INPUTS

WEATHER SUMMARY

Today will be the hottest day of the week, with instability starting overnight into Monday.
See IMET forecast for specific details

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- The fire is burning in heavy timber and slash intermixed with bitterbrush and Manzanita, along with clear cut plots littered with moderate to heavy slash.
- Fuel moistures in the bitterbrush are nearing record levels, and timber fuel moistures are very low due to drought conditions in the area. Fuel moistures in Manzanita are much higher, slowing fire spread
- Unburned islands and spots can burn actively when aligned with the wind and slope.

Timber and slash: Rate of spread 4-8 ft/min // Flame length 2-4 feet // Spotting 500 feet // PIG 80%

Bitterbrush: Rate of spread 9-12 ft/min // Flame lengths 6-12 feet // Spotting ¼ mile feet // PIG 85%

Manzanita: Rate of spread 4-8 ft/min // Flame lengths 2-4 ft // Spotting 200-300 feet // PIG 65%

Rates of spread can be much higher under thunderstorm outflows winds

SPECIFIC:

Branch I: Fire behavior is minimal, with hot ash pits and stump holes. Topographic features in the Susan river drainage and along Hwy 36 channel winds in various directions. Unburned islands have become active as the temperatures and winds increase; spotting potential is high in the Bitterbrush and grass in Division A

Branch V: Fire behavior is minimal but there is activity within the interior islands with the increase in wind speed and rise in temperatures. Wind will continue to blow smoke into the burn and away from control lines.

Branch IX: This Branch has the most activity as spots and unburned islands continue to become active. Southwest winds will be gusty over the upper portions of the Branch, blowing smoke over the lines. The timber understory and clear-cut plots contain heavy dead and down and have a higher probability to contain smoldering spots fires.

AIR OPERATIONS: A weak inversion and smoke from nearby fires may inhibit air operations until midmorning, but skies will clear for the rest of the day. Upper level winds will be south to southwest.

Sunrise: 05:55 Sunset: 20:23

SAFETY

- Snags and stump holes are likely in timber areas.
- Mop up should be more extensive in areas that could generate windblown embers across the line.
- Watch for afternoon / evening wind shift with thunderstorms forecasted

DEMOBILIZATION MESSAGE

Hog Incident
CA-LMU-003874

We appreciate your efforts during this incident and want to make sure that we get you to your next destination safely and efficiently. When we begin demobilization, a Tentative Demobilization List will be posted in several places around base camp, including the briefing area and the eating area. If you are on this list, please adhere to the following:

SHOW UP AT THE DESIGNATED TIME

- Show up at the designated time.
- Do not show up early.
- Do not show up late.

A demobilization schedule has been prepared in careful coordination with all essential demobilization functions. Not following the demobilization schedule can have significant negative impacts on the Demobilization Unit staff and all other resources scheduled for demobilization. We do not want you or any other resources to have unnecessary delays. Please adhere to your scheduled demobilization time.

BE PREPARED FOR A RE-ASSIGNMENT

There may be other incidents in the state that are in need of resources. There is a possibility that some of the resources released from this incident will be immediately assigned to another one. Please make sure you are properly supplied, rested, and nourished while waiting for your designated demobilization time.

BE THOROUGH AND EFFICIENT

Demobilization begins and ends at the Demobilization Unit. Please follow the instructions given to you when starting the demobilization process. Returning to the Demobilization Unit with a complete and accurate Demobilization Check-Out (ICS-221) form will help prevent any unnecessary delays and ensure you are shown as available for future assignments. Unforeseen delays can occur during the demobilization process, such as mechanical issues discovered while at Ground Support. Plan to visit the Time Unit towards the end of the demobilization process in order to provide an accurate accounting of your time.

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

CAL FIRE SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

LOST AND FOUND – The Information Section will manage lost and found items for the incident. If you have lost an item please leave your contact information and what you have lost at the Information Section. If you have found an item on the incident, bring the item to the Information Section with your contact information as well. All items left in Lost and Found will be turned over to the local CAL FIRE Shasta Unit.

MAIL SERVICE – The Information Section can assist you with sending and receiving mail.

FIRING PLAN AND GO / NO GO CHECKLIST

Test Firing Plan

The size and location of the test burn will be large enough and representative of the fuels of the proposed burn area.

Communications:

A radio net announcement at the incident will be made prior to firing operations. This will be communicated on tactical and command nets and will identify general location of geographic area to be burned. Special frequencies may or may not be used.

Frequencies:

1. Firing Group Tactical
2. Air to Ground
3. Aerial ignition discreet frequencies:

Slop-overs and Escapes:

If an escape/slop-over occurs notify the Division/Group Supervisor, who will take appropriate suppression actions. The Firing Group Supervisor will evaluate whether or not to continue firing and communicate such to the Division Group Supervisor. At all times, appropriate information will be transmitted through the chain of command to the Operations Section Chief.

Perimeter Firing Sequence:

The perimeter firing will proceed as follows:

Conditions:

Observed weather conditions: See IAP Weather Forecast
Fire Behavior Burn Index: See IAP Fire Behavior Analysis

Sequence of Firing:

1. Ignition will begin at anchor point(s)
2.
3.
4.
5.

Aerial Ignition Plan (Section 8344.5 of the CAL FIRE 8300 manual):

1. Ignition will begin at anchor point(s)
