FIRE BEHAVIOR FORECAST

TYPE OF FIRE: Wildfire

OPERATIONAL PERIOD: 7/22 - 7/23

INPUTS

WEATHER SUMMARY: RED FLAG WARNING IN EFFECT UNTIL 2100 PDT WEDNESDAY DUE TO THUNDERSTORM ACTIVITY AND POTENTIAL DRY LIGHTNING OVER THE FIRE AREA.

Low pressure over the area will increase the chances of thunderstorms to 35%. The potential for dry lightning exists with these storms along with strong gusty erratic outflow winds. Temperature will be slightly cooler than yesterday, 82-87° with RH values increasing, minimums at 20-25% in the afternoon. Winds will be light early becoming west at 9-14 MPH in the afternoon, except for outflow winds of 50-60 from thunderstorm activity. The inversion will clear quicker than yesterday, around 1200, increasing fire activity earlier in the day.

OUTPUTS

FIRE BEHAVIOR

GENERAL: The fire is burning in heavy timber and slash intermixed with bitterbrush, along with clear cut plots littered with moderate to heavy slash. Fuel moistures in the bitterbrush are nearing record levels, with timber fuel moistures very low due to drought conditions in the area. The fire will continue to burn actively when aligned with the wind and slope, even under the inversion.

- Timber and slash: Rates of spread 9 - 16 feet per minute, 35 - 48 feet/minute with outflow winds
Flame lengths 7-10 feet, 11-15 feet with outflow winds
Spotting ¼ to ½ mile, with 1 ½ mile possible during outflow winds
- Brush: Rates of spread 13-15 feet per minute, 80-90 feet per minute with outflow winds
Flame lengths 4-5 feet, 9-11 feet with outflow winds
Spotting up to ½ mile, up to 1 mile with outflow winds
- Probability of Ignition 98%

SPECIFIC:

Branch I: The fire is primarily burning in the bitterbrush within the timber. Fire activity has been dictated by topography until wind increases and becomes a factor. If active thunderstorms develop, increased fire activity with short to midrange spotting is possible. Expect spotting of up to 1 mile when aligned with the wind.

Branch V: This Branch should have low to moderate fire behavior but may still experience spots from outflow winds. Holdover hot spots within the interior can be potential ember producers with enough wind.

Branch IX: This Branch has the largest variation in topography burning in a mix of bitterbrush and manzanita under the heavy timber. There has been significant fire activity when the winds align with the slope, including single and group tree torching. As the day progresses and thunderstorm activity increases, Spotting will be an issue, especially in Divisions O & Q

AIR OPERATIONS: Thick inversion will inhibit air operations until midday. Outflow winds near thunderstorms may affect flight operations

SAFETY

- Be aware of the afternoon thunderstorms that can bring wind shifts
- Fire weakened timber is starting to fall, maintain your situational awareness
- Make sure to identify escape routes and safety zones early in the shift before dark

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well. All items left in Lost and Found will be turned over to the local CAL FIRE Shasta Unit.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.
