensure COVID-19 precautions and best practices are met at all times.
- Protect the commercial timberland, historical and cultural assets within the affected area, infrastructure, improvements, and watersheds.
- All management actions and efforts will be focused on serving, safeguarding, and protecting the citizens of Butte and Plumas Counties.
- Ensure coordinated, timely and accurate release of public information.
- Be financially responsible for all management and fire suppression tactics.

Control Objectives

- Keep the fire North of Lamb Hill.
- Keep the fire East of Table Mtn.
- Keep the fire South of Gold Flat.
- Keep the fire West of Georgia Gulch.

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Fire and COVID-19 Briefing Checklist

Self-Awareness / Screening

- Immediately separate yourself from others.
- Notify supervisor if you or others experience:
 - Cough, more than expected
 - Shortness of breath or difficulty breathing
 - New loss of taste or smell
 - Fever
 - Chills
 - Sore throat
 - Muscle pain
- Review and follow crew and division plans to isolate, triage, and transport symptomatic personnel.

Hygiene on the Fireline

- Properly wash or sanitize your hands often, especially before and after eating or entering a public place, and after coughing or sneezing.
- Avoid handshakes and communal use items.
- Maintain a supply of hand sanitizer and hand wipes. Inform supervisor of needed resupply.
- Disinfect high touch surfaces often:
 - Radios, phones, doors, pumps, fuel cans, etc.

Social Distancing and Protective Equipment

- Initiate, practice, and remind others of social distancing.
- Conduct briefings and conversations outdoors and at least 6 feet apart.
- Utilize face coverings as a tool when practical.
- Clean or replace dirty face coverings, equipment, and PPE.

Communications

- Face coverings and social distancing complicate communications. Ensure effective sender/receiver messaging.

Protect yourself, your crew, and your camp!

Find more information: <https://www.nwccg.gov/coronavirus>.

Fire Weather Forecast

FORECAST NO: 19
PREDICTION FOR: Monday-Monday Night
DATE: September 28th, 2020
FORECAST ISSUED: 1900 September 27th, 2020

Fire: North Complex West Zone
UNIT: Plumas/Butte
Incident Meteorologist: Kari Fleegel
Signed: *[Signature]*

*****RED FLAG WARNING continues*****

Wind Advisory continues

WEATHER DISCUSSION: Our strong winds, and in particular the gap winds, this morning will slowly diminish though the daytime hours as the pressure gradient weakens. The very warm and very dry conditions will continue as the large upper level ridge of high pressure strengthens its hold over the western U.S. Due to the very low relative humidity, dry fuels, and gusty winds, the Red Flag Warning remains in effect. A Wind Advisory also remains in effect.

TODAY:

WEATHER: Breezy early. Sunny, with patchy smoke and haze.
MAX TEMP: 85-93° **MIN RH:** 15-20%
CHC WTG RAIN: 0% **LAL:** 1

WINDS (20 FEET): Decreasing out of the east-northeast 10-20 mph with gusts to 25 mph by 1100. Winds to increase out of the northeast 15-25 mph with gusts to 30 mph after 2000.

Exposed Ridges and elongated northeast to southwest oriented valleys (particularly the Big Bend/Jarbo Gap area): Decreasing out of the northeast 15-25 mph with gusts to 35 mph by 1100. Winds increasing to 20-30 mph with localized gusts to 40 mph after 2000.

ICP/Chico Helibase: Out of the Northwest 15-20 mph with gusts 25 to near 30 mph, decreasing to 10-15 mph after 1900.

MIXING HEIGHT: 1500 feet until 1000 and reaching 6000 feet around 1400.

TRANSPORT WIND: East 15-20 mph.

VISIBILITY: 2-5 miles.

TONIGHT:

WEATHER: Clear, with patchy smoke and haze.
MIN TEMP: 63-70° **MAX RH:** 23-30%
CHC WTG RAIN: 0% **LAL:** 1

WINDS (20 FEET): Decreasing out of the east 10-15 mph with gusts up to 25 mph after 0300.

Exposed Ridges and elongated northeast to southwest oriented valleys (particularly the Big Bend/Jarbo Gap area): Decreasing out of the northeast 15-25 mph with gusts to 35 mph after 0300.

ICP/Chico Helibase: Out of the north-northwest 10-15 mph.

MIXING HEIGHT: Decreasing to around 500 feet AGL overnight.

TRANSPORT WIND: Northeast around 15 mph.

INVERSION: Moderate temperature inversion developing, and peaking near sunrise at 0500.

EXTENDED OUTLOOK: Tuesday through Friday:

While our winds will be decreasing, the heat and dry air will remain, as an upper level ridge of high pressure lingers across the western U.S. through the week. Expect afternoon relative humidity values to fall into the teens through the entire week, with overnight recoveries only around 30%. More autumn like upslope/upvalley afternoon winds, and stronger late evening-overnight downslope/downvalley winds will be the theme from Tuesday on.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 19	TYPE OF FIRE: Wildland Fire
FIRE NAME: North Complex West Zone	OPERATIONAL PERIOD: 24hr 9/28 (0700-0700)
DATE ISSUED: 9/27/2020	TIME ISSUED: 1900
UNIT: BTU	SIGNED: Jonathan Pangburn, FBAN <i>Jonathan Pangburn</i>

INPUTS

WEATHER SUMMARY

****RED FLAG WARNING****
See Weather Forecast in IAP.

OUTPUTS

GENERAL:

No major fire activity is expected on the North Complex West Zone, despite the elevated wind, warming temperature, and lowering RH. Smoldering continues as heavy fuels are consumed. Overnight, expect sustained wind & gusts to threaten control lines in both zones, especially with no RH recovery. Crown fire potential still exists, with critical fuel moisture & heavy fuels, increasing into the week with incoming heat, low RH, and decreased smoke cover. Overnight, ember cast still possible with steady downcanyon wind.

Probability of ignition remains elevated overnight, around 60-75%. This value will continue to increase as temperatures warm & humidity falls through the week. Smoke inversion will be mostly absent into Tuesday. Any new starts will have potential for rapid rates of spread and sustained active crown fire.

NOPS has issued a fuels and fire behavior advisory for elevated ERCs & dry fuels. ERC & 100-hr dead fuel average for this time of year, and 1,000-hr dead fuel at 90th percentile. Severe Drought conditions.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	7' (2.1 m)	50 ch/hr (1.0 km/hr)	1/2 mile (0.7 km)	90%
Grass/Shrub Mix	8' (2.4 m)	30 ch/hr (0.6 km/hr)	1/2 mile (0.7 km)	90%
Shrub	20' (6.0 m)	70 ch/hr (1.4 km/hr)	1/2 mile (0.7 km)	90%
Timber Understory	12' (3.6 m)	15 ch/hr (0.3 km/hr)	1/2 mile (0.7 km)	90%
Timber Litter	5' (1.5 m)	10 ch/hr (0.2 km/hr)	1/2 mile (0.7 km)	90%

****minimum safety zone size for brush/plantation is 1-acre (0.4 Ha) for a Strike Team of Engines.**

****minimum safety zone size for timber understory is 1/2-acre (0.2 Ha) for a Strike Team of Engines.**

SPECIFIC:

DIV C / D / F: Little to no fire activity anticipated. Substantial fuel loading with ladder fuels in Lost Creek, Bear Gulch, Mooreville Ridge Rd, Squaw Flat Rd and Forbestown. Sunset Hill to Robinson Mills could see fire growth if any spots establish. Watch Lower Forbestown Rd to Rebbie Way for overnight winds on ridgeline and spotting potential.

DIV I / M / R / T: No fire growth expected.

New starts could see active crown fire with overnight winds. Expect rapid rates of spread in brush and timber

AIR OPERATIONS:

Mostly sunny with patchy smoke.

Mixing height: 6,000 ft. AGL. Transport winds: E 15-20 mph. Sunrise 0659, Sunset 1851.

SAFETY

Don't let down your guard down. Tragedies have occurred during mop up, especially in light flashy fuels. Common Denominator #1: Fatal and near-fatal fires often occur on relatively small fires or deceptively quiet areas of large fires.

Critical fuel moisture has led to dangerous rates of spread and extreme fire behavior. Expect crown fire and long range spotting during wind events. Escape routes may become compromised due to long range spotting; have more than one route, and consider the time it takes to reach a safety zone or TRA.

Fuels and Fire Behavior Advisory

Northern California Geographic Area

September 7, 2020

Subject: Extended high temperatures continues to rapidly dry out an above normal live fuel load and dead fuels across Northern California. Extreme fire behavior and rapid to dangerous rates of spread has occurred during enhanced breezy periods accompanied with low humidity in areas clear of smoke. Extreme fire behavior will become more common as the fuel drying continues in September.

Discussion: Weeks of record temperatures in August and early September coupled with limited precipitation has been expanding extreme to severe drought conditions across much of the Geographic Area. All indications show these drought conditions persisting through September. The thunderstorm event of August 16-17 produced much lightning with limited rainfall that only lowered fire danger for a very brief period. Fires have recently shown or exhibited rapid or dangerous spread rates or generate extreme fire behavior once the any cap of smoke lifts out. There is a high potential for extreme fire behavior to persist under a wider range of conditions as fuel continues to dry and gusty north to northeast foehn winds events become more frequent.

Difference from normal conditions: Winter precipitation was below to well below normal with 55% of normal mountain snowpack. Late spring moisture during the heart of the low-mid elevation growing season led to **above normal fine fuel loading**. Typical dry summer conditions coupled with above normal temperatures has dramatically effected fuel dryness and fire danger indices. ERC's will generally range between 90th to 97th percentile the next 2 weeks with some PSA's experiencing seasonal record values. This time of year, live brush has typically low moisture levels due to normal seasonal drying but recently sampled live brush are at the at historic lows for many sampling sites.

Fuels – Low Elevation Grass Crop

Sierra Foothills Rangeland Forage Production Data

- 40 years of consistent data
- 2019-20 growing season 4th highest total
- 5 seasons of above normal in a row

Top 5 Growing Seasons	Pounds/Acres
2017-18	5514
1992-93	4696
1982-83	4630
2019-20	4420
2004-05	4410

For more information about the very unseasonable environmental conditions occurring, follow these links:

https://gacc.nifc.gov/oncc/fuelsFireDanger_Bi.php

<https://vegdril.unl.edu/Home/StateVegDRI.aspx?CA>

https://gacc.nifc.gov/oncc/fuelsFireDanger_Erc.php

https://gacc.nifc.gov/oncc/fuelsFireDanger_Thousand.php

https://gacc.nifc.gov/oncc/fuelsFireDanger_Hundred.php

<https://www.esrl.noaa.gov/psd/eddi/>

Concerns to Firefighters and the Public:

- Cured fine fuel loading below 3,000' elevation is above normal, exhibiting very rapid fire spread.
- Firefighters should be prepared for potential extreme fire behavior and dangerous or otherwise rapid rates of spread at any time of day, especially during foehn wind events.
- The potential for extreme fire activity will be likely to continue until enough precipitation occurs to significantly increase fuel moisture.
- Rapid rates of spread could have a significant impact on public safety and make evacuations difficult.

Mitigation Measures:

- All local and visiting firefighters need to remain aware of current and expected weather and burning conditions and consider such information while making strategic and tactical decisions.
- Employ LCES principles (Lookouts, Communications, Escape Routes, Safety Zones).
- Review current fire potential products from Predictive Services at <https://gacc.nifc.gov/oncc/predictive/weather/index.htm> or potential Red Flag conditions from the National Weather Service and weather at <https://www.wrh.noaa.gov/fire2/cafw/>.

Area of Concern: All areas across Northern California could see very active fire behavior. The PSA numbers associated with those areas are NC01, NC02, NC03A, NC03B, NC04, NC05, NC06, NC07 and NC08.

ASSIGNMENT LIST (ICS 204 WF)

SAFETY MESSAGE

NORTH COMPLEX, WEST ZONE

20.CA.BTU.010751 - September 28, 2020 - 0700 TO 0700

FIRE WEAKENED TREES

SNAGS, and WEAKENED TREES PRESENT A SERIOUS RISK

Watch Out Tree and limb fall has been reported throughout the fire area

- Areas having burned for several weeks may have standing snags ready to fall
- Probability of falling trees is **HIGH**: Trees may fall without warning, afternoon/evening winds may increase potential
- Drought conditions have created snag patches in areas of the fire

Mitigation Situational awareness is the key to mitigating this risk

- Scout line prior to engagement in areas with, scout areas in daylight when fire damaged trees.
- Avoid areas with identified weak and fire weakened trees when appropriate
- Flag hazard trees, prevent access as possible, and notify falling modules to mitigate hazard trees

OPERATE WITHIN YOUR LIMITS

WORK / REST, QUALIFICATIONS, DRIVING

Watch Out

- **Mop up** can include roll out, snags, and uneven footing. Watch for ash pits and root bails
- **Hot weather** can lead to dehydration, heat illness, serious medical emergencies
- **Working beyond capabilities** can lead to a failure to identify risks
- **Unsafe vehicle operation** can lead to accidents and serious/catastrophic injury

Mitigation

- Stay alert, preplan actions, communicate, and have a look out. Identify and flag ash pits
- Proper nutrition, rest and hydration reduces fatigue and exhaustion emergencies
- Know your qualification level and be honest about capabilities
- Slow down, maintain a safe distance, turn on lights, allow for extra travel time

DEFENSIVE DRIVING

REDUCE YOUR EXPOSURE

- **Demob:**
 - ✓ Drive safely for conditions on the road and at ground support
 - ✓ **Slow Speeds**, use blinkers, anticipate other drivers
 - ✓ Follow posted routes of travel
 - ✓ **DEMOB**: Be extra cautious while your inspection is being performed. Do a full walk around before you leave.

BE FIRE FOCUSED AND COVID AWARE

INCIDENT ACTION PLAN SAFETY ANALYSIS (ICS 215A)

1. Incident Name: North Complex West Zone		2. Incident Number: 20-CA-BTU-10751
3. Date/Time Prepared: Date: 09/27/2020 Time: 1700hrs		4. Operational Period: Date From: 09/28/2020 To: 09/29/2020 Time From: 0700hrs To: 0700hrs
5. Incident Area	6. Hazards/Risks	7. Mitigations
Branch XX, XXIII Div T, Contingencies	Fatigue – physical, mental, dehydration / rhabdomyolysis, other illness	Continually monitor your crew. Know the signs and symptoms of heat illness. 2-1 work rest work cycle, water and caloric intake regime.
All Branches	Hazardous trees	IRPG Pg 22: Identify and flag. LOOK UP! No extended breaks under trees. Post lookouts if working under trees.
Branch XX, XXIII Div T	Driving and Roadways Chippers / Crews	DRIVE WITH CAUTION / SLOW DOWN, Drive with lights on, and allow extra time to get to destination. Use Traffic Signs
Branch XX, XXIII Div T	Powerlines / Power Poles	IRPG Pg. 24: Treat all lines as if they are energized. Flag downed powerlines as hazard to others, and notify.
Branch XX, XXIII Div T	Weather and Fire Behavior	Stay mobile and identify escape routes and safety zones and make them known to your personnel.
Branch XX, XXIII Div T, Contingencies	Poor Communications	Review ICS 205 and ensure radio clone is current. Preplan a backup relay plan. Ensure all resources are briefed.
Branch XX, XXIII Div T, Contingencies	Steep, undercut and unstable terrain	Watch footing and maintain downhill tool placement. Be aware of loose material. Look for ash pits/stump holes.
Branch XX, XXIII Div T	Unburned areas / Repopulation	Watch for evacuees; LCES - utilize worst case scenario when working in or around pockets of unburned fuels.
Branch XX, XXIII Div M,R,T	Needle Cast	Be Aware of new starts due to fresh needle cast on the burned area.
Branch XX, XXIII Div R,T, Contingencies	Airborne hazards	Be aware of your surroundings, wear proper PPE, utilize SCBA's and N95 masks when appropriate.
Branch XX, XXIII Div T, Contingencies	COVID-19: Reduce exposure potential to yourself, your crew and the public	<u>Wear a mask</u> while in the ICP, while feeding and with the public, and when six feet of social distancing is difficult. Wash hands for at least 20-seconds.
Branch XX, XXIII Div T	Helicopters - water drops and turbulence	Post lookouts and make escape routes and safety zones know. LCES. Watch overhead for hazard trees.
Branch XX, XXIII Div T	Burned residences may contain hazardous materials.	Utilitze "3-stripes You're Out" flagging and notify line supervisor.
Div I, F, T, R, M	Water ways	Be vigilant working around water with your PPE on.
All incident locations	COVID19: Reduce exposures to yourself, your crew and the public	<u>Wear a mask</u> in ICP, with public, and when 6-feet of distancing is difficult. Wash hands for at least 20-seconds.

FINANCE MESSAGE

TIME UNIT

We are undergoing a new process to speed up Demob for *Cal Fire - Hired Equipment*. Financial payment documents for *Cal Fire - Hired Equipment* will be completed through E-Mail with DocuSign unless other arrangements have been made prior to Demob

When Demobing from the Incident, please bring the Time Unit the following information...

- EMAIL ADDRESS FOR REPRESENTATIVE WHO WILL SIGN DOCUMENTS
- NAME OF SIGNEE
- PHONE # FOR SIGNEE
- GOLDEN TICKETS

Hired Equipment Suppliers will meet with a Time Representative at Demob, who will assist with gathering all information to ensure proper payment of equipment

***Electronic processing will allow for Faster Processing and Payment to Supplier's**

****Documents can be signed and completed with any Smart Device (Smart Phone, Tablet, Computer) and does NOT require an account with DocuSign to complete**

Any Questions call 925-324-9188 or E-Mail imt4finance@gmail.com

DMOB

NORTH COMPLEX WEST ZONE INCIDENT CA-BTU-010751

- Resources must check-in prior to the Demobilization process.
 - In order to be deemed excess, supervisors must submit an ICS 213 to the Resources Unit.
 - Resources report to Demobilization Unit at the times posted on the tentative DMOB list, which is posted around the Incident Base and posted to the Box Account.
 - Prior to reporting to DMOB, please return all supplies and equipment.
 - Resources will get signatures from the following units:
 - Ground Support
 - Training (If they have a trainee)
 - Documentation
 - Time
 - DMOB
- The following will be done by radio at DMOB**
- Motels
 - Supply
 - Communications

Local Government Resources on CFAA

If you are demobing from this incident and there is no OES AREP on site

F-42 thru the Incident Finance Section Chief

The Incident keeps the Pink copy and you keep the Golden.
The Original and Green you mail to OES Headquarters as per the
instructions on the front of your F-42

EMERGENCY FIRE SUPPRESSION REPAIR PLAN – NORTH COMPLEX WEST ZONE

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities. It is not the repair of infrastructure or rehabilitation of burned areas caused by the fire. We cannot upgrade facilities beyond their pre-fire condition. Fire suppression repair shall be applied to mitigate infrastructure damage and natural resource damage.

Infrastructure Damage: Culverts and other watercourse crossings, water sources, trails, road barriers removed for fire access, trash, debris and supplies left by fire suppression activities; miscellaneous.

Natural Resource Damage: Repair of existing problems caused by fire suppression activities (direct effect) to natural resources and to prevent likely future problems such as accelerated erosion caused by rains (indirect effect). The goal is to minimize soil erosion, adverse impacts to water quality, and adverse impacts to protected species of plants and animals

REPAIR GUIDELINES

General: Restore berms and barriers removed for fire control access.

Drop Points/Staging Areas/Safety Zones: New construction - cross drain and abandon (if applicable). Existing - repair to original condition, remove debris resulting from use. Pick up all trash.

Roads: Reshape soil surfaced roads that were used during fire control operations. Roads should be out-sloped with rolling dips where degradation of the road prism has resulted from fire control operations. Clean out culvert inlets and outlets as needed. Report any damaged culverts to the Fire Suppression Repair Specialist for specific repair guidance. Breach berms, where appropriate, to facilitate drainage.

Firelines: Break apart dozer piles of pushed over trees, vegetation and soil, and spread along tractor roads, tractor fire breaks, or any other areas disturbed during fire suppression activities. Lop and scatter displaced vegetation to a height of less than 30 inches or chip within 100' of a public or unlocked private road or structure. Scatter the lopped material along the fire line. Pull back any excess soil material sidecast along roads or tractor disturbed areas that are located within 100 feet of any watercourse or spring. Install waterbreaks on all constructed or used dozer lines using the following criteria:

Fireline and road gradient(%) oak woodland:	0-10	11-25	26-50	>50
Fireline waterbreak spacing:	150'	100'	75'	50'
Road waterbreak spacing:	300'	200'	150'	100'
Fireline and road gradient(%) Timber	:0-10	11-25	26-50	>50
Fireline waterbreak spacing:	100'	75'	50'	25'
Road waterbreak spacing:	200'	150'	100'	75'

Waterbreaks and/or rolling dips shall be used to reduce the volume and velocity of water by directing it off fire lines as soon as possible at controlled locations. The outfall end of all waterbreaks shall be opened by hand if necessary. Waterbreaks should be located to discharge into natural vegetation. Waterbreaks should cross the fire line at an angle of approximately 45 degrees.

Handlines: Install waterbreaks as needed based on slope and soil erodibility.

All waterbreaks shall be installed diagonally with a minimum cut of 6" into existing grade, and minimum height of 12". Waterbreaks shall be constructed to allow for drainage at the discharge end into non-erodible material.

Slash Piles: Piles within 150' of permanent structures or public roads will be lopped and/or scattered within 18" of the soil surface.

Piles along roads and fences: Lop to fire protection standards to ensure decreased fire risk is obtained. Scatter smaller debris where applicable.

Watercourse Crossings: All slash, soil, and debris deposited into watercourses resulting from fire suppression activities shall be removed and stabilized above the high-water line.

Major watercourse damage, if present, shall be reported to the Fire Suppression Repair Specialist prior to the end of the shift day.

Where fire lines are constructed within 100' of flowing watercourses, slash or straw mulching will be applied. All loose soil must be pulled away from the watercourse and stabilized.

Archaeological or Historic Sites: All potential sites shall be avoided. Contact Incident Archaeologist or the Suppression Repair Specialist.

TRAINING SPECIALIST

CHECK-IN

A Training Specialist is available for trainees on the incident.

All State, Federal and local government agency Trainees working on Position Task Books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

Dennis Martin
Training Specialist
(707) 479-8421

Register using the QR Code

Trainee Check-Out

If you would like to CHECK-OUT / CLOSE OUT your packet with the Training Specialist, please scan the QR code, fill in "ALL" information and "click" submit.

Your completed packet will be emailed back to you

If you have any questions or concerns, please feel free to contact me.

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications
