#### \*\*\* Dry Lightning Threat: Red Flag Warning Today \*\*\*

An incoming low pressure system will result in another day of increased potential for thunderstorms today. A few storms may become strong or severe. Strong outflows with erratic and sudden wind shifts are possible with these storms along with localized areas of heavy rainfall, hail, and dry lightning strikes.

TODAY (WEDNESDAY):

\*Red Flag Warning: until 2100\*

WEATHER:

Scattered showers and thunderstorms after 1200. A hybrid mix of wet/dry

storms. A few storms could be strong or severe.

WINDS (EYE LEVEL):

West around 9 - 14 mph after 1400. Gusty and erratic winds with

outflows of up to 60 mph possible near thunderstorms in the afternoon.

MAX TEMPERATURES: MINIMUM HUMIDITY:

83 - 87°

TRANCPORT WIND:

20 - 25%

TRANSPORT WIND:

S 10 - 15 mph, shifting W 15 - 25 mph after 1700.

LAL 4 HAINES: 5

#### **TONIGHT (WEDNESDAY NIGHT):**

WEATHER:

Partly cloudy. A few lingering showers through 2000.

MIN TEMPERATURES:

48 - 53°F

MAX HUMIDITY:

55 - 60%

WINDS (EYE LEVEL):

Outflow winds diminishing, becoming downslope 2-6 mph.

LAL: 3, decreasing to 1 overnight.

HAINES: 3

THURSDAY:

WEATHER:

Smoke, partly cloudy.

WINDS (EYE LEVEL):

Upslope 3-7 mph becoming southwest 9 - 14 mph by late afternoon.

MAX TEMPERATURES: MINIMUM HUMIDITY:

79 - 84° 20 - 25%

TRANSPORT WIND:

W 15 - 20 mph.

LAL 1 HAINES: 4

INPUTS						

# WEATHER SUMMARY: RED FLAG WARNING IN EFFECT UNTIL 2100 PDT WEDNESDAY DUE TO THUNDERSTORM ACTIVITY AND POTENTIAL DRY LIGHTNING OVER THE FIRE AREA.

Low pressure over the area will increase the chances of thunderstorms to 35%. The potential for dry lightning exists with these storms along with strong gusty erratic outflow winds. Temperature will be slightly cooler than yesterday, 82-87° with RH values increasing, minimums at 20-25% in the afternoon. Winds will be light early becoming west at 9-14 MPH in the afternoon, except for outflow winds of 50-60 from thunderstorm activity. The inversion will clear quicker than yesterday, around 1200, increasing fire activity earlier in the day.

#### **OUTPUTS**

#### FIRE BEHAVIOR

**GENERAL:** The fire is burning in heavy timber and slash intermixed with bitterbrush, along with clear cut plots littered with moderate to heavy slash. Fuel moistures in the bitterbrush are nearing record levels, with timber fuel moistures very low due to drought conditions in the area. The fire will continue to burn actively when aligned with the wind and slope, even under the inversion.

- Timber and slash: Rates of spread 9 16 feet per minute, 35 48 feet/minute with outflow winds Flame lengths 7-10 feet, 11-15 feet with outflow winds Spotting ½ to ½ mile, with 1 ½ mile possible during outflow winds
- Brush: Rates of spread 13-15 feet per minute, 80-90 feet per minute with outflow winds Flame lengths 4-5 feet, 9-11 feet with outflow winds Spotting up to ½ mile, up to 1 mile with outflow winds
- Probability of Ignition 98%

#### SPECIFIC:

Branch I: The fire is primarily burning in the bitterbrush within the timber. Fire activity has been dictated by topography until wind increases and becomes an factor. If active thunderstorms develop, increased fire activity with short to midrange spotting is possible. Expect spotting of up to 1 mile when aligned with the wind.

Branch V: This Branch should have low to moderate fire behavior but may still experience spots from outflow winds. Holdover hot spots within the interior can be potential ember producers with enough wind.

Branch IX: This Branch has the largest variation in topography burning in a mix of bitterbrush and manzanita under the heavy timber. There has been significant fire activity when the winds align with the slope, including single and group tree torching. As the day progresses and thunderstorm activity increases, Spotting will be an issue, especially in Divisions O & Q

**AIR OPERATIONS:** Thick inversion will inhibit air operations until midday. Outflow winds near thunderstorms may affect flight operations

#### SAFETY

- Be aware of the afternoon thunderstorms that can bring wind shifts
- Fire weakened timber is starting to fall, maintain your situational awareness
- Make sure to identify escape routes and safety zones early in the shift before dark

# SAFETY MESSAGE

Never neglect details. When everyone's mind is dulled or distracted the leader must be doubly vigilant.

- Take all COVID 19 precautions.
- Trees are weakened due to fire activity. Look Up, Down, and Around.
- Make sure everyone gets a briefing!
- Monitor your hydration/nutrition intake and keep adequate supplies of each.
- RED FLAG WARNINGS. Thunderstorms are possible during today's operation. Be prepared to take appropriate actions.
- Drive defensively and expect the unexpected.
- · Be sure to wash hands prior to entering feeding line.

**MEDIA** – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found here.

**CAL FIRE SOCIAL MEDIA POLICY** – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy here.

PHOTOGRAPHS AND VIDEOS OF INCIDENT — We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well. All items left in Lost and Found will be turned over to the local CAL FIRE Shasta Unit.

MAIL SERVICE - The Information Section can assist you with sending and receiving mail.

# THE ADINESS TO

# MESSAGE

CAL FIRE staff; please ensure you start your eFC-33s with the Personnel Time Recorder.

Please make sure hired equipment shift tickets are completed for all private vendors and dropped off in the Time Unit by agency personnel / line supervisors only, as well as EERAs.

Please report all injuries and suppression damage to the Comp / Claims Unit, no matter how minor.

The Finance Section is located in the grass area across from briefing.

Federal and Contract resources need to check-in with the Federal Time Unit.

OES is located in the back of fairgrounds.

#### FIRING PLAN AND GO / NO GO CHECKLIST

#### **Test Firing Plan**

The size and location of the test burn will be large enough and representative of the fuels of the proposed burn area.

#### Communications:

A radio net announcement at the incident will be made prior to firing operations. This will be communicated on tactical and command nets and will identify general location of geographic area to be burned. Special frequencies may or may not be used.

#### Frequencies:

- 1. Firing Group Tactical
- 2. Air to Ground
- 3. Aerial ignition discreet frequencies:

#### Slop-overs and Escapes:

If an escape/slop-over occurs notify the Division/Group Supervisor, who will take appropriate suppression actions. The Firing Group Supervisor will evaluate whether or not to continue firing and communicate such to the Division Group Supervisor. At all times, appropriate information will be transmitted through the chain of command to the Operations Section Chief.

#### **Perimeter Firing Sequence:**

The perimeter firing will proceed as follows:

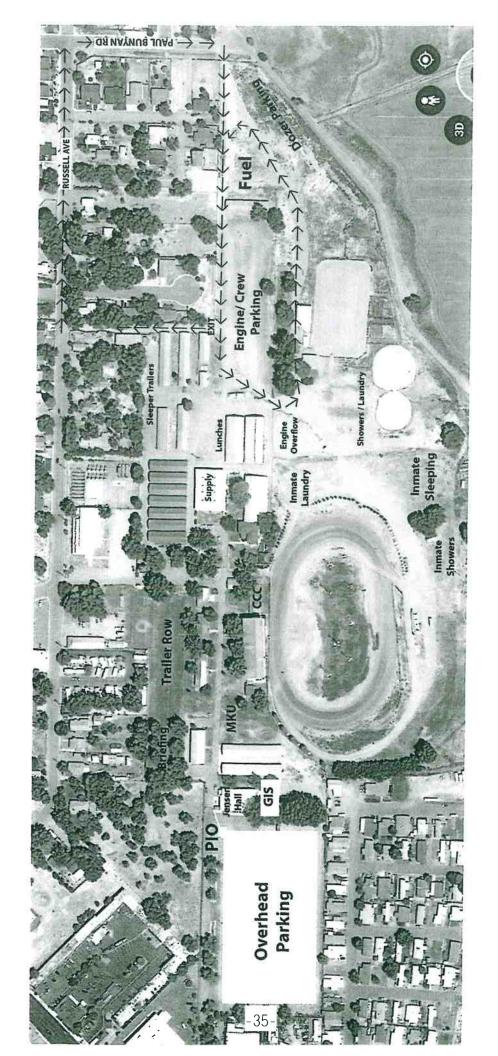

#### Conditions:
