WEATHER DISCUSSION: ...RED FLAG WARNING IN EFFECT THROUGH TUESDAY MORNING FOR DRY THUNDERSTORMS AND GUSTY OUTFLOW WINDS...

The remnants of former Hurricane Genevieve off the Baja Coast will bring up moisture Sunday through Monday into the California Coast, bringing dry thunderstorms and gusty outflow winds to the region. The best chances for thunderstorms over the CZU Lightning Complex will be late today into early Monday morning. Even though there is a 50-50 chance that a storm will directly hit the fire, the impacts could be potentially severe. In addition to abundant lightning, gusty outflow winds up to 60 mph are possible if a storm directly hits the fire area, especially in the upper elevations. Little to no rainfall is expected. This is a similar event to what happened this past week that started the wildfires across northern California.

WEATHER FORECAST SUNDAY: ...THUNDERSTORM CHANCES INCREASING TODAY...

WEATHER: Mostly sunny with heavy smoke. Some coastal fog possible in the morning. Slight chance of dry thunderstorms mainly in the afternoon. (20% chance of direct hit) **LAL: 2 CWR 5%**

WEATHER SUMMARY

RED FLAG WARNING IN EFFECT FOR THUNDERSTORMS AND OUTFLOW WINDS!!

Fuel conditions are prime for new starts from the lightning
Review the IMET forecast for specific details

OUTPUTS

FIRE BEHAVIOR

GENERAL: The fire is burning in heavy timber mix of Hardwoods and Coastal Redwoods along with thick litter and some intermixed grass and brush. The region is experiencing moderate to severe drought with rainfall for the area at about 50% of average. The fire continues to resist control efforts due to the prolonged drying and depth of fuel beds. Fuel moistures in the brush are at critical levels, and the 100 hour and 1000 hour fuels moistures are around 7%. Heavy dead down fuels will be consumed near 100% leaving deep seated heat in ash pits.

With the shift in winds, the fire behavior may increase on the south aspects of the drainages and slopes within Branch 2 and Branch 9.

SPECIFIC:

Below 1500 foot elevation: The marine layer will be over the fire for these areas for most of the shift. This marine layer has limited moisture except directly nearest the coast. This moisture has had little effect on the heavier fuels and thick duff layer. The fuels conditions continue to allow for fire spread at a steady pace. Probability of ignition is 50%

Above 1500 foot elevation: The upper elevations of the fire have remained dry for the past 6 days and have burned with active flanking and backing, roll out and slope driven runs. Single and group tree torching is possible, with the spotting potential at ½ to 1 mile. Expect this to continue for the entire shift, with the potential of increased activity due to predicted thunderstorms and lowering humidity levels through the night. Probability of ignition is 85%

AIR OPERATIONS: limited air operations due to smoke and marine layer. Best chances for clear air will be on the west and southwest portions of the fire.

Sunset: 19:49 Sunrise: 06:32

SAFETY

- Outflow winds can rapidly increase fire behavior and cause widowmakers and snags to fall with little warning!
- Fire in drainages can dislodge rolling objects and firebrands.
- Identify safety zones early before predicted thunderstorms occur

Safety Alert

Thunderstorm Safety

Approaching thunderstorms may be noted by a sudden reverse in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature. Rain, hail, and lightning occur only in the mature stage of a thunderstorm.

Situational Awareness

Observe the 30/30 rule: If you see lightning and hear the thunderclaps following in less than 30 seconds take the storm precautions identified below. Do not resume work in exposed areas until 30 minutes after storm activity has passed.

Hazard Control

- Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines and other elevated conductive objects. Make sure the place you pick is not subject to flooding.
- If in the woods, move to an area with shorter trees.
- If only isolated trees are nearby, keep your distance twice the tree height.
- If in open county, crouch low with feet together, minimizing contact with the ground. You can use a pack to sit on, but never lay on the ground.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together.
- Don't stay on ridge tops, wide open areas, or near ledges or rock outcroppings.
- Don't operate landlines telephones, machinery, or electric motors.
- Don't handle flammable materials in open containers or metal hand tools.

CZU LIGHTNING COMPLEX INCIDENT PEER SUPPORT

Watch for the signs and symptoms of stress in yourself and the people around you. Many of us are here, away from our families and kindness towards each other is key. Try and stay positive and get much needed rest when you can. We can do this, together!

Stay Healthy, Stay Alert and Stay Strong!

In addition to peer support, if there is a need, we can have a culturally competent Clinician available that could meet with you on an individual and/or group basis. You may not be experiencing these symptoms now. However, you may find yourself experiencing them when you return to your home or Unit.

If you find yourself in this situation and need to talk to someone, please contact Employee Support Services.

DEMOBILIZATION MESSAGE

**CZU Lightning
CA-CZU-005205**

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

STATUS	
Incident Start Date: 8/16/2020	Incident Start Time: 3:15 PM
Cause: Lightning	Acres:
Containment:	Total Personnel:

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well. All items left in Lost and Found will be turned over to the local CAL FIRE Santa Cruz Unit.

MAIL SERVICE – Due to the complexity of the incident, mail service will not be available.

FROM THE DESK OF DOCUMENTATION

CZU LIGHTNING
CA-CZU-005205

Who needs to turn in what?

Unit Logs (ICS-214s) are required by Strike Team Leaders and above. However, Crews, Engines and possibly other contractors working on the line or in camp, may be asked to fill them out, especially if there has been a significant event that may need to be documented, or if requested by your Supervisor.

Strike Team Leaders only submit one 214 for your resource and not multiple Unit Logs for each engine.

Copies of the Crew Evaluations (ICS-224s) and Personnel Evaluations (ICS-225s) are sent to your home unit or business office. Therefore, it is imperative to provide the home unit or business name and address on the evaluation form.

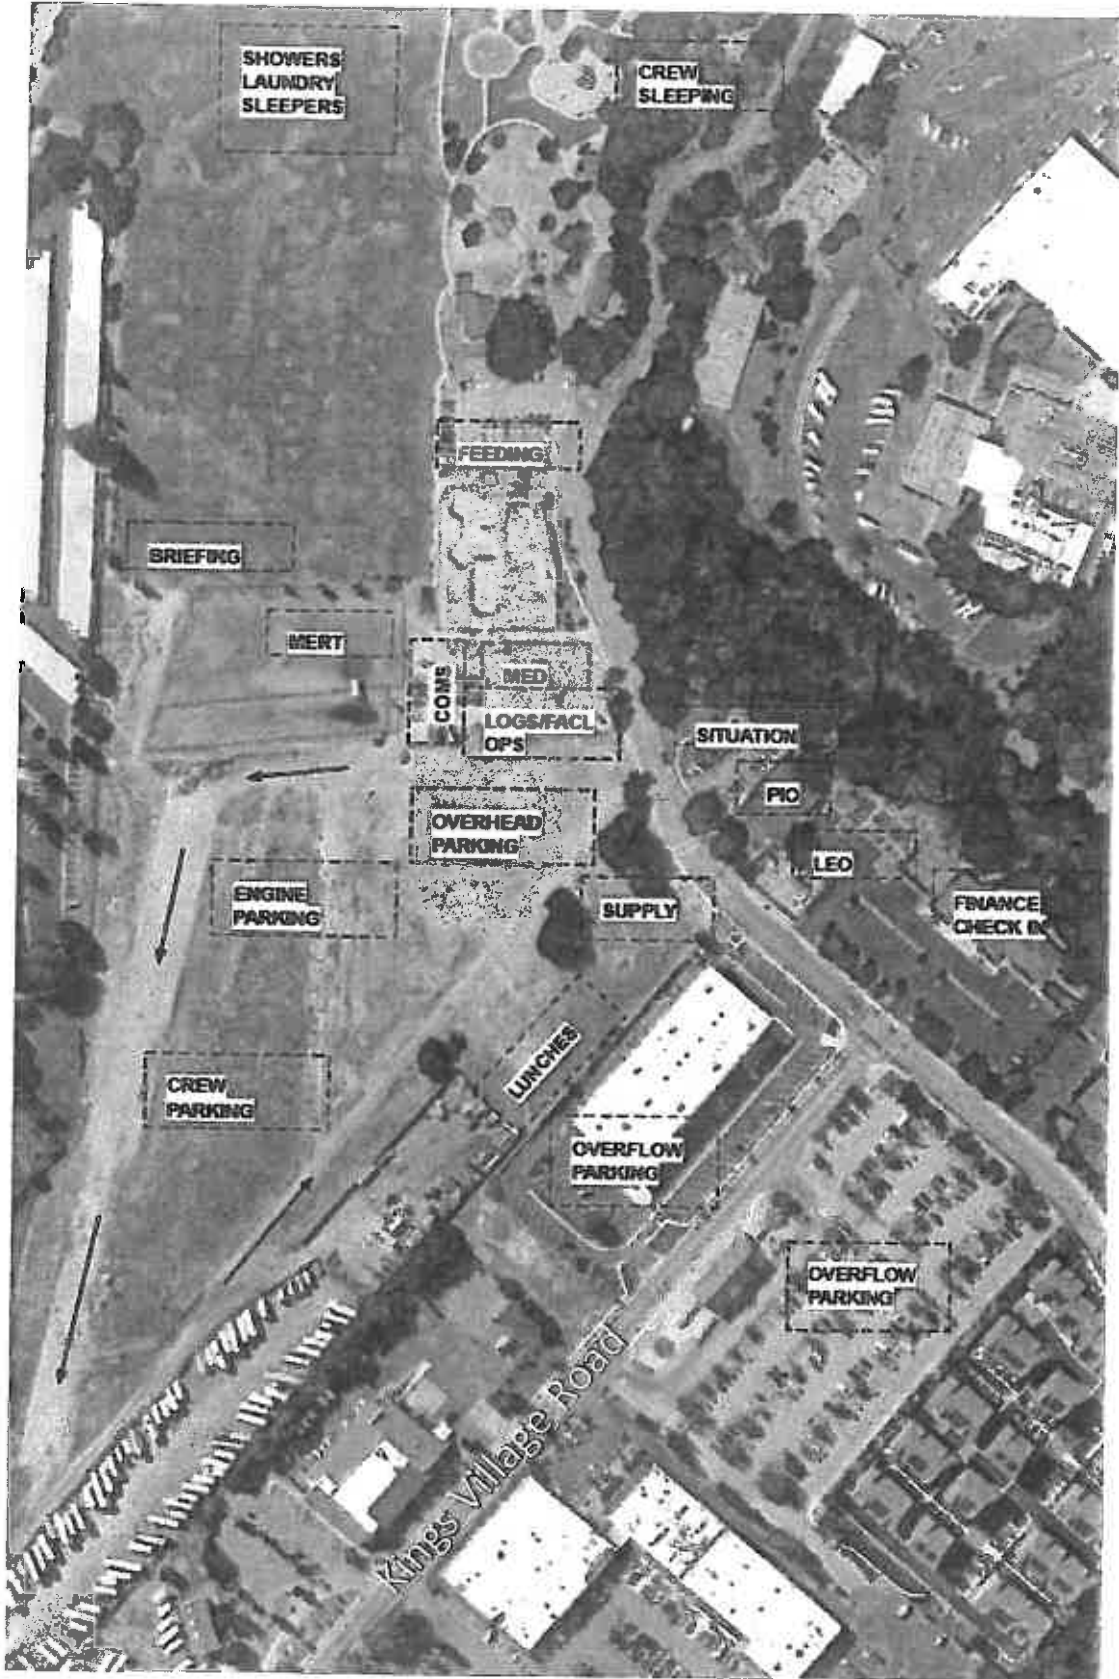

Please do not turn in documents with staples.

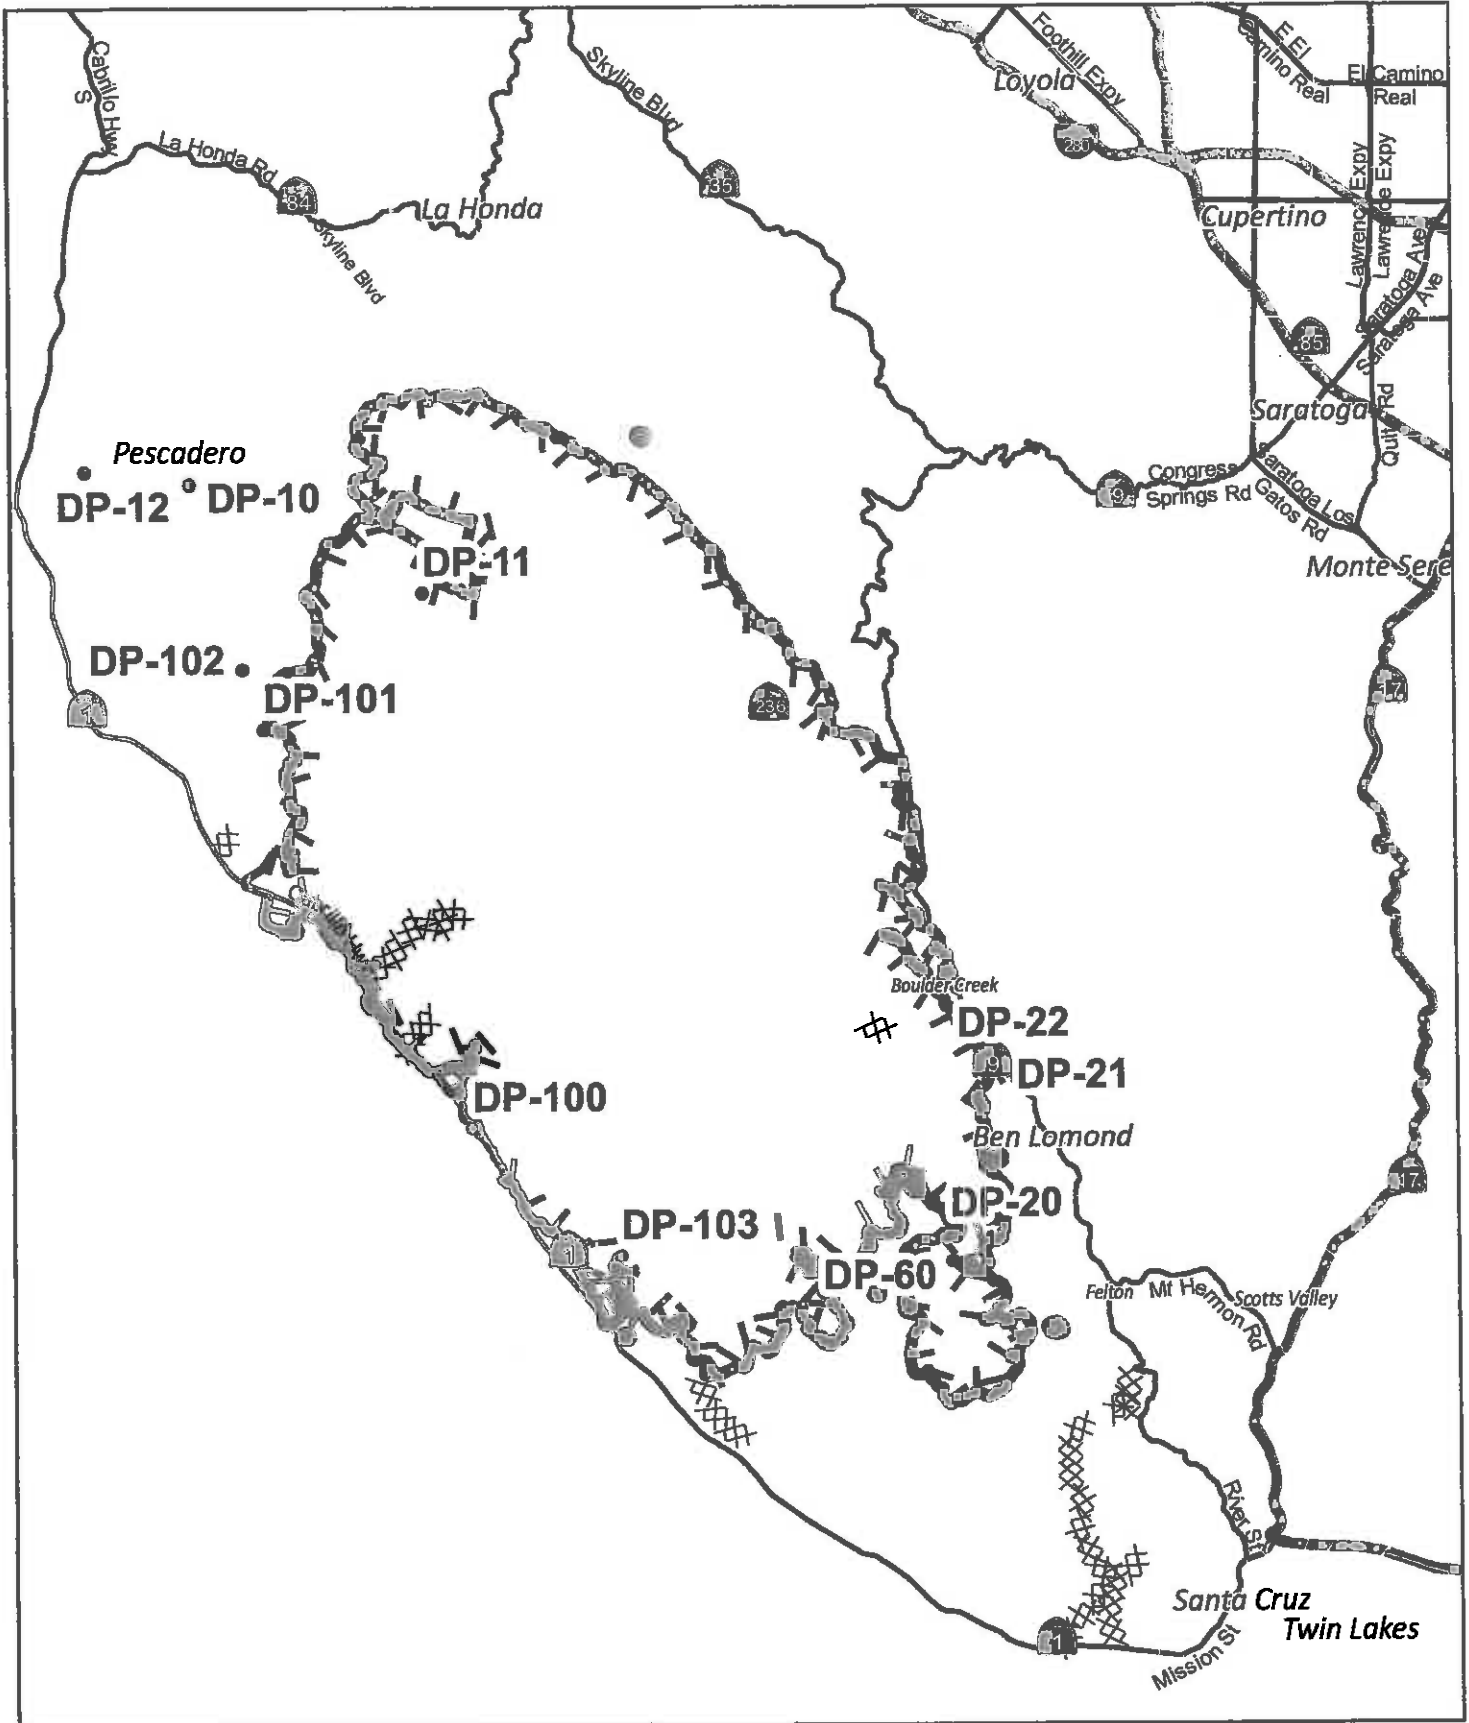

Thank you for your help and cooperation.
